Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast. And now the DX news compiled from 425 DX News and other sources

Lance, W7GJ will conduct a 6m EME DXpedition to Niue on from 7 to 21 September. QSL direct to his home callsign. Further information, including details on the QSO procedure that he uses is at www.bigskyspaces.com/w7gj/Niue2012.htm.

>From 7 to 21 September, Bob, ZL1RS will be active as E6RS on 2m EME. QSL via his home callsign. Further details are online at www.qsl.net/zl1rs/zk2.html.

Michael, DF8AN will operate mainly CW as FR/DF8AN from Reunion Island, which is IOTA reference AF-016, until 10 September. QSL via his home callsign.

Riccardo, IZ5JMX is active as IM0/IZ5JMX from San Pietro Island, IOTA EU-165, until 14 September. He will operate holiday style on 10 to 40 metres SSB. QSL via his home callsign, direct or via the bureau.

Now the contest news

Today, 9 September, the second 70MHz contest takes place from 0900 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

Finishing at 2359 today, the 9th, the WAE DX SSB contest has been taking place. European stations can only work non European stations for this contest. Using all contest bands from 3.5 to 28MHz, the exchange is signal report and serial number.

The 432MHz UK Activity Contest takes place from 1900 to 2130UTC on 11 September. The exchange is signal report, serial number and locator.

The 80m Club Sprint takes place on 12 September from 1900 to 2030UTC. Using SSB the exchange is both callsigns, serial number and name.

The Worked All Britain 144MHz QRO Contest takes place on Sunday 16 September from 1000 to 1400UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and also log sheets can be obtained from the WAB website www.worked-all-britain.co.uk or from the contest manager G3XKT, e-mail aebbooks@ntlworld.com.

Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast. And now the solar factual data for the period from Friday the 31st of August to Thursday the 6th of September, compiled by Neil Clarke on Friday the 7th of September.

Considering there were two large and magnetically complex groups visible, they both remained relatively quiet and only produced numerous C class solar flares except for a single M1 solar flare on the 6th. Solar flux levels increased to 146 units on the 1st but then gradually declined to 128 by the 6th. The average was 137 units. The 90 day solar flux average on the 6th remained unchanged from the previous week at 124 units. X-ray flux levels declined from B9.8 units on the 1st to B4.4 by the 6th and the average was B6.9 units. Geomagnetic activity started at quiet levels on the 31st with an Ap index of only 3 units but by the 3rd activity increased to peak at 40 units. This was in response to a coronal mass ejection that departed the Sun on the 31st. Just as that storm was declining a coronal hole disturbance arrived which allowed geomagnetic activity to continue to the end of the period. The average was Ap 20 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 290 kilometres per second to peak at 590 by the 5th. Particle densities increased to 54 particles per cubic centimetre on the 3rd and remained elevated at around 20 particles per cubic centimetre till the 6th. Bz varied between minus 3 and plus 2 nanoTeslas on the quietest day and between minus 23 and plus 15 nanoTeslas on the 3rd. A good week for many VHF/UHF operators, with a stable high pressure system producing extended tropo propagation on 144MHz and above, particularly towards France, Germany and Spain. Also, disturbed geomagnetic levels on the 3rd resulted in auroral propagation on 6 and 2 metres lasting some twelve hours and, at its peak, extending down to central England.

And finally the solar forecast from Sunday the 9th of September. This week the quiet side of the Sun is expected to rotate into view, therefore, solar activity should be low with only C class solar flares taking place. Solar flux levels are expected to decline and be in the 90's later in the week. Geomagnetic activity should be quiet until later in the week, when a small recurring coronal hole is expected to arrive and last into the weekend. MUFs during daylight hours at equal latitudes should be around 24MHz for the south and 21MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to India should have a maximum usable frequency with a 50 per cent success rate

will be around 23MHz. The optimum working frequency with a 90 per cent success rate is expected to be 18MHz. The best time to try this path will be between 1100 and 1600 hours.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB

website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Friskney and East Lincolnshire Communications Club is running its radio rally and sale at Friskney Village Hall, Church Road, Friskney, PE22 8RR from 9am today. There's a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is a club net via GB3FR. Contact the FELCC Information Line on 07554 362 020.

Lincoln Short-Wave Club is taking part in the Second 70MHz Contest today. Wednesday sees the 80m Club Sprint and a natter night. Next weekend there's the Saturday surgery in the shack from 0900. For more information contact Pam Rose, G4STO, on 01427 788 356.

Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. Tuesday sees a pre-AGM committee meeting, and there's a social evening in the shack on Friday. Next weekend's special event station at Stoke Prior Steam Rally starts on Saturday. Details from Chris, G0EYO, on 07710 412 819.

Central Radio Amateur Circle is running an Intermediate course via Skype on Tuesday. On Thursday there's a night on the air on 145.300MHz from 20:00. Friday sees the start of the 3-day Transmission 2012 BWFB event, and next Saturday there's the weekend event at the Black Country Boating Festival. Details from Martin Hallard, G1TYV, by email to radio- circle@live.co.uk.

South Kesteven Amateur Radio Society is having a club net on 145.525MHz from 2000 BST on Wednesday. Next Sunday they are attending the Fire Station open day and operating GB0FRS. Contact Nigel, M0CVO, on 01476 402 550.

South Birmingham Radio Society has training classes with Dave Murphy, G8OWL on Thursday, then shack and aerial work on Friday. Contact Don, on 01214 581 603.

Now we return to the traditional listing in date order. On Monday Gloucester Amateur Radio & Electronics Society is holding its AGM. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday Sutton Coldfield Amateur Radio Society is having a talk on ATUs by Bob, G3PLP, with graphics and visual aids prepared by Mike, M0AZE. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Eagle Radio Group is having a talk on gas pipelines by Anne Gilberthorpe. Contact John, M6JMS, on 01754 873 926.

On Tuesday Loughborough & District Amateur Radio Club is holding an open forum, with topics chosen on the night. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is holding a committee meeting and training classes. Details from Norman, G8BHE, on 07808 078 003.

Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast. On Wednesday Telford & District Amateur Radio Society is having a debriefing on Hamfest, SOTA & /P events. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Salop Amateur Radio Society has its construction contest. Details on the web at www.salop-ars.org.uk.

On Thursday Tamworth Amateur Radio Society is having a talk by Chris Maxwell on aerials, SWR and the ATU. Contact Darren, by email to secretary@tars.es.

On Friday Bromsgrove & District Amateur Radio Club is having a VHF night. Contact Chris, M0BQE on 01905 776 869.

On Friday Coventry Amateur Radio Society has the 4th round of the G2FDC Trophy. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND On Monday Angel of the North Amateur Radio Club is having a talk on UHF and wind farms at by Ed Aksamit. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is having a talk on operating caravan portable by David Littlewood, G6DCT. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group is having a social evening. For more information contact Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday Chester & District Radio Society is holding a committee meeting. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Morecambe Bay Amateur Radio Society is having a radio doctor night with Bob, G3VVT. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is having a night on the air on 145.575MHz from 7.30. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday South Lancashire Amateur Radio Club is having a talk on HF bicycle and pedestrian mobile by Dave Starkie, G4AKC. This presentation is open to non members. Contact Allan Green, 2E0RAG, on 07533 970 841.

On Thursday South Manchester Radio and Computer Club is having a talk on digital modes by Terry, G6CRF. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is having a radio magazines evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Lothians Radio Society is having a talk on amateur radio in Japan by Vic, JA5VQ. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Farnborough & District Radio Society is running a Top Band net on 1.995MHz from 8pm on Monday. On Wednesday there is a talk on bygone days by Collin, G8BCO, 7.30 for 8.00pm. Friday sees a 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

On Friday 14 September Radio Society of Harrow is having a surplus equipment sale on Friday. Saturday sees GX3EFX/P at Pinner Village Fair. More information from Linda, G7RJL, on 02083 868 586.

Now we return to the traditional listing in date order.

On Monday Braintree & District Amateur Radio Society has a 2m club net. For more information contact John, M5AJB, on 01787 460 947.

On Monday Coulsdon Amateur Transmitting Society is having a construction evening with Dave, G8VXB. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org.

On Monday West Kent Amateur Radio Society has its club construction challenge, led by Richard, G8CDD. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Harwell Amateur Radio Society is having a natter night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday South Essex Amateur Radio Society has a talk by Dave, G4UVJ, asking what is amateur radio?. Contact Dave, G4UVJ, on 01268 697 978.

On Tuesday Stevenage & District Amateur Radio Society is having an operating night. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday Chesham & District Amateur Radio Society is holding a members forum - bring along your radio equipment. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Darenth Valley Radio Society Radio is on the air and is having a natter night. Contact Bob, M0RAW, on 01322 663 804.

On Wednesday Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday Norfolk Amateur Radio Club is having a talk by Mark Haynes, M0DXR, on the FT5XO Kerguelen DXpedition - the DX trip with a bit of everything. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday Southgate Amateur Radio Club is having a natter night. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday Worthing & District Amateur Radio Club is having a discussion evening and taking part in the 80m SSB Sprint contest. Contact John, G8FMJ, on 01273 593 232.

On Thursday Bredhurst Receiving and Transmitting Society is holding a club night with CW practice from 8.30 -9pm. Details from Charles, G4VSZ, on 07982 244 788.

On Thursday Edgware & District Radio Society is having a talk on how to spend a Tuesday evening getting involved with a short contest run by the RSGB. More information from Mike, G4RNW, on 02089 500 658.

On Thursday Huntingdonshire Amateur Radio Society is announcing the results of its annual rally. Contact David Leech, G7DIU, on 01480 431 333.

Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast. On Thursday Reading & District Amateur Radio Club is having a talk on liquified natural gas by John Turner. Details from Pete, G8FRC, on 01189 695 697.

On Thursday Shefford & District Amateur Radio Society asks members to discuss what they did in the holidays. Details from John Burnett,

M6JBU, on 07860 804 793.

On Thursday Vange Amateur Radio Society is watching a DVD. Contact Steve, G0KVZ, on 01268 552 606.

On Thursday Verulam Amateur Radio Club is having a social evening with the GB3VH repeater group from 7.30pm at the Rose and Crown, Sandridge. Contact Ralph, G1BSZ, on 01923 265 572.

On Friday Cambridge & District Amateur Radio Club is holding a junk sale. Contact Ron, G3KBR, on 01223 501 712.

On Friday Itchen Valley Amateur Radio Club is having a talk on unravelling the loop by Vic, G3NVB. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society is having a radio night and testing equipment for railways weekend. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Wimbledon & District Amateur Radio Society is holding its summer camp retrospective. Contact Andrew Maish, G4ADM, on 02083 353 434.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is watching an amateur radio video at the Moose Centre on Monday at 19:00. The 2m net is on Tuesday and the 4m net on Thursday. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday Riviera Amateur Radio Club is having a portable RV. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Tuesday Plymouth Radio Club is having a talk by Chris Parker, M0ZCP on advanced repeater and Echolink use. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday South Bristol Amateur Radio Club is having a demonstration and explanation of the popular HF digital mode PSK31. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday Swindon & District Amateur Radio Club has an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday Torbay Amateur Radio Society is running an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES Blackwood Amateur Radio Society will be starting Foundation, Intermediate and Advanced courses shortly. Enrolment will be on Friday 14 September from 6.30pm at Oakdale Comprehensive School, near Blackwood, South Wales. Further details are on the web at www.gw6gw.co.uk.

On Thursday Aberystwyth & District Amateur Radio Society is having a club meeting. Details from Ray, GW7AGG, on 01970 611 853.

Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast.

1725. Weekly Highlights of Solar and Geomagnetic Activity, 03 - 09 September 2012

Highlights of Solar and Geomagnetic Activity
03 - 09 September 2012

Three M1 flares this week brought solar activity to moderate levels.
Region 1560 (N03, L=128, class/area=Eki/350 on 03 September) was the
largest and most magnetically complex (beta-gamma-delta) of the
week. It produced the first M-flare on September 6th at 0413Z before
rotating around the west limb the next day. Region 1564 (S14, L=68,
class/area=Esi/270 on 05 September) followed with a long-duration M1
event on September 8th at 1759Z and another on September 9th at
2236Z. None of the M1 flares were accompanied by significant radio
emissions, or coronal mass ejections (CMEs).

The week began with the end of an energetic particle event. The 10
MeV proton flux was above the 10 pfu threshold on September 3rd and
fell below on the 4th at 0625Z after reaching a maximum of 59 pfu
three days earlier. Later, a coronal mass ejection from beyond the
west limb was observed on September 8th, first visible in SOHO/LASCO
C2 coronagraph imagery at 1000Z. The event that produced the CME was
also believed to be responsible for a 10 MeV proton enhancement
which began around 1200Z. The peak 10 MeV flux during the
enhancement was 1 pfu.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on September 7th and 8th and at high levels on
September 9th. The remainder of the week was at background levels.

Geomagnetic activity was propelled to major storm levels this week
by the arrival of three CMEs. The first arrived at 03/1214Z when a
sudden impulse of 28 nT was observed at the Boulder magnetometer.
The disturbed geomagnetic field reached minor storm levels (Kp=5,
G1) by 03/1312Z, and major storm levels (Kp=6, G2) by 03/1500Z.
Conditions decreased to active levels for two periods before rising
again to minor storm levels at 04/0000Z. The geomagnetic field
returned to quiet to active levels until September 5th when two CMEs
```

observed on September 2nd arrived simultaneously. An interplanetary shock was observed at the ACE spacecraft at 04/2203Z. The subsequent arrival at earth caused the magnetic field to jump to major storm levels by 05/0144Z. Kp indices then decreased one level each synoptic period until reaching Kp=2 by 05/15Z. On both September 3rd and 5th, the College, AK magnetometer recorded a period of severe storm (K=7,G3) levels. A solar sector boundary change brought active conditions for one period on the 6th, but the remainder of the week was mostly quiet.

Forecast of Solar and Geomagnetic Activity
10 September - 06 October 2012

Solar activity is expected to be low with a chance for moderate activity through the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels on 10-11, 18-20 and 24-27 September.

Geomagnetic field activity is expected to be mostly quiet to unsettled. Active conditions are possible on 14-16 and 19-22 September, and again on 03-05 October associated with coronal hole high speed streams.

AMSAT President Barry Baines, WD4ASW TV Interview on HAMRADIONOW.tv

Gary Pearce, KN4AQ, producer and host of the HAMRADIONOW.tv webcasts interviewed AMSAT President Barry Baines, WD4ASW at the Shelby North Carolina Hamfest. Barry's interview provides an in-depth update on AMSAT activities and plans.

As Gary says, "So there's a lot going on at AMSAT. Exciting stuff like commanding a remote-control vehicle with instructions relayed through the ISS (think Mars Curiosity Rover)". As Barry said, "This isn't your grandfather's AMSAT anymore".

Barry discussed AMSAT's exciting projects including:

Project Fox Cubesat developmentAMSAT selection for NASA's ELaNa launch programAMSAT development of missions meeting STEM educational goalsAMSAT-ARRL-ARISS teamworkFuture opportunities in spaceHow you can join and help

Watch the 60 minute interview at HAMRADIONOW.tv, Episode 19.

While you are on the Amateur Radio Video News website please "click the pig" if you can donate to this amateur radio video series.

[ANS thanks Gary Pearce, KN4AQ and Amateur Radio Video News for the above information]

Board of Directors Ballots Due by September 15

If your ballot for the 2012 AMSAT Board of Directors election has not hit the mail yet you gotta do it today!

AMSAT Corporate Secretary Alan Biddle, WA4SCA reminds all AMSAT-NA members, "Your ballots for the 2012 Board of Directors election need to be received at AMSAT-NA headquarters by September 15th, 2012. This is one of your best opportunities to make your views on the path of our organization known."

Ballots for the 2012 AMSAT-NA Board of Directors election have been mailed to all members. Also included is biographical information about each of the candidates.

Select no more than three of the six listed candidates (in alphabetical order):

Tom Clark, K3IOSteve Coy, K8UDMark Hammond, N8MHLou McFadin, W5DIDGould Smith, WA4SXMPatrick E. Stoddard, WD9EWK

The 3 candidates receiving the most votes will become directors serving 2 year terms. The 2 receiving the next highest number of votes will be seated as alternates for 1 year terms.

You must mail your ballot back to be received at the AMSAT-NA Office no later than the close of business on September 15, 2012:

AMSAT

850 Sligo Avenue, #600

Silver Spring, MD 20910

[ANS thanks AMSAT Corporate Secretary Alan Biddle, WA4SCA for the above information]

Register On-line for the AMSAT 2012 Space Symposium

AMSAT announces that the registration for the 2012 AMSAT Space Symposium, to be held on Friday, October 26th through Sunday, October 28th is now open on-line. A mail-in option is also available those preferring this approach.

Visit the AMSAT Web Store to complete your on-line registration. Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page.

Prices for the Symposium are:

Symposium Registration including Proceedings

Through September 23, 2012: $ 45.00Starting September 24, 2012: $ 50.00At the Door: $ 55.00
Saturday Evening Banquet $ 45.00Sunday Morning Area Coordinators☐ Breakfast $ 15.00Monday (Oct 29) bus trip to KSC and entrance ticket $ 100.00

The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

The Symposium Hotel is the Holiday Inn at Orlando-International Airport is located one mile from the Orlando International Airport (MCO). The AMSAT discount rate is $99 + taxes per night. The reservation block code used when calling the hotel directly is AMT.

The hotel telephone number is 407-851-6400. The Symposium Committee recommends you make reservations by calling the hotel directly rather than through the Web. Cutoff date for reservations is Oct 6, 2012. Additional information is available on the hotel web page. The hotel offers free Internet connection and free airport shuttle.

When you arrive at the Orlando Airport call 407-709-5310 to request the shuttle.

The Orlando International Airport (MCO) is the closest to the Symposium and is served by most major air carriers. The hotel address is: 5750 T.G. Lee Blvd ☐ Orlando, FL 32822. A map link is included on the hotel web page.

[ANS thanks the 2012 Symposium Committee for the above information]

Final Call - AMSAT 2012 Space Symposium Papers Due October 1

Symposium Proceedings Editor, Dan Schultz, N8FGV reminds authors the final copy of your paper for the 2012 Space Symposium is due by October 1, 2012. Dan requests a tentative title of your presentation as soon as possible, with final copy to be by October 1 for inclusion in the printed proceedings. Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv at amsat.org

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

The Symposium Committee still has prime slots available on the speaker's schedule. The AMSAT Symposium depends on YOU to make it happen, without speakers there is no Symposium.

Please consider doing a presentation, even if you have never done so in the past. We are especially interested in papers and presentations involving our educational partnerships with K-12 and university level classrooms. Education is quickly becoming critical for our future rides to space.

[ANS thanks 2012 Symposium Proceedings Editor Dan Schultz, N8FGV for the above information]

Israeli Students Developing Duchifat-1 145.825 MHz APRS CubeSat

The SpaceDuchifat-1 is an experimental and educational CubeSat developed and built by young Israeli students at the Space Laboratory of the Herzliya Science Centre (HSC). The project is directed by Dr. Ana Heller with support from the Herzliya city municipality and the Israeli Amateur Radio Club.

The CubeSat will carry an APRS digipeater operating on 145.825 MHz and a UHF/VHF 1200 bps BPSK transceiver that can provide a CW beacon and an FM to DSB transponder.

The main mission of the satellite is to transmit real-time information via radio amateur packets from a Low Earth Orbit (LEO) using the Automatic Position Reporting System (APRS) protocol. Duchifat-1 will allow remote travelers to access the satellite for worldwide position/status reporting and messaging even in the case of using

simple handheld or mobile radios with Omni-directional whip antennas.

Due to the lack of APRS digipeating coverage on the 145.825 MHz frequency remote travelers, ships at sea, and stations in many parts of the world are presently unable to use the APRS system. The Duchifat-1 satellite will augment the existing worldwide terrestrial Amateur Radio APRS by adding LEO satellite coverage along with the International Space Station APRS digipeater.

Real-time position reporting uses the Global Positioning System (GPS) of the groundstation and will allow transmission of a wide variety of data including short text messages and telemetry data. The reports will be combined with a computer and mapping software to display the data superimposed on maps at a HSC Ground Station.

No launch or orbit details are presently available.

[ANS thanks HSL Space Laboratory at the Herzliya Science Center in Israel for the above information]

Astronaut EVA Activity Delays ISS CubeSat Deployment Schedule

A critical EVA was conducted at the International Space Station on Wednesday, September 5 by Astronauts Sunita Williams (KD5PLB) and Akihiko Hoshide (KE5DNI) to complete the installation of a spare power unit on the station's truss, which caused problems during an August 30 spacewalk.

During the August 30 EVA Williams and Hoside spent 8 hours and 17 minutes in space, but failed to install a new Main Bus Switching Unit (MBSU) on the station's s-zero truss as they had difficulties driving the bolts to secure the equipment. The MBSU is a heavy component that is used to relay power from the station's solar arrays to its systems.

This additional EVA activity drove schedule changes in which JAXA announced that the deployment of five CubeSats from the ISS planned for September 10 has been postponed. A new deployment date has not yet been announced.

Four of the CubeSats carry Amateur Radio payloads, they are F-1, FITSAT-1, WE-WISH and TechEdSat. Please refer to ANS-197 for the detailed list of CubeSat radio frequencies and operating modes.

The CubeSats are mounted in a JEM-Small Satellite Orbital Deployer (J-SSOD). In one pod are FITSAT-1, TechEdSat and F-1 and in the second pod is WeWish and a scientific 2U CubeSat RAIKO. Japanese astronaut Akihiko Hoshide KE5DNI will use the ISS Kibo robot arm to deploy the pods as demonstrated in this YouTube video.

ELaNa Cubesats to Launch From Vandenberg September 13 - Thursday!

The Atlas V NROL-36 launch from Vandenberg Air Force Base in California, originally planned for August is now ready for launch on September 13. Liftoff is planned during a period between 1:45 and 4:15 p.m. local PDT (4:45-7:15 p.m. EDT; 2045-2315 GMT).

This launch will be carrying a pair of ocean surveillance satellites to locate ships at sea. Also aboard this flight at four cubesats as part of ELaNa IV mission and seven cubesats for government missions.

The ELaNa Cubesats aboard are:

CINEMA (Cubesat for Ion, Neutral, Electron, Magnetic fields)

Downlinks for engineering telemetry and command are in the 2400-2450 MHz range; Science telemetry is in 2200-2300 MHz range.
CSSWE (Colorado Student Space Weather Experiment)

Downlink 437.345 MHz, 9k6 with AX25
CP5 (PolySat)

Downlink 437.405 MHz at 1 watt, AFSK on LSB AX.25 over NRZI at 1200 baud, every 2 minutes, begins 3.5 hours after first turn-on.
CXBN (Cosmic X-Ray Background Nanosatellite)

Downlink 437.525 MHz, GFSK, AX.25

The US Government Satellites aboard are:

+ Aeneas

First cubesat to deploy 2.4 GHz Dish Antenna. WIFI transmitter will transmit on 2425.0 MHz with 1 watt of output power.Downlink 437.600 MHz AX25 1200 bps beacon every 10 seconds and spread spectrum two-way link elsewhere in the 70cm band.Will test a 20-inch mesh antenna to track electronic tags on shipping containers in the open ocean.
+ ORSES (ORS Enabler Satellite)+ Horus+ Re

Will be used for the optical tracking of space debris
+ Aerocube 4A, 4B, 4C

Testing deployable solar panels.Technology demonstration of □parachute-like□ devices to deorbit satellites. Testing closed-loop attitude control system based around a three-axis gyroscope.

A discussion of the launch re-scheduling can be found on NASASpaceFlightNow.com. A detailed article of the launch can be found on AmericaSpace.org. Please refer to ANS-211 for mission summaries and satellite team web pages.

AMSAT Store Grand Reopening

The AMSAT Store is fully open for business after being updated. All the usual AMSAT software, hardware, and clothing are available, as is the registration for the AMSAT 2012 Symposium and activities. Please stop by, even if you are just looking.

You can also find a link to the AMSAT Store from the AMSAT web page. It is the bottom button on the list on the

left side of the main page.

If you don't find what you are looking for here, contact Martha at the main office:

E-mail at martha@amsat.orgFrom the US call toll free at (888) 322-6728From all other locations call (301) 589-6062Fax (301) 608-3410Regular mail: AMSAT, 850 Sligo Ave. Suite 600, Silver Spring, MD 20910

[ANS thanks Alan Biddle, WA4SCA for tha above information]

Successful ARISS Contacts With Germany, Japan, and Maryland

Astronaut Akihiko Hoshide, KE5DNI participated in two ARISS (Amateur Radio on the International Space Station) contacts over the past week. He spoke with students attending Megina Gymnasium Mayen in Mayen, Germany on Friday, August 31 and with youth from the Iruma Junior Ham Club in Iruma, Japan on Sunday, September 2.

Sunita Williams, KD5PLB picked up a third ARISS contact with the National Electronics Museum in Linthicum, Maryland on Saturday, September 1. The radio contacts were integrated into comprehensive science and math lessons.

[ANS thanks Carol Jackson, KB3LKI, for the above information]

September 9 Launch From India Planned for Japan PROITERES Satellite

The Japanese amateur radio satellite PROITERES is planned to launch Sunday, September 9 at 0421 UT from the Indian Space Research Organisation (ISRO) Satish Dhawan space centre. The satellites SPOT6 and mRESINS will be on the same launch into a 695 km × 695 km, 98.2° inclination orbit.

PROITERES was built by a team of students and faculty members of Osaka Institute of Technology (OIT) and the spacecraft aims to demonstrate powered flight using a Pulsed Plasma Thruster (PPT) engine. Its amateur radio callsign is JL3YZK.

PROITERES stands for PRoject of OIT Electric-Rocket-Engine Onboard Small Space Ship and will transmit on 437.485 MHz FM/AFSK. The spacecraft carries a camera and the two CPU□s run the Linux operating system.

PROITERES, Osaka Institute of Technology, Japan

Launch : 9 Sep 2012 4:21UTC (9:51IST)Vehicle: PSLV-CA with SPOT6 and mRESINSSite : Satish Dhawan Space Centre, Sriharikota, India 30cm^3, 10kg, 10W, 437.485MHz FM/AFSK

The PROITERES Google English website contains the most up-to-date information. There is also an English language website. Watch a video showing ISRO launch prepartion for PROITERES.

[ANS thanks Mineo Wakita, JE9PEL and AMSAT-UK for the above information]

Help Wanted: AMSAT News Service Rotating Editor Positions Available

The AMSAT News Service (ANS) is responsible for researching, writing, editing, and publishing the weekly amateur satellite news bulletins.

After the passing of Dee, NB2F, we currently have a two editors who take a turn weekly to publish the bulletins. With the addition of a volunteer, or two, this would generally involve taking a turn about every 3 to 4 weeks.

At present we a looking for interested satellite enthusiasts to join the ANS editorial team. Professional writing/editing experience is NOT a requirement. Your interest and enthusiasm in following and reporting on amateur radio in space will get you started! The ANS Editor team helps each other by rounding up items of interest. Plus we receive submitted items for

publication ... so you won't be left all alone!

If you can commit to working on the bulletins for a week on a rotating basis please reply via e-mail to AMSAT News Service Editor JoAnne Maenpaa, K9JKM via k9jkm at amsat.org.

[ANS thanks AMSAT Vice-President User Services, Gould Smith, WA4SXM for the above information]

Satellite Shorts From All Over

Listen for Tom Deeble, KA6SIP operating on FO-29, SO-50, and AO-27 satellites from the north shore of Kauai in the Hawaiian Islands. Tom is running a dual FT-817 setup with an Arrow antenna and ARR 440 preamp. Since this is a family trip he will try to operate on satellites in his spare time. He will be on Kauai until Friday, September 14.Plan ahead! Scouting's Jamboree on the Air is coming up the weekend of October 20. If you know of local scout groups latch on to them and hopefully let's make the satellites come alive with Scout to Scout contacts. It may end up being the high point for many of the Scouts involved with JOTA. (Tom Schuessler, N5HYP)Congratulations Bob Bruninga, WB4APR as the ARRL announced him as the winner of the August QST Cover Plaque award. Bob's article is ☐Rethinking Electrical Power for the Ham.☐ The QST Cover Plaque award is given to the author or authors of the best article in each issue of QST Magazine and is determined by a vote of ARRL members. (ARRL)Enjoy a simulated flyover of the most intriguing landmarks on giant asteroid Vesta, as seen by NASA's Dawn spacecraft.Congratulations to Hector, CO6CBF on his successful amateur radio and satellite demonstration in the town's central park at Aguada de Pasajeros, Cuba. Hector reports 21 stations were worked on 3 satellite passes. He was also able to demonstrate receiving the contact between the ISS and K3CUJ at the National Electronics Museum in Linthicum, MD. His gear includes a mobile 2m FM radio with a homebrew 70cm/2m down converter for receive, a 2M Kenwood TK-270 HT for transmit. He operates with the HT in one hand and his homebrew Arrow Antenna with a homebrew preamplifier in the other hand.Earth-Mars-Earth Radio Message Received by Curiosity Controllers Utilizing the radio relay capability of the Mars Science Laboratory Curiosity Rover on the surface of Mars, an international network of telecommunications relay orbiters around Mars and NASA's Deep Space Network (DSN) voice playback of NASA Administrator Charles Bolden's message to JPL's Mars mission crew was played for the team on August, 27, 2012. The video and audio of the relayed message are available from NASA.AMSAT Commemorative Shirt for the 2012 Symposium is only available by mail order. If you have not received a copy of the order form you can download and print a copy from the the link on the AMSAT Web Page. The deadline for receiving your mail order is September 21, 2012.The next Hudson Valley Satcom net dates are Thursday, September 13, and September 27, 8 PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). An echolink connection is available on the N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)YouTube Space Lab Live Broadcast of Space Experiments: NASA has partnered with Space Adventures and YouTube on

a global competition that challenged 14-18 year old students to design a science experiment to be performed in space. The winning experiments were conducted aboard the International Space Station, or ISS, and the results will be revealed live on YouTube. Of the 2,000 experiment ideas received from students in over 80 countries, only two were chosen to fly to space. The live broadcast can be seen on September 13, 2012, at 10:30 a.m. EDT (UTC-4).NASA's Digital Learning Network, or DLN, is hosting a special event on September 17, 2012, at 1 p.m. EDT to commemorate the departure of space shuttle Endeavour. Watch the live webstream from NASA's Kennedy Space Center in Florida as space shuttle Endeavour continues her journey on the back of the Shuttle Carrier Aircraft, a modified 747, to its final destination at the California Science Center in the heart of Los Angeles.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind if you give a man a fish, he will eat today ... Promise a man a million fish, he will contribute heap big wampum to your tribal election campaign fund.

Hams -- File Written Testimony on HOA Restrictions!!

Posted: 09 Sep 2012 01:52 PM PDT
http://forums.qrz.com/showthread.php?360922-Hams-File-Written-Testimony-on-HOA-Restrictions!!&goto=newpost

On Wednesday, September 12, Capitol Hill Hearings on "Resilient Communications" will be held before the Emergency Preparedness Subcommittee of the House Homeland Security Committee. The Subcommittee is chaired by Representative Gus Bilirakis (R-FL) and the Ranking Minority Member is Representative Laura Richardson (D-CA).

Since Amateur Radio is one of the most "resilient" of America's "resilient" communications -- a true Emergency Communications asset in a disaster or a megadisaster -- Written Testimony about ham radio survivability is relevant to these Hearings.

NICK LEGGETT N3NL of Virginia and I have already filed Written Testimony, calling for new legislation to override over-regulation of ham antennas by Homeowners' Associations (HOAs) and landlords.

Before September 12, at least 2 other parties plan to file Written Testimony that hammers home the same basic point. One of these parties is ROBERT C. BOYD, M.D. WA5VSK of Texas. (For a copy, contact "Doc" at wa5vsk@gmail.com) In addition, DON SCHELLHARDT, ESQUIRE KI4PMG of Connecticut will be filing comprehensive Written Testimony on behalf of HAMS FOR ACTION (HFA). (For a copy, contact Don at djslaw@gmail.com)

****

If you wish to write up and submit your own Written Testimony for the September 12 Hearings:

A. ATTACH the document, clearly labeled as Written Testimony, to an E-Mail. Only one copy is needed. Your cover E-Mail Message should start with "Dear Chairman Bilirakis and Ranking Minority Member Richardson:".

B. Say this, or something like this, EXPLICITLY: "I respectfully request you to place this Written Testimony into the public record for the September 12 Emergency Preparedness Subcommittee Hearings on 'Resilient Communications'."

C. Send the E-Mail to homeland.security@mail.house.gov (for Representative Gus Bilirakis, R-FL) and nicole.johnson@mail.house.gov (for Representative Laura Richardson, D-CA)

You MUST send this E-Mail. and Attached Testimony, ON OR BEFORE the day of the Hearing: Wednesday, September 12. Earlier is probably better.

On Behalf of Hams For Action,

Lee McVey

Hams Drill During State Exercise:

Posted: 09 Sep 2012 05:10 PM PDT
http://www.eham.net/articles/28956

Amateur Radio operators take part in a recent statewide emergency exercise to drill in providing emergency communications. Amateur radio operators of the Connecticut Amateur Radio Emergency Service (CT ARES) in Region 2 supported the recent four day statewide emergency exercise as they simultaneously conducted their Simulated Emergency Test 2012 in the Region, which includes 30 municipalities in South Central Connecticut. The Simulated Emergency Test is an opportunity for amateur radio operators to drill in providing emergency communications. With amateur radio operators, known as Hams, strategically placed across the region, they demonstrated their ability to get the message through from local Emergency Operation Center locations to the State Region 2 Office.

//
How Will You Communicate in an Emergency?

Posted: 09 Sep 2012 05:07 PM PDT
http://www.eham.net/articles/28955

If an emergency were to hit Poway right now, how would you get information? How would you reach your family? The Poway Neighborhood Emergency Corps held its bimonthly meeting Thursday night, discussing exactly this topic. Three different aspects of emergency communication were covered last night: how the City of Poway communicates to the public in an emergency, how to use amateur (or ham) radios and two-way radios, and how to make and maintain contact lists to use in emergencies. The topic of communication was in preparation for the citywide drill the city will be holding sometime next month, where they will test the lines of emergency communication in the city. PNEC will also be participating in the drill, to be held on an unannounced day, where the members will be testing their own emergency communication set-ups.

RAC Bulletin 2012-055E - Tropical Storm Leslie lies 1079 kms south of Sydney Nova Scotia
2012-09-10

Advisories from the Canadian Hurricane Center place Leslie 1079 kms south of Sydney, Nova Scotia and it is travelling NNE at 30 kms per hour. Latest
reports show it gaining speed and intensity, with landfall projected between the Burin and Avalon Peninsula's around 1200Z Tuesday plus/minus 3 hours.
More than 100 mm of rain has already fallen in Nova Scotia.

Predicted rainfall of 100-150mm is expected along with winds of 100 - 150 kms per hour. AS this storm approaches all operators are encouraged to ensure
your own home and family are safe, and during the event your cooperation in keeping the IARU COA frequencies clear is appreciated. The COA (Center of
Activity) frequencies are 21.360, 18.160, 14.300, 7.060 and 3.760. In addition, please monitor all local repeaters in the event that your assistance is
required.

Thank you and please stay safe.

Posted: 09 Sep 2012 06:48 PM PDT
http://forums.qrz.com/showthread.php?360948-The-Starke-Hamfest-November-24th&goto=newpost

Mark your calendars for November the 24th the Saturday after Thanksgiving. For The Starke Hamfest We need your help in order to make this a big success. We are looking for venders with equipment for sale and people looking to buy. We can not make this a great event with out your support. This year the hamfest will be held at the Starke Country Club just East of Starke on CR 230. This year it will be held inside out of the weather. Also we have a covered area out side if you prefer that. Also an area for tailgaters. If you like to play golf you can do that also. So come on out for a day of ham radio, golf and meeting up with some ole friends. Plenty of places to sit and relax. Please help support Amateur Radio and we hope to see you their. Here is a link to the web site for more information. http://starkehamfest.info/ Talk in on 145.150 73's and God Bless

Lost Contact With Balloon, Looking For Listeners.

Posted: 11 Sep 2012 06:33 AM PDT
http://forums.qrz.com/showthread.php?361087-Lost-Contact-With-Balloon-Looking-For-Listeners&goto=newpost

Last Sunday evening The High Altitude Balloon Group Near Space Sciences launched EarthBreeze II, their 51st of these high altitude balloon experiments. We have been doing these flights for almost 25 years now and are always trying something new.

All was going well for the first three hours of flight. Then as it was nearing the coldest altitude, It began to operate oddly. Maybe some background of the flight is in order here first. Please go to the following web page to learn all about this flight. It is a very unique flight.

http://www.qsl.net/nss/earthbreeze.html

Ok, symptoms of behaving oddly. As I said as the payload traveled into the colder parts of it's journey, one of the last telemetries had it being -47 deg C! The RTTY transmissions were designed to have a 200 Hz shift. controlled by a crystal. As the flight continued on, this shift was widening. towards the end it was almost double at about 400 Hz shift. Also additional symptoms were the actual frequencies were rising higher and higher in the waterfall audio passband. Towards the end almost a full KC higher than intended. This of course was also controlled by a crystal. So being nearly -50 deg C it was expected.

But what started to happen next was not expected. The transmitter was set to transmit at 15 seconds after the minute. This was being controlled by the clock in the GPS system. It was slowly transmitting later and later and later, and nearly a full minute late towards the end.

Then the last transmissions heard were very strange. Longitude position of -184 degrees? It should have parked at this time at near 70 thousand feet. Then the last transmission came down, and it was a very wide shift RTTY signal probably close to 500 Hz and did not have enough time to adjust the software for a decode. in addition in the short transmission, what 10 seconds? it swept in frequency a good 400 Hz down in the waterfall.

That was the last anyone has heard from it.

Now we are asking for everyone to listen for it. Unless the electronics were actually damaged by the cold, once they thaw out, this should start to transmit again. even if the on-board batteries die it should still transmit during the day because of the solar panels. If it's still flying it may still be froze up since it's in a location where last checked it is -55 deg C, but it has to come down eventually, and then it will warm up, if it hasn't landed already. Even on the ground this can be heard, pre launch it was being heard by several stations via skip.

So we are looking for people to try to hear this run away payload. unless it was damaged, it should eventually come back to life.

Any info or questions feel free to ask.

Joe WB9SBD

Mission Director

Near Space Sciences

80th Anniversary of Practical Wireless Magazine - GB80PW on the air
Thursday September 13th

The GB80PW Special Event callsign is being aired each month until
December 2012 – but Thursday September 13th is a very special day as
it marks the actual 80th anniversary of the first publication of the
(then weekly) PW in September 1932.

The Editor Rob Mannion G3XFD will be operating the station from around
0930 local time from his home in Bournemouth with the help of Phil
Ciotti G3XBZ on this very special Thursday.

Plasma Powered Amateur Radio Satellite PROITERES Launched:

Posted: 10 Sep 2012 05:18 PM PDT
http://www.eham.net/articles/28964

The Japanese amateur radio satellite PROITERES was launched Sunday, September 9 at 0423 UT on PSLV-C21 from the Indian Space Research Organisation (ISRO) Satish Dhawan space centre. The satellite SPOT6 was on the same launch into a 654 km × 643 km, 98.28º inclination orbit. The rocket was fitted with the mini Redundant Strapdown Inertial Navigation System (mRESINS). PROITERES was built by a team of students and faculty members of Osaka Institute of Technology (OIT) and the spacecraft aims to demonstrate powered flight using a Pulsed Plasma Thruster (PPT) engine. Mike Rupprecht DK3WN reported hearing PROITERES, callsign JL3YZK, on 437.485 MHz at 07:36 UT.

//
Effort to Save Tesla Lab Gets Surprise Web Jolt:

Posted: 10 Sep 2012 05:18 PM PDT
http://www.eham.net/articles/28963

Online Donors Give More Than $1 Million to Aid Wardenclyffe Site in Shoreham: In 1901, visionary Nikola Tesla began building a 187-foot-tall wooden tower on the North Shore of Long Island, dreaming of sending wireless Morse code messages over the Atlantic and even transmitting electricity through the atmosphere. After experiments two years later -- during which nearby residents reported hearing a thunder-like noise and seeing light emanate from the spire -- Tesla lost his equipment to creditors and was sued for back taxes. The tower was later demolished with dynamite. Now, more than a century after the renowned scientist and inventor founded the experimental site known as Wardenclyffe in Shoreham, his fans have raised more than $1 million in an effort to save what is left of his Long Island facility: a boarded-up brick building that is the last remaining Tesla laboratory in the world. Using the crowdfunding website IndieGoGo.com, the campaign sparked donations from more than 25,000 Tesla supporters in 102 countries, hitting the $1 million mark in nine days and providing a jolt of attention for the long-dead scientist.

NZART Headquarters Infoline Special Issue 32s

11 September 2012

List of Call Signs of Amateurs that RSM has been unable to contact and callsigns that RSM has been informed were held by Silent Keys.

As members will be aware (see HQ Infolines 221 and 243), Radio Spectrum Management have been attempting to contact all the Amateurs listed in SMART to see whether the information held is correct and up-to-date. (Under the Radio Communication Act 1989, Section 24A, Amateurs are required to update changes of address within 1 month of the address change.)

RSM have managed to contact most Amateurs but there are over 150 (see below) who they have not been able to contact either by email or post. The call signs of these amateurs, many of whom are Silent Keys, have been moved into a special “reserved” category in SMART and will become available for reallocation in about a year’s time unless the holder contacts RSM.

ZL1: ZL1ABM, ZL1ACD, ZL1AFE, ZL1AHP, ZL1AIF, ZL1AK, ZL1ALX, ZL1ANE, ZL1ANP,ZL1AOH, ZL1AOI, ZL1AQU, ZL1ASY, ZL1AWX, ZL1AXZ, ZL1AZX, ZL1BCN,ZL1BDE, ZL1BDQ, ZL1BDT, ZL1BF, ZL1BFH, ZL1BJN, ZL1BNJ, ZL1BPA, ZL1BQO,ZL1BRS, ZL1BWS, ZL1BXX, ZL1BYY, ZL1CAD, ZL1CCJ, ZL1COD, ZL1CWD,ZL1DGD, ZL1DW, ZL1FL, ZL1GAD, ZL1HY, ZL1JBM, ZL1JF, ZL1KZ, ZL1LFA,ZL1NY, ZL1PJR, ZL1RAW, ZL1RRV, ZL1SV, ZL1TAL, ZL1TBL, ZL1THG,ZL1TIF, ZL1TOQ, ZL1TS, ZL1TZS, ZL1UDZ, ZL1UED, ZL1UEL, ZL1UF, ZL1UJW,ZL1ULS, ZL1UND, ZL1UNS, ZL1UUN, ZL1VAH, ZL1VIM, ZL1WA, ZL1WEN ZL2: ZL2AAO, ZL2ADM, ZL2AGC, ZL2AGM, ZL2AJJ, ZL2AKE, ZL2AKN, ZL2ALC,ZL2AOA, ZL2AQI, ZL2ARY, ZL2ATM, ZL2ATO, ZL2AVR, ZL2AWA, ZL2BBA,ZL2BEK, ZL2BGI, ZL2BHM, ZL2BLO, ZL2BN, ZL2DM, ZL2EST, ZL2GA,ZL2GMP, ZL2IO, ZL2JC, ZL2JR, ZL2JT, ZL2KAS, ZL2LU, ZL2LUK, ZL2MNZ,ZL2NH, ZL2OG, ZL2OT, ZL2SS, ZL2TAK, ZL2TAS, ZL2THX, ZL2TJO, ZL2TK,ZL2TKL, ZL2TNM, ZL2TOO, ZL2TPS, ZL2TRT, ZL2TUI, ZL2UAJ, ZL2UBU,ZL2UCD, ZL2UDO, ZL2UT, ZL2VCM, ZL2VJW, ZL2WI ZL3: ZL3AAB, ZL3ABU, ZL3AFS, ZL3AGB, ZL3AIX, ZL3BRB, ZL3DYL, ZL3GN, ZL3GV,ZL3GW, ZL3JMC, ZL3JW, ZL3KV, ZL3MO, ZL3OD, ZL3PD, ZL3RC, ZL3RD, ZL3RE,ZL3SO, ZL3TAN, ZL3TCK, ZL3TGN, ZL3TK, ZL3TUM, ZL3UPS, ZL3VAB, ZL3WEJ ZL4: ZL4BI, ZL4ECD, ZL4GT, ZL4KH, ZL4KU, ZL4KV, ZL4MX, ZL4QG, ZL4SR,ZL4TAD, ZL4TDT, ZL4TFY, ZL4TKK, ZL4UPB, ZL4WF, ZL4WZThere is a chance that some of these callsigns belong to active Amateurs. If you know anybody on the list who is still active, please ask them to contact RSM at rsmlicensing@med.govt.nz or phone the Business Service Centre on 0508 776 4636 ASAP as otherwise they will lose their callsign!

****
The ARRL Contest Update

Published by the American Radio Relay League
****

September 12, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Make Hej in the Scandinavian Activity Contest
- Fall VHF Sprints - 144 and 222 MHz
- What's Shaking from New Zealand?
- CW Open - New and Growing
- A Dizzying Height in Tunisia
- RTTY Rookie Roundup Results
- Bell Labs Returns with Wave Behavior Film
- IEEE Student Antenna Design Contest
- A Job Well Done

NEW HF OPERATORS - THINGS TO DO

The Run for the Bacon contest is a slow-speed-CW friendly contest just right for beginners. It happens on the third Sunday of every month. If you like something more fast-paced, try the North American Phone Sprint - radio's version of slam dancing! And if you have a boat-anchor radio gathering dust - try putting it on the air during the Classic Exchange contests.

BULLETINS

ARRL Contest Branch Manager, Sean Kutzko KX9X, reports that he scraped together some spare change and put several more quarters in the Propagation Enhancement Machine located in the basement of W1AW, thus insuring good conditions during the 2012-2013 contest season.

BUSTED QSOS

Dick W0RAA noticed that the QST "Contest Corral" for September (pg.79) has the wrong dates for two major contests. CQ WW RTTY should be listed as Sep 29, 0000Z to Sep 30, 2400Z and the Texas QSO Party should be listed as beginning at Sep 29, 1400Z. A new online PDF has been uploaded on the ARRL contest calendar website <http://www.arrl.org/contest-calendar>.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Sep 15-16

- ARRL 10 GHz Cumulative Contest
- North American Sprint--Phone
- CWops Monthly Mini-CWT Test (Sep 12)
- CIS DX PSK Contest
- Scandinavian Activity Contest--CW
- South Carolina QSO Party
- Feld-Hell Hell on Wheels Sprint
- Washington State Salmon Run
- Classic Exchange--Phone
- 144 MHz Fall VHF Sprint (Sep 17)
- Run For the Bacon--CW (Sep 17)

Sep 22-23

- NAQCC Monthly QRP Sprint--CW (Sep 20)
- FOC QSO Party--CW
- Classic Exchange--CW
- BARTG Sprint 75--Digital
- 222 MHz Fall VHF Sprint (Sep 25)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The "Quake Contesters" - ZL3X - are a new contest group in ZL3 and are planning to be on for the CQWW RTTY Contest - it may be the first ZL RTTY multiop station in that contest. The station will operate from a hillside in Christchurch overlooking the ocean. The operators note that many contesters do not turn their beam to ZL, so don't miss out! They've sorted out a secret handshake and everything so watch for the team of ZL3PAH, ZL3DMC, ZL3GK, ZL4PLM, ZL3DW, ZL3GA, and ZL3AB. (From the Daily DX <http://www.dailydx.com/> for 10 Sep)

The Scandinavian Activity Contest (<http://sactest.net/>SAC) sponsors report a renewed website with

- searchable scores
- downloadable awards
- announcements for participants activity
- new log robot with built-in calculations with immediate claimed scores listings

This year the contest will offer something new, the SAC National Team Contest Trial with real-time score reporting together with live video and audio. (Thanks, SAC CC Teamleader, Ingo SM5AJV)

Bob WA1Z will be releasing another version of the Super Check Partial <http://www.supercheckpartial.com/>database files on September 16th, 2012. Bob requests that you send him your contest logs to develop the database. "Please attach in an email the same Cabrillo format log that you submitted to the contest sponsor and send it to

mailto:logs@supercheckpartial.com. Logs from any contest within the last 24 months are always appreciated.

Scott N3FJP <http://www.n3fjp.com/> notes, "The Ontario Section Change has already been incorporated into Field Day, November Sweepstakes and the ARRL 160 contest logging software. I've been getting e-mail from folks daily who are just discovering that Ontario has been split into four sections and are wondering if I will update my software accordingly. The new versions for these contests are already on the website, so please be sure to download the latest before the upcoming contests." Scott's advice applies to ALL contesters, regardless of their logging software - don't be caught unprepared. Make sure your logging software is upgraded now and don't miss out on the new Ontario multipliers!

>From the September issue of the ARRL's Public Information Officer newsletter CONTACT! <http://www.arrl.org/current-contact-issue> "It's time to begin pulling your plans together for the October 2012 Jamboree on the Air that will be held October 20 and 21. Last year's effort saw a 600% increase in reported Scout participation in the USA --- 3,000+ American Scouts were a part of exciting activities and a superb introduction to the fun and technology of Amateur Radio." To help make JOTA a success, you can register your station <http://www.scouting.org/jota/station_registration.aspx> online, as well.

The World Maker Faire <http://makerfaire.com/newyork/2012/index.html> takes place over the Sep 29-30 weekend in New York City's Hall of Science. If you're in the neighborhood, don't miss it! Ham radio will be featured by the Hall of Science Radio Club's "100 Years of Ham Radio Makers <http://makerfaire.com/pub/e/9039>" exhibit.

Good job to the British - the Olympic Games went off swimmingly and, more importantly, the 2O12L <http://www.2o12l.com/> station made nearly 70,000 QSOs - one of the best special event station efforts ever. 2O12W <http://www.2o12w.com/> was a supporting station from Whitmore Bay in Wales. Strong work and congratulations!

Web Site of the Week - The second running of the CWops-sponsored "CW Open <http://www.cwops.org/cwopen.html>" contest was held on September 1 and 2. This contest is in a novel format with three separately scored and awarded "sessions" all creating a burst of activity. There are other contests with the multiple-session format as well. This allows an operator to be competitive in any 4-hour session. Reminiscent of the Stew Perry Contest, the unique multiplier rules also make it possible for someone running a modest station and wire antennas to amass point scores that can compete with big-gun stations running QRO with gain antennas. (Thanks, Alan AD6E and Rob K6RB)

WORD TO THE WISE

Logs Submitted - Many contests post a list of logs that have been received on their web site. For example, see the ARRL Logs Received <http://www.arrl.org/logs-received> page. Every log submitted for an ARRL contest accepted by the email-handling robot generates an entry with category, location, club, date received, etc. You can avoid unpleasant surprises when the results are published by checking this page after emailing your log. Be sure to read the robot's return message, too - if there are problems with the format of your log, correct them with a text editor and resubmit the log. When the robot is happy, it will generate a confirmation number for you - save it in case there are any questions later. Once your log is listed, you can be confident that it is safe and sound.

==> SIGHTS AND SOUNDS

SM0JHF's story "Contesting from Tunisia" in the latest (Sep/Oct) issue of the National Contest Journal <http://www.ncjweb.com/> caught my eye - there are some great pictures of the 3V8SS station. In addition, the station custodian, Ashraf KF5EYY maintains an excellent website <http://www.kf5eyy.com> with lots more information, videos, and photos of 3V8SS and elsewhere.

Those big numbers generated by the W3AO Field Day team are depicted in a series of photographs <http://www.n3aln.com/W3AOFD2012.htm> by Alan N3ALN. It makes me tired just looking at the guys working away to get that station and antennas set up!

This illustration of the electric field <http://www.youtube.com/watch?v=4KBTzwhyr3o&feature=share> a thunderstorm can generate suggests an interesting possibility for a lightning detector. It would probably also work in a snowstorm or windstorm. One LED conducting in each direction would catch both polarities of discharge. Using the LED in an opto-coupler or opto-isolator might also make a good alarm or at least turn on a bigger light. (Thanks, Jeff K1NSS)

John K7HV is on a quest to work 100 DXCC entities with his Argonaut - each new DXCC counter is recorded on video as he works it. You can watch him knock them off on YouTube <http://www.youtube.com/watch?v=t8Fb9oAW2OQ&feature=bf_prev&list=SP677A093C75EB5C55.>. This particular Argonaut has some notoriety being previously owned by Homer K7RA (SK) and Danny K7SS - both QRP top guns from the Pacific NW.

What if they could make these critters <http://spectrum.ieee.org/automaton/robotics/military-robots/latest-ls3-alphadog-prototypes-get-less-noisy-more-brainy> climb towers and carry your tool kit?

Take a few minutes and watch <http://www.youtube.com/watch?v=zLekEzL1jtw&feature=plcp> our favorite Chief Science Officer put the Vulcan Death Grip on some poor operating practices!

==> RESULTS AND RECORDS

Results for the ARRL August (RTTY) Rookie Roundup <http://www.arrl.org/contest-results-articles> are now online. Certificates for the 2011 ARRL September VHF Contest went out the door a couple of days ago, too. You can follow the ARRL Contest Branch's awards processing status online <http://www.arrl.org/plaques-and-certificates>. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The WRTC-2014 Event Scores <http://www.wrtc2014.org/qualifying/qualification-standings/> based upon the latest official published contest results are now posted. Updates included since the last posting cover the 2011 Oceania DX, CQ WW, and All-Asia. The 2012 ARRL DX scores are also included. Over 24,000 different operators have submitted scores in those events. Nine additional qualifying events have taken place for which official results are not yet available. There are only six months left in the qualifying period! (Thanks, WRTC-2014 Team Selection Director, Dan K1TO)

Bob N6TV points us to an "unofficial" WRTC-2014 qualification standings web site <http://wrtc-rank.com/> that includes claimed scores from many of the more recent contests.

Logs from the WRTC 2012 Station Test <http://www.wrtc2014.org/competition/2012-station-test/> are now available for download, as well. These are provided to help WRTC competitors study the propagation they can expect in 2014. (Thanks, WRTC-2014 Co-Chair, Randy, K5ZD)

Results for the 2012 Wisconsin QSO Party <http://www.warac.org/wqp/wqp.htm> are now online. The contest now features a Beginner category with a separate results listing. "The Beginner category was created as a two-year category, toget you started. Two years - meaning you can only enter as a Beginner two times, and then you will need to move to a different category." There was also quite a horse race between the first- and second-place out-of-state single-op finishers. (Thanks, Tom K9BTQ and Lynn K9KR)

OPERATING TIP

"It is impossible to send code and sneeze at the same time." - Kate K6HTN

==> TECHNICAL TOPICS AND INFORMATION

The wonderful and timeless Bell Labs training film, "Similarities in Wave Behavior <http://www.youtube.com/watch?v=DovunOxlY1k>" hosted by Dr J.N. Shive is now available online as a video. The mechanical version of a transmission line is used to show velocity of propagation, reflections, standing waves, and other phenomena. The explanation of SWR is particularly clear - if you've ever been mystified at how SWR "works", this video is a must-see. The AT&T Archives <http://techchannel.att.com/showpage.cfm?ATT-Archives> have more material, as well.

Gene WB8WKU cleared up some confusion about solder composition recently. "The solder that has the lowest melting point is (by weight) 63% tin (Sn), 37% lead (Pb). This ratio also has the same temperatures for "starts to melt" and "completely melted"; i.e., no temperature range with "pasty" solder. Note the greater amount of tin, not lead, because tin melts at a lower temperature than lead. Note also that tin is more expensive than lead. 60Sn/40Pb melts very close to 63Sn/37Pb and has only a small pasty range." Manfred XQ6FOD recommends these two web pages from the University of Bolton <http://www.ami.ac.uk/courses/topics/0244_tsm/index.html> and the European Space Agency <http://spaceflight.esa.int/impress/text/education/Solidification/Phase_Diagrams.html> for more detailed information and phase diagrams of tin lead solders or other alloys.

Guy wires are pretty important so it is important to maintain them and tighten them properly. This document from Casar on wire rope <http://www.wescovan.com/catalogs/handling&maintenance.pdf> provides a lot of information. The "cyclic method <http://www.wirelessestimator.com/industryinfoselect.cfm?categid=697>" of tensioning is often recommended and is described here online. (Thanks, Joen G3JVC/GM3JVC)

A sequence of articles about LED basics <http://www.edn.com/design/led/4391454/The-Nuts---Bolts-of-LEDs-Part-I> is available from EDN magazine beginning with Part 1 of the series.

Dave K1WHS had to cancel his multioperator plans for the ARRL September Contest due to corrosion of his tower guy anchor. One anchor failed but did not cause the loss of the tower. As Dave describes it, "The problem occurred as a result of high levels of iron pyrite, FeS2, in the rock formation. It oxidizes and transforms to FeSO4 and can form acids by mixing with water and air. The steel near the rock is badly corroded, while the portion of the steel above ground is undamaged and looks good as new." If your soil conditions are similar, a regular inspection program is in order!

This online story by John Titus of EDN, "Send Your Kids to College With Tools <http://www.designnews.com/author.asp?section_id=1386&doc_id=249979&itc=dn_analysis_element&cid=NL_Newsletters+-+DN+Daily&dfpPParams=ind_183,aid_249979&dfpLayout=blog>" caught my eye. It reminds me of the "teach a man to fish" parable - every boy and girl should learn some basic tool skills while growing up.

Technical Web Site of the Week - The IEEE Antennas and Propagation Society <http://www.ieeeaps.org/> has announced its fourth Student Design Contest. To enter the Antenna Design Challenge, build an antenna system with reconfigurable antenna elements that can adapt to different propagation conditions (e.g. line-of-sight versus non-line-of-sight). The top three teams will receive up to $2,500 (US dollars) in travel funds to attend the IEEE Antennas and Propagation Symposium in Orlando, FL, USA, July 7-13, 2013 to demonstrate their working systems. The

written reports of the three finalists will also be published in the IEEE Antennas and Propagation Magazine. More details are available on the society's website. While you are visiting the site, check out the article "Who Was James Clerk Maxwell and What Was/Is His Electromagnetic Theory?" by Sarkar, Salazar-Palma, and Sengupta.

==> CONVERSATION

A Job Well Done

In an announcement if not unexpected in its eventuality then surely in its abruptness, long-time CQ World Wide Contest Director, Bob Cox K3EST retired as the contest's Director and as CQ magazine's Director of Contesting. From CQ's press release announcing Bob's retirement, "Cox has been at the helm of the CQWW for 35 years, guiding the contest through massive changes in technology - both on and off the air - and CQWW's growth to become the world's most popular amateur radio contest." Indeed, CQ WW has grown to be one of the five biggest sporting events on the planet with thousands and thousands of participants simultaneously taking to the airwaves.

Bob became the contest's Director in 1977, sharing duties with Larry Brockman, then WA6EPQ and now N6AR until 1994. Since then, Bob has been the face and voice of the contest. Like many hams in my age bracket, the CQ WW contests were my first taste of what a Really Big Contest sounded like. With its everybody-works-everybody format, you really had to compete to make long-haul DX contacts through piles of closer or better-located stations. It is not unusual to hear a station pull out six successive calls from six different continents when the bands are open. I think my first WW contest was in 1973, so except for my first few years, Bob has been managing the contest in which I've participated almost every year of my ham career.

Another veritable sequoia in the forest of radiosport, Fred K3ZO, weighed in via the Potomac Valley Radio Club reflector with some recollections about the early days of the contest. "In those pre-PC days log checking was done by hand on paper logs. I remember helping Bob out. Occasionally by luck you would catch something fishy. I remember checking a log...liberally salted...with lots of multipliers right toward the end of the contest. The catch was that the calls...were mostly stations that had not been active since at least ten years before then. Bob was also wise to take counsel from Dick Norton N6AA who was a pioneer in figuring out ways to catch log obfuscation even before we had PCs to help us.

"It is no accident that the CQWW is the world's premier contest with greater numbers of participants by far than any other Amateur Radio contest. Bob's idea of signing up a corps of advisers from all over the world is still a unique undertaking in the world of contesting, and has given contesters world-wide the sense that they have a piece of the action. He has also always maintained that the contest not only exists for the high scorers but he always emphasized that if it wasn't for the

"little guys'" who help the big guns maintain their high rates, those scores wouldn't be nearly as high. He has always tried to make the contest rewarding for all participants no matter how meager their scores or their stations. Thus the massive numbers of certificates that go out to participants each year."

Bob was also instrumental in rescuing the WRTC for its 1996 event after plans for a 1994 WRTC failed to achieve orbit. He sits on the WRTC Sanctioning Committee today, still contributing after 26 years. From the CQ press release, "In making his announcement to members of the CQ World Wide Contest Committee, Bob said, "35 years encompasses almost the entire history of modern contesting. All the way from paper logs to today's need for instant answers. During that time a framework was created that made the CQWW the innovator of almost everything used in contesting today including log checking." He added, "With that in mind...I am tired and wish to move on with other interests.""

I can only imagine the uncountable hours that Bob has dedicated to our sport - mostly uncompensated except for the satisfaction of seeing the contest and all that goes with it grow and flourish. He has suffered the slings and arrows as well for implementing stiff quality measures in log checking and in administering the rules. Hell hath no fury like a penalized contester! But it is precisely because of those efforts that so many focus so intently on the CQ WW - they know that to do well in the World Wide means something important. It sets the standards high and expects us all to live up to them, even though during the competition there is often no one there to judge our ethics. What may be Bob's biggest contribution - along with the rest of the CQ WW Committee who also deserve high praise - is that a standard has been set and maintained. We would forget that lesson at our peril and to our discredit.

As of today, no replacement for Bob has been named with the last full weekend of October looming on the next calendar sheet. Airline tickets have been purchased. Stations are being prepared. Technique is being honed. As Fred said in closing and to which I can add nothing, "Well done Bob. Yours will be a hard act to follow!"

73, Ward N0AX

==> CONTESTS

September 12-25

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American Sprint-- Phone, from Sep 16, 0000Z to Sep 16, 0400Z. Bands (MHz): 3.5-14. Exchange: Call signs, serial, name, and state.

Logs due: 7 days. Rules <http://www.ncjweb.com/>

CWops Monthly Mini-CWT Test-- CW, from Sep 12, 1300Z - see website. Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

CIS DX PSK Contest-- Digital, from Sep 15, 1200Z to Sep 16, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and DXDA code. Logs due: 15 days. Rules <http://www.eupsk.com/>

Scandinavian Activity Contest-- CW, from Sep 15, 1200Z to Sep 16, 1159Z. Bands (MHz): 3.5-28. Exchange: RST and serial. Logs due: 2 weeks. Rules <http://www.sactest.net/>

South Carolina QSO Party-- Phone, CW, from Sep 15, 1400Z to Sep 16, 0300Z. Bands (MHz): 3.5-28, 50+, Frequencies (MHz): CW--1.815, 3.545, 7.045, 14.045, 21.045, 28.045, 50.095; Phone--1.865, 3,810, 7.190, 14.250, 21.300, 28.450, 50.135. Exchange: RS(T) and county or S/P/C. Logs due: Oct 18. Rules <http://scqso.com/>

Feld-Hell Hell on Wheels Sprint-- Digital, from Sep 15, 1600Z to Sep 15, 1800Z. Monthly on 3rd Saturday. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

Washington State Salmon Run-- Phone, CW, Digital, from Sep 15, 1600Z to Sep 16, 2400Z. Bands (MHz): 1.8-28, 50,144, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 16. Rules <http://www.wwdxc.org/>

Classic Exchange-- Phone, from Sep 16, 1300Z to Sep 17, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

Run For the Bacon-- CW, from Sep 17, 0100Z to Sep 17, 0300Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Frequencies (MHz): CW--1.812, 3.562, 7.044, 7.104. 14.062, 21.062, 27.185, 28.062. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

NAQCC Monthly QRP Sprint-- CW, from Sep 20, 0030Z to Sep 20, 0230Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

FOC QSO Party-- CW, from Sep 22, 0000Z to Sep 22, 2359Z. Bands (MHz): 1.8-28. Exchange: RST, name, FOC nr if member. Logs due: 7 days. Rules <http://www.g4foc.org/>

Classic Exchange-- CW, from Sep 23, 1300Z to Sep 24, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

BARTG Sprint 75-- Digital, from Sep 23, 1700Z to Sep 23, 2100Z. Bands (MHz): 3.5-28. Exchange: Serial. Logs due: Nov 1. Rules <http://www.bartg.org.uk/>

VHF+ CONTESTS

ARRL 10 GHz Cumulative Contest-- Phone, CW, Digital, from Sep 15, 6 AM to Sep 16, 12 midnight. Bands (MHz): 10G+. Exchange: 6-character grid locator. Logs due: Oct 16. Rules <http://www.arrl.org/contests>

144 MHz Fall VHF Sprint-- Phone, CW, Digital, from Sep 17, 7 PM to Sep 17, 11 PM. Bands (MHz): 144. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

222 MHz Fall VHF Sprint-- Phone, CW, Digital, from Sep 25, 7 PM to Sep 25, 11 PM. Bands (MHz): 222. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

South Carolina QSO Party-- Phone, CW, from Sep 15, 1400Z to Sep 16, 0300Z. Bands (MHz): 3.5-28, 50+, Frequencies (MHz): CW--1.815, 3.545, 7.045, 14.045, 21.045, 28.045, 50.095; Phone--1.865, 3,810, 7.190, 14.250, 21.300, 28.450, 50.135. Exchange: RS(T) and county or S/P/C. Logs due: Oct 18. Rules <http://scqso.com/>

Washington State Salmon Run-- Phone, CW, Digital, from Sep 15, 1600Z to Sep 16, 2400Z. Bands (MHz): 1.8-28, 50,144, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 16. Rules <http://www.wwdxc.org/>

Classic Exchange-- Phone, from Sep 16, 1300Z to Sep 17, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

Classic Exchange-- CW, from Sep 23, 1300Z to Sep 24, 0700Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): SSB--1.885, 3.87, 7.28, 14.27, 21.37, 28.39; AM--1.89, 3.88, 7.16, 7.29, 14.286, 21.42, 29.0. Exchange: Name, RS, S/P/C, type of equipment. Logs due: 60 days. Rules <http://www.classicexchange.org/>

war-bonds-450edt.jpg

NORTH TEXAS AMATEUR RADIO GROUP TO FLY BALLOON FLIGHT FROM HILLSBORO TEXAS
AIRPORT

NTBP PRESS RELEASE

FLIGHT 20, ☐For the VETS of WWII☐

* * *

FLIGHT ANNOUNCEMENT

North Texas Balloon Project (NTBP) is a group of amateur (HAM) radio operators from Fort Worth and Dallas and has launched balloons from Cleburne, Clifton, and Hillsboro Airports since before 1991. This is the annual launch and is funded by the amateur radio operators associated with the NTBP.

Please send an email to webmaster@ntexbp.org for further information or to make reports during or after the actual launch. Launch date is September 29, 2012. The back up date will be October 6, 2012.

Mission Number 20, ☐For the VETS of WWII☐, will be held by the North Texas Balloon Project and is planned for launch about 7:30 am on September 29, 2012 from the municipal airport in Hillsboro, Texas, just south of Fort Worth and Dallas. Back up date is October 6, 2012. Several payload packages containing sensors and amateur radios will be carried to nearly 100,000 feet in about 90 minutes by a hydrogen filled balloon and return via parachute in about 50 minutes. Mobile recovery teams will use position reports from the onboard GPS and APRS transmitter on 144.390 MHz and radio direction finding techniques to recover the payloads.

Pre-launch activities will begin about 6:30 am with the HF Launch Net on 7260 +/- 5 kHz, LSB beginning around 8:00 am. A cross band repeater will be activated soon after launch. Uplink is 445.800 MHz and downlink is 147.560 MHz. Handheld VHF radios and scanners can receive the downlink. At the peak altitude ham radio operators from Texas, New Mexico, Oklahoma, Arkansas, and Louisiana can contact each other using the cross band repeater.

The radios used normally have a range of about 5 to 10 miles, but that range will be extended to about 500 miles at the peak altitude. At the peak altitude, the curvature of the earth is visible. Digital video is recorded for later playback and will be streamed the day of the event. Check our website to see how to watch the event via your computer. APRS packets will transmit the balloon's location about once a minute.

NTEXBP's Team Leader, Tommy Davis said, "In past operations we did the launches for fun and the enjoyment of flight. It involves many different facets of amateur radio and thus a project that many types of amateur radio operators can enjoy together.☐ There is also an educational component utilized by scouting groups, because it involves orienteering and can be counted toward several different merit badges, as well as by teachers for science experiments. Davis said, ☐Area boy scout troops and school classes are invited along with all that are interested.☐

In the event of unfavorable weather or poor jet stream conditions, the launch will occur at a later date. Be sure to check www.ntexbp.org or www.w5sjz.net and other Ham Radio forums and news sources for later information.

The public is invited to come out to the Hillsboro Municipal Airport, located at Exit 3 on Interstate Highway 35W, to watch the launch.

Launch Net will be Friday September 28th at 8pm on 147.28 and carried on Echolink at K5AMM-R (Area 5 US). Live broadcast will be on www.batc.tv ,

member streams, K5PHD.

Operator and Technical Data to follow at www.ntexbp.org or www.w5sjz.net. Reports, questions, APRS and other data may be sent to NTEXBP by emailing webmaster@ntexbp.org .

Please forward to interested Hams and ham communities. I would also appreciate any announcement that could be made on local repeaters during allotted calls for announcements.

* * *

LAUNCH PREPARATION

Payloads: See below

Payload Integrator: Mark Culross, KD5RXT

Name: Flight 20, ☐For the VETS of WWII☐

Launch Site: Hillsboro Airport

Public Relations: Larry Westmoreland, K5PHD

RDF Coordinator: David Forbes , KC5UYR

Balltrack: David Forbes, KC5UYR; Kevin Vickers, AC5UV

Launch Coordinator: Tommy Davis, W5TCD

HF Operations: Mark Culross, KD5RXT

APRS Operations: Bruce Elliott, KC5KYJ

Misc:

Gas: David Forbes, KC5UYR

Batteries: Mark Culross, KD5RXT

Balloons: Tommy Davis, W5TCD

TECHNICAL DETAIL

PAYLOAD 1&2 (Mark Culross, KD5RXT)

Payload: Basic Package ☐ APRS (part 1 of 2)

Purpose: Position reporting, recovery support

Summary: Utilize Automatic Position Reporting System (APRS) capabilities to allow reception by chase & recovery teams with at least one Amateur Radio licensed operator & the required technical equipment to track & recover the balloon launch packages

Technical Equipment Details:

- Motorola OnCore 12-channel GPS receiver (common with voice beacon)
Provides location & date/time information as a serial data stream to TT4

- TinyTrakker4 (TT4) Converts location & date/time information from GPS into tones that can be transmitted through a standard voice radio. Also converts analog telemetry, such as battery supply voltage & module temperature into tones that can be transmitted through a standard voice radio

- Yaesu VX-2R dual-band amateur transceiver that takes tones from TT4 & transmits on 144.390MHz (standard APRS frequency in US) at ½ watt of output power

- Diamond RH77CA dual-band antenna

- Component power supplied by single-use lithium sulfate (LiSO4) batteries 3-cell pack supplies 9VDC to all electronics (individually regulated down to 5VDC in each component) (common with voice beacon)

- With an additional 2-cell tap which supplies 6VDC to APRS VX-2R radio

Payload: Basic Package ☐ Voice Beacon (part 2 of 2)

Purpose: Position reporting, recovery support, public monitoring

Summary: Utilize a BS2e single chip microprocessor to read internal/external temperature sensors, to gather location & date/time information from the GPS, & to control a text to speech module to ☐speak☐ all of this information such that it can be received by anyone, with or without an Amateur Radio license, without the need for any additional or specialized technical equipment other than a simple receiver (scanner, radio, etc.)

Technical Equipment Details:

- Motorola Oncore 12-channel GPS receiver (common with APRS) provides location & date/time information as a serial data stream to Parallax

- GPS module, reports on APRS as W5SJZ-11.

- Parallax BasicStamp BS2e acts as central controller for this capability generates Morse Code identification tones through the EMIC text to speech module converts location & date/time information from Parallax GPS module into commands to the EMIC text to speech module converts digital temperature data from internal/external temperature sensors into commands to the EMIC text to speech module reports inside temperature, outside temperature, date, time, number of GPS satellites being received, latitude, longitude, altitude, speed, & heading programmed in PBASIC

- Parallax GPS Module accepts location & date/time information from Motorola OnCore GPS & provides command/status interface to BasicStamp BS2e includes an integral GPS receiver that is not utilized (we only use the command/status interface it provides)

- Dallas Semiconductor DS1620 Digital Temperature Sensors (Internal/External) provides digital temperature data to BasicStamp BS2e

- Parallax EMIC Text to Speech module accepts textual data from BasicStamp BS2e and converts it into spoken audio that can be transmitted through a standard voice radio

- Yaesu VX-2R dual-band amateur transceiver that takes Morse Code identification tones and generated speech from EMIC text to speech module & transmits on 146.560MHz at ½ watt of output power

- Diamond RH77CA dual-band antenna

- Component power supplied by single-use lithium sulfate (LiSO4) batteries

- 3-cell pack supplies 9VDC to all electronics (individually regulated down to 5VDC in each component) (common with APRS)

- Separate 2-cell pack supplies 6VDC to voice beacon VX-2R radio

- If primary 9VDC battery pack fails, rendering all electronics inoperative, then by design, the voice beacon radio will remain constantly keyed (allowing direction finding by the chase & recovery teams to continue on this constant carrier)

Payload: Cross-band Repeater Package

Purpose: Short & long-distance amateur-to-amateur radio contacts

Summary: Utilize a pair of radios coupled to a miniature repeater controller to allow Amateur Radio licensed operators separated by either short distances (

Payload 3 (Kevin Vickers, AC5UV)

Ten Meter Beacon

The third payload of the flight is a ten meter beacon. This beacon was built by ham operators employed at a local avionics shop. This home brew transmitter and Byonics controller will be the basis of the beacon. It is operating on a frequency 28.274 mhz. The antenna is a home brew loop antenna with an swr of 1.2 to 1. The output of this transmitter is approximately 1 watt. This coupled with the high gain antenna, should be heard world wide? Please report contact and we will happily qsl the event. Email webmaster@ntexbp.org or kdvickers@aol.com

Payload 4 (Doug Loughmiller, K5BL)

Slow Scan Video is planned. Look for more detail on the NTEXBP website.

** DXCC: ZK2 ; Niue ; Square: AH51 ; start 2012-09-07

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
LATEST NEWS from W7GJ, dated 2012-09-08:
Arrived in Niue Friday afternoon September 7 local time (I am 11 hours behind GMT,
so it was early September 8 GMT). Weather this afternoon was great. E6M license is
in hand. Not currently able to send email or update my web page with this slow and
intermittent internet connection. Watch ON4KST EME CHAT page for updates.
21' mast is assembled and a location for it has been prepared...a few of the more
obvious offending palm fronds have been broken off and pulled out of the way now.
The 6M8GJ yagi should clear the metal house roof by about a foot when I am aimed
to the east over the house. I will start assembling the yagi today at first light
today (Saturday, September 8 GMT) and hopefully will be able to recruit some helpers
from down the road to help raise the antenna later in the day. It will require some
extra help with all the trees and bushes around, preventing a normal clean raising.
6m station is currently set up except for the antenna.

VY 73, Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

NEWS by W7GJ, dated 2012-09-03:
Hello! Well, I wanted to provide as much advance time as I could so you could mark your calendars and/or get everything in your 6m station optimized by the end of August ;-)
As those of you know who completed JT65A mode contacts with me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows - especially during the optimum days of the month for 6m EME.
The callsign is not in hand yet (but assured by email), and the QTH has not been finalized, but all the plane tickets have been purchased (as usual, any contributions are VERY welcome),
and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the works.
As soon as the license is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a takeoff shot
over water on moonrise. However, that is not necessary to work NA stations during their moonsets (I will be elevating),
so we will get the ground gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2;
Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure
time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

Goodbye to Record-Beating 2O12L:

Posted: 11 Sep 2012 05:12 PM PDT
http://www.eham.net/articles/28968

Cray Valley members started operating 2O12L on 25 July, in the first 10 hours over 3,300 contacts were made. As well as introducing visitors to amateur radio the station exceeded the world record for special event station QSOs on 21 August and reached their target figure of 60,000 QSOs at 2305UTC on Friday, 31 August.

//
Holding Your Community Together During a Disaster:

Posted: 11 Sep 2012 05:12 PM PDT
http://www.eham.net/articles/28967

The nonprofit Topanga EOC acts as a clearing house for incoming and outgoing information like evacuation zones, road and school closures, and shelter locations. It also collects eyewitness accounts from radio operators roving at a safe, non-evacuated distance, and then shares that information with stake-holder parties like community groups and local government services such as public safety, including fire departments.

//
10 Questions with Don Zupon, W3MIF:

Posted: 11 Sep 2012 05:11 PM PDT
http://www.eham.net/articles/28966

Don Zupon, known by his amateur radio call sign W3MIF, has been on the air since he was a young boy. Zupon is a member and past president of the North Augusta-Belvedere Radio Club, which has been together more than 40 years. He also serves as the amateur radio emergency coordinator for Edgefield County. The 69-year-old bought his first radio in high school after earning $50 from his job at Dairy Queen. He said today it costs $100 and up for a short-range radio, and $400 and up for long-range radios. Prior to purchasing a radio, he learned how to build his own transmitter. When he isn't on the radio meeting new people, Zupon enjoys traveling and camping. He also has a pilot's license, and enjoys target shooting, bowling and rebuilding his 1965 Corvette. For information about monthly meetings and amateur radio training courses offered by the radio club, visit k4nab.org.

//
On Second Try, Commission Approves Cell Tower in Disputed Location:

Posted: 11 Sep 2012 05:11 PM PDT
http://www.eham.net/articles/28965

After previously learning of pending litigation on the issue, County Commissioners on Monday approved placing a cellphone tower on Vernon Ferry Road. At commission's Aug. 7 meeting, commissioners did not vote on the request by American Tower and ATT to place a 105-foot cellphone tower at the site after a lengthy public hearing where several ham radio operators and area residents opposed the move. Commission Chairman Ricky Wolfe on Monday apologized for the inaction. "I apologize for that mistake, it's my responsibility as chairman," he told the people gathered in commission chambers. "In my six years here that is the first time that has ever happened that way." Despite opposition at previous meetings, the request complied with local ordinances and met federal requirement, said David Dyer of the Georgia Center for Local Government, who consults with the county on cellphone tower matters. "My recommendation remains the same," he said during Monday's hearing. "I feel the application fully complied with ordinance and that the applicant agreed to any and all appropriate conditions for the ordinance." Opposition to the tower had come from a group of ham radio operators after resident Steve Mobley said the tower risks interfering with his equipment. Mobley's system ties into other states and the SkyWarn weather system to help local emergency services be alerted to weather threats. Dyer said two studies by certified engineers said there was no reason believe there would be any interference. He said that American Tower and ATT also would be the ones obligated to clear any interference, but Mobley and other radio operators say FCC regulations puts the burden on him. Mobley said there is no way to know for sure if there will be interference and added that he felt the potential to shut down his operation was infringing his rights. "What I really have problem with is the lack of regard for my rights," Mobley said at the hearing. "It's not just Skywarn, but my rights as an individual and a ham radio operator. \& For anybody who is in support of this, what if that tower being there meant you possibly couldn't watch TV? A ham radio, to me, is more important than someone's right to watch TV, and they're threatening my right at that location." Mobley said there are alternate locations in the area that would work just as well for ATT to expand coverage in the area, but would not risk interference with his system.

Ham radio operator signs off on licensing duty
Ocala
He got involved in amateur radio, commonly called “ham” radio, when he was 12, got his first ham license in 1955 and spent a career at Motorola as a quality assurance engineer until he retired in 1998. On Tuesday, fellow hams honored Toler before he ...

RadioNow-Episode-20&goto=newpost

HAMRADIONOW.tv

Episode 20: DVDongle Inventor

Robin Cutshaw AA4RC

Robin didn't invent D-STAR, but he invented an awful lot of D-STAR stuff
that

hams use every day: The DVDongle, the DVAP, DPLUS linking and utility
software,

and coming soon, the UHF DVAP (Robin writes the software. His partner,

Moe Wheatley AE4JY, does the hardware). In this episode from the

Huntsville Hamfest, KN4AQ talks to Robin for the better part of an hour,

and learns a lot about how Robin got started and put this stuff together,
and

we get a peek at what's coming next.

If you 'do' D-STAR, this is a don't-miss episode. Watch it at our

web site, www.HamRadioNow.tv.

Ham Operators to Support National Wildlife Refuge Week

Posted: 12 Sep 2012 08:02 PM PDT
http://forums.qrz.com/showthread.php?361275-Ham-Operators-to-Support-National-Wildlife-Refuge-Week&goto=newpost

Ham Operators to Support National Wildlife Refuge Week

Amateur Radio operators will be on air in observance of the 2012 National

Wildlife Refuge Week, October 14-20. This event will coincide with festivals

and special events at refuges that help connect people with nature at the

country's more than 500 National Wildlife Refuges.

Combining Amateur Radio's communication capabilities with enjoyment of the

outdoors to help others learn about the National Wildlife Refuge System
(NWRS)

is the goal of the amateur stations participating in the nine-day event.
Hams

begin operating from a number of wildlife refuges this week under guidelines

established in cooperation with the US Fish and Wildlife Service (USFWS).

Visit the NWR Week ham radio special event web site nwrweek-radio.info for

more information.

==> + ARRL NATIONAL CONVENTION: ARRL WELCOMES NASA ASTRONAUT LEE MORIN,
KF5DDB, TO 2012 NATIONAL CONVENTION

NASA Astronaut Lee Morin, KF5DDB, will be a special guest at the
2012 ARRL National Convention at Pacificon -- held October 12-14 -- in
Santa Clara, California. Morin, an ARRL member, served as a Mission
Specialist on Atlantis for STS-110 that launched in April 2002. During
this 13th shuttle mission to the International Space Station, he
performed two extra-vehicular activities (EVAs) -- also known as
spacewalks -- the first time that the station's robotic arm was used to
maneuver spacewalkers around the station. Pacificon attendees will have
the chance to meet and greet Morin in the ARRL exhibit area. He will
also present a forum at Pacificon and will be the speaker at Saturday
night's banquet where he will share his experiences about spaceflight
and his interests in Amateur Radio. Read more here
<http://www.arrl.org/news/arrl-welcomes-nasa-astronaut-lee-morin-kf5ddb-to-20
12-national-convention>.
```

==> + EMERGENCY PREPAREDNESS: GET SET FOR THE 2012 SIMULATED EMERGENCY TEST

Are you ready to respond to a local communications emergency? How about within your area, state or beyond? The ARRL Simulated Emergency Test (SET) -- an exercise that enables you and your local, District and Section leaders to test equipment, modes, operating skills and emergency deployment plans to see if everything is in place and ready for an actual emergency event -- is October 6-7. The SET is one of the premier events of the year that invites the Amateur Radio Emergency Service, the National Traffic System, the Radio Amateur Civil Emergency Service, SKYWARN, members of the ARRL Field Organization and other groups to work in concert together to practice and prepare. Read more here <http://www.arrl.org/news/get-set-for-the-2012-simulated-emergency-test>.

==> AMATEUR RADIO IN SPACE: THREE HAMS RETURN TO EARTH THIS WEEKEND; WATCH LIVE ON NASA TV

After spending 125 days in space, NASA Flight Engineer Joe Acaba, KE5DAR, Expedition 32 Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS (both of the Russian Federal Space Agency), will begin their voyage home to Earth this weekend, marking the end of Expedition 32 on the International Space Station. The trio will undock their Soyuz TMA-04M spacecraft on Sunday, September 16 at 7:09 PM EDT (2309 UTC) for the flight home. They are scheduled to arrive in Kazakhstan at the Baikonur Cosmodrome almost four hours later at 10:53 PM EDT (0253 UTC on Monday, September 17). NASA will televise the farewell ceremony, as well as the undocking of the Soyuz craft, its launch and landing in Kazakhstan live on NASA TV. Read more here <http://www.arrl.org/news/three-hams-return-to-earth-this-weekend-watch-live-on-nasa-tv>.

==> + NEWLY ELECTED SECTION MANAGERS TO CONVERGE IN NEWINGTON

This weekend, 12 newly elected or appointed Section Managers will be in Newington at ARRL Headquarters for an orientation workshop. The primary purposes of the three-day workshop sessions are to share ideas and to provide basic administrative, management, leadership and motivational training. The workshop provides an opportunity for the Section Managers to chat among themselves or within the group, and to share their views on various issues and exchange ideas. Through training and orientation sessions conducted by ARRL staff members -- and by meeting with other Section Managers -- participants can explore what works, as well as what does not, and bring home some fresh ideas and some encouragement. Read more here <http://www.arrl.org/news/newly-elected-section-managers-to-converge-in-newington>.

==> + BECKY SCHOENFELD, W1BXY, NAMED QST MANAGING EDITOR

ARRL Book Editor Becky Schoenfeld, W1BXY, has been promoted to QST Managing Editor, the position formerly held by Joel Kleinman, N1BKE

(SK). A Connecticut native, Schoenfeld has more than two decades of publishing experience. Prior to her employment at ARRL Headquarters, she was Senior Editor at Teaching K-8 magazine, one of the most popular magazines for childhood educators, and Senior Project Editor for textbook publisher Macmillan/McGraw-Hill. In addition, she founded Amaranth magazine, a successful poetry journal. She holds an MFA from Emerson College and a BA from Fairfield University. Her Amateur Radio activities include chasing grid squares in pursuit of her 6 meter VUCC award and DX hunting on 10 meters.

==> SOLAR UPDATE

Tad "You'll find us chasing the Sun <http://www.youtube.com/watch?v=ZIyYMjI-xFg>" Cook, K7RA, reports: Solar activity retreated this week, with the average daily sunspot numbers off nearly 46 points -- about 35 percent -- to 83.1, while the average daily solar flux declined 18 points to 118.9. Geomagnetic conditions were quieter, with the planetary and mid-latitude A index most days in the single digits; the average planetary A index declined from 14.1 to 6.6. The predicted daily solar flux is 100 on September 13, 95 on September 14-16, 100 again on September 17-18, 105 on September 19, 95 on September 20-21, 100 on September 22, 110 on September 23-24, 115, 125 and 130 on September 25-27, and peaking at 140 on September 28-October 1. The predicted planetary A index on September 13-17 is 5, 7, 10, 12 and 8, then down to 5 on September 18-19, 10 on September 20, 8 on September 21-23, 5 on September 24-28, 10 on September 29, and back down to 5 on September 30-October 2. Look for more on the ARRL website on Friday, September 14. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Wanted's Chasing the Sun <http://en.wikipedia.org/wiki/Chasing_the_Sun_%28song%29>.

==> + ARRL TO WELCOME USTTI STUDENTS IN OCTOBER

Next month -- October 1-5 -- the ARRL will welcome eight international students who want to learn how to administer and regulate Amateur Radio programs in their home countries. This course, offered by the United States Telecommunications Training Institute for learners from developing countries, will help the participants create, administer and foster an Amateur Radio Service in their countries.

ARRL staff instructors will help course participants discover the ever-expanding universe of Amateur Radio communication, explaining why Amateur Radio operators -- upwards of three million individuals in virtually every country of the world -- have earned licenses to operate stations in the Service and why they are recognized, both by their governments and internationally, as a valuable voluntary telecommunications resource. Course participants will also discover how a telecommunications administration can bring the benefits of a healthy Amateur Service to its nation.

Now in its 30th year, USTTI is a nonprofit venture involving leading
US-based communications and information technology corporations and
leaders of the federal government cooperating to provide tuition-free
management, policy and technical training for talented professionals
from the developing world. This is the 28th year that the ARRL has
participated in the program.

==> THIS WEEK IN RADIOSPORT

This week:

- September 14 -- NCCC Sprint Ladder
- September 14-16 -- FISTS Get Your Feet Wet Weekend
- September 15 -- Feld Hell Sprint
- September 15-16 -- ARRL 10 GHz and Up Contest (local time)

This Week in Radiosport:

//
ARRL Welcomes NASA Astronaut Lee Morin, KF5DDB, to 2012 National Convention

Posted: 13 Sep 2012 07:40 AM PDT
http://www.eham.net/articles/28974

NASA Astronaut Lee Morin, KF5DDB, will be a special guest at the
2012 ARRL National Convention at Pacificon -- held October 12-14 -- in
Santa Clara, California.

//
Get Set for the 2012 Simulated Emergency Test:

Posted: 13 Sep 2012 07:38 AM PDT
http://www.eham.net/articles/28973

Are you ready to respond to a local communications emergency? How
about within your area, state or beyond? The ARRL Simulated Emergency
Test (SET) -- an exercise that enables you and your local, District and
Section leaders to test equipment, modes, operating skills and
emergency deployment plans to see if everything is in place and ready
for an actual emergency event -- is October 6-7.

//
Three Hams Return to Earth This Weekend; Watch Live on NASA TV:

Posted: 13 Sep 2012 07:39 AM PDT
http://www.eham.net/articles/28972

After spending 125 days in space, NASA Flight Engineer Joe Acaba,
KE5DAR, Expedition 32 Commander Gennady Padalka, RN3DT, and Flight
Engineer Sergei Revin, RN3BS (both of the Russian Federal Space
Agency), will begin their voyage home to Earth this weekend, marking
the end of Expedition 32 on the International Space Station.

//
Becky Schoenfeld, W1BXY, Named QST Managing Editor:

Posted: 13 Sep 2012 07:39 AM PDT
http://www.eham.net/articles/28971

ARRL Book Editor Becky Schoenfeld, W1BXY, has been promoted to QST Managing Editor, the position formerly held by Joel Kleinman, N1BKE (SK). A Connecticut native, Schoenfeld has more than two decades of publishing experience.

//
ARRL to Welcome USTTI Students in October:

Posted: 13 Sep 2012 07:40 AM PDT
http://www.eham.net/articles/28970

Next month -- October 1-5 -- the ARRL will welcome eight international students who want to learn how to administer and regulate Amateur Radio programs in their home countries. This course, offered by the United States Telecommunications Training Institute for learners from developing countries, will help the participants create, administer and foster an Amateur Radio Service in their countries.

//
Newly Elected Section Managers to Converge in Newington:

Posted: 13 Sep 2012 07:38 AM PDT
http://www.eham.net/articles/28969

This weekend, 12 newly elected or appointed Section Managers will be in Newington at ARRL Headquarters for an orientation workshop. The primary purposes of the three-day workshop sessions are to share ideas and to provide basic administrative, management, leadership and motivational training.

DXNL 1797 - Sep 12, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

4O, MONTENEGRO
Chab,YT7WA, announced to show up in BPSK and QPSK from Buljarice
signing YT7WA/4O from Sep 14-23. QSL via bureau.

G, ENGLAND, EU-005
The Preston Amateur Radio Society (G3KUE) is activating the special
callsign GB0PGY (WLOTA 1841, Loc IO83os) until the end of September
to celebrate the "Preston Guild Year", an event which takes place
every 20 years in Preston/England. QSL via bureau.
See also: http://www.prestonars.co.uk/joomla

HK, COLOMBIA
Lothar,DK8LRF, will be QRV again as HK3JCL from Colombia working mainly
in SSB on 20m and 40m between Sep 18 and Nov 19. Digital modes can be
arranged via e-mail (QRZ.com). QSL via DK8LRF.

HS, THAILAND
Dennis,K7BV/HS0ZKS, of Yaesu, sponsored two FT2000D for the HQ station
HS0AC of the Radio Amateur Society of Thailand (RAST). The clubstation
was completely destroyed during the heavy floods last year. After seven
years of waiting, Thai hams are once again able to test for a license
that gives them privileges on the HF bands so expect many new calls to
show up on the bands soon. See also: http://www.qsl.net/rast and
http://www.hs5ac.net/smf1112/smf/index.php?topic=749.0

JW, BEAR ISLAND, EU-027
Erik,LA2US, is working at the meteorological station on Bear Island
(EU-027) until November and wants to be on the air as JW2US as often
as possible, mainly in SSB on 40m-6m. eQSL only.

SM, SWEDEN
The special event station SI9AM from the "King Chulalongkorn Memorial"
in Ragunda is activated by Lars,SM3EAE, Joe,SM3FJF, and Goeran,SM5SIC,

on Sep 15/16. Operation will take place on 160m-10m and in the upcoming
Scandinavian Activity Contest (Sep 15/16). Listen for them on:
CW: 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897, 28017 kHz
SSB: 1840, 3760, 7060, 14210, 18160, 21310, 24960, 28510 kHz
FM: 145.550 MHz and repeater RV49 on 145.612 MHz
QSL via SM3CVM. See also: http://www.si9am.se

T8, PALAU, OC-009
Ulf,DL5AXX, will return to Palau for a combined dive and radio holiday.
Once again he will be QRV as T8XX (CW) and T88UE (RTTY) on 160m-10m
from Sep 14-28. QSLs are preferred via OQRS or via homecall.
See also: http://www.dl5axx.de/dxlog

YA, AFGHANISTAN (update)
T6SM is based in Afghanistan until November. His job there has nothing
to do with telecommunications and his equipment there is rather sparse
(IC7000 with 75 watts and Triple Leg after DK7ZB 7m high). He has the
opportunity to be QRV only occasionally.

YJ, VANUATU, OC-110
Rod,YJ8RN, is staying on Loh Island (OC-110) and is mainly active in
SSB on 20m signing YJ8RN/p. The length of his stay is not known.
QSL via homecall.

ZA, ALBANIA
Franta,ZA/OK1HH, and Bob,ZA/OK2BOB, announced to be active in CW and
SSB on 160m-6m from Sep 12-20. QSLs via homecalls.

Information about the DXCC entities of three autumn DXpeditions:
The Documentary Archives Radio Communications offers detailed informa-
tion about the DXCC entities and all previous activations of three
major DXpeditions in autumn 2012: St. Peter & Paul Rocks, PT0S,
Swains Island, NH8S, and Campbell Island, ZL9HR. You can also find some
rarities like two QSLs of the initial activity of St Peter & Paul Rocks
with a total of 40 QSOs. Furthermore, there is an exclusive interview
with Herb Kline about his involvement in the faked Peter&Paul activity
by Don Miller as reported by Wolf Harranth, OE1WHC:
http://www.dokufunk.org/swains-de
http://www.dokufunk.org/peterpaul-de
http://www.dokufunk.org/auckland-de

Philippine HAMs get new QRGs: Following new frequencies can be used by
Philippine amateurs now:
35.7 kHz - 137.8 kHz
472 kHz - 479 kHz
7.201 MHz - 7.300 MHz
See also: http://www.para.org.ph/news.htm

TOP LISTS: The latest Topband, Topmode and Toplist listings are online now.
Send your scores, as well as any request for further information, via
e-mail to Luciano Lucini, IK2QPO (ik2qpo@425dxn.org).
See also: http://www.425dxn.org/awards/toplist

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 15 Thuringia Contest
Sep 15/16 Scandinavian Activity Contest
Sep 16 North American Sprint

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
IOTA Net: The IOTA Net meets Saturdays at 1300 UTC on 14260 kHz and Sundays
at 1300 UTC on 21260 kHz. These are the QRGs of the island hunters:
CW: 28040, 24920, 21040, 18098, 14040, 10114, 7030, 3530 kHz
SSB: 28560, 28460, 24950, 21260, 18128, 14260, 7055, 3765 kHz

AF-014, CT3, Madeira Archipelago: DJ6QT, DK1MM, DK1QH, DK4QT, DL1YFF, DM3BJ,
DJ3IW, E73Y and S56A will be active as CR3L (Santana-Madeira Island,
WLOTA 0053) between Sep 16 and Oct 4, including the CQWW RTTY Contest.
QSL via DJ6QT (bureau/direct).

AS-008, JA1, North Izu Islands: Take,JI3DST, is QRV again from Shikine Shima
(Shikine Island, WLOTA 2267). He is signing JI3DST/JI1 in CW, SSB, RTTY
and PSK31 on 40m-10m from Sep 12-16. He also plans to take part in the
SAC Contest as JI3DST/1. QSL via JI3DST (bureau/direct).
See also: http://blog.goo.ne.jp/ji3dst

AS-095, R0Z, Bering Sea Coast group: Victor,RU0ZM/p, Valery,UA0ZC/p,
Vlad,RA0ZJ/p, and Alex,UA0ZAM/p, are working on all HF bands from
Starichkov Island (RRA RR-12-05, RDA KT-06, WLOTA 1837) until Sep 14.
QSLs via homecalls (bureau/direct).

EU-008, GM/MM, Inner Hebrides: Members of the Black Country DX & Contest
Group will be QRV as MS0OXE from Tiree Island (IOSA NH04, SCOTIA DI10,
Loc IO66ML, WAB NL94) from Sep 13-21. The station is works in SSB, CW
and RTTY on 80m-10m using a HexBeam (http://www.g3txq-hexbeam.com).
QSL via M0URX (bureau/direct/LoTW).
More information can be found on: http://www.ms0oxe.webs.com

EU-013, GJ/MJ, Jersey: Jim,G0UPG, is signing GJ0UPG from Jersey in SSB on HF
using FT-857D and vertical until Sep 15. QSL via G0UPG (bureau/direct).

EU-026, JW, Spitsbergen Island: Karl,LA8DW, and Kjell,LA9HH, will sign JW8DW
from Longyearbyen on Spitsbergen Island (WLOTA 0125) from Sep 12-19.
They will join the SAC Contest (Sep 15/16) as JW5E.
QSL for JW5E direct via QRZ.com; QSL for JW8DW via LA8DW.
See also: http://la8dw.com/Svalbard%202011 and http://www.jw5e.com

NA-018, OX, Greenland: Listen for Henning,OZ1BII, to be active in CW only
signing XP2I from the XP1AB clubstation in Kangerlussuaq (WLOTA 0072,

WFF OZFF-006) from Sep 13-17. Activity will be in CW only on all HF
bands, including the SAC Contest. QSL via OZ1BII (bureau/direct).
See also: http://oz1bii.dk/dx-xp2i-sep.htm

NA-046, W1, Massachusetts State South (Bristol to Barnstable County) group:
Larry,K4KGG, and members of the BRARA club will be QRV as K4KGG/1 from
Martha's Vineyard (USi MA-005S, WLOTA 2804) mainly in SSB on 20m from
Sep 14-18. If the conditions permit they plan to show up also on 28460,
21260 and 7055 kHz. QSL via K4KGG (bureau/direct).
See also: http://www.n4brf.org

NA-097, 6Y, Jamaica: Juergen,6Y5/DL3JH, is working on HF until Sep 22.
QSL via DL3JH (bureau/direct).

OC-040, ZK2, Niue Island: Lance,W7GJ, and Bob,ZL1RS, are planning another
EME DXpedition to Niue Island (WLOTA 2139, Loc AH51ba) until Sep 21.
Lance is working as E6M on 6m and Bob signs E6RS on 2m.
QSL for E6M via W7GJ (direct) and for E6RS via ZL1RS (direct).
See also: http://www.bigskyspaces.com/w7gj/Niue2012.htm

OC-097, 5W, Samoa Island: John,N7CQQ, and Ron,N6XT, are working from
Savaii Island (WLOTA 4026, Loc AH36sg) mostly in SSB on 20m signing
5W0QQ and 5W0XT until around Sep 20. Unfortunately they cannot go to
Tokelau (ZK3) anymore but will return to American Samoa (KH8) on Sep 30
QSLs via homecalls (direct).

SA-036, P4, Aruba Island: Robert,W3BTX, and Roy,W3TEF, will be active from
Aruba (WLOTA 0033) using P49T (special callsign P49Towers 9/11) from
Sep 14-21. QSL via W3BTX (bureau/direct).

NON-IOTA: Members of the TCSWAT plan to activate the lighthouse Gerze
(Loc KN71ot, WEBLOTA 8) as TC6GLH on Sep 15/16.
See also: http://www.tcswat.org

FFF: Eric,F5SIH, will be QRV from the WFF area FFF-1145 on Sep 15.
His focus will be on 40m. QSL via homecall (LoTW or eQSL).

Amateur Radio Newsline(tm) Report 1831 - September 14 2012

Amateur Radio Newsline report number 1831 with a release date of
September 14 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Two illegal operations in Canada are evicted
from 2 meters; the Radio Society of Great Britain takes on Region One
of the International Amateur Radio Union over the endorsement of a more
liberal B-P-L standard; the FAA to begin a new study of the use of
broadband devices on aircraft in flight and a safety warning about
those tiny button batteries. Find out the details are on Amateur Radio
Newsline(tm) report number 1831 coming your way right now.

(Billboard Cart Here)

**

ENFORCEMENT: TWO COMMERCIAL OPERATIONS EVICTED FROM 2 METERS IN CANADA

Radio Amateurs of Canada has announced that two cases of frequency
incursion to the 2 meter band by business users have been resolved.
Amateur Radio Newsline's Aaren Jensen, VA7AEJ, reports:

--

In the first incident, a transportation company based in Reinfeld,
Manitoba was observed to be operating illegally on 144.100 Mhz. The
company in question had purchased VHF radios from a US based supplier
who failed to indicate correct licensing procedures.

Once contacted by Radio Amateurs of Canada the company agreed to
immediately cease operating in the two meter band and shifted its
operation to a business band frequency. Industry Canada was notified of
the incursion and continues to work with the company to secure a
licensed channel. In addition to illegally transmitting inside the
amateur radio two meter band, this operation posed a threat to low
signal operations across a wide portion of North America

In the second matter, a home moving company was observed to be
operating on 144.940 Mhz. The company in question is based in Winkler,
Manitoba, but the operation was observed in Alberta during the moving
of a house.

In this case, the company had already been licensed to specific
frequencies with Industry Canada. However it had requested 144.940 Mhz
as a channel. Their request was denied and a business band channels
were issued. However, the company failed to check tits license

paperwork and assumed it had been approved for their requested frequency.

As in the first case, the moving company was also contacted by Radio Amateurs of Canada and agreed to move their operations to their correctly licensed frequencies. Given their wide geographic operations Industry Canada had licensed their operation on four separate frequencies including 140.730, 154.325, 158.940 and 151.730 MHz.

In both cases, it appears that frequencies in the two meter band were chosen by these businesses because their new vhf radios defaulted to that frequency range. This is definitely an indicator that the actual radio gear being used is likely to be modified amateur radio transceivers.

For the Amateur Radio Newsline, I'm Aaren Jensen, VA7AEJ, in Lumby, British Columbia Canada.

--

The use of equipment intended for amateur radio operation outside of the amateur bands or by persons who do not hold an Canadian Amateur Radio Certificate is illegal. What punitive action Industry Canada might impose on the two companies for their incursion into the 2 meter band is at this time unknown. (RAC, VE4WO)

**

RADIO LAW: RSGB ASKS IARU R-2 TO RECONSIDER PLT STANDARD

The Radio Society of Great Britain has formally asked the International Amateur Radio Union Region 1 Electromagnetic Compatibility Working Group to reconsider its policy on the draft European Broadband over Powerline or PLT standard. One that the RSGB claims to threaten a 38 dB increase in R-F pollution over much of the short wave radio spectrum

The request from the RSGB came in an August 28th letter to C.M. Verholt, who is the Chairman of the IARU Region 1 EMC Working Group from the RSGB's Don Beattie G3BJ. In it, Beattie says that there is no way that the emissions from devices meeting this new standard can satisfy the essential requirements of the EMC Directive outside the notched frequencies. As such, G3BJ says that the IARU Region 1 EMC Working Group is in effect condoning overriding the essential requirements of the Electromagnetic Compatibility Directive by backing the standard. He says that this action of the Commission is clearly contrary to the law of the European Union and therefore open to judicial review.

Beattie goes on to say that the new emission levels, if sanctioned, will inevitably become the baseline for future standards. In this context he notes that that there are already some new drafts that are circulating which reference the more liberal proposed emission levels.

Beattie ends his letter by saying that the RSGB hopes that common sense will prevail and that IARU Region 1 will amend its position on this matter. The IARU Region 1 EMC Working Group had previously added its support to the new Pan-European Electromagnetic Compatibility standard that the RSGB so vigorously opposes. (GB2RS)

**

RADIO LAW: PLMRS NARROWBANDING TAKES EFFECT ON JANUARY 1 2013

The FCC has sent out a notice to the manufacturers, importers, distributes and users of Private Land Mobile two-way radio that the deadline to switch to 12.5 Khz narrow band transmission is January 1, 2013. This is for two way radio gear that operates in the 150 to 174 MHz and 421 to 470 MHz frequency bands, not including the 2 meter or 70 centimeter Amateur Service spectrum from 144 to 148 MHz or 430 to 450 MHz. Amateur Radio Newsline's Jim Davis, W2JKD, reports:

--

According to the FCC the reason for this mandated change is to promote the efficient use of private land mobile radio spectrum and to facilitate the introduction of advanced technologies. In other words, this government edict is not only applicable to analog FM based communications but to current and all future digital modes as well.

The FCC also notes that Private Land Mobile Radio licensees are not required, at this time, to modify their licenses to remove wideband emission designators. However, the presence of a wideband emission designator on a license does not authorize operation after January 1, 2013 that does not comply with the new narrowbanding standards.

The FCC release also reminds manufacturers, subject to the limited exceptions, that they must cease manufacturing and importing equipment that is capable of 25 kHz mode operation in the VHF and UHF bands by the narrowbanding transition deadline.

I'm Jim Davis, W2JKD.

--

While the Amateur Service is exempt from the new narrowbanding mandate, do not be to surprised if future generations of off the shelf VHF and UHF ham gear is built to conform to this new commercial radio standard. Especially if a manufacturers primary business is in supplying Private Land Mobile Service radio gear with ham gear as a secondary product line. Its simply less expensive for them to do it that way. (FCC)

**

RADIO LAW: NEW ZEALAND TO ENFORCE UHF CB NARROWBANDING

In a similar move, New Zealand's telecommunications regulator has issued an edict to all manufacturers and importers of UHF CB radio equipment with 25 kHz channel spacing. It notes that in accordance

with the nations General User Radio License for citizen band operation, equipment that does not comply with a new narrowbanding specification cannot be sold in that nation if it is manufactured or imported after December 1st. Only current stock of 25 kHz radios on hand and merchandise in the domestic New Zealand distribution pipeline can be sold after that date. (NZART)

**

RESTRUCTURING: TV SPECTRUM AUCTION UPDATE

According to top FCC officials, FCC Chairman Julius Genachowski will soon circulate the FCC's long-awaited framework for reclaiming and re-auctioning broadcast spectrum for wireless use, and repacking remaining stations. This, with the target of having a report and order voted by mid-2013 and the auctions completed by the end of 2014.

The document is described as a comprehensive treatment rather than the first of a series of items. As such it's expected to contain many detailed proposals that the FCC will then seek comment on and adjust as needed. The FCC is trying to move far enough down the road with this initial proposal to make that auction goal of 2014 a realistic one.

While ham radio is not directly involved in this frequency shuffle, there is always the chance that some bands like 222 to 225 MHz and 50 to 54 MHz could be impacted. This is because 222 to 225 MHz lies between what is known as the spectrum between the VHF low and VHF high band TV channels. 50 to 54 MHz that we call 6 meters is actually VHF low band TV channel 1. If the sell-off of the coveted UHF broadcast spectrum results in a lot of TV stations returning to the VHF bands then both these spectral parcels could come under some future reallocation scrutiny. We are not saying that it will happen that way, but ham radio has to keep a careful watch on how it might be affected in the years to come. (Published reports)

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W8RLC repeater serving Lowell, Michigan.

(5 sec pause here)

**

RADIO LAW: FAA TO BEGIN INVESTIGATION OF BROADBAND DEVICES ON FLIGHTS

It's going to be a while before airline passengers can use their wireless electronic devices during an entire flight. Amateur Radio Newsline's Stephen Robertson, KB3HGM, is near the nations capital with the details:

--

On Monday, August 27th the Federal Aviation Administration said that it is starting a process to study the issue, with a timeline that means it will take at least until March 2013 for a recommendation and likely longer for action.

Smartphones, laptops and tablet computers are common in the passenger cabin, and some pilots are using these devices in flight. But passengers have to shut off electronic devices when the plane is below 10,000 feet because of worries that they might interfere with electronics in the cockpit. And anything that has a broadband connection that cannot be disabled must be kept off for the entire flight.

Now, in its recent statement, the FAA says that it will form a committee to study the issue for six months and then make recommendations. The group will include representatives of the mobile technology companies, aircraft manufacturers, airlines, pilots, flight attendants, and even representatives of passenger associations. The agency will also ask for public input. The FAA often uses such aviation rulemaking committees when it is considering regulatory changes and their discussions often last months and sometimes even years.

It should be noted that the FAA doesn't actually ban the devices. However its rules state that airlines can only allow devices that have been tested and proven not to interfere with a given make and model aircraft's electronics. With thousands of devices on the market and new ones coming out each day, airlines simply ban them all during takeoff and landing. And it looks as if that's the way it will continue for some time to come.

For the Amateur Radio Newsline, Im Stephen Robertson, KB3HGM, in Silver Spring, Maryland.

--

As to ever getting permission for hams to use radio gear like handie talkies on a commercial airline flight? There is no consideration being given to ever permit any hobby radio electronics to be used. The FAA says that allowing cellphone use during flights isn't under consideration either. (FAA, RW, other published reports)

**

RADIO LAW: FENDER AND THE FCC ENTER CONSENT DECREE

Fender Musical Instruments Corporation and the FCC's Enforcement Bureau have come to an agreement regarding how the company marketed digital RF devices and how it will do so in the future.

The case which began in June of 2010, involves how the company marketed bass amplifiers, preamplifiers, tuners, wireless microphones and audio mixers. Imported digital RF devices are subject to the agency's

equipment verification or declaration of conformity procedures.

As part of the agreement, Fender Musical Instruments Corporation will designate a compliance officer within 30 days and set up a plan within 60 days to ensure the company complies with the FCC's equipment marketing rules. The company has also agreed to develop and implement an online compliance training program for all if its overseas Original Equipment Manufacturers that build some of its equipment. The company is to report to the commission within 15 days any discoveries of noncompliance and submit regular equipment compliance reports to the agency.

Based on a consent decree, Fender will make a voluntary payment of $265,000 to the U.S. Treasury and admits no guilt. In turn, the commission will end its investigation. The first installment of its U.S. Treasury payment of $132,500 is due within 30 days of the signing of the Consent Decree. (FCC, RW)

**

ENFORCEMENT: BROADCASTER FINED $20000 FOR UNLIT TOWER

Not lighting a broadcast tower for more than a decade will likely cost Renacer Broadcasters Corporation a hefty $20,000 fine from the FCC.

Renacer owns the antenna structure located in Maricao, Puerto Rico. Responding to a complaint, an FCC Enforcement Bureau agent inspected the tower and found the structure had never been painted and had no lights installed. Because the tower had been that way for more than 10 years, the commission found the violation to be egregious and doubled the proposed penalty to $20,000.

Renacer was given the customary 30 days to submit a sworn statement certifying that the tower is now in full compliance with FCC rules and also to pay the penalty or file an appeal. (FCC)

**

ENFORCEMENT: FCC SAYS RADIO STATION MUST REVEAL ALL CONTEST RULES

The FCC has affirmed a $4000 Notice of Apparent Liability against Good Karma Broadcasting. This, for airing contest information without fully disclosing the terms.

The case concerns WKRN AM in Cleveland. The FCC received a complaint alleging that from November 2007 to September 2009, the station conducted what the complainant called a "bogus" contest called "Who Said That?" In it, those calling into the station were required to accurately identify who actually voiced a clip that was played on-air.

In 2009, the FCC wrote to WKRN asking about the contest. The agency said that in its reply WKRN admitted the bit aired regularly from early 2007 until the summer of 2008, and then sporadically thereafter. Once someone guessed the voice a new clip would air.

The station admitted that for more than 20 months, no one guessed the voice behind the clip. Also that the station was not announcing all the prizes, but rather focusing on the new prize. Also that it eventually stopped announcing them unless a listener called in and tried to guess the voice behind the last clip.

Good Karma also said that by September 2009, some of the original prizes were no longer available. It claimed that if a listener correctly identified the voice in a clip, the station would have offered a similar prize package to the one that was originally announced. As such, Good Karma disputed that it violated the contest rules, arguing that "Who Said That?" was better characterized as a feature or bit rather than a real contest. It argued that as such the material was not subject to the FCC's contest rules.

But the FCC would not buy that explanation. In affirming the fine it stated that licensees must accurately disclose all of the material terms of a contest. Also that licensees must conduct the contest substantially as announced or advertised.

Good Karma Broadcasting was given the customary 30 days to pay the fine or to file a further appeal. (FCC, RW)

**

HAM HAPPENINGS: YOUTH IN AMATEUR RADIO PODCAST #3 RELEASED

If you are a young ham or know of one, you might want to spread the word that Episode 3 of the Youth in Amateur Radio Podcast is now on line and ready for download. In this installment the young hosts discuss what you should do after earning your amateur radio license including getting your first radio and joining a radio club. Heres a sample:

--

Net Audio: ".to find a ham who will be able to assist you in finding your first radio go to a local radio club and become a member. Radio clubs will help you find your first radio and they usually have monthly meetings which discuss local issues in amateur radio and also organize fun activities like Fox Hunts."
--

The Youth in Amateur Radio Podcast is produced by and for the youngsters in amateur radio. Its primary hosts are Anthony Spinelli, K2RCN, Sterling Coffey, N0SSC and Jacob Keogh, KD0NVX. Other voices include Joe Andrews, KD0LOS, and Matthew Chambers, NR0Q. Jerry Taylor KD0BIK serves as the shows Executive Producer. To hear the complete program and the two that preceded it simply take your web browser to yarphams.com. You can also find it on itunes under Youth in Amateur Radio podcast. (Youth in amateur Radio)

**

NAMES IN THE NEWS: NORM ACES THE AZ TEST

Some names in the news. We lead off with Amateur Radio Newslines own Norm Seeley, KI7UP who tells us that recently scored 100% on the State of Arizona Traffic School test. While he does not know if he broke any records, Norm says that he finished the exam in less than 4 minutes and 30 seconds. At that point he got up and left his computer, after seeing that he had answered all questions correctly. We say, congratulations.

(ARNewsline(tm))

**

NAMES IN THE NEWS: W7EQI BEING EYED TO HEAD THE REPUBLICAN NATIONAL CONGRESSIONAL COMMITTEE

Regardless of the upcoming outcome of the November presidential election, don't be too surprised if Oregon Representative Greg Walden, W7EQI, is named to the chairmanship of the Republican National Congressional Committee. News reports say that House Speaker John Boehner recently gave a broad hint when he praised Walden by saying that he would soon have a "bigger job."

While the post doesn't get much attention from the general public, it's of major importance on Capitol Hill and is often viewed as a step up on the House leadership ladder. This is because thee chairman plays a key role in distributing millions of dollars in campaign help, in recruiting candidates and in making the tough calls on which districts to bet heavily on. (Published news reports)

**

THE SOCIAL SCENE: CELEBRATING MFJ 40th ANNIVERSARY OCT 5 AND 6

Turning to the ham radio social scene, all eyes will be on the city of Starkville, Mississippi, the weekend of October 5th and 6th. That's when hams from around the country and around the world are invited to join in on the 40th anniversary of the founding of MFJ Enterprises by the company's founder Martin Jue, K5FLU:

--

K5FLU: "Its going to be a fun event. We're opening all the factories up for tours. We will have people working there with the machines up so that you can see everything.

"We are going to have a free lunch. You can come over and we will feed you some good fried chieken.

"We are going to have free tailgating. You bring your stuff (to sell).

"We will have a VE session for taking license tests. And we will have a special event station with our club K5MFJ.

"And we are going to have door prizes from each of our companies. From MFJ, Ameritron, Hy-Gain, Cushcraft, Mirage and Vectronics.

"And everybody is invited and we hope that everyone comes."

--

Again the dates for the MFJ Enterprizes 40th anniversary party are October 5th and 6th at the company's headquarters in Starkville, Mississippi. For more information take your web browser to www.mfjenterprises.com. And oh yes, Ill see you there. (MFJ)

**

THE SOCIAL SCENE: PACIFICON IN SANTA CLARA CA. OCT 12-14

Two weeks later on October 12th, 13th and 14th the joint Pacificon and ARRL 2012 National Convention will take place at the Mariott Hotel in Santa Clara, California. Hosted by the Mt. Diablo Amateur Radio Club, Pacificon is considered the premiere West coast ham radio gathering and this year with the addition of the ARRL Expo, planners are going all out to make it the best ever. And by going all out we mean some 80 forums, a huge exhibit hall featuring all of the well known ham radio manufacturers, distributors and retailers; a huge flea market and several special gatherings.

Among those who will be appearing at these years Pacificon is Amateur Radio's best known educator and the co-host of the T-V webcast Ham Nation, Gordon West, WB6NOA. Gordo will be the keynote speaker presenting the Saturday Opening Address and word is that this is already a complete sellout.

Also attending is NASA Astronaut Lee Morin, KF5DDB. He has been announced as the evening banquet featured speaker. Morin served as a Mission Specialist on the space shuttle Atlantis for STS-110 mission that launched in April of 2002.

And flying in all the way from Lincoln, Nebraska is ham radios favorite kit building enthusiast, Joe Eisenberg, K0NEB. Eisenberg will be giving his acclaimed talk and demonstration titled Kit Building 101 and 102 at Pacificon.

Add to that the ARRL Expo, an all day Friday antenna seminar, special event station W1AW/6 and so much more that there's no time to mention it all and you have the makings of a great West coast ham radio gathering. And you can find out more by simply going to www.pacificon.org on the World Wide Web. (Pacificon)

EMERGING TECHNOLOGY: WB2MGP WORLDRADIO COLUMN ON FRACTAL ANTENNA MEETING

An upcoming article in a popular ham radio on-line publication will peak your interest if you are interested in the future of the hobby and what some of those in it now are doing to insure its future. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

If you are a reader of Worldradio On-Line, then keep an eye open for an interesting column by Carole Perry, WB2MGP. Back in June, WB2MGP and one of her Radio Club of America Young Achievers, Austin Schaller, KD0FAA, accepted an invitation from Dr. Chip Cohen W1YW to visit his facility in Waltham, Massachusetts.

Dr. Cohen is the inventor of fractal antenna technology and in 1988 built the world's first fractal element antenna. He is also the founder and Chief Technology Officer of Fractal Antenna Systems and was interested in meeting with the 17 year old ham. This after KD0FAA gave a presentation on fractal technology at a Radio Club of America Technical Symposium in Dallas, Texas, last November.

According to Perry, W1YW attributes his ham radio background as being responsible for his career choices and interests. She tells Amateur Radio Newsline that KD0FAA was inspired by the experience. Even more so when Dr. Cohen invited the teenage ham to co-author an article with him.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, in Berwick, Pennsylvania.

--

WB2MGP says that this is what she calls the ham radio ripple effect at its very best. You can read the entire story in the next issue Worldradio Online when it hits you e-mail in box. (WB2MGP)

NEWS FROM SPACE: EXPLOSION ON JUPITER NOTED BY AMATEUR STAR GAZERS

Amateur astronomers last week reported a bright fireball on the planet Jupiter that appears to be the result of a small asteroid hitting the planet during the early hours of September 10th. As the fireball faded, attention has turned to trying to discover any possible debris around the impact site. Observers will be monitoring the region in the nights ahead to see what if anything surfaces. Updates will be posted on-line at spaceweather.com (Spaceweather)

**

HAM RADIO IN SPACE: ISS TO GERMANY STUDENT Q AND A SESSION

A fascinating Amateur Radio on the International Space Station or ARISS contact was held on Friday, September 7th. This, between astronaut Sunita Williams, KD5PLB and students at the Michelstadt Gymnasium in Michelstadt, Germany. The clarity of the space to Earth link via ham radio was amazing. It enabled Williams to answer 14 questions posed by the students during the ten minute pass. Here's a sample:

--

Jessica: "What was the most scientific project you have been involved in on the ISS?"

KD5PLB: ".I think the most interesting thing is the investigations that we are doing on ourselves to see what happens to the human body after being in space for a long time. We are doing bone density; muscle measurements; workouts; different nutrition projects and all of that is going to help us understand what happens to the human body after a long time so that we can prepare the next generation which is your generation to go further. Back to the Moon and on to Mars."

--

With this being a political season here in the United States, one student was curious if astronauts can vote from space:

--

Arissa: "How do American astronauts vote for the president?"

KD5PLB: "Great question. Actually we vote by state in the U.S. and I am a Florida resident so I actually voted before I left. But you can vote from space. People have done that who are from the state of Texas."

--

Over 1600 students, teachers, and others were in attendance, as well as representatives from German radio, television and newspapers. The entire contact was video recorded and is posted on-line at tinyurl.com/iss-german-contact (ARISS)

**

RADIOSPORTS: ICOM D-STAR QSO PARTY SEPT 21 - 23

This years Icom sponsored D-STAR QSO Party runs from 00:00 UTC on Friday, September 21st to 24:00 hours on Sunday the 23rd. The goal of the D-STAR QSO Party is to communicate through as many D-STAR repeaters as possible throughout the world. All operators who submit an approved log will be eligible for the prize draw with winners randomly selected for each prize. For more information on this year's event take your web browser to tinyurl.com/DSTAR-contest-2012. (ICOM)

**

DX

In DX, word that DL3JH, is active stroke 6Y5 from Jamaica through September 22nd. His operation should be on all of the High Frequency bands using CW and SSB. QSL via his home callsign only.

PT2OP will be operational as 3D2OP from Fiji between October 7th and the 14th. His activity will be holiday style on the High Frequency bands. QSL via his home callsign, either direct or via the bureau.

And speaking about Fiji, PY7ZY will be on from there as 3D2ZY from there between October 11th and the 15th. This just prior to his participation in the Tarawa Island, Western Kiribati, DXpedition. His operation will also be on the High Frequency bands with QSL's also going via his home callsign.

F6ICX will be active as 5R8IC from Saint Marie Island, Madagascar between November 10th and December 9th. His operation will be holiday style operating CW, RTTY, and PSK63 on 20 through 10 meters. QSL via his home callsign as listed on QRZ.com.

SQ1DWR, will be active signing stroke CE3 from Chile between October 10th and the 22nd. Operations will be on 40 through 10 meters using CW only. QSL as directed by the operator.

YJ8RN is currently visiting Loh Island in the Torres Island Group and is active as YJ8RN stroke P. The length of stay unknown and his operation has been mainly on 20 meter SSB. QSL direct only to Rod Newell, Box 905, Port Vila, Vanuatu.

Lastly, Members of the "Invoker Team" will be active as EG5INT from Columbretes Island between September 20th to the 24th. No frequencies or operating schedule has yet been announced. If you work them please QSL only via EA5KA.

(Above from various DX news sources)

**

THAT FINAL ITEM: KEEP YOUR KIDS AWAY FROM BUTTON BATTERIES

And finally this week a warning from the Center for Disease Control saying that children and small button batteries are a dangerous and increasingly common problem for one another. Amateur Radio Newsline's Bruce Tennant, K6PZW, tells us why:

--

According to a new Center for Disease Control report, in 1998 battery related injuries sent 1,900 children to the emergency room. In 2010 that number had risen to 4,800 cases being reported.

Overall, more than 40,000 children were admitted to Emergency Rooms nationwide between 1997 and 2010. Almost three quarters of them were 4 years old or younger. One in 10 children required hospitalization. 14 of them died.

Now the CDC has singled out button batteries as the most potentially harmful type for young children to be near. These are the small, thin round batteries often used to power watches, hearing aids, and other small devices. They are easy to swallow and can get stuck in a child's esophagus leading to serious injury or death. In fact, the C-D-C report says that twelve of the fourteen child mortalities were attributed to button batteries and that the remaining two also likely involved them.

The data, primarily from the National Electronic Injury Surveillance System was collected and analyzed by the federal Consumer Product Safety Commission. The report states that the C-P-S-C is urging the electronics industry and battery manufacturers to develop warnings and industry standards to prevent serious injuries and deaths from button batteries.

The symptoms of battery ingestion include vomiting, abdominal pain, fever, and diarrhea, as well as difficulty breathing and swallowing. As these symptoms can be attributed to numerous causes, it is difficult to diagnose battery ingestion quickly. The report's authors point out that this is especially true when a child swallows a battery when no one is around to see them do it.

Battery safety standards for children's toys are dictated by law. All batteries must be inaccessible in toys designed for children under age three, while toys for kids under age twelve must make batteries under a certain size inaccessible. Even so, at least three of the deaths noted in the report were caused by batteries from devices not meant for children. These including a remote car alarm, a garage door opener, and a radio remote control.

A new law is being considered by Congress that may require child-proofing for button battery enclosures on all consumer products. Meantime its important that parents and caregivers should be aware of the potential hazards associated with battery exposure and ensure that products containing them are either kept away from children or that the batteries are secured safely in the product.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

The Consumer Product Safety Commission says that if a child swallows a battery that you immediately contact your local poison control center, your family doctor, or the 24-hour National Battery Ingestion Hotline at 202-625-3333. You can learn more about this hazard and how to proceed in the event a child does swallow a battery at tinyurl.com/kids-button-batteries. (CDC)

WIANEWS WEEK COMMENCING SEPTEMBER 16 2012.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING SEP 16 2012.

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

PASSED its USE BY DATE.

August 20 was the cut-off date for applications to be received by the WIA club
grant scheme committee, 10 arrived in time 1 didn't.

Yes one application was unfortunately received 9 days after the deadline.

The WIA Board has announced that the Grant Committee for 2012 will comprise
Reg Emmett VK7KK as chair with Peter Lowe VK3KCD and Rotarian of Amateur
Radio Bill Main VK4ZD as members.

They hope that grants will be announced by Monday 22 October 2012.

(sourced to wia front page news)

GUIDING LIGHT

The WIA Board invites clubs, groups of clubs and even groups of individuals to consider conducting the WIA Annual Conference. The Annual Conference in 2011 was in Darwin and the host club was the Darwin Amateur Radio Club and the Annual Conference this year was in Mildura and the host club was the Sunraysia Radio Group.

The "Guidelines for Hosting a WIA Annual Conference Weekend" is based on the experience of those involved in those two conferences, and Spud Murphy (Darwin) and Noel Ferguson (Mildura) have contributed to the "Guidelines".

The Board hopes the pattern set by these two highly successful events can be continued, with different clubs in interesting areas hosting weekends, usually in the latter half of May. The 2013 Conference will be in Perth, but clubs are urged to think about Conferences after that. The "Guidelines" set out the general procedures for a Conference, some of the issues that should be considered and the approach to actually coordinating and managing a Conference.

contact secretary@wia.org.au for your copy.

Central Highlands ARC AGM Weekend - SUDDEN DATE CHANGE BACK !

The famous and popular Central Highlands Amateur Radio Club AGM weekend
at Camp Fairbairn, approx. 20km south of Emerald, was to have been on
from 4pm Friday 28th to Midday Sunday 30th September 2012.

Then the dates got changed due to a double booking with the Scouts
Queensland State Jamboree Committee to 4pm Friday October 5th to MiddaySunday October 7th.

Well, CHARC members have actually contacted Gordon/VK4KAL to advise that at
least half that were going on the original dates can't make the new dates!

So, Gordon has thrown his 89 years of experience around a bit, been assured
that CHARC will have exclusive use of the usual facilities at Camp Fairbairn
and that the Scouts will be settling in a bit further down the grounds.

Of course, any Scouts or Leaders that get to close on the weekend will be
recruited, undergo a crash Foundation Course and turned into Hams!

So - the Central Highlands Amateur Radio Club AGM weekend at Camp Fairbairn,
approx. 20km south of Emerald is again on from 4pm Friday 28th to Midday Sunday30th
September 2012.

Get your finger out and contact Gordon on vk4kal@wia.org.au
to get your bookings in or to find out more.

Northern Tasmanian Amateur Radio Clubhttp://www.ntarc.net
October NTARC Meeting

To be held on Wednesday 12 October, this will again be the yearly pilgrimage
to Mt Barrow. Last year this was a really great evening and those that
attended thoroughly enjoyed themselves, especially in the extended twilight
that came with the introduction of daylight saving just days before.

This formula will also apply in 2012, so get along.

Arrive any time in the afternoon and NTARC have the site overnight so if you
are appropriately equipped, why not camp until next morning. There are
members who regularly do just that and they would love to have your company.

DISCUSSION POINT

Website News Feedback form

SILENT KEY

Hans Camenzind, Father of the NE555, Dies at the Age of 78

VK7 News tell us that last month one of the unsung heroes of electronicspassed away.

Hans Camenzind, father of one of the most famous integrated circuit of all
times, the Signetics timer NE555, timed out at the age of 78. Being a
gifted analogue designer, Swiss-born Monsieur Camenzind is also credited
to be the father of class-D amplifiers and he has introduced the concept
of the Phase-Locked Loop (PLL) in ICs. During his rather productive
career he designed over 140 ICs, wrote several books and many articles
and his name is attached to some twenty patents.

When a famous artists dies you will hear his or her greatest hits on
every radio or see his or her best films on every TV channel. Therefore,
as a tribute to one of the great electronics inventors of our century we
will play here Hans Camenzind's most successful composition: NE555 inbipolar.

Amateur Radio Newsline, NZART, AR Victoria and the WW sources of the WIA.

STAR FOUND DEVOURING PLANET

Astronomers have found evidence of a planet being
devoured by its star, yielding insights into the
fate that will befall Earth several billions years in the future.

The team uncovered the signature of the planet
that had been absorbed by looking at the
chemistry of the host star. They also think a
surviving planet circling this star may have been
kicked into its unusual orbit by the destruction of a neighbouring world.

The US-Polish-Spanish team made the discovery
when they were studying the star BD+48 740 -
which is one of a stellar class known as red
giants. Rising temperatures near the cores of
red giants cause these elderly stars to expand in
size. This in turn results in any nearby planets
to be absorbed by the expanding star or otherwise destroyed.

It's the way of the universe now brought to us
thanks to the art of radio and the science of Astronomy.

RSGB sticks to its views on EMC Directive

Members may have seen recent press commentary about the RSGB's
position on the proposed European power line telecommunicationsstandard.

Whilst protecting to a large extent the amateur HF bands, this
standard, if approved, would legalise high levels of wideband
emissions elsewhere in the HF spectrum, in direct contravention of
the European EMC Directive. The European Commission's own EM
Consultant supports the RSGB view that the Standard would not
comply with European Law.

Sadly the International Amateur Radio Union has taken the view
that support for the standard represents protection for the
amateur bands. The RSGB has concerns that this is a narrow view,
and that setting aside the requirements of the EMC Directive is
not only improper, but bodes ill for the future protection of the
Spectrum and for the integrity of the standardisation process.

The RSGB position is now being challenged by the Chair of the
CENELEC Committee charged with developing the standard, who argues
that there is no current standard. This is simply not the case, as
the Commission itself has confirmed that the exiting CISPR22
standard applies to PLA devices and that it fails to allow the
high emission levels which PLT manufacturers say they need is thereal issue.

OPERATIONAL NEWS - DATELINE 2012

WW Oceania Dx Contest SSB October 6
ww Oceania Dx Contest CW oceaniadxcontest.com Oct 13
VK Spring VHF / UHF Field Day November 24-25

JACK FILES MEMORIAL CONTEST HAS NOT CONCLUDED - JUST QSY'd till 2013.

The Jack Files Memorial Contest had been an annual 80m phone contest by the old WIAQ then the WIA Queensland Advisory Committee. The contest honours the memory of Jack Files VK4JF a long standing member and contributor to the work of the then Wireless Institute of Australia Queensland division particularlythe QSL Bureau.

Jack also wrote the old "Teleradio" notes in the 30's was the institutes Librarian and as a tribute the then VK4 Division saw fit to honour his 35 years of unselfish devotion to the Institute it developed the Jack FilesMemorial Contest.

The Jack files contest is normally an annual contest run in the month of July as a precursor to the Remembrance Day contest. The object is for amateurs to work as many other amateur stations, and particularly as many different VK4 shires, and lately towns and as many different states and territories as possible within each one hour block of the contest.

Regretfully the 2012 contest has been suspended.

The only reason, according to VK4TS, writing on wia Front Page News that the contest is now not on the web site was to quote "To avoid confusion".

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Northern Tasmanian Amateur Radio Club's Dave VK7DD and Joe VK7JG have successfully completed the installation of a 28Mhz beacon at Don Heads. 28.267Mhz with a nominal output of 5 Watts into an end-fed half-wave verticaldipole. (vk7wi)

VOODOO CONTEST CLUB TO BE ACTIVE FROM LIBERIA

For the 24th straight year look for the Voodoo Contest Group to again be active from Liberia between November 21st and the 27th. Operations will be from a location just South of Monrovia, the capital of Liberia.

Their main goal is to be an entry in the CQ World Wide DX CW Contest on November 24th and 25th as a Multi-Multi category using the call signEL 2 A.

Outside of the contest the operators will use their own personal call signs.

QSL as directed by each operator.
(arnewsline sep10)

A group of operators from Switzerland known as the Radio 7 Team will be active from Rodrigues Island as 3 B 9 SP from between October 16 and 23. Most operation will be on CW and SSB with some RTTY and PSK 31.QSL via HB 9 ACA.

As part of the 50th Anniversary of Independence celebrations in Algeria several special stations are active until the end of 2012.
Prefix hunters will have the opportunity to work 7U50I, 7V50I, 7W50I and7Y50I.

E I 25 D B Dublin Bus celebrates its 25th Birthday.
To celebrate the event a Special Event Station EI 25 DB until 30th June 2013.
The station is operated by current and former employees of Dublin Bus led byDeclan and Pete.

QSLs to Declan EI 9 HQ or on LOTW or HamLog.eu

Morocco CN 2 YZ through years end. His activity will be from the
city of Tangier especially on the weekends.

Philippine Amateur Radio League 50th anniversary special event
Look for special event station 4 G 0 LD to be active during 2012.
Activity is to celebrate the 50th anniversary of the Philippine Amateur RadioLeague (PARL).
QSL via the Bureau.
Also, the P.A.R.L. is sponsoring a commemorative Diploma for amateur radio
stations that have established two-way communications with at least 12 QSOswith PARL
members.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

Two commercial operations evicted from two meter band

Following investigation into several member complaints, the Radio Amateurs of
Canada is pleased to announce that two cases of frequency incursion have beenresolved.

In the first, a transportation company was observed to be operating illegally
on 144.100 Mhz. In addition to operating inside the amateur radio two meter
band, this operation posed a threat to low signal operations across a wide
portion of North America.

In the second matter, a home moving company was observed to be operating on
144.940 Mhz. The company was observed in Alberta during the moving of a house.
In this case, the company had already licensed frequencies with Industry
Canada. They had requested 144.940 MHz as a channel. Their request was denied
by Industry Canada and a business band channel was issued. However, the
company failed to check their license paperwork and assumed they had been
approved for their requested channel.

In both cases, it appears that channels in the two meter band were chosen by these businesses because their new vhf radios defaulted to that frequency range. As well, both businesses indicated they could simply dial a new frequency into the radio to move out of our band.

This is strong cause for concern that the actual radios being used are modified Amateur Radio equipment. The use of equipment intended for Amateur Radio operation outside of the Amateur Bands or by persons who do not hold an Amateur Radio Certificate is illegal.

Action on these and other incursions has been made possible by quality reports from monitoring stations.

(Bill Gade, VE4WO Regulatory Affairs)

K3EST RETIRES FROM DIRECTOR OF CQWW DX CONTEST

CQ Magazine has announced that Bob Cox, K 3 EST, has retired as Director of the CQ World Wide DX Contest and as CQ's Director of Contesting.

Bob has been at the helm of the CQ World Wide DX contest for 35 years.

During his tenure he guided the competition through numerous changes in technology and growth to become the world's most popular amateur contest. Cox's retirement is effective immediately. A successor has not yet been named. (arnewsline sep10)

ARDF World Championships were held last week

The RSGB ARDF World Championships team flew out to Serbia Monday 10th September. All nine of the UK competitors were self-funded.

UK ARDF events using the IARU rules have been run by the RSGB since 2002.

In contrast, most eastern European nations have been pursuing this radio sport for over 50 years and have a great deal of experience. These nations dominate the results, with Russia, the Ukraine and the Czech Republic particularlysuccessful.

There were four days of competition.

Wednesday 12th saw the first of the classic races with both the 3.5 and 144MHz bands in use. The inaugural World Sprint ARDF championships took place on Thursday and that format used 3.5MHz.

Friday 14th competitors used the band they did not use two days earlier.

Finally there was the Fox-Oring race on the Saturday and this also used 3.5MHz.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

ANOTHER ZS CUBESAT ON THE CARDS

Twenty Interns at the Denel Dynamics Engineering Academy of Learning are designing and building a CubeSat as part of their internship training.

Denel Dynamic takes on up to 20 interns, students who have completed their engineering degree, masters or PhD. During the first year they spend half their time in the Academy and the other half in their designated departments.

"The programme is aimed at exposing interns to a complete product development cycle", said Grant Wilson who leads the Academy. "Designing and building a CubeSat and developing a ground station to manage the satellite is an ideal project to achieve this."

The 20 strong Intern Project Team was split into three separate teams, each responsible for certain aspects of the project. Team Ground Zero is responsible for the ground station and radio frequency (RF) link components. Team Virtuoso is responsible for the cube structure and on-board computer; and Team Frodo is 'sponsible for the payload, Attitude Control and Determination System (ADCS), and the launch. Read more about DynaCube on http://www.amasatsa.org.za.

WW SPECIAL INTEREST GROUPS --- ILLW

Plan now to be at a lighthouse

There are plenty to activate for the first time in next year&#65533;(tm)s International Lighthouse and Lightship Weekend on 17-18 August 2013 to take advantage of a local or exotic location.

A few DX spots are worth checking out and some sites remain in currently very active countries.

It needs a little planning and access to the structure relies on the responsible authority that run the lighthouses, lightships and other maritime navigation structures allowed under the event guidelines.

You can of course operate in the car park or very nearby. To see what it is all about, reports from earlier activations, the guidelines, an online registration form used by 60 in 15 countries already, and a lot more, atthe website ILLW.NET

24.960, 28.390, 50.160

Calling frequencies for Slow Scan TV (SSTV):3.630, 7.033, 14.227

Calling Frequencies for PSK3114.070

JOTA/JOTI

The 54th + 1 Jamboree On The Air will take place on 20 and 21 October 2012
ann in VK7 NTARC's effort is at the Carnacoo camp site at Paper Beach, as part
of a Northern Districts camp.

JOTA/JOTI coordinator Peter VK7KPC, advises that he is planning to get to
Carnacoo on the afternoon of Friday 19 October to do preliminary setup fora JOTA station.

Peter advises that the final site won't be known until organisers have a
better idea of the number of Scouts attending.

Peter is planning to use the VK7RAB to VK7RAF link to contact JOTA
station being run South of Hobart and he is hopeful to have 2 HF
stations active, plus IRLP on 2 metres and UHF to link South and maybe
to North West coast stations.

North West Tasmanian Amateur TV Group (NWT-ATVG) have planning well
under way and the Club will again be providing resources and operators
over 2 days at the Paton Park Camp at Ulverstone.

Operators offering their assistance at this time with communications and
control are Neil VK7NX, Ross VK7WP, Paul VK7HPD, Jim VK7JH, Graham
VK7NGA, and Tony VK7AX.

Operating frequencies as per the official JOTA frequencies
published again this week, best read at
wia.org.au and read the text edition of this wireless news.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page onwia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh ‘and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they weresubmitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by Bryan Pliatsos VK3GR@wia.org.au on behalf of the National WIA.

1756. October 2012 QST - Digital Edition / SPECIAL DXING ISSUE

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-14 13:07:42 UTC
From: ARRL Web site <memberlist@www.arrl.org>
Message-ID: <20120914123714.6C2B527DB0E@bmail.arrl.org>
Source record: 2023
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

*October 2012 QST - Digital Edition - *Go Now>
<http://www.nxtbook.com/nxtbooks/arrl/qst_201210/>
Digital QST <http://www.nxtbook.com/nxtbooks/arrl/qst_201210/>

Digital QST

September 2012 QST - Digital Edition
<http://www.nxtbook.com/nxtbooks/arrl/qst_201210/>Dear ARRL Member,

The digital edition of October /QST/ is available now! Go to this link
and start reading: October 2012 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201210/>.

*Special DXing Issue... *

* Build a shared apex loop array antenna to boost your receive
performance.
* Read about the fascinating HK&#65533;NA DXpedition to Malpelo Island.
* Get tips on how to make the most of modern DX spotting networks.
* Learn the real story of the historic 1954 DXpedition to Navassa Island.
* Find out why so many amateurs are eager to make contact with the
Sovereign Military Order of Malta.
* ...and much more!

Enjoy Content You Won't Find in the Print Edition...

* Watch video overviews of the Alinco DJ-V57T and Kenwood TH-K20A
handheld transceivers.
* Listen to galactic noise on 10 meters.
* See extra photos of the HK&#65533;NA Malpelo Island DXpedition.
* Listen to the Hendricks QRP Kits Scout Regen receiver.

And, don't forget that all ARRL members have access to every issue of
/QST/. After you've enjoyed reading this month's issue, you can browse
the entire /QST/ archive (every issue since 1915) by visiting
www.arrl.org/qst <http://www.arrl.org/qst>. Look for the links to the
digital and print archives.

73,

Steve Ford, WB8IMY
Editor

What is a digital edition?
The digital edition of /QST/ is a web-based edition of the journal...a

way to read and interact with the current issue of /QST/ anytime, anywhere. It simulates the look and feel of our printed version, complete with page flipping, indexing and easy ways to move around to get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions.
Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green. Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Cork City Goal (jail) on the Air - October 14

Posted: 14 Sep 2012 05:54 AM PDT
http://forums.qrz.com/showthread.php?361412-Cork-City-Goal-(jail)-on-the-Air-October-14&goto=newpost

The North Cork Radio Group moves forward with more activations!

Sunday 14-October, 11AM (UTC+1), the NCRG will be activating Cork City Goal (Jail)

http://www.corkcitygaol.com/

The new Cork City Gaol opened in 1824 & was reported as being "the finest in 3 Kingdoms". In 1870 the west wing was remodelled into a double-sided cell wing & in 1878 under the General Prisons (Ireland) Act, the Gaol became an all-female prison which it remained until male anti-treaty supporters were incarcerated in 1922/1923. The Gaol closed in August 1923, with all remaining prisoners either released or transferred to other gaols.

At the same location and uniquely situated in the former Governor□s House, is the Radio Museum Experience incorporating the restored 6CK Radio Broadcasting Studio. In addition to an audio visual on Marconi □ and particularly his Irish connections, there is a wonderful collection of artefacts, including the RTE Collection, providing a nostalgic trip back to the early days of radio.

This event is open to all (subject to entrance fee to the Heritage Center), NCRG member or not, licensed or not.

If you want to experience the atmospere of the NCRG events, come along, work our station, and join the fun!

Hope to see you there, or work you on the air!

Ham Radio Operator Signs Off On Licensing Duty:

Posted: 13 Sep 2012 05:02 PM PDT
http://www.eham.net/articles/28978

Wireless communication has fascinated Ron Toler for most of his life. He
got involved in amateur radio, commonly called "ham" radio, when he was 12,

got his first ham license in 1955 and spent a career at Motorola as a quality assurance engineer until he retired in 1998. On Tuesday, fellow hams honored Toler before he gave his last exam to aspiring ham operators at Green Clover Hall at the McPherson Governmental Complex. For nearly 20 years, Toler was a volunteer examiner and taught classes to those seeking their first or upgraded licenses. He has shepherded hundreds of people through the process. "I'm not giving up the hobby. I'm just not going to give exams. It's time for somebody else to have a shot," said Toler, who has taught at the Silver Springs Radio Club building for the last six years.

//
Amateur Radio Club Seeks Used Radio Equipment:

Posted: 13 Sep 2012 05:02 PM PDT
http://www.eham.net/articles/28977

CENTREVILLE - The Queen Anne's Amateur Radio Club (QAARC) is seeking used amateur radio equipment. The club is asking radio operators, past operators and friends or spouses of operators to consider donating equipment that is no longer being used. The club needs amateur radio equipment for emergency deployment, education and training and establishing fixed stations. Equipment donations can be made to the club as charitable, tax deductible items.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

SARL NEWS 16 September 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other newsreaders change to suit).

SILENT KEYS

It is with regret that it must be announced that the keys of two radio amateurs went silent recently. They are:

ZS1CP, Chuck Du Preez, about 2 months ago. It seems that no radio members had been notified of this previously.

The other one is that of ZS1VX - Valter Blaughsted, on 2 September after a long battle with cancer a month shy of his 79th birthday. He is seen as father of the west-coast publication "Ons Kontrei" which he started in 1968 and is still published today. He is survived by his loving wife Patricia and son Erik and will be much missed by family and friends.

We offer our condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

RSGB ASKS IARU REGION ONE TO RECONSIDER PLT STANDARD

RADIO TECHNOLOGY IN ACTION

THREE RADIO AMATEURS RETURN TO EARTH THIS WEEKEND

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

RSGB ASKS IARU REGION ONE TO RECONSIDER PLT STANDARD

The Radio Society of Great Britain has formally asked the International Amateur Radio Union Region 1 Electromagnetic Compatibility Working Group to reconsider its policy on the draft European Broadband over Power Line or PLT standard, one that the RSGB claims to threaten a 38 dB increase in RF pollution over much of the short wave radio spectrum.

The request from the RSGB came in an August 28th letter from the RSGB's Don Beattie. G3BJ, to C.M. Verholt, who is the Chairman of the IARU Region 1 EMC Working Group. In it, Beattie says that there is no way that the emissions from devices meeting this new standard can satisfy the essential requirements of the EMC Directive outside the notched frequencies. As such, G3BJ says that the IARU Region 1 EMC Working Group is in effect condoning overriding the essential requirements of the Electromagnetic Compatibility Directive by backing the standard. He says that this action of the Commission is clearly contrary to the law of the European Union and therefore open to judicial review.

Beattie goes on to say that the new emission levels, if sanctioned, will inevitably become the baseline for future standards. In this context he notes that that there are already some new drafts that are circulating which reference the more liberal proposed emission levels.

Beattie ends his letter by saying that the RSGB hopes that common sense will prevail and that IARU Region 1 will amend its position on this matter. The IARU Region 1 EMC Working Group had previously added its support to the new Pan-European electromagnetic Compatibility standard that the RSGB so vigorously opposes.

The SARL supports the RSGB's views as any relaxation in emission levels can have far reaching negative effects which ultimately may impact also on South Africa

RADIO TECHNOLOGY IN ACTION SYMPOSIUM - PRE-BOOK FOR CAPE TOWN NOW

The last in the 2012 series of the SARL Radio Technology in Action Symposiums will be held min Cape Town on 29 September 2012 at the Cape Peninsula University of Technology Bellville Campus. The full programme and registration forms are now available on www.sarl.org.za. Click on RTA or the link in the news update centre stage on the home page.

Pre-booking assists with catering arrangements and guarantees that you will be able to get the CD and the SDR kit at the meeting.

The challenge is on for the Western Cape Radio Amateurs to beat the Gauteng record of close to 100 participants. Please make use of the pre-booking facility and stand a change to win an ARRL Basic Antenna book. The booking form can be downloaded from www.sarl.org.za.

THREE RADIO AMATEURS RETURN TO EARTH THIS WEEKEND

After spending 125 days in space, NASA Flight Engineer Joe Acaba, KE5DAR, Expedition 32 Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS, (both of the Russian Federal Space Agency) will begin their voyage home to Earth this weekend, marking the

end of Expedition 32 on board the International Space Station. The trio will undock their Soyuz TMA-04M spacecraft today for the flight home. They are scheduled to arrive in Kazakhstan at the Baikonur Cosmodrome almost four hours later.

At the time of undocking, Expedition 33 will formally begin on board the ISS under the command of NASA's Sunita Williams, KD5PLB. She and her crewmates -- Russian cosmonaut Yuri Malenchenko, RK3DUP, and Akihiko Hoshide, KE5DNI, of the Japan Aerospace Exploration Agency (JAXA) -- will tend to the station as a three-person crew for a month until the arrival of three new crew members in mid-October, including NASA astronaut Kevin Ford, KF5GPP, and Russian cosmonauts Oleg Novitskiy and Evgeny Tarelkin. Williams, Malenchenko and Hoshide are scheduled to return to Earth in mid-November.

IS YOUR SARL MEMBERSHIP UP TO DATE?

The cutoff date for membership renewal of the SARL is 30 September 2012. On the 1st of October the SARL database will be refreshed and persons who have not yet renewed their membership will be indicated as "non-members". To prevent your uninterrupted membership from lapsing, renewals can now be done on line on the SARL web page or contact the SARL office during weekdays between 09:00 and 13:00 on 011 675 2393. Renew your membership now- It is the right thing to do!

CLUB NEWS

The West Rand Amateur Radio club is hosting its next flea market 12:00 on Saturday 29 September 2012 at their clubhouse in Kroton street, Weltevredenpark, Roodepoort. Everybody is welcome. For more information contact Phillip ZS6PVT, 083 267 3835 or Geoff ZS6GRL 082 546 5546.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Only a few sunspot regions are currently visible.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 39.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be less frequent due to the lower solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15 and 16 September - SARL VHF/UHF analogue and digital contest. 29 September - Flea market of the West Rand Amateur Radio club. 30 September - Nominations for MTN sponsored SAARDT awards to be in to saardt@intekom.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Martin Schwella, ZS4MS, and edited George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

SSB only. QSL via G4DFI (not G0VJG).

3D2C, CONWAY REEF (Press Release #3). Paul, N6PSE, sent out the following on September 10th [edited]: "DXpedition to Conway Reef as 3D2C -- It is with great excitement that we announce that our preparations for a large multi-national DXpedition to Conway Reef are going according to plan. We now have 19 operators from all over the globe to participate in this tent and generator operation.
Conway Reef is located in the South Pacific Ocean and is #35 on Club Log's most wanted DXCC list.
The bulk of our equipment has arrived and is staged in Suva, Fiji. ICOM is shipping the IC-7600 rigs to us this week, and they will travel with the team to Suva. Our advance team is arriving in Suva on September 21st to commence with equipment testing and loading on our vessel, the venerable Island Dancer II.
The main Team is meeting in Lami Bay, Suva, and departing by ship to Conway Reef on September 24th. The Team expects to arrive at Conway Reef and become active on September 26th. We will complete our Dxpedition on October 5th, 2012, and return to Suva.
The main goals of this DXpedition are to work every amateur radio operator who needs Conway Reef for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5 MHz and 50 MHz bands.
We will be active on CW, SSB and RTTY. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.
We will use our Satellite phones to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.
Our team consists of these Operators: Hrane/YT1AD (Leader), Aleksej/UA4HOX (Co-Leader-Operations), Paul/N6PSE (Co-Leader-PR & Fundraising), David/WD5COV, Vasily/RW4NW, David/AH6HY, Alan/K6SRZ (Team Physician), Alan/AD6E, Sergej/RZ3FW, Craig/K9CT, Stan/LZ1GC, George/N6NKT, Peter/PY5CC, Mike/K6MKF, Jim/K9JM, Miguel/PY3MM, Luciano/PY5KD, Dragan/YT3W and Tevita/3D2TR. Our Pilot Stations are: Aca/YU1AA, Toma/YU1AB and Andre/V51B.
We wish everyone good propagation, and we hope that you enjoy working the 3D2C Team.
We are very grateful to INDEXA, NCDXF and all of the Clubs and individuals who have provided monetary support for this Dxpedition. We sincerely hope we can satisfy your needs!
At this time, we are seeking additional Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition. Donations can be made via the 3D2C web page. OQRS will be available upon completion of the DXpedition.
Our official website is <http://www.yt1ad.info/3d2c/index.html>
3D2C Team"

4O, MONTENEGRO. Chab, YT7WA, will be active as 4O/homecall from the Village of Buljarice between now and September 23rd. Activity will be on BPSK and QPSK.

4S, SRI LANKA. A group of JA operators are now active from Trincomalee in eastern Sri Lanka using individual callsigns until September 20th. Activity will be on all bands and modes. Operators mentioned are Hiroshi/ JA3HBF (4S7HBG), Toru/JR3QHQ (4S7QHG), Nakasako/JA3UJR (4S7UJG), Ryo/ JG3DOG (4S7DOG), Ikuo/JA3TJA (4S7TAG), 7M3FMR (4S7TEG), Kunio/JH3LSS (4S7LSG) and Tatsuo/JA3ARJ (4S7ARG). By the way, the JA team also activated Pigeon Island in the Sri Lanka's Coastal Island IOTA Group (AS-171) this past Sunday for a few hours. QSL via their home callsigns or via the instructions of the operator.

5H, TANZANIA. Noel, WB0VGI, informs OPDX that he will arrive in Tanzania on September 18th. However, he will be settling in and touring the country first before operating. He suspects that he will not be able to operate until at least October 8th, and will be active as 5H3NP from Iringa until December 15th. His plan is to operate 20/15/10 meters initially. Noel will have to build a WARC band antenna if he can find the room. Operations will be on CW, SSB and PSK. QSL via his home callsign.

5W & KH8, SAMOA AND AMERICAN SAMOA (Update). John, N7CQQ, sent out the following press release on September 12th [edited]: "We plan to depart Western Samoa (5W) on or about the 18th of September and join the party at a Trade Winds hotel in American Samoa. The gang from Swains should be arriving a day or two following our arrival back in American Samoa [AS] (KH8). Party will begin. We will see them off from the airport.
N7CQQ (5W0QQ) and N6XT (5W0XT) will continue to operate from AS until our planned departure on October 1st. We expect (or will try to) setup our station at the Trade Winds hotel for the remainder of our stay. We might also have access to the AH8LG station for QRO operation. We will set up for 60 meter operation from Western Samoa (WS) also. As soon as we set up a schedule for 60 meters, it will be posted here on your favorite DX news source.
PS: A special thank you to Atsuo, 5W1SA, for opening his home/ham station and very generous support while in Western Samoa. He drove us around and showed us the ropes here until we felt comfortable to do it on our own. Atsuo has a computer and wireless internet business here in Samoa.
Atsuo is forming a Ham Club here for visiting hams from around the world. We have contributed a donation to get him started. His plan, on the one acre hill top, is to get the property surveyed, the weeds cut, haul in some crushed rock and then obtain a 20 foot shipping container. I offered to purchase half of a shipping container to help get Atsuo started. (I might get my Call Sign on the side of the container?)
We have made plans to return to Western Samoa next year to build antennas and work on the site. This is an aggressive schedule for Samoa; I will keep you posted on the progress.
Atsuo will be putting up a Web page to post pictures and progress notes. The Web site will have suggested lodging sites, logistic information, car rental info, licensing info, and a list of the Charter Members of the

Samoa Ham Club. I will add a section to the Web site to give details of
our attempt to visit Tokelau, ZK3.
So here is your chance to make the DXCC program stronger by getting a
world class ham site going on Samoa.
N7CQQ (n7cqq@msn.com) (atsuo@5w1sa.com)"

9H, MALTA. Gus, ON6KE, will be active as 9H3AK from Gozo (EU-023) between
September 22-28th. Activity will be holiday style on 40/30/20 meters
operating QRP (2-5 watts) CW. Suggested frequencies are 7030/7040,
10106/10116 and 14060 kHz. QSL only via LoTW and eQSL and LoTW. He states,
"NO Bureau" and "no printed QSL, sorry".

A7, QATAR. Members of the Qatar Amateur Radio Society are heading for
the beach again for a Multi-Operator/Multi-Transmitter entry in the CQWW
DX SSB Contest (October 27-28th). This year the A73A team will include
Ali/A71BX, Rashid/A71AD, Abdulla/A71CV, Khalid/A71CO, Mohammad/A71EL,
Saif/A71AM, Ali/A71BZ, Ibrahim/A61ZX, Khalid/A61BK, Dave/K5GN,N5OT,
David/N6AN, Larry/N6TR and Aoli/HA1AG. QSL via EA7FTR.

A SLICK CERTIFICATE FROM THE AZORES NINE ISLANDS HUNT ORGANIZERS! [edited]
Press Release from Martti, OH2BH, dated September 14, 2012: "While this
special activity will feature a hunt to work the maximum number of Azores
islands, the Organizing Committee has today released the copy of a
beautiful certificate available to all who manage to contact all 9 islands
during the weekend of September 28-30th, 2012. The certificate will be
sent by E-mail to those eligible for the Certificate of Merit presented
as part of this release and shown at <http://azores-islands-hunt.com/>
This new element will add to the grand prizes (2) of free travel to the
Azores that are to be given out on October 15 as part of a lucky draw.
Also, the renowned Club Log will be featured as a window to all 9
islands logs almost real-time with special software combining all nine
islands logs into one overview.
We kindly ask you to pass the Nine Islands banner to your favorite
webmaster and ask him to link it to <http://azores-islands-hunt.com/>."
ADDED NOTE: The certificate can also be seen on the Northern Ohio DX
Association's FaceBook page (see URL below).

BX5, TAIWAN (AS-020). Jimmy, BX5AA, from Changhua City, Taiwan (WLOTA
0022), will be active during the CQWW DX SSB Contest (October 27-28th)
as a Single-Op/Single-All/High-Power entry. Jimmy states that BX5 is a
rare prefix for Taiwan (CQ 24). QSL via BX5AA, direct (see QRZ.com).
Visit his Web page at: http://blog.yam.com/bx5aa

BY, CHINA. Look for the YinZhou Middle School Amateur Radio Club Station,
located in NingBo City, Zhejiang Province, to be active as BY5CD during
the CQWW DX SSB Contest (October 27-28th) as a Multi-Op/All-Band entry.
Their station consists of 2x Yaesu FT-2000 with stacked antennas for 40m
and above. They also have 80m 4 SQ, 160m full size Slope with Beverage,
and will use legal limit power. QSL via BD4HF, direct or by the Bureau
(May take a long time!). OM and YL operators mentioned are Jack/BA4ALC,
Ding/BA7MG, Bai/BH1DYK, Wei/BD1QXU, BG4AHK, Chen/BA7NO, Jordan/BA7MY,
Mark/BD4FM, Esa/OH7WV, Takao/JE2LPC, Fan/BA1RB, Lu/BA5FB, Bojan/BA5BJ,

Robin Le/BD5CHU and Chenxing/BD4HF.

FO, FRENCH POLYNESIA (IOTA Op). Alain, F4GYP, will be active as FO/F4GYP from several French Polynesian Islands between October 19th and November 6th. The islands mentioned are Tahiti (OC-046, DIFO FO002), Mehetia (OC-046, DIFO FO009), Moorea (OC-046, DIFO FO010) and Raiatea (OC-067, DIFO FO012) [probably during the weekend of October 27-28th for Raiatea]. He will be also be active on Motu Nono (OC-046, DIFO FO131) with the special callsign TX4FO. No specific date; it depends on the weather conditions. Activity will be on SSB and on 40/20 meters possibly 10 meters also. QSL via F4GYP, direct or by the Bureau.

IOTA NEWS.....
AS-025. Valery, RA0SS, is now active as RA0SS/0 from Kunashir Island possibly for one month depending on transport. Activity has been mainly on 30 and 20 meters.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS, Hisashi/7N1GMK and Takeo/7L4PVR will be active as homecall/1 from Hachijo Island between October 13-16th. Activity will be on 160-6 meters using CW, SSB and RTTY. QSL via their home callsign, direct or by the Bureau.

EU-054. Operators Raffaello/IT9ATF, Sal/IT9BXR, Renato/IT9NPR, Pippo/IT9PPG, Antonino/IT9RDG and Pino/IT9WDC will be active as IF9A from Favignana Island (IIA TP-011, MIA MI-025, WLOTA LH-1545) for the CQWW DX SSB Contest as (October 27-28th) as a Multi-Single entry. Activity will be on all bands and modes outside of the contest. QSL via IT9ATF, direct or by the Bureau.

EU-057. Volkert, DL6BE, will be active as homecall/p from Oehe Island (DID/GIA O-019) between October 29th and November 4th. Activity will be on the HF bands on, or near, the usual island and IOTA frequencies. QSL via his home callsign.

NA-046. Larry, K4KGG, is now active as K4KGG/1 on Martha's Vineyard Island until September 18th. Look for him around 2200z on primary on 14260 kHz SSB, but he may also work the other IOTA SSB frequencies on 10, 15, and 40m. QSL via K4KGG, direct or by the Bureau.

NA-067. Glenn, NY4NC, will be active as homecall/p from Ocracoke Island (USI NC001S, WLOTA 0466, Hyde County), North Carolina, between September 17-21st. Activity will be mainly on 40/20 meters operating QRP CW. QSL via direct to his home callsign.

OC-160. Aki, JA1NLX, will be active as homecall/VK4 from Hamilton between October 18-23rd. Activity will be on 40-10 meters using CW and SSB. QSL via JA1NLX. There is a OQRS on: http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html

JW, SVALBARD. Operators Kjell/LA9HH and Karl/LA8DW will be active as JW9HH and JW8DW, respectively, from Svalbard Islands until September

19th. Activity will be on the HF bands using CW and SSB. They were both active this past weekend as JW5E during the SAC Contest. QSL JW8DW via LA8DW and JW9HH via LA9HH, direct or by the Bureau. QSL via JW5E (see QRZ.com).

K6, UNITED STATES (Special Event). Mark, KM6HB, for the 8th straight year, will operate as special event station, K6P, between September 21-23rd. Activity is to commemorate "National POW-MIA Recognition Day" (Every 3rd Friday in September as stipulated by the Congress) and "Honor and remember those that have served and are still waiting to come home". Mark states, "Please stop by on the air and help us remember and honor those that having given so much for freedom." Suggested SSB frequencies are: 7250, 14253 and 18150 kHz (+/- QRM). They will operate from the Southern California area. QSL for a two sided picture QSL card via KM6HB: Mark McMullen, P.O. Box 27271, Santa Ana, California 92799, USA. Logs will be uploaded to EQSL and LoTW.

KH2/NH2, GUAM. Dave, N2NL, will once again be active as NH2T from Guam (OC-026) during the CQWW DX RTTY Contest (September 29-30th) and both the CQWW DX SSB Contest (October 27-28th) and CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Bnad/High-Power entry. He is expected to be here until the summer of 2013. Dave will be active (outside of contests) as KH2/N2NL and during all contests as NH2T. QSL via LoTW or via W2YC. For more information, including a station description, you can visit his Blog Page at: http://www.n2nl.net

KP2, U.S. VIRGIN ISLANDS. Jeff, K5WE, will be active as KP2/K5WE from St. Croix beginning September 17th until 26th. Activity will be on all bands, mostly CW, maybe some RTTY. QSL via his home callsign.

NH8, SWAINS ISLANDS. By the time you read this, the NH8S team on Swains Island is now QRT and in the process of tearing down their camp for a possible early departure. They were expected to be active until September 18th. However, San, K5YY, Swaim's 60m pilot, informs us on Saturday that the team has had "much bad weather conditions, antennas down, operators sick and tired and dehydrated and with some wounds requiring medical care."

The NH8S team has made a total of 105455 QSOs with 26010 Unique callsigns (43126/SSB, 54128/CW and 8201/RTTY). Breakdown by Continent: 522/AF, 2/AN, 28620/AS, 29509/EU, 43091/NA, 2663/OC and 1048/SA. The NH8S team recommends to QSL via OQRS by ClubLog for both direct or Bureau QSLs.
PLEASE NOTE: They will activate the OQRS system after the DXpeditions ends -- on or about Saturday, 22-September-2012. Complete instructions will be provided on the NH8S QSL page. Direct QSLs can be mailed to: Swains Island DXpedition, P.O. Box 5005, Lake Wylie, SC 29710, USA. Bureau QSLs go to AA4NN (but use the OQRS - it is faster). QSL via LoTW (Logs will be posted 6 months after the conclusion of the DXpedition). There will not be any QSLs via eQSL.
For more details on the NH8S operation, see the Web site at: http://nh8s.org

OH0, ALAND ISLAND. Raimo, OH3BHL, will be active as OH0KAG during the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/Single-Band (40m) entry. QSL via LoTW. There will be part time operations if 10m is not open.

P4, ARUBA. Helmut, DF7ZS, will once again be active from Aruba (SA-036) (probably from P40V's QTH), possibly as P40Z between October 17-21st. He plans to be active in the Worked All German Contest [WAG] (October 20-21st). Helmut informs OPDX that outside of the contest he will be active on 17/12 meters. QSL via DF7ZS.

PJ6, SABA. Mike, G4IUF (ISWL Member), will once again be active as PJ6/G4IUF from Isle House, Windwardside, Saba Island (NA-145, WFF PAFF-027, WLOTA 2043) between October 1st and November 1st. Activity will be holiday style on the HF bands using CW and SSB. QSL via his home callsign, direct or E-mail for Bureau request (see QRZ.com).

REPUBLIC OF KOSOVO (To Be On The Air Soon!). Excerpts from the IARU Region 1 Web page reports: "Monday, September 10, 2012 marked the end of supervised independence of the Republic of Kosovo, a European country with a population of 2 million, and the beginning of its status as a fully sovereign state." It also states, "Kosovo is now an independent country, which must be honored as such. As of today, a total of 91 countries, including most of the industrialized world, such as USA, Japan, Germany, the United Kingdom and France along with the Benelux and Nordic countries, have recognized the Republic of Kosovo. These powers have endorsed the final settlement, the fulfilment of which is now celebrated in Kosovo's capital Prishtina. An Amateur Radio working group headed by IARU Region 1 President Hans Blondeel Timmerman, PB2T, and including IARU Region 1 Executive Committee Member Nikola Percin, 9A5W and Mission Goodwill Kosovo Coordinator Martti Laine, OH2BH, together with their associates are in the final stages of assisting Kosovo's Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community. <http://www.voanews.com/content/supervised-independence-ends-in-kosovo/1505339.html>"
The IARU Region 1 Web page is at: http://www.iaru-r1.org

SU55, EGYPT (Special Event). Members of the Egyptian Radio Amateur Society for Development (ERASD) will activate special event station SU55J from Cairo between October 18-22nd. The ERASD will be celebrating 55th World Scout Jamboree On The Air (JOTA 55) and also participate in the event. QSL only direct to SM5AQD. Visit the Egyptian Radio Amateurs Society

Facebook page to learn of upcoming activities and all news about ERASD at:
https://www.facebook.com/pages/The-Egyptian-Radio-Amateurs-Society-For-Devel
opment-ERASD/118552214859517

T30, WESTERN KIRIBATI. Melody, T30MK, is a native living on Tarawa Atoll (OC-017) in Western Kiribati. He states on QRZ.com, "I will be pleased to contact colleagues from all over the world. Please, be patient when contacting me as T30 is a highly requested entity. I will try to offer all colleagues the chance to confirm a contact with Western Kiribati." So far, we have not seen any QSNs on the DXClusters, but we will keep you informed.

T30, WESTERN KIRIBATI (3rd Press Release - T30PY/T30SIX). "We are working on the last minute logistic issues as well as on final preparation of our operation. Although Air Pacific has changed our flight schedule multiple times, we are confident that we can keep up with the announced schedule. The first station should be on the air in the first GMT hours of October 16th. Then we will gradually have all 4 stations running. The quality and even the availability of local Internet need to be confirmed. Our goal is to upload logs in Clublog daily as well as send news to the community periodically. The current DXpeditions in the Pacific area give us additional information about the likely local propagation behavior on HF. We emphasize that we plan to have Low Band stations in every SR/SS as well as the 6m station on EME on every MR/MS. We are grateful for the support received from many individuals, clubs and companies. Support is key for the success of this enterprise.
73, T30PY / T30SIX Team <http://www.mdxc.org/t30py>"

T33, BANABA. A 14 member team of operators led by Jay/W2IJ and David/N1EMC is being planned for a DXpedition to Banaba for March/April 2013. A license has been issued (T33A), landing permission obtained and charter boat organized. The team's plan is to have 6 active stations on 160-10 meters using CW, SSB and RTTY for approximately 12 days (including two weekends) returning to Tarawa on April 10, 2013. Operators mentioned are Jay/W2IJ, David/N1EMC, Arnold/N6HC, John/N7CQQ, Charlie/W6KK, Mike/N9NS, Paul/W8AEF, Cliff/KD6XH, Jay/AA4FL, Franz/DK1II and Carlos/EA1IR. They have 3 places remaining for interested operators. For more details in joining the DXpedition, drop an E-mail to Banaba[at]T33A.com. Look for more details to be forthcoming.

T8, PALAU. Hisashi, JF2SKV, will be active as T88KV from Koror Island (OC-009) between October 26-30th. Activity will be on the HF bands using CW, SSB and the Digital modes. He will also be in the CQWW DX SSB Contest October 27-28th) as a Single-Op/All-Band entry. QSL via his home callsign. For more info, visit the following URLs: http://www.facebook.com/jf2skv http://blog.goo.ne.jp/skv_2006

TA, TURKEY. Gab, HA3JB, will be active as TA/HA3JB from Turkey between September 22nd and October 2nd. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He will also be in the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/Single-Band (??) entry. QSO is valid for the IPA Award. QSL via the CBA or his OQRS at:

http://www.ha3jb.com/oqrs.html

VK9C & VK9X, CHRISTMAS ISLAND. Sadao "Dan", JA1PBV, will once again be active as VK9XS from Christmas Island (OC-002) between now and September 20th. Activity will be on the HF bands, 80-6 meters using CW and RTTY, with a focus on NA and SA. Dan will use a IC-7000, DM-330MV, X200PC and wire antenna. See his setup from last operation at: http://ito110.com He is expected to move to Cocos Keeling Island (OC-003) and be active as VK9CS between September 21-28th. QSL via his home callsign.

VP2M, MONSERRAT. Martin, G4XUM, will be active as VP2MXU between October 23-30th. He should be active in the CQWW DX SSB Contest (October 27-28th). QSL via G3NKC.

VP9, BERMUDA. Les, N1SV, will once again be active as VP9I for the 2012 CQWW DX SSB Contest (October 27-28th). Before the contest, look for VP9/N1SV starting on October 24th on all bands. QSL VP9I via N1HRA and VP9/N1SV via his home callsign.

YB, INDONESIA (Special Certificate). To commemorate the one year anniversary of the YB Land DX Club, a special short term certificate of merit will be issued for contacting YBDXC members as well as other amateurs from YB land between September 13th and October 31st, 2012. Members of YBDXC and non member YB amateur radio stations are assigned points, and you must obtain a minimum 50 points to qualify for the certificate. The award in PDF electronic form which you can download and print is FREE. QSL cards are not required, but you will need to send log entries by E-mail to sponsor. For further details, please check out their Web site at the following URLs: http://www.ybdxc.net

Z8, SOUTH SUDAN (Update). Jim, K7QI, reports on QRZ.com that he has received his callsign, as well as Diya, YI1DZ. Their callsigns are Z81A (Jim) and Z81D (Diya) and are good for one year. Jim is now living and working in Juba, while Diya is a UN WFP telecom worker there. The two operators will soon meet and pool their resources together to help bring Amateur radio to South Sudan. Jim states on QRZ.com that "most all of Juba has no electricity and the house I've rented is the same. My company is in the process of ordering 2 generators. I am scheduled to fly back home on 25th of September 2012, and will return to Juba around late October or early November. I still need to select HF equipment and VHF equipment, and will bring the equipment back with me once I've selected the equip-ment. I am a member of AMSAT back home, and am planning on becoming active on AMSAT from here. Once I am set up and operating, I plan on being highly active, and will be on just about everyday. So please be patient, and I will be on very soon." Meanwhile, Diya, Z81D, has a station already set up and ready to go. Jim states, "Thanks to his kindness, we both will be using his station until I can get my station set up." By the way, Diya was heard on the air for the first time on September 13th,

around 1745z operating 17 meters SSB. The QSL Manager for Z81A is Frank Remington, K7GSE. Please send S.A.S.E. with 2 green stamps or 1 valid IRC to Frank. The QSL Manager for Diya, YI1DZ (Z81D), is Stefan, OM3JW. To see pictures of both licenses and Diya's radio shack located at Nyakuron South, Juba, see "DX-World.net" at:
http://dx-world.net/2012/z81a-z81d-republic-of-south-sudan
ADDED NOTE: Both operators are now active and have been on 20, 17 and 15 meters SSB.

ZL7, CHATHAM ISLAND. Hiro, JF1OCQ/W1VX/ZL1WY, will be active as ZL7A from the Chatham Islands (OC-038) between November 1-9th. Activity will be on 80-6 meters using CW, SSB and the Digital modes, with an emphasis on 80 and 6 meters. A beacon will be on 50.117 MHz around the clock. Hiro will use a TS-590S w/ACOM1000 into a Husler vertical for HF, and a FT-100 without a Linear Amp into 4 element yagi for 6 meters. QSL via JF1OCQ, direct (see QRZ.com) or by the Bureau (E-mail requests available) or LoTW. NO eQSL. For more details, see:
http://w1vx.net/pedition/zl7/2012ZL7.htm

ZL9, CAMPBELL ISLAND (Update/Press Release)[edited]. The following was release by Ed, VK2ARE, Australian publicity Officer for ZL9HR, on Sunday, September 9th: "MONSTER ANTENNA! - The HARAOA president and DX'Pedition leader Tommy, VK2IR, has just finished construction of a 40 meters, 2 element Moxon antenna yes that's right a two element 40 meters beam is gong on the ZL9HR DX'Pedition to Campbell Island (IOTA OC-037) for the activation between November 28th and December 9th. The element length is 15 metres long! To see the construction of this monster simply search for ZL9HR on Youtube: http://www.youtube.com/?watch?v Jo9LGOS7I
http://www.youtube.com/?watch?v Vvtc2ptvw
http://www.youtube.com/?watch?v EOlxcTVZ8
http://www.youtube.com/?watch?v 17FjlBQfQ
http://www.youtube.com/?watch?v 6lwNXMjCM
http://www.youtube.com/?watch?v 7p5Qkz3nI
The fitting out of the four shipping containers to take all the equipment has also been finished, and they are being packed. All of this is on schedule to be ready to be shipped out of Sydney in just a few days around the 15th of September.
The team is also delighted to have received several more sponsors, both commercial, associations and clubs and individuals all of which are listed on the web site at ZL9HR.com. Again a great vote of thanks to all of the sponsors without whom this DX'Pedition could not take place.
So where will ZL9HR operate? On which bands and which modes? While the aim is to operate on as many bands as possible and try to give as many amateurs as possible the chance to work this rare DX location, your vote on the website will affect some of the plans so if you haven't already done so, please go and vote for your preferred mode and band by going to ZL9HR.com and clicking on the survey button at the top of the home page. Presently 10m is by far the most requested band followed by 160m, as for modes CW leads Digital followed by Sideband.
Please refer to the web site ZL9HR.COM for the full, up-to-date infor-

mation about this major DX'Pedition to the Great Southern Ocean.
73 from Ed VK2ARE Australian publicity Officer for ZL9HR"

Special event. Live broadcast of MFJ 40th anniversary

Posted: 15 Sep 2012 03:54 PM PDT
http://forums.qrz.com/showthread.php?361587-Special-event-Live-broadcast-of-MFJ-40th-anniversary&goto=newpost

Live internet broadcast of the MFJ 40 Anniversary on Oct 5-6

http://w5kub.com will be broadcasting this special event. There will be

a number of special guests, there will be forums, factory tours, and a

hamfest to mention just a few of the events that will be shown live.

As in past broadcasts, W5KUB.COM will be giving prizes away to lucky

viewers who tune in to the broadcast. There will also be a live chat room

where you can talk to other hams around the world and also ask questions

realtime to the people at this event. W5KUB.COM is viewed in over 150
countries.

Please help us spread the word. You can get more updated information
regarding

the details and schedules at our facebook broadcast page at
https://www.facebook.com/groups/w5kub/

We will also be broadcasting the 4 hour drive from Memphis, Tn to
Starkville, MS, home of MFJ, on

Thursday afternoon Oct 4 starting at approx 3:00 pm Central time.

If you can't make it in person to this event, we hope we will see you on
the broadcast.

thanks, Tom W5KUB

Fox Hunting gone hog wild in Texas

Posted: 16 Sep 2012 08:35 AM PDT
http://forums.qrz.com/showthread.php?361660-Fox-Hunting-gone-hog-wild-in-Texas&goto=newpost

Everything is bigger in Texas, even fox hunting..of sorts. This article http://www.dallasnews.com/sports/mor...omments_anchor in the Dallas Morning News tells the tale of radio tracking collars being used to help hunt down packs of wild hogs in Texas. Hogs do terrific damage to crops and fields here in Texas not to mention damage to wildlife and the spread of disease. We need some APRS tracker collars so we can watch the action on APRS.FI I wonder what frequency the collars operate on?

73 and good hunting!

AMSAT NEWS SERVICE

ANS-260

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

Cubesats Deployed From Vandenberg Atlas V Launch

The Atlas V NROL-36 launch from Vandenberg Air Force Base in California, originally planned for August, successfully launched on 13 September at 2139 UTC.

This launch carried a satellite for the National Reconnaissance Office. Also aboard this flight at four cubesats as part of ELaNa IV mission and seven cubesats for government missions.

Several hours after launch Justin Foley, KI6EPH, announced via the #Cubesat IRC Channel that all eight P-PODS had successfully deployed. (Ed. Note: the #cubesat IRC channel can be found on the irc.freenode.org server)

The ELaNa Cubesats aboard are:

CINEMA (Cubesat for Ion, Neutral, Electron, Magnetic fields)

Downlinks for engineering telemetry and command are in the 2400-2450 MHz range; Science telemetry is in 2200-2300 MHz range.
CSSWE (Colorado Student Space Weather Experiment)

Downlink 437.345 MHz, 9k6 with AX25
CP5 (PolySat)

Downlink 437.405 MHz at 1 watt, AFSK on LSB AX.25 over NRZI at 1200 baud, every 2 minutes, begins 3.5 hours after first turn-on.
CXBN (Cosmic X-Ray Background Nanosatellite)

Downlink 437.525 MHz, GFSK, AX.25

The US Government Satellites aboard are:

Aeneas

First cubesat to deploy 2.4 GHz Dish Antenna. WIFI transmitter will transmit on 2425.0 MHz with 1 watt of output power.Downlink 437.600 MHz AX25 1200 bps beacon every 10 seconds and spread spectrum two-way link

elsewhere in the 70cm band.
ORSES (ORS Enabler Satellite)HorusReAerocube 4A, 4B, 4C

Testing deployable solar panels.Technology demonstration
of "parachute-like" devices to deorbit satellites.Testing closed-loop
attitude control system based around a three-axis gyroscope.

Please refer to the prior bulletin for mission summaries and satellite team
web pages.

A detailed article of the launch can be found on-line on the
AmericaSpace.org website.

[ANS thanks NASA, the CubeSat Teams noted above, AMSAT-UK, Gunter's Space
Page and nasaspaceflightnow.com for the above information]

2012 AMSAT Space Symposium & Annual General Meeting Comes to Orlando

AMSAT announces the 2012 AMSAT Space Symposium will be held on Friday,
October 26th through Sunday, October 28th. The Symposium weekend will
feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques,
News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting
open to AMSAT membersMeet Board Members and OfficersAnnual General
Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

Visit the AMSAT Web Store to complete your on-line registration.

Downloadable paper registration forms in MS-Word format and PDF format are
available on the 2012 Symposium page.

Prices for the Symposium are:

Symposium Registration including Proceedings

Through September 23, 2012: $ 45.00Starting September 24, 2012: $ 50.00At
the Door: $ 55.00
Saturday Evening Banquet $ 45.00Sunday Morning Area Coordinators'
Breakfast $ 15.00Monday (Oct 29) bus trip to KSC and entrance ticket $
100.00

The Symposium Hotel is the Holiday Inn at Orlando-International Airport is
located one mile from the Orlando International Airport (MCO). The AMSAT
discount rate is $99 + taxes per night. The reservation block code used
when calling the hotel directly is AMT.

The hotel telephone number is 407-851-6400. The Symposium Committee
recommends you make reservations by calling the hotel directly rather than
through the Web. Cutoff date for reservations is Oct 6, 2012. See the
Orlando Holiday Inn web page for more details of the accomodations.

The hotel offers free Internet connection and free airport shuttle. When
you arrive at the Orlando Airport call 407-709-5310 to request the shuttle.

The Orlando International Airport (MCO) is the closest to the Symposium and is served by most major air carriers. The hotel address is: 5750 T.G. Lee Blvd - Orlando, FL 32822. A map link is included on the hotel web page.

[ANS thanks the 2012 Symposium Committee for the above information]

2012 Symposium Banquet Speaker - Astronaut Dr. Samuel T. Durrance

The featured speaker for the AMSAT 2012 Saturday Evening Banquet on October 27 will be Dr. Samuel T. Durrance, NASA Astronaut/Payload Specialist and Professor of Physics and Space Sciences at the Florida Institute of Technology.

Biography

Samuel T. Durrance was born in Tallahassee, Florida, but considers Tampa, Florida his hometown.

He received a Bachelor of Science degree and a Master of Science degree in physics (with honors), at California State University, Los Angeles, 1972 and 1974, respectively, and a doctorate in astro-geophysics at the University of Colorado at Boulder in 1980.

Dr. Durrance has been involved in space exploration, scientific research and education for over 30 years. He has logged over 615 hours in space as a payload specialist and member of the crew of Space Shuttle Columbia for the STS-35/Astro-1 and Space Shuttle Endeavour for the STS-67/Astro-2 missions.

He played several key roles in the design, construction, integration, and operation of the Hopkins Ultraviolet Telescope and NASA's Astro Observatory. He conducted research and directed graduate students at the Johns Hopkins University for 16 years.

He has designed and built spectrometers, detectors, and imaging systems, and made numerous spacecraft and ground-based astronomical observations. He conceived and directed a program to develop adaptive optics instrumentation for ground based astronomy.

He led the team that designed and built the Adaptive Optics Coronagraph, which led to the discovery of the first cool brown dwarf, Gliese 229 b, orbiting a nearby star. He also co-discovered a telltale signature of planet formation in the dust disk surrounding the star beta Pictoris.

Starting in 2001, Durrance was the executive director of the Florida Space Research Institute (FSRI) created by the State of Florida in 2000. FSRI was located at NASA's Kennedy Space Center in support of the State's Space Life Sciences Laboratory. Durrance guided FSRI from its start up phase to a successful research and education organization.

Since 2006, he has been a professor of physics and space sciences at the Florida Institute of Technology. At Florida Tech he is developing an interdisciplinary research program and undergraduate degree program in astrobiology. His long-term goal at Florida Tech is to create a climate where students and faculty can regularly participate in space-based research programs. His research interests include the origin and evolution

of the solar system, the search for planets around other stars, planetary astronomy, atmospheric physics, nuclear physics, adaptive optics, spacecraft operations, and the origin of life.

He has published over 70 technical papers on planetary astronomy, adaptive optics, atmospheric physics, nuclear physics, and spacecraft operations.

[ANS thanks the 2012 Symposium Committee for the above information]

2012 AMSAT Symposium Schedule

To help you plan your trip to Orlando the 2012 Symposium Committee has posted a high-level schedule of the weekend's events.

Preliminary 2012 Symposium Schedule

Thursday 25 October 2012

AMSAT Board of Directors Meeting 8am - 9pm

Friday 26 October 2012

AMSAT Board of Directors Meeting 8am - Noon

Trips to the famous SkyCraft surplus store 9am - Noon

AMSAT Symposium 1pm - 5pm

Saturday 27 October 2012

Symposium 8am - 3pm

AMSAT General Meeting 3:30pm

AMSAT Banquet 6:30pm - 10pm

Sunday 28 October 2012

7:30am AMSAT Area Coordinator's Breakfast

Trip to the Orlando Science Center

Monday 29 October 2012

Special trip to Kennedy Space Center 8am-6pm. The trip will include a round trip bus from the hotel and entrance

to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus. Contact Martha if interested

Watch the AMSAT Symposium Web Pages for the latest information.

[ANS thanks the 2012 Symposium Committee for the above information]

AMSAT-NA Board of Directions Election Results

As a result of the 2012 board of directors election, Tom Clark, K3IO, Lou McFadin, W5DID, and Gould Smith, WA4SXM, will serve on the board for two years. The first alternate is Mark Hammond, N8MH and the second alternate is Patrick Stoddard, WD9EWK. The final results of the voting with 700 ballots cast are as follows:

Tom Clark, K3IO
514

Lou McFadin, W5DID
449

Gould Smith, WA4SXM
393

Mark Hammond, N8MH
309

Patrick Stoddard, WD9EWK
213

Steve Coy, K8UD
162

[ANS thanks AMSAT Corporation Secretary Alan Biddle, WA4SCA, and Martha, AMSAT Manager for the above information]

DynaCube CubeSat Under Development in South Africa

A news item on the South African Radio League reports on their September 9 amateur radio newscast that 20 interns at the Denel Dynamics Engineering Academy of Learning are designing and building the DynaCube CubeSat as part of their internship training. The interns are students who have completed their engineering degree, masters or PhD.

During the first year they spend half their time in the Academy and the other half in their designated departments. "The programme is aimed at exposing interns to a complete product development cycle", said Grant Wilson who leads the Academy. "Designing and building a CubeSat and developing a ground station to manage the satellite is an ideal project to achieve this."

The 20 strong Intern Project Team was split into three separate teams, each responsible for certain aspects of the project. Team Ground Zero is responsible for the ground station and radio frequency (RF) link components. Team Virtuoso is responsible for the cube structure and on-board computer; and Team Frodo is responsible for the payload, Attitude Control and Determination System (ADCS), and the launch.

More information about DynaCube on the SA AMSAT web.

[ANS thanks SARL and SA AMSAT for the above information]

Japan's PROITERES Launched - Signals Received

The PROITERES satellite, built by a team of students and faculty members of Osaka Institute of Technology (OIT) was successfully launched aboard India's PSLV C21 rocket on September 9.

The purpose of the mission is to demonstrate powered flight using a Pulsed Plasma Thruster (PPT) engine. Its amateur radio callsign is JL3YZK.

PROITERES stands for PRoject of OIT Electric-Rocket-Engine Onboard Small Space Ship and will transmit on 437.485 MHz FM/AFSK. The spacecraft carries a camera and the two CPU's run the Linux operating system. Amateur radio operators around the world reported copying the downlink signal shortly after launch.

[ANS thanks Mineo Wakita, JE9PEL for the above information]

AMSAT Store Grand Reopening

The AMSAT Store is fully open for business after being updated. All the usual AMSAT software, hardware, and clothing are available, as is the registration for the AMSAT 2012 Symposium and activities. Please stop by, even if you are just looking!

You can also find a link to the AMSAT Store from our main web page. It is the bottom button on the list on the

left side of the main page.

If you don't find what you are looking for here, contact Martha at the main office:

E-mail at martha at amsat.orgFrom the US call toll free at (888) 322-6728From all other locations call (301) 589-6062Fax (301) 608-3410Regular mail: AMSAT, 850 Sligo Ave. Suite 600, Silver Spring, MD 20910

[ANS thanks Alan Biddle, WA4SCA for tha above information]

Five CubeSats to be Deployed From ISS on September 27

Five cubesats launched on July 21 and now aboard the ISS have been integrated with the J-SSOD small satellite deployer on the the Japanese Experiment Module, also known as Kibo. They will be deployed with the Kibo robotic arm planned September 27, 2012. Deployment of these satellites was delayed last week due to crew EVA activities.

The five CubeSats on this mission include:

Raiko

http://www.astro.mech.tohoku.ac.jp/RAIKO/ (Japanese) 2U cubesat, photography, Ku-band beacon
We Wish

http://www.meisei.co.jp/news/2011/0617_622.html Infrared camera for environmental studies
FITSat 1

http://www.fit.ac.jp/~tanaka/fitsat.shtml High-speed data test, high power LED visual tracking CW Beacon 437.250 MHz, FM Data 437.445 MHz, High speed data 5840.00 MHz.
F-1 Vietnam Student CubeSat

On-board camera for earth observation mission VX-3R1, 437.485 MHz FM downlink:

Solar cell power only, operates in sunlight only Output power: max 0.3W, half-wave dipole antenna Morse code beacon (10 chars) using PWM CW every 30 seconds
VX-3R2, 145.980 MHz FM downlink:

Rechargeable battery, operates in dark and sunlight Output power: max 1.0W, half-wave dipole antenna AFSK 1200bps, half duplex, one AX.25 packet every 30 seconds
TechEdSat

http://ncasst.org/techedsat.html http://www.uk.amsat.org/5018 Downlink on 437.465 MHz

Satellite Shorts From All Over

California amateurs may be interested in observing the flyover on the morning of September 20, 2012, of space shuttle Endeavour. It is scheduled to perform a low-level flyover of northern California, passing near NASA's Ames Research Center and various landmarks in multiple cities, including San Francisco and Sacramento en route to its permanent home at the California Science Center in Los Angeles. Endeavour is mounted atop NASA's modified 747 Shuttle Carrier Aircraft (SCA). Additional details are posted at: http://spaceref.com/news/viewpr.html?pid=38476Keith Cowing from SpaceRef.com interviewed Flight Engineer Astronaut Suni Williams on the International Space Station:
http://www.youtube.com/watch?feature...&v=T_D_o9UxpTEScience minded hams might want to investigate CosmoQuest, home to several citizen science projects. You will find the opportunity to join Vesta Mappers - Explore the surface of Vesta, one of the largest asteroids in our Solar System. Or join Moon Mappers - to identify craters and other interesting phenomena in actual images of the moon. The Ice Investigators project will have you looking for asteroids and transient space objects to help to direct the New Horizons spacecraft. Visit http://cosmoquest.org/ for more information.This article discusses how CubeSats have captured the attention of space agencies and universities world-wide due to the significant amount of science that can now be packed aboard. Read up at:
http://thespacereview.com/article/2155/1+ The next Hudson Valley Satcom net date is Thursday, September 27, 8 PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). An echolink connection is available on the N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)

[ANS thanks everyone for the above information]

ARISS Status - 10 September 2012

1. German Students Delighted with ARISS Contact

An Amateur Radio on the International Space Station (ARISS) contact was held between on-orbit astronaut Sunita Williams, KD5PLB and students at the Gymnasium Michelstadt in Michelstadt, Germany on Friday, September 7. Williams was able to answer 14 questions posed by the students during the ISS pass. Over 1600 students, teachers, and VIP's were in attendance, as well as representatives from radio, television and newspapers. Positive feedback was received from the school, including the following: "Older colleagues compared the feeling to

watching the moon landing in TV. Our Kids were electrified and already now we can see an increased interest in sciences and extracurricular activities. We are planning to continue this topic and have further projects in this field." Video has been posted. See: http://www.youtube.com/watch?v=4xmL6wSPWzE

2. Girls' School Speaks with ISS Astronaut

On Sunday, September 9, Tara Anglican School in North Parramatta, New South Wales, Australia spoke with Astronaut Sunita Williams, KD5PLB via an Amateur Radio on the International Space Station (ARISS) contact. The radio connection was provided by telebridge station ON4ISS in Belgium. The contact was integrated into the school's science and space curriculum. Tara Anglican, a girls K-12 school, was selected by Oxford University as the Australian school to participate in the Global Jet Watch Program which links astronomers at Oxford University with students from four high schools around the world in Australia, Chile, South Africa and India in order to carry out cutting edge research. Oxford University installed a research grade 20 inch RC Optical telescope, together with custom designed instrumentation and an observatory with a 4.5 metre dome on Tara's grounds for use by the students. The school also formed a partnership with the Astronomical Society of New South Wales (ASNSW) through which students are mentored in complex astronomy projects by experienced amateur astronomers.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Radio News Bulletin
Sunday 16th September 2012

Licence Examination

Almost all of the places have been allocated for the next Amateur Station Licence Examination which will be held on Thursday 4th October at 2 p.m.in the ComReg Offices in Dublin. The closing date for receipt of applications is Thursday next 20th September but there are very few places still available

Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis.

Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

North Cork Radio Group

North Cork Radio Group would like to sincerely thank all the supporters that attended our rally, it was a brilliant day and we had the opportunity to chat to many of our great friends. Thanks especially to the traders, sellers, and to all those who kindly donated raffle prizes, to include South East Communications, Longs Communications, Blackrock Castle Observatory, Claus Stehlik EI7JZ and Dan from Frequency Db. Your support as ever is much appreciated. The winners of the prizes were:-

Pat Ryan, Ken O'Driscoll, John Cahill, Dave Deane EI9FBB and Dave EI9GBB.

We also wish to thank the IRTS, especially Pat EI2HX and Ger EI4GXB, who attended and gave us a lovely pile of QSL cards to sort. Morse tests were held on the day and many are awaiting their official results.

A big thank you also to our new hosts, the Commons Inn in Blackpool who kindly allowed us the use of their facilities. We are pleased to

announce that our rally will take place at this venue again next year as the location was a huge success and was a perfect venue for all involved.

A final thanks is to be given to all our members who assisted in the planning and execution of the event, especially Edwin EI2HEB for his many phone calls and emails, and we look forward to doing it again.

Our next activation to take place at Cork City Gaol in October.

Achill Henge CASHOTA Activation

The Galway VHF Group will be activating Achill Henge on Sunday the 16th of September from 11 am - 3 pm and active on 80, 40 and 20 metres. Achill Henge is a "stone henge" like structure that was built on a hilltop on Achill Island near the village of Keel. The Henge was built in record time over the weekend of 26th and 27th of November 2011. Achill Henge is located in WAI Square F60 Co. Mayo &#65533;nd has the CASHOTA Designator EI-02-M. The Callsign for this operation will be EI4ALE/P. Check out EI4ALE on QRZ.com for more details.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held on Sept 19th, October 3rd, October 17th, October 31st. All are welcome to enrol and this will be a fun learning experience. More information from www.ei7dar.com or secretary at ei7dar dot com.

DX News

The well-known DXer JA1PBV will operate as VK9XS from Christmas Island from 16 - 20 September. This will be followed by an operation from Cocos Keeling Island as VK9CS. QSLs for both stations go via the home call.

A multi-national team will put Conway Reef in the South Pacific Ocean on the air from 24 September until 5 October. The callsign will be 3D2C and QSL manager is YT1AD.

Jim K7QI is expected to be QRV from South Sudan in the coming weeks. He will use the callsign Z8AAA. This will be the first activity since the ST0R DXpedition in July/August last year when South Sudan became an independent country. Expect major pile-ups.

A group of 6 Belgian operators will be in Liechtenstein from 18 - 23 September. Look out for them signing HB0/home calls. They plan to be on all bands 10 - 80m using SSB and CW.

Fists CW Club

On the Facebook Page of the FISTS CW CLUB, you can access a recording made by Finbar O'Connor , Radio Officer, at the closing down of Malin Head Radio Station in County Donegal. At that time 5 Compact Discs were recorded and these have now been converted to MP3 files and the link is available for all to listen to by clicking on the FACEBOOK PAGE of the FISTS CW CLUB.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

GB2RS NEWS

Sunday 16th September 2012

The news headlines:

Final hours of the Contest General Rules Proposals

Request for proposals to fund a radio propagation-related project

RSGB Convention draft lecture programme revealed

The consultation on Contest General Rules proposals is in its final hours, closing at 2359 BST today, 16 September. It is open to all RSGB members. Full details appear at www.rsgb.org/pages/?id=contest-general-rules-proposals.

The RSGB's Propagation Studies Committee is inviting proposals to fund a radio propagation-related project, up to a maximum of £1,000. The PSC was recently bequeathed £1,000 by the late Charlie Newton, G2FKZ, who died earlier this year. Charlie was an active member of PSC and also helped educate other amateurs about propagation matters through talks and lectures. He was also the author of the book Radio Auroras, which is viewed as a definitive guide to this type of propagation. His bequest was made to help fund propagation-related research and the PSC is looking to hear from any person or group who might have a detailed proposal for how the money could be used. Full written proposals, including details, costings and likely timescales, should be submitted to PSC chairman Steve Nichols, G0KYA by email to steve@infotechcomms.co.uk by 31 December 2012.

The draft lecture programme for the RSGB Convention on 12 to 14 October has been released. It is available online at www.rsgb.org/rsgbconvention and also appears in the October edition of RadCom. The Partners Programme for the RSGB Convention has a day trip planned for Saturday 13 October. This will include a visit to Oxford, including one of the colleges where participants will have the chance to experience matriculation day, seeing freshers dressed in their black gowns. Other highlights will be the Sheldonian theatre and Bodleian library area, finishing with some retail therapy at the Covered Market. Tickets for all aspects of the RSGB Convention on 12 to 14 October are still available, including weekend packages. Details are online at www.rsgbevents.org.

Members of Sands Contest Group will be activating the Isle of Man, IOTA reference EU-116, from 23 to 29 September. The group will use the club

call MT0SCG and will be active on most HF bands using SSB and datamodes. The base location is next to a small beach, close to the town of Ramsey at the NE end of the island, locator IO74UH. The group is likely to activate at least one SOTA summit during the week, probably on 2m FM.

This year's D-Star QSO Party runs from 0000UTC on Friday 21 September to 2359UTC on Sunday 23rd. The goal of the D-Star QSO Party is to communicate through as many D-STAR repeaters as possible throughout the world. All operators who submit an approved log will be eligible for the prize draw with winners randomly selected for each prize. For more information on this year's event go to www.icom.co.jp/world/d-starparty2012/.

And now for the details of rallies and events for the coming week

Today, 16 September, the Torbay Annual Communications Fair will be held at Newton Abbot Racecourse, Newton Abbot, Devon TQ12 3AF. There will be trade stands and Bring & Buy as well as an RSGB bookstall. Doors open from 10am and admission is £2. Details from Mike Dixon on 01803 557 941.

Next weekend, on Saturday 22 September, the Fog on the Tyne Rally will be held in Whitehall Road Methodist Church Hall, Bensham, Gateshead NE8 4LH, organised by Angel of the North ARC & South Tyneside ARS. Entry is £1.50 and

Copyright © RSGB 2012. Not for public release before Monday 17 September 2012 except as a GB2RS broadcast. the doors open at 10.30am. There will be trade stands and plenty of car parking available in the school next door. More details from Nancy Bone, G7UUR on 01914 770 036, evenings only please.

The Great Northern Hamfest takes place at the Barnsley Metrodome, Queens Road, Barnsley on Sunday 23 September. The post code for those with a satnav is S71 1AN. Follow the large brown Metrodome signs from the A roads into town. There will be trade stands, special interest groups and clubs, disabled facilities, family attractions, prize draw, free parking and extensive catering facilities including a licensed bar and restaurant. Doors open at 11am. For more information contact Ernie G4LUE on 01226 716 339.

Now for the news of special events

GB5IFC will be on the air until 17 September to celebrate the 51st International Federation of Railway Radio Amateurs Congress at Sheffield.

To celebrate the 39th Ryder Cup, GB39RC will be operational from Verulam Golf Club in St Albans until 30 September. Operation will be on 10, 15, 20 and 40m using mostly CW and RTTY. Full details of the QSL route is given on QRZ.com.

South Lancs Amateur Radio Club will be on the air from the site that was Bickershaw & Abram Station that closed 48 years ago, using the callsign GB1BAS. On the air from 0000UTC on 22 September until 1400 on 23 September, they plan to use the 80, 40, 20, 10, 2m and 70cm bands.

Huntingdonshire Amateur Radio Society will be operating special event station GB0NVR at the Nene Valley Railway, Wansford, near Peterborough on 22 and 23 September for Railways on the Air. This will coincide with NVR's Steam Gala when both the 50163 Tornado and 71000 Duke of Gloucester locomotives are scheduled to appear.

On Sunday 23 September, GB50WVR will be taking part in Railways on the Air weekend from the Keighley & Worth Valley Railway in West Yorkshire. Direct QSLs should go to s via Pam, 2E1HQY who is QTHR. More information can be found on QRZ.com.

Preston Amateur Radio Society will be activating GB0LMR for Railways on the Air. Starting on the evening of Friday 21 September and running through to Sunday 23rd, the station will be located at the miniature railway on Worden Park, Leyland. The highlight of Sunday will be when RSGB President Dave Wilson, M0OBW visits to meet the Mayor, and have a ride on one of the trains with Alex Sorley, M6CDA. At 10 years old, Alex is the youngest licensed member of the club. Due to bad weather earlier in the year, the Leyland Festival had to be postponed and it is now on at Worden Park on these dates. If you require further information you can consult the website for Railways on the Air and also QRZ.com. There will be a talk-in station on 2m.

And now the DX news compiled from 425 DX News and other sources

DL3JH, is active as DL3JH/6Y5 from Jamaica until 22 September. His operation should be on all of the HF bands using CW and SSB. QSL via his home callsign only.

Members of the Black Country DX & Contest Group will be on the air as MS0OXE from Tiree Island until 21 September. The station plans to use SSB, CW and RTTY on 10 to 80m using a HexBeam. QSL via M0URX either via the bureau, direct or Logbook of the World.

Robert, W3BTX and Roy, W3TEF, will be active from Aruba using P49T until 21 September. QSL via W3BTX either via the bureau or direct.

Copyright © RSGB 2012. Not for public release before Monday 17 September 2012 except as a GB2RS broadcast. Now the contest news

The Worked All Britain 144MHz QRO Contest takes place today, Sunday 16 September, from 1000 to 1400UTC. The exchange is signal report, serial number and WAB square. Full details of the rules and also log sheets can be obtained from the WAB website, www.worked-all-britain.co.uk or from the contest manager, G3XKT, e-mail aebbooks@ntlworld.com.

The 1.3GHz UK Activity Contest takes place on 18 September from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

On Sunday 23rd, the Practical Wireless 70MHz Contest runs from 1200 to 1600UTC. It has Low Power, that's 10 watts in this contest, and Open sections. Scoring is 1 point per contact, multiplied by the number of Locator squares worked. Using all modes on the 4m band, the exchange is signal report, serial number and locator. As this is the 80th anniversary year of Practical Wireless, expect a good turnout.

The BARTG Sprint 75 takes place on the same day. Available sections are Single Operator Expert and Single Operator All Band. Running from 1700 to 2100 and using bands from 3.5 to 28MHz, the exchange is the serial number.

And now the solar factual data for the period from Friday the 7th to Thursday the 13th of September, compiled by Neil Clarke on Friday the 14th of September

Six sunspot groups were visible on the 7th but this was down to three by the 13th. Solar activity increased to moderate levels on the 8th and 9th when a single M1 class solar flare took place on both days. Solar activity was low on the remaining days with occasional small C class solar flares taking place. Solar flux levels declined from 133 units on the 7th to 99 by the 13th. The average was 115 units. The 90 day solar flux average on the 13th was 123, that's one unit down on last week. X-ray flux levels declined from B7.1 units on the 8th to B3.1 by the 13th. The average was B4.9 units. Geomagnetic activity was quiet every day. The most disturbed day was the 8th, with an Ap index of 10 units. The average was Ap 6 units. Solar wind data from the ACE spacecraft saw solar wind speeds decline from 440 kilometres per second on the 8th to a slow 260 kilometres per second on the 11th and the 12th. Speeds then increased on the 13th to 450 kilometres per second, which are the first signs of an expected coronal hole disturbance arriving. Particle densities were low except for a rise to 25 particles per cubic centimetre on the 12th. Bz varied between minus 7 and plus 11 nanoTeslas on the 12th and between minus 3 and plus 2 nanoTeslas on the quietest days. Though well past the summer seasonal peak, occasional Es events took place on both 50 and 70MHz.

And finally the solar forecast from Sunday the 16th of September. This week the quiet side of the Sun is expected to be looking our way. Solar activity is expected to be low, with only C class solar flares taking place and only a small chance of any larger flares. Solar flux levels should be just below the 100 mark today but from midweek levels should start to increase. Geomagnetic activity could be unsettled at first due to the after effects from a coronal hole disturbance that is just coming to an end and then be mostly quiet for the remainder of the week. MUFs during daylight hours at equal latitudes should be about 24MHz for the south and 21MHz for the north. Darkness hour lows should be around 10MHz. Paths this week to South Africa should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will be between 1100 and 1600 hours UTC.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. South Kesteven Amateur Radio Society is operating the GB0FRS special event station and attending the Fire Station open day today, Sunday 16th. On Wednesday there is a VHF Contest primer talk and presentation by G8NWC & G1ZJP from SDARS. Contact Nigel, M0CVO, on 01476 402 550.

Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. Tuesday sees a talk on the 4W6A Timor Leste DXpedition by Tim, M0URX, and on Friday there's a social evening in the shack. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm, and on Friday there is an HF club net on 3.748MHz. Contact the FELCC Information Line on 07554 362 020.

Lincoln Short-Wave Club is holding a committee meeting on Monday from 19.30 at the shack. On Wednesday there's a formal meeting at the BSA Club at 20.15. The Thursday club net on 145.375MHz from 2000 and there's the Saturday surgery in the shack from 09.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding a committee meeting on Monday. On Thursday there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Central Radio Amateur Circle commences its Intermediate course on Thursday via Skype with MX0PPC. On the same day there is a meeting at the Turf Tavern, Wolverhampton Road, Bloxwich, WS3 2EZ. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is on the air. Contact Albert, G0KFS, on 01922 614 169.

On Monday Welland Valley Amateur Radio Society is having a round robin Q & A session. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday Derby & District Amateur Radio Society is considering technical topics. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is having a talk on software defined radio by Steve, G8EBM. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is holding a general meeting and training class. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday Telford & District Amateur Radio Society is considering that the club needs to buy, and invites members to put forward their ideas. Contact Mike, G3JKX, on 01952 299 677.

Copyright © RSGB 2012. Not for public release before Monday 17 September 2012 except as a GB2RS broadcast. On Thursday Cheltenham Amateur Radio Association is having a talk on measuring SSB linearity & power by Robert, G4VCL. Details from Derek Thom, G3NKS, on 01242 241 099.

On Friday Bromsgrove & District Amateur Radio Club has a committee meeting. Contact Chris, M0BQE on 01905 776 869.

On Friday Coventry Amateur Radio Society is having a quiz night. Contact John, G8SEQ, on 07958 777 363.

On Friday Melton Mowbray Amateur Radio Society is holding its AGM. For more information contact Geoff, G3STG, on 01664 480 733.

On Sunday 23 September Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

NEWS FOR THE NORTH OF ENGLAND Angel of the North Amateur Radio Club is making preparations for the rally on Monday. On Tuesday there's amateur radio training with Girls Brigade. On Saturday 22 September it's the Fog on the Tyne Rally, and the 22nd Great Northern Rally on Sunday. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Bolton Wireless Club is having a talk by Elaine, 2E1BVS on a chance encounter that led to the Shetland Isles. For details, send an email to boltonwireless@gmail.com.

On Monday Sheffield Amateur Radio Club is looking back on the year's contest efforts. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday Chester & District Radio Society is holding a surplus sale. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday Halifax & District Amateur Radio Society is holding its AGM. Details from Martin, M0GQB, on 01422 341 317.

On Tuesday Morecambe Bay Amateur Radio Society is holding a HF & 70cm night. Contact Sheila, on 07867 516 836.

On Wednesday Denby Dale Radio Club is having a club night. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Goole Radio and Electronics Society is having a contest planning evening. Contact Ken, G6YYN, on 01757 638 539.

On Thursday South Manchester Radio and Computer Club is having a surplus equipment sale. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is having a night on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is having a debrief session for Ayr Flower Show and ILLW weekend. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday Wigtownshire Amateur Radio Club is holding its AGM. More information from Ellis Gaston, GM0HPK, on 07979 692 580.

Copyright © RSGB 2012. Not for public release before Monday 17 September 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. East Kent Radio Society is having a talk on portable aerials on Monday by Karl, M1DFM. Sunday 23rd sees the Stelling Minnis meeting and picnic. Details from Karl Davies, M1DFM, on 01227 710 120.

Farnborough & District Radio Society is running a Top Band net on 1.995MHz on Monday. On Wednesday there is a CW net on 3.570MHz from 8pm, to which all are welcome. Friday sees a 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Bromley & District Amateur Radio Society is having a talk on digital amateur TV on Tuesday by Justin, G8YTZ. Details from Andy, G4WGZ, on 01689 878 089. The Foundation class continues on Saturday. Details from Andy, G4WGZ, on 01689 878 089.

Norfolk Amateur Radio Club is having a quiz on Wednesday and invites everyone to bring their own question along for the list. On Saturday 22 September there's a joint Railways on the Air weekend event with the Bittern DX Group at North Norfolk Railways stations. Details from Chris Danby, G0DWV, on 01603 898 678.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society is having a natter night. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is holding an open evening to celebrate its 75th anniversary. Contact Dave, G4XDU, on 01628 625 720.

On Monday Surrey Radio Contact Club is holding a natter and fix-it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Stevenage & District Amateur Radio Society is having a talk and demo on the Slim Jim by G4KGP. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Tuesday Verulam Amateur Radio Club is having a talk and demo by Middlesex University Robotics Department, who recently scored top marks at international drone competition. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday Banbury Amateur Radio Society is looking at fault-finding techniques for use in amateur radio equipment. Contact John, G8OZH, on 07774 525 818.

On Wednesday Chesham & District Amateur Radio Society is discussing a technical topic. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Havering & District Amateur Radio Club is having a talk on radio mesh by Howard, G8DXV. More information from John, M0UKD, on 07890 222 111.

On Wednesday Worthing & District Amateur Radio Club is holding its annual construction contest. Contact John, G8FMJ, on 01273 593 232.

On Thursday Bredhurst Receiving and Transmitting Society is having a talk by G8JAD on a coil-less VFO. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday Cray Valley Radio Society is having a talk on one man DXpeditions by Nobby, G0VJG. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a talk on fuses by Hugh Rooms, M1ETU. Contact Stuart, G0FYX, on 02392 472 846.

Copyright © RSGB 2012. Not for public release before Monday 17 September 2012 except as a GB2RS broadcast. On Thursday Shefford & District Amateur Radio Society is having a talk on WiNRADiO by Richard Hillier, the General Manager of Radixon. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday Sutton & Cheam Radio Society is having a talk on the MKARS HF SDR receiver kit by Steve Drury, G6ALU, of Milton Keynes Amateur Radio Society. Details from Darren, M0PRV, on 07525 753 702.

On Thursday Vange Amateur Radio Society is having a talk. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Mid-Sussex Amateur Radio Society is having a talk and demo by John Narborough on Victorian and Edwardian electro-medical machines. Contact Rob, 2E0RJA, on 01444 232 129.

On Saturday Huntingdonshire Amateur Radio Society is taking part in Railways on the Air weekend from Nene Valley Railway. Details from David Leech, G7DIU, on 01480 431 333.

On Saturday Southgate Amateur Radio Club commences its weekend event operating GB0TLR for Railways on the Air. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Exeter Amateur Radio Society has its HF net on Monday on 3,675kHz at 19:45. The 2m net is on Tuesday and the 4m net is on Thursday. Contact Nick, 2E0NRJ, on 01363 775 756.

South Bristol Amateur Radio Club is having a briefing for Railways on the Air on Thursday. Saturday sees the start of the Railways on the Air weekend event. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Monday Appledore & District Amateur Radio Club is having a back to basics talk on HF propagation by Terry, G4CHD. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Monday Riviera Amateur Radio Club is having a club night. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a homebrew project surgery. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday Trowbridge & District Amateur Radio Club is having a natter night. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday Cornish Radio Amateur Club is holding a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317 750.

On Friday Torbay Amateur Radio Society is having a natter night and an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday Dragon Amateur Radio Club is having a talk on mountain rescue by MW6BKS. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday Carmarthen Amateur Radio Society is holding an open night. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday Wrexham Amateur Radio Society is having a talk on the life story of a telly mender. Contact Frank Bailey, M1EYH, by email to

fcbailey20@btinternet.com.

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Sep 17 1309 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
10 - 16 September 2012

Solar activity was at low levels during the first half of the of the
summary period, and ended the week at very low levels. Region 1569
(S12, L=296, class/area=Eac/210 on 14 September) was the largest and
most magnetically complex region of the period, yet only yielded
four C-class flares. The largest of these was a C3/Sf flare that
occurred at 11/0111Z. A filament eruption occurred near N22W20 at
approximately 13/0640Z. The associated CME had an estimated speed of
536 km/s, but had little to no impact on Earth. A Type II Radio
Sweep occurred at approximately 15/2259Z, had an estimated speed of
681 km/s, and was associated with a non-Earth directed CME near the
north west limb.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels on 10 and 12 September. Moderate levels were observed on
11 September and again from 13 - 16 September.

The geomagnetic field was at quiet levels throughout the period with
two isolated unsettled periods on 12 September and 15 September due
to extended periods of negative Bz. A solar sector boundary crossing
was also observed at approximately 16/1800Z.

Forecast of Solar and Geomagnetic Activity
17 September - 13 October 2012

Solar activity is expected to be at very low to low levels with a
chance for moderate activity throughout the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is
expected to be at high levels on 18-20 and 24-27 September, then
```

again from 07-09 October.

Geomagnetic field activity is expected to be quiet to unsettled with active conditions possible on 19-22 September, 03-05, 09-10, and 12-13 October. The active conditions are mainly associated with coronal hole high speed streams.

SB DX @ WW < KB8NW $OPDX.1079.1
Ohio/Penn DX Special Bulletin No. 1079.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1079.1
BID: $OPDX.1079.1
September 17, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, DX-World.Net, VA3RJ & ICPO and various sources for the following DX information.

REPUBLIC OF KOSOVO (On The Air!). A few different sources are reporting the following [edited]:

* Sept 17 - Z60K - Launch of Amateur Radio in Pristina, Kosovo. IARU Project.

Z60K now listed on Club Log with the following message: Provisionally The Republic of Kosovo - pending news from ARRL. This DXCC is temporarily marked as a current DXCC entity in Club Log in order to allow the expedition log search features to function correctly. Approval for this operation will come from ARRL alone.

On September 17th, shortly after 1700z, international and local ops started operating as Z60K from near Pristina, Kosovo on both 20 and 17m SSB. Operators included Emil/9A9A, Bob/MD0CCE, Martti/OH2BH and Pekka/OH2TA. Local TV recorded the moment live on air. QSL via G3TXF.

An Amateur Radio working group headed by IARU Region 1 President Hans Blondeel Timmerman, PB2T, and including IARU Region 1 Executive Committee Member Nikola Percin, 9A5W, and Mission Goodwill Kosovo Coordinator Martti Laine, OH2BH, together with their associates are in the final stages of assisting Kosovo's Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community.

REPUBLIC OF KOSOVO (Update/On The Air!). The following was posted on QRZ.com [edited]:

Z60K Republic of Kosovo
Amateur Radio Association of Kosovo
SHRAK
Pristina
Republic of Kosovo
QSL: VIA G3TXF

Monday, September 10, 2012, marked the end of supervised independence of the Republic of Kosovo, a European country with a population of 2 million, and the beginning of its status as a fully sovereign state. The ceremonies featured a keynote address by a former UN Envoy for Kosovo, President Martti Ahtisaari of Finland, an architect of the March 26, 2007, Comprehensive Proposal for the Kosovo Status Settlement which now came to its completion.
In his speech at Monday's special session of the Kosovo Parliament, President Ahtisaari stated: "Five years ago I offered to the Secretary-General of the United Nations a blueprint for a sovereign, multi-ethnic democracy called Kosovo. Today we celebrate the full and final adoption of the principles and structures of that blueprint into the institutions, the processes, and the legal framework of an independent, functioning state."
Pursuant to the Settlement Proposal, an International Steering Group (ISG) - consisting of twenty-five countries - was formed to oversee and guide the development of good governance, multi-ethnicity and rule of law in Kosovo. The ISG has now completed its duties, allowing Kosovo to continue with full sovereignty and the management of its own affairs as a member of the world community.
This is now the overall state of affairs regarding Kosovo's formal

status, which enables the country to pursue its chosen course independently
into the future. Kosovo is now an independent country, which must be
honored as such.
As of today, a total of 91 countries, including most of the industrialized
world, such as USA, Japan, Germany, the United Kingdom and France along
with the Benelux and Nordic countries, have recognized the Republic of
Kosovo. These powers have endorsed the final settlement, the fulfilment
of which is now celebrated in Kosovo's capital Prishtina.
An Amateur Radio working group headed by IARU Region 1 President Hans
Blondeel Timmerman, PB2T, and including IARU Region 1 Executive Committee
Member Nikola Percin, 9A5W, and Mission Goodwill Kosovo Coordinator Martti
Laine, OH2BH, together with their associates are in the final stages of
assisting Kosovo's Telecom Authorities in drafting regulations governing
Amateur Radio in Kosovo, to bring the original Kosovar operators and their
revitalized Amateur Radio Association back to the international community.

Kosovo at last recognized by IARU and on the air!

Posted: 18 Sep 2012 01:47 AM PDT
http://forums.qrz.com/showthread.php?361867-Kosovo-at-last-recognized-by-IARU-and-on-the-air!&goto=newpost

Last night a "new" country came on the air: the Republic of Kosovo with a number of wellknown operators under the callsign Z60K.

This has been a long-drawn business. Kosovo declared its independence in February 2008 but has been under international protectorate,

which has now been lifted (most of it anyway). This made it possible for the IARU and its DXCC Committee to recognize the Republic of Kosovo

as a separate country and a valid DXCC entity.

Z60K has been heard on several bands and modes, so far.

This is good news, to most of us. But some people who listen to the nationalists in their country are not satisfied. From Serbia and countries allied

with YU like Russia and Ukraine, there is talk of "pirate operation." This is nothing but mixing politics into ham radio, forgetting that facts are facts:

IARU recognition, an independent state, recognized by about 90 nations so far. The problem is that the territory of Kosovo is disputed by Serbs and Albanians.

In addition to the facts mentioned above, I personally feel that the will of 90% of the population, not to return to Serbian rule under any circumstances, is a stronger argument than old Serbian monasteries and churches in Kosovo, making Serb nationalists entangle in myths which are truly unrealistic. Reconciliation is necessary in the Balkans, but it is necessary to see facts instead of myths of history.

No need to say more. Hope those who do not recognize the existence of the Republic of Kosovo could realize that they are just as childish as if a man whose wife, who was married to him by force, cannot accept that she has taken divorce and lives on her own. This is lack of maturity! A wife in this case has got her own will, the people of Kosovo as well, whatever they

think in Belgrade - and Moscow!

IRLP & EchoLink Made Easy

Posted: 17 Sep 2012 10:48 AM PDT
http://forums.qrz.com/showthread.php?361788-IRLP-amp-EchoLink-Made-Easy&goto=newpost

Feeling a little intimidated about using IRLP? Having trouble getting
EchoLink to work on your home PC? Interested to learn about all the cool
nets and discussion topics available through both of these applications?
If so, then don☐t miss the IRLP & EchoLink Made Easy tutorial on the
VA3XPR repeater on Thursday September 20th @ 7:00pm ET. This interactive
tutorial, which is part of the VA3XPR ☐Over The Air Learning☐ series, will
teach participants all about IRLP and EchoLink operation, whether using an
HT, PC or smartphone and is intended to help amateur radio operators make
the most of this great hobby. This tutorial will be delivered using both
the VA3XPR repeater and the VA3XPR.net website.

For more information, go VA3XPR website at:
http://www.va3xpr.net/irlp-echolink-made-easy/

Cheers!

Don

BDARA Members Gather To Celebrate Hari Raya:

Posted: 17 Sep 2012 05:33 PM PDT
http://www.eham.net/articles/28990

Bandar Seri Begawan - Members of Brunei Darussalam Amateur Radio Association (BDARA) are urged to enhance cooperation in carrying out works that have been planned as BDARA is among one of the active associations in the country. This was highlighted by President of BDARA, Pengiran Haji Salleh Ab Rahaman bin Pengiran Haji Damit (V85DX) at the Hari Raya Aidilfitri celebration held recently at the Centrepoint Hotel in Gadong. The President of BDARA also expressed his appreciation and thanks to the members of BDARA that had contributed in implementing support and welfare activities this year for the progress of the association and the country Meanwhile, Major (Rtd) Haji Tamat bin Haji Lampoh (V85TL), the association's Secretary General, in his speech said the activity is the association's annual event which aims to celebrate Hari Raya and at the same time to enhance closer relationship among the members of BDARA and their families.

==> HURRICANE ISAAC PROMPTS DISASTER RESPONSE

Seven years to the day that Hurricane Katrina smashed into New Orleans,
Hurricane Isaac came calling. But instead of making landfall right at
New Orleans like Katrina (a Category 3 storm) did on August 28, 2005,
Isaac veered slightly to the west of the city. Through it all, hams at
WX4NHC <http://www.wx4nhc.org/> -- the Amateur Radio station at the
National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) in Miami,
Florida -- and those supporting the Hurricane Watch Net (HWN
<http://www.hwn.org/>) and the VoIP Hurricane Net
<http://www.voipwx.net/>, along with various nets within the ARRL's
Delta Division, relayed reports to their served agencies on Isaac's
progress and the damage the storm created in its wake. More here
<http://www.arrl.org/news/hams-heed-the-call-to-help-as-isaac-makes-landfall-downgraded-to
-tropical-storm>.
-- ARRL HQ

The VoIP Hurricane Net <http://www.voipwx.net/> running on the
*WX_TALK* EchoLink conference node 7203/IRLP 9219 was active over a two
day period from Tuesday, August 28, through Wednesday, August 29, as
Hurricane Isaac pounded the US Northern Gulf Coast with high winds,
extremely heavy rainfall, significant storm surge and river and stream
flooding. The VoIP Hurricane Net operated for more than 25 hours
continuously during the US coast landfall. More here
<http://www.arrl.org/news/voip-hurricane-net-provides-support-during-hurricane-isaac>.
-- ARRL HQ
```

ARES® EC's, DEC's, and SEC's: Don't forget to report activity related to Hurricane Isaac. -- Mike Corey, KI1U, ARRL HQ Emergency Preparedness Manager

```
Mississippi Responds

[The following report came from ARRL Mississippi Section Manager
Malcolm Keown, W5XX]. Mississippi has managed to escape the hurricane
bullet for three years in a row, but our luck ran out this year. Isaac
```

came ashore on August 28 leaving substantial damage to the power grids in south Mississippi and southeast Louisiana as well as long term flooding. The Mississippi Emergency Management Agency (MEMA) reports that the most damage was experienced in Hancock, Harrison, Jackson, and Pearl River counties with 44 more counties north of the Coast being impacted.

The ARES/RACES response was well organized with station KM5EMA on from MEMA, the Delta ARES Emergency Net handling tactical traffic, and the Mississippi Emergency Net handling health/welfare traffic. Thanks to Jim Rapp, WS7EOC, Richard Webb, NF5B, and Douglass Sullivan-Gonzalez, K5DSG, respectively, for managing these operations. In addition, James Ready, N5LRQ activated the two-meter link from Jackson to the Coast, and several SKYWARN nets were activated. Operation from county EOCs was reported from Forrest, Greene, Hancock, Harrison, Hinds, Jackson, Lauderdale, Pearl River, Stone, and Warren counties. Others may have been activated but have not been reported as of this writing.

NF5B reported that the Delta Emergency Net operated continuously for 46 hours. Many thanks go to net control stations who manned one or more two hour shifts. Net Manager K5DSG reported that the Mississippi Emergency Net operated for 30 hours.

A widespread communications emergency did not develop and there was not much resulting traffic; however, this was an excellent opportunity to test our readiness for catastrophic events in that we had not had an exercise of this magnitude since 2008. Many thanks the DEC's, EC's, AEC's, and ARES members who activated stations as part of the ARES response to Isaac.

William Musa, K5YG, advised from the Ocean Springs EOC that the Ocean Springs Command Center asked that an emergency message be passed to authorities in Louisiana regarding two adults and one child that were trapped in an attic as a result of attempting to escape flood waters. This message was passed on the Delta Emergency Net to the Louisiana State EOC. Later in the day word was received that the three people had been rescued along with 15 others rescued as a result of the message originating from the Ocean Springs EOC.

>From the September 2012 issue of the MCARA Splatter, Harry Samuelson, KB9ZR, reported that the Harrison County EOC was activated on August 28. In response, Harrison County EC Jeff Smith, N9OKV, activated ARES to man the EOC station W5SGL. The ARES team was divided into three shifts to ensure 24 hour coverage. W5SGL operators monitored the HF Nets as well as the local Emergency Net on the Biloxi 146.73 MHz repeater. Many area hams checked into this net and monitored, ready to respond. These hams provided the EOC team with information as to conditions in their respective areas. W5SGL was secured on August 30, 2012.

There were over 106 check-ins on two-meters, one emergency message was sent, 136 routine RMS messages sent, and numerous bulletins passed

during the activation period. The EOC team used RMS Express for the first time, passing information to MEMA in Jackson, the SHARES Coordinator at DHS in Washington, DC, and ARRL Mississippi Section Manager W5XX via the Internet, VHF, and HF channels. Much was learned about EOC operations/procedures by everyone. EC N9OKV was very pleased with the ARES activation and thanked his team for their support.

In Hancock County, the EOC was manned by Thom Kelly, KF7SEB, and Jeff Urbaniak, KF5JTK, the entire time of the event lasting approximately 50 hours. The traffic passed was minimal, mostly local reports of roads flooded. The Hancock County EOC was not located in a permanent location using a building that could be penetrated by RF and the team was unable to find an available opening to run coax for an outside antenna and was forced to use Echolink during the first 36 hours of the operation. After the Internet went down, KF7SEB resumed operations from his vehicle until the MEMA link to Jackson was lost. KF7SEB noted that the activation went as well as could be expected considering the activation was on very short notice and trying to operate from a non-radio friendly structure. He looks forward to working on a solution for future events including plans to have a cross band repeater or a full mobile repeater.

>From Forrest County, EC Sam Williams, N5SP, reported that he and Lex Mason, KD5XG, DEC Larry Morgan, AG5Z, and Roderick Balam, KF5BLR, went to the EOC prior to the arrival of Isaac to inspect and determine the operational status of the Amateur Radio equipment. It was determined that additional equipment was needed to interface the HF radio to the amplifier. A phone call was made to MFJ and with their assistance an order was placed. Upon arrival, the equipment was installed, which solved the problems. The EOC activated at 1700 on August 28, with Emergency Management District Forrest County ARC station KC5WFM being activated at the same time. The emergency nets were monitored and checked into numerous times.

Jasper County EC Albert McDonald, WV1Q, reported that the South Central SKYWARN net and Jasper County ARES Emergency Net were activated due to Isaac affecting the region. Jasper County had power outages countywide and low land flooding in several areas. In addition, there was flooding on Highway 528 in Heidelberg with many roadway blockages from falling trees and heavy rains. And from Central Mississippi SKYWARN, Linda Goodman, KE5PYM, reported that WX5JAN was on the air for 60 hours from the Jackson National Weather Service office.

See also the Section Web Site at www.arrlmiss.org <http://www.arrlmiss.org/>. - W5XX

ARRL Delta Division Director Issued Commendation

As expected, Hurricane Isaac made landfall in the early morning of August 28 in Louisiana, south of New Orleans as a Category One storm. The Greater New Orleans area and adjacent parishes along with the Mississippi Gulf Coast counties continued to be buffeted by winds and

torrential rainfall, causing power outages and flooding. ARES/RACES members were on the Delta Emergency Net and from local and State EOC's and shelters in the affected region. I wish to commend all our Delta Division amateurs involved in these operations for their professionalism and their on the air demeanor.

As Isaac moved north through Louisiana and into Arkansas we expected heavy rains, high winds and tornadoes. EOC's were activated in front of the storm through Friday. Power outages posed a potentially big problem in drought stricken areas of Arkansas since the trees were already stressed and the high winds would cause a greater number of trees or larger limbs to fall on power lines.

The ARRL Delta Division MOU is still in effect and net control operators were called to fill shifts into the weekend, depending on the extent and duration of the localities' storm event effects. Section leadership coordinated this effort: Section Managers, Section Emergency Coordinators and local Emergency Coordinators kept ARES members and RACES operators up to date as to ARES and net requirements. ARES members were called upon to work through the chain of command during this incident. -- ARRL Delta Division Director David A. Norris, K5UZ, k5uz@arrl.org

==> WISCONSIN ARES/RACES' BUSY SUMMER

Two Wisconsin ARES/RACES teams in opposite corners of the state had major incidents to deal with this past summer. Milwaukee County ARES/RACES stood up three times, deploying their communications van for the tragic shooting incident in Oak Creek on Sunday, August 5, 2012. And in another corner of the state, the Douglas County ARES/RACES team assisted with communications for their neighbors in Duluth and surrounding counties in Minnesota and northern Wisconsin during the severe flooding in the June 17 to 20 period.

The Milwaukee County ARES/RACES <http://www.milwares.org/> communications van staged once and deployed twice in support of public

safety agencies for the tragic shooting incident in Oak Creek that sad Sunday. The team owns and operates the van with equipment that is able to link different public safety radio networks together by employing a Raytheon ACU-1000 <http://www.arrl.org/intranet/nledit/fckeditor/editor/dialog/ACU%201000> network cross-connecting device. This force multiplier allows police, fire, and other emergency services with radio systems using different technologies to communicate with each other. That Sunday, the team was alerted on MABAS <http://www.mabaswisconsin.org/> (Mutual Aid Box Alarm System) with instructions to stage the van, ready to deploy, at the Greenfield Fire Department. Even though most ARES members from Milwaukee and Waukesha County were in Whitewater providing communications support for the MS150 Bike Ride, the team was able to respond with two hams -- James Langer, WI9FF, and David Lofy, KC9TGE -- who were able to get to the van, and get it prepped and ready to roll in just 30 minutes from the time of the initial request from Emergency Management.

On Tuesday, August 7, Milwaukee ARES/RACES received a call from Emergency Management requesting the van roll to Oak Creek to assist with communications support for the community's National Night Out and Prayer Vigil being held for the victims of Sunday's shootings. The mission again was to patch radios together for public safety agencies

coming in from Madison, Dane, Racine and other surrounding counties. WI9FF and Phillip Rebensburg, KC9CI, staffed the van and reported to the Oak Creek Police station. High profile officials were coming to attend the Prayer Vigil, including the Governor, a U.S. Senator and Representative to Congress. Brian Jansen, KC9GMW, a Milwaukee County AEC, and lead COML for the State, assisted in setting up a communications plan and the ARES van remained on standby at the Oak Creek Police Station through the entire event.

A memorial event was held on Friday, August 10, and again ARES/RACES was involved with van and communications support. The Milwaukee group's van provides tremendous service for multiple public safety agencies and recognition of that fact came by the calls made during this tragedy of violence.

Superior/Duluth Flooding

In June, Superior, Wisconsin and Duluth, Minnesota roads and bridges were washed out, and five feet of standing water was left in low-lying areas. Water rescues were effected, entire neighborhoods were evacuated, highways were cut off, and Internet and cell service was gone on the North Shore of Minnesota. Members of the Douglas County ARES/RACES <http://www.douglascountywi.org/index.aspx?NID=196> team went to work. Douglas Nelson, AA0AW, and Garry Hooghkirk, KD0DHB, organized an effort to staff the Douglas County EOC, provided mutual aid across the border to the St. Louis County EOC and the National Weather Service's Duluth office. It took many hours to get the Lake County, Minnesota EOC open, due to road closures. This team worked with

many local radio amateurs to collect information on road closures and damage reports from throughout the area. They also provided the only link to the outside world for Lake and Cook counties in Minnesota, established contacts with Life Flight services for the Grand Marais Hospital, handled traffic for doctor exchanges on the North Shore and provided support for Emergency Management in the region. Upon receiving the news of service restoration for the North Shore, the crews at the EOCs stood down. Many of the members of the Douglas County, Wisconsin ARES/RACES team live right across the border in and around Duluth. The cooperation across state lines is tremendous on both sides of the border.

Here <http://www.wi-aresraces.org/counties/douglas-2.htm> is a link that shows the infrastructure damage to the Duluth/Superior area including a major fiber optic cable conduit break affecting communications. Many thanks for the fine efforts of these dedicated Wisconsin ARES/RACES teams from two opposite corners of the state. - Skip Sharpe, W9REL, Chief Radio Officer, RACES, State of Wisconsin; Paul Gruettner, WB9ODQ, Emergency Coordinator, Milwaukee County ARES/RACES; Dave Miller, W0NWO, Emergency Coordinator, Douglas County ARES/RACES; Gary Sorensen, W9ULK, Section Emergency Coordinator, Wisconsin ARES/RACES <http://www.wi-aresraces.org/index.html>

==> READING LIST: WHEN GPS LEADS TO SOS

This New York Times article doesn't mention ham radio as such, but it presents a scenario we may face in the future: When GPS Leads to SOS <http://www.nytimes.com/2012/08/14/opinion/when-gps-leads-to-s-o-s.html?hpw>. -- Mike Harla, N2MHO, EC, Cumberland County, New Jersey

Here's another NY Times article that will lend some perspective on spectrum needs versus technology advancement and efficiency as applied to the cellular, broadband services, but is applicable to all radio spectrum use. I learned a lot from this piece: Carriers Warn of Crisis in Mobile Spectrum <http://nyti.ms/HFFXfN> - As data usage multiplies on mobile devices, carriers say they need more spectrum, but scientists and engineers say newer technologies can improve efficiency. - K1CE

Another recommendation for your reading pleasure and/or induction of cognitive dissonance: Space Weather: What Emergency Managers Need to Know <http://www.emergencymgmt.com/disaster/Space-Weather-Emergency-Managers-2012.html> by Elaine Pittman on March 26, 2012, in Emergency Management newsletter. -- K1CE

==> LETTERS: INTERNET-BASED SYSTEMS' FALLIBILITY

As a regular reader of the ARES E-Letter, I've watched the newsletter consistently espouse the use of D-STAR for disaster response and emergency communications services. One of the ARRL's catchy slogans, which is really more than just a slogan as it rings true is: "When all else fails, Amateur Radio."

Here in the mid-peninsula area south of San Francisco, we regularly train using simplex among hams, relaying as needed, to ensure all exercise participants get the messages. Among other things, these exercises encourage us to put up more effective antennas to ensure we can communicate across our cities on simplex and not rely on the numerous local repeaters.

I have nothing against D-STAR, IRLP, EchoLink, or repeaters. They can be very useful systems when they are available. My concern is the emphasis on relying on the availability of the Internet for emergency communications. I would like to suggest that any emergency exercise that uses the Internet to pass traffic, also include direct ham-to-ham communication to pass traffic. Furthermore, the ARES E-Letter should encourage this direct communication so that we will truly be prepared for an emergency when/if the Internet is not available: "When all else fails, Amateur Radio." -- Rich Stiebel, W6APZ, Palo Alto, California, CERT, ARES/RACES, w6apz@sbcglobal.net [Stiebel sent this follow-up note: Our last Monday night ARES/RACES net was called "Rubber Ducky Night." Everyone checking in was asked to use their hand-held with either the stock rubber ducky, or an after-market antenna that mounted on their hand-held, i.e., an antenna that one could walk around with on the radio to simulate what communications would be like if our homes' outside antennas were knocked down. Yes, the net took a bit longer with people relaying messages for those who could not be heard by the entire net, but it was good practice." - Ed.]

==> LETTERS: AT GROUND ZERO

I want to thank you for the article in September 2012 QST about Bob Hejl's, W2IK, service at Ground Zero on 9/11. Thanks to Bob for sharing this with the members. It really shows not only the value of Amateur Radio communications, but also depicts the dedication and caring that so many of us in the service share. Many of us lost relatives, friends and acquaintances that tragic day. No one will really ever know how many heroes there were. The article was very enjoyable. Again, thank you both. -- Mark Rappaport, W2EAG, Retired Firefighter, New York, nccwman@aol.com

==> LETTERS: MESH NETWORKS IN THE USVI

Mesh was brought to the US Virgin Islands about six months ago by Peter Sinkowski, KP2US, and the networking has spread like wildfire. KP2US purchased many units, flashed them and sold complete "starter kits" at cost. It's grown from there with our own reflector facilitating dialog.

There are presently about three dozen nodes in the USVI, and more are coming on-line quickly. We found a source for "rootennas" (outdoor router-antenna combinations) and are in the process of building up those for permanent deployment in strategic locations, i.e., attended locations with backup power, particularly at radio amateurs' home sites. We also have a cheap mesh go-kit design using kitty litter/food plastic containers.

Inter-island mesh links are high on the agenda. Installation of a 10-mile link between St. Thomas and St. John is slated for the near future. Commercial 2.4 WiFi signals have been copied across the 40-plus mile St. Thomas to St. Croix link and the design of a 2-way link is underway.

A demonstration of mesh network capability was given to the local EMA, VI National Guard, TSA, E-911 and VI PD. It was well received and we are moving toward designing systems to provide backup voice/data /video communications at key locations: the EOC, E-911, shelters, points of distribution, airports, and ports.

System design is greatly enhanced with the path profiling utility on Google Earth. While it is not an absolute predictor of reliability, it saves a ton of field time checking path reliability. - Fred Kleber, NP2X, K9VV, ARRL Virgin Islands Section Manager

==> LETTERS: MENTAL HEALTH RISKS

I'd like to congratulate you on an excellent Public Service column in July 2012 QST. I believe it is very important for those involved or contemplating involvement in emergency communications to understand the risks to their mental health as a result of what they may experience.

Although one may experience a traumatic event that causes nightmares and/or depression during ARES events, it is also possible to trigger PTSD of traumatic events of many years or decades past. My personal experience and one apparently common to many Vietnam veterans, was PTSD triggered by the events of 9/11. After more than thirty years home and with a successful career in telecommunications and RF applications development for State Farm Mutual, PTSD and depression happened to me post 9/11.

Prior to 9/11, I enjoyed the challenge of developing disaster recovery communications procedures for State Farm and being involved with MARS, FEMA, and ARES communications. It took several years of psychiatry and medication post 9/11 to recover. Now, while I will support the local emergency communicators as a technical resource, I can no longer be a communicator or be on-site for training or actual events.

Thank you for addressing the issue of the mental health risks as an ARES volunteer. I wish you better times and relief from PTSD. -- CSM(r) Gary L. Huber, AB9M, Bloomington, Illinois

Your short article in July QST was both touching and compelling. Thank you for presenting a sensitive topic so eloquently. -- Curt Wilbur, K7CU, Immediate Past President, Utah DX Association; CQ Magazine Awards Checkpoint

==> BEHIND THE CIRCLE - TIM HOLLAND, KK5H, EC, MADISON COUNTY, ALABAMA

Tim L. Holland, KK5H, is the EC for Madison County, Alabama who took time away from his vacation recently to visit your editor K1CE at the hospital in Daytona Beach, Florida, where he works. Holland was

appointed an AEC and Net Manager in 2008, responsible for providing training to his team. (It was the team's dedication to training and participation in ARRL SETs that paid off when it was deployed for the infamous tornado outbreak in April 2007). Holland was appointed EC this past summer. He said "I am proud of our ARES team for having a respected working relationship with the county EMA. We have open access to the EOC for meetings and exercises." Holland has many county hams and seven AECs to assist him with his active ARES team.

==> NEIGHBORHOOD HAMWATCH IN CENTRAL FLORIDA

A new program in central Florida helps neighbors and communities in times of need, with minimal extra effort, right from our own homes: The Neighborhood HamWatch. NHW is not an organization. There are no tests to take nor structured organization to follow. It is rather a simple service program where every ham has the opportunity to use his/her license and radio skills right where they live to support their neighbors during times of an extended power outage or isolation in a disaster or incident. All an NHW operator needs is his or her radio and an emergency backup battery or generator power supply.

Neighbors could be physically isolated due to downed trees, wires, flooded rivers or unsafe roadways. Community life is disrupted, a situation that can last for days or weeks. Residents are under stress from electrical and communication blackout and personal isolation. Media reception is disrupted, telephone and cell phone circuits are overloaded or down and the sense of community is shaken. During these periods of isolation, fear and rumors fill the gap created by a lack of official information and the inability to contact someone outside of the affected area.

This is the scenario where Neighborhood HamWatch operators activate using their preplanned simplex (with repeater backup) radio relay network to break through the barrier of silence. They can establish two-way communications to alert ARES officials at the EOC, keep local authorities up to date, and reconnect neighbors with friends or relatives outside the affected area with health and welfare traffic. In the program, you're a ham, you're a licensed radio communicator and you know what to do: Know the NHW net frequency, check in, observe your surroundings and gather and report neighborhood messages and conditions, needs and requests. -- Norman Lauterette, WA4HYJ, Casselberry, Florida

==> ARES QSO PARTY CONCEPT FEEDBACK

I agree with you regarding it being time to consider the drafting and development of an ARES QSO Party. In order to promote on-the-air practice of skills of message handling and efficiency and the networking of local, district and Section ARES groups across the country it would need to have local, regional and national components.

While digital communications is a growing component of emergency and disaster response communications, I would not advocate that this QSO Party include a digital component. I feel we spend a lot of time tweaking newer technology but often neglect the "shining light" of Amateur communications, the down and dirty direct, point to point communications that forms the foundation of our ability to communicate when others cannot: Simple, direct and effective, not dependent on anything but our power source, our radio and our skills at getting a signal out and a message delivered. - James Burrough, N5DTT, Bellaire, Texas [Burrough also added this as support for his position: http://www.arrl.org/news/the-amateur-amateur-some-aggravation-required -- ed.]

I was chuckling about replying, "It's called Sweepstakes" but then the thought occurred to me that maybe a hybrid would make more sense and not require a completely new contest. Here's a suggestion: start with Sweepstakes. That's a nation-wide HF contest and not really within scope for most ARES teams - they are local/regional. So tack on local communications by using the Sweepstakes info to generate traffic the ARES members then exchange locally, similarly to WAE QTC. Prototype QSO party: (1) Operate Sweepstakes Phone using standard rules. All QSOs must be made according to Sweepstakes rules and a Sweepstakes log MUST be submitted in standard format; (2) Complete 5 Sweepstakes QSOs, then change to local VHF/UHF simplex frequency (no repeaters) designated by SEC/DEC and pass received SS QSO information to local station. Local station could be another QSO party participant or designated QTC handler station(s); (3) Score is SS score + Local QTC total; (4) Local teams verify SS QSO information by comparing QTC log against submitted SS log. No additional HQ processing or resources required, combines HF operating with VHF/UHF message passing. Local teams can optimize however they feel it is appropriate for them. Time periods can be limited or open-ended. -- Ward Silver, N0AX, St. Charles, Missouri [Silver, while living on Vashon Island, Washington, worked closely with community leaders and the Vashon-Maury Island Radio Club (W7VMI) to provide effective emergency communications. Working together, the fire district, CERT, and radio club members created one of the best local communications systems in the state of Washington. He is currently a member of the St. Charles (Missouri) Amateur Radio Club (WB0HSI) and active in the ARES Rapid Response Team (RRT). Silver is the 2008 Dayton Hamvention Amateur of the Year and prolific QST writer and book author. -- Ed.]

Regarding your call for ideas for an ARES QSO Party: Don't limit the Party to a traditional HF only contest -- it should be more like Field Day. Although allowing use of repeaters would be desired from an "all ports in a storm" approach, one person could monopolize a repeater. However, allowing ARES repeaters to announce local non-repeater VHF/UHF frequencies being used by ARES QSO party members once an hour would seem prudent. It would also give some attention to this event. If the logistics of this recommendation are too onerous, require anyone who would use VHF/UHF to pre-register with the ARES group. By doing so, they could have input to the ARES group and the ARES group could

publish the frequencies used during the VHF/UHF part of the ARES QSO Party.

Although Morse code is an important emergency capability mode, care should be taken to allow voice-only ARES members to be able to win. This is traditionally accomplished by keeping awards segregated by mode. If this isn't possible, ensure adequate voice-only awards.

Give a nod to all the different kinds of ways that emergency people provide service. Have the exchange include "years of emergency service." Also, have the contest exchange include all the roles (titles) served over those years. Have the contest entry include all the agencies served as well. Include RACES. -- Randy Wing, N0LD, Butler County, Kansas

==> FROM ARRL HQ: LESSONS LEARNED FROM ISAAC

As we all know every event has lessons to teach us, whether the event be big or small. Isaac, while not packing the punch of Katrina or Ike, still had a tremendous impact on the Gulf coast. In the aftermath lessons emerged for your staff at HQ.

As we've seen in the past, a Major Disaster Emergency Coordinator (MDEC) would have been a huge asset. Hurricanes have a tendency to remind us of this since the operational level rises from the local level to the section level as state assets come into play and typically involve many sections (Isaac involved 13 and Irene in 2011 involved 19 sections). The idea of an MDEC is not new and more information can be found on the ARRL website <http://www.arrl.org/files/file/About%2520ARRL/Committee%2520Reports/2011/July/Doc_33b.pdf >.
Having that go between during multi-section events would be a great tool in the toolbox.

We have also seen the value of contest stations during an emergency. When net control stations were needed during Isaac, contesters volunteered their skills and stations to serve. When planning, be sure to reach out to the contest community. These top of the line stations and operators with sharp skills can and want to assist.

And finally, the methods we use to get information from the field could use some improvement. Our primary method for receiving updates is via e-mail. The e-mails give us a snap shot of what is happening, but they lack hard numbers. A modernization of our on-line reporting system, for both major disasters and routine ARES activations, may need to be considered. Information from the field is critical: It keeps us aware of Amateur activity, provides us with information to share with national partners, and helps increase our visibility to media and the public.

Lessons learned has been a buzz word in disaster response for many years and these lessons are important. However, what matters is lessons applied. I've been amazed at how many times the same lessons learned

emerge again and again with each disaster. Lessons applied is how we get prepared for the next one. It shows that we don't suffer from disaster amnesia. Here at HQ we'll work on building from the lessons learned, as we did after Irene and the 2011 Halloween Nor'easter.

And finally, I invite ARES groups and others to share your lessons learned and lessons applied with us at HQ. Remember, someone else may have faced the same problem, found a solution, and can share the results. 73, Mike Corey, KI1U, ARRL Emergency Preparedness Manager

==> K1CE FOR A FINAL

September is National Preparedness Month <http://www.ready.gov/>. The ARRL Simulated Emergency Test <http://www.arrl.org/news/get-set-for-the-2012-simulated-emergency-test> (SET) is October 6-7; yes, that's right, that's just a few weeks from now! Click on the links for more information. Get psyched for SET!

It had been a while since I took and passed FEMA's Introduction to the Incident Command System, IS-100.b, so I took it again. To take this course, which is an essential for any ARES operator, click here <http://training.fema.gov/EMIWeb/IS/is100b.asp>. And while you're at it, take IS-200 and IS-700, too, on ICS for Single Resources and Initial Action Incidents and the National Incident Management System (NIMS), respectively!

Have a great ARRL SET! See you next month! 73, Rick, K1CE, Daytona Beach, Florida

ARRL -- Your One-Stop Resource for Amateur Radio News and Information

Join or Renew Today! <http://www.arrl.org/join> ARRL membership includes QST <http://www.arrl.org/qst>, Amateur Radio's most popular and informative journal, delivered to your mailbox each month.

Subscribe to NCJ -- the National Contest Journal <http://www.arrl.org/ncj>. Published bi-monthly, features articles by top contesters, letters, hints, statistics, scores, NA Sprint and QSO Parties.

Subscribe to QEX -- A Forum for Communications Experimenters <http://www.arrl.org/qex>. Published bi-monthly, features technical articles, construction projects, columns and other items of interest to radio amateurs and communications professionals.

Free of charge to ARRL members: Subscribe <http://www.arrl.org/myarrl-account-management#%21/edit-info-email_subscriptions> to the ARES E-Letter (monthly public service and emergency communications news), the ARRL Contest Update (bi-weekly contest newsletter), Division and Section news alerts -- and much more!

RAC Bulletin 2012-056E - WEBINAR for the Radio Amateurs of/du Canada
Annual General Meeting September 22, 2012
2012-09-19

Please pre-register for the webinar to attend the Radio Amateurs of/du Canada Annual General Meeting - Montreal on September 22, 2012 3:40 PM EDT at:

https://attendee.gotowebinar.com/register/4613458776261289984

Welcome to the Radio Amateurs of/du Canada Annual General Meeting - Montreal on September 22, 2012.

Please pre-register before Saturday, 12:00 (noon) EDT using the link provided. A confirmation of your attendance and conference link will be provided by email. Sorry we cannot accept late registrations.

Please direct any questions to President Bawden in advance by 12:00 (noon) Saturday, September 22nd via vo1prb@rac.ca. We will not be able to take questions live via audio during the webinar due to bandwidth issues.

Audio will be via PC speakers or headset (preferred). We will be starting about twenty minutes before the AGM to allow for technical issues. Please note you will need to install a conference client software in advance as well.

After registering, you will receive a confirmation email containing information about joining the webinar.

Paul Burggraaf VO1PRB
Chief Information and Technology Officer

Vernon Ikeda - VE2MBS/VE2QQ

DXNL 1798 - Sep 19, 2012
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

3D2/CR, CONWAY REEF, OC-112
A few members of the "World Wide DX Group" will provide a new DXCC and
band points as 3D2C from Sep 24 until Oct 5. They will focus on Europe
and ask everybofy to respect that during the band openings to EU.
Activity will be in CW, SSB, RTTY, SSTV and PSK31 on 160m-2m. The OPs
will be: Hrane,YT1AD, Aleksej,UA4HOX, Paul,N6PSE, David,WD5COV,
Vasily,RW4NW, David,AH6HY, Alan,K6SRZ, Alan,AD6E, Sergej,RZ3FW,
Craig,K9CT, Stan,LZ1GC, George,N6NKT, Peter,PY5CC, Mike,K6MKF,
Jim,K9JM, Miguel,PY3MM, Luciano,PY5KD, Dragan,YT3W, and Tevita,3D2TR.
Pilot stations are Aca,YU1AA, Toma,YU1AB and Andre,V51B.
QSL via YT1AD, OQRS, ClubLog. See also: http://www.yt1ad.info/3d2c

4S, SRI LANKA, AS-003
A Japanese group stays in Trincomalee at the east coast of Sri Lanka
until Sep 20. Hiroshi,JA3HBF (4S7HBG), Toru,JR3QHQ (4S7QHG),
Ryo,JG3DOG (4S7DOG), Nakasako,JA3UJR (4S7UJG), Ikuo,JA3TJA (4S7TAG),
7M3FMR (4S7TEG), Kunio,JH3LSS (4S7LSG), and Tatsuo,JA3ARJ (4S7ARG),
will be QRV in all modes on all bands.
If you were lucky you worked them also from Pigeon Island (AS-171).
QSLs via homecalls or as instructed by the operator.

5H, TANZANIA
Noel,WB0VGI, will be in Tanzania from Sep 18 and plans to tour the
country first before operating. So expect him on the bands not earlier
than Oct 8 (until Dec 15) signing 5H3NP from Iringa in CW/SSB/PSK on
20m/15m/10m. He has to build a WARC antenna as well. QSL via homecall.

6W, SENEGAL
Enrico,IK2FIL, will be QRV as 6V7X from Le Calao using his Elecraft K3
plus amp from Sep 24 until Oct 4. He plans to join the upcoming
WWDX RTTY Contest (Sep 29/30) in the single Op/low power category.
QSL via GlobalQSL, LoTW, eQSL. See also: http://6v7x.jimdo.com

9M2, WESTERN MALAYSIA
Piju,9M2PJU, will be active as 9M2PJU/p in CW on 15m/20m from the
Pertak dam in Kuala Kubu Bharu from Sep 22-24. His callsign is also
good for the "Diamond DXCC Award Challenge" of the ARRL.
QSL via homecall, unfortunately only direct.
See also: http://www.arrl.org/active-stations

CE, CHILE
Luis,CE2/CX1EK, is working mainly in CW on 10m and 12m until Sep 20.
QSL unfortunately only direct to: Luis Matho, 2303 Nordok Place,
Alexandria, VA 22306, USA.

F, FRANCED
The special event station TM34CDXC is active until Sep 22 from the
34rd Convention of the Clipperton DX Club in Granville.
QSL via F5CWU (OQRS), LoTW. See also: http://www.f5cwu.net/oqrs

G, ENGLAND
The South Lancs Amateur Radio Club will be QRV as GB1BAS from the site
that was Bickershaw & Abram Station, which closed 48 years ago, for the
Railways On The Air (ROTA). They will work on 80m/40m/20m/10m/2m/70cm
on Sep 22/23. QSL via bureau. See also: http://www.slarc.co.uk
---
The Ryder Cup will take place in the USA on Sep 28-30. Dick,G3VSQ, will
be QRV as GB39RC in CW/RTTY on 10m/15m/20m/40m from Verulam Golf Club
in St. Albans (Loc IO91UR) until Sep 30. QSL via G3VSQ, LoTW, eQSL.

HB0, LIECHTENSTEIN
Philippe,ON4ACP, Erik,ON4ANN, Jose,ON4CAU, Eric,ON4CCV, Marc,ON4CJY,
Cedric,ON4CKM, and Walter,ON8CW, will be QRV in SSB and CW on 80m-10m
signing HB0/Homecalls from Sep 19-22 with emphasis on the high bands.
QSL via ON4ANN. See also: http://users.telenet.be/on4ann

KH8, AMERICAN SAMOA, OC-045
Juergen,DJ2VO, had to return to American Samoa because he became sick
on the trip to Swains Island (NH8S). He may use the station of the
deceased KH8LG as KH8/DJ2VO starting around Sep 15 but has to clean up
the station before.

KP2, US VIRGIN ISLANDS, NA-106
Jeff,KP2/K5WE, is making pile-ups on all bands working from St. Croix
mostly in CW and some RTTY until Sep 26. QSL via homecall.

ON, BELGIUM
The special event station ON68POL is active until Sep 30 and remembers
the liberation of the bridgehead of Rijkevorsel by the "Polar Bears"
68 years ago. Increased activity has been announced for the weekend
on Sep 22/23.
QSL via bureau.

T30, WESTERN KIRIBATI, OC-017
Melody,T30MK, is a resident on the Tarawa atoll (OC-017) in Western
Kiribati. He is looking forward to QSOs with radio friends around the
world but asks for patience during the QSO.

TA, TURKEY
Gab,TA/HA3JB, will be QRV in CW, SSB and digital modes on 80m-10m
between Sep 22 and Oct 2. He will join the upcoming WWDX RTTY Contest
in the SOSB category. QSOs with him are also good for the IPA award.
QSL unfortunately only direct (OQRS). See also: http://www.ha3jb.com

UA0, ASIATIC RUSSIA, AS-025
Valery,RA0SS/0, is working from Kunashir Island (AS-025) until the
beginning of October using a vertical on 20m and a dipole for 30m.
QSL via homecall.

V6, MICRONESIA, OC-010
Madison,W5MJ, is active as V63MJ from Pohnpei Island (OC-010). Listen
for him in CW on 40m-10m (maybe also 80m) until Sep 22. QSL via W5MJ.

VE, CANADA
The Mississauga Amateur Radio Club plans to use the club call VE3MIS
in SSB on 7.210 kHz and 14.250 kHz from the "Halton County Radial
Railway Museum" on Sep 22. QSL via VE3TKI.
See also: http://www.marc.on.ca and http://www.hcry.org

VK9X, CHRISTMAS ISLAND, OC-002 / VK9C, COCOS KEELING ISLANDS, OC-003
Sadao,JA1PBV, is working as VK9XS from Christmas Island (OC-002) until
Sep 20 and once again from Sep 28-29. He also plans to show up as VK9CS
from the Cocos Keeling Islands (OC-003) from Sep 21-28. he works in CW
and plans to focus on NA and SA. QSLs via JA1PBV.
Logsearch is available at: http://ito110.com

W, USA
Mark,KM6HB, will activate the special event station K6P for the eighth
time in a row during the "National POW-MIA Recognition Day" from
Sep 21-23. The 3rd Friday in September was set
by the American Congress
in order to remember the prisoners and missing soldiers.
QSL via KM6HB, unfortunately only direct, LoTW, eQSL.

Z8, SOUTH SUDAN
The first two Z8 licenses habe been issued on Sep 13:
Z81A: James Pratt,K7QI, QSL via K7GSE
Z81D: Diya Al Sadi,YI1DZ, QSL via OM3JW
Diya has set up his station already in Nyakuron South, Juba and James
may use it as well.

Republic of Kosovo "on air" soon: The supervised independence of Kosovo
ended on Sep 10. Kosovo has two million inhabitants and the capital is
Pristina. So far, 91 countries including U.S., Japan, Germany, France,
Great Britain, the Benelux and Nordic countries have recognized the
Republic of Kosovo under
international law.
An Amateur Radio working group headed by IARU Region 1 President
Hans Blondeel Timmerman,PB2T, and including IARU Region 1 Executive
Committee Member Nikola Percin,9A5W, and "Mission Goodwill Kosovo"
Coordinator Martti Laine,OH2BH, together with their associates are in

the final stages of assisting Kosovo's Telecom Authorities in drafting regulations governing Amateur Radio in Kosovo, to bring the original Kosovar operators and their re-vitalized Amateur Radio Association back to the international community. See also: http://www.voanews.com/content/supervised-independence-ends-in-kosovo/1505339.html and http://www.iaru-r1.org

Electronic journals online: Old electronic journals including the QST have been put online: http://www.rsp-italy.it/Electronics/Magazines

DARC performance diplomas and DARC Contest Logbook (DCL) popular abroad: Foreign radio amateurs are increasingly using the excellent opportunities for easy
application of the German DARC performance diplomas using
the DARC Contest Logbook and are particularly fond of the combination
of the DCL with LotW and eQSL.
VE3FWA thanks DF8AA, manager of the WAE award, with following words:
"Some remarks on the DCL. What you have created here is incredible.
No-one but the DARC can connect eQSL, LotW and Contestlog to apply for diplomas. Really great! It is also a pleasure to use. Otherwise I would have not been able to collect all the
necessary QSL cards for the DARC
awards. Thank you for setting up this system. 73! Ed, VE3FWA"
In his "SV5DKL amateur radio blog" SV5DKL even presents his recently received EU-DX-D 1000
Trophy, his Europe RTTY Diploma (EURD) and other
DARC awards that he could apply for only by using
the DCL. This is not
only a good achievement but also proof to the excellent
acceptance of
the DARC Contest Logbook.
See: http://sv5dkl.blogspot.de/2012_08_01_archive.html
This might be also an additional motivation for award collectors to participate in a contest since many logs are uploaded to the DCL as well. As a result the
application of awards is very much simplified.
The DARC Contest Logbook can be found at: http://www.dxhf.darc.de/~dcl

E40VB QSL status: The E40VB QSLs were mailed on Sep 13. Documentation was sent to the ARRL by the end of July but DXCC approval is still pending.

OPs wanted: Three more operators are wanted for a major international DXpedition to Banaba Island (T33) in March/April 2013.
If you are interested to join please send an e-mail to: Banaba@T33A.com

Short term award: The "YB Land DX Club" issues a special award to celebrate his first anniversary. See also:

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 23: BARTG Sprint 75
Sep 24: DIG-PA Contest
Sep 29/30: CQ WWDX Contest, RTTY

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Lighthouse Weekend: The "Adriatic DX Team" has organised an Italian Light-
house Weekend on Sep 22/23. More information can be found at:
http://digilander.libero.it/adriaticdxteam

Island activities:
AF-014, CT3, Madeira Archipalego: Walter,DJ6QT, Goetz,DJ3IW, Kalle,DM3BJ,
Stefan,DK1MM, Horst,DK1QH, Dieter,DK4QT, Boris,E73Y, Mario,S56A, and
Hans-Juergen,DL1YFF, will be QRV as CT9/homecalls from Santana on
Ilha da Madeira (DIP MA-001, PIP MD-001, DPRN FF-101, WLOTA 053,
WFF CTFF-030) between Sep 20 and Oct 4. This will include a multi-multi
entry in the WWDX RTTY Contest (Sep 29/30) as CR3L.
QSLs via homecalls and for CR3L via DJ6QT (direct/bureau).
See also: http://www.cq3l.de

AF-032, 5H, Zanzibar Island: Harald,DL7VSN, will be QRV again from Zanzibar
signing 5H1HS from Sep 23 until Oct 13. He also plans a short trip to
"Lazy Lagoon Island" (no IOTA) as 5H1HS/3. QSL via DL7VSN.

EU-023, 9H, Malta group: Gus,ON6KE, plans to show up again from the island
of Gozo (MIA MM-004, WLOTA 046, Loc JM76cb) from Sep 22-28. He will
sign 9H3AK in CW on 40m/30m/20m using QRP.
QSL via ON6KE (only LoTW and eQSL).

EU-028, IA5, Tuscany Region Group: Max,IA5/IZ2LTW, is staying on Elba Island
until Sep 22 and hands out IOTA points on HF and 6m. QSL via homecall.

EU-069, EA5, Columbretes Islands: A few members of the "Invoker Team" will
be QRV as EG5INT from Columbretes Island from Sep 20-24. The team
includes George,EA2TA, Christian,EA3NT, Ramon,EA3OR, Raul,EA5KA, and
Guillermo,EA5MON, and the station will be active on all HF bands.
QSL only direct via EA5KA.

EU-128, DL, Schleswig-Holstein State East group: Klaus,DL7UXG, Ric,DL2VFR,
Henning,DB5BZ, Friedrich,DL4BBH, and Matthias,DK7LV, will be active as
DM50IOTA from Fehmarn Island (GIA O-001, WLOTA 0637) from Sep 21-23.
They plan to work in SSB/CW on HF and VHF. QSL via DM50IOTA (d/B).
See also: http://www.iota-expedition.com

NA-067, W4, North Carolina State East Group: Glenn,NY4NC/p, is working in CW
mainly on 40m/20m running with QRP power from Ocracoke Island (NA-067,

USi NC001S, WLOTA 0466, Hyde county) until Sep 21. QSL via homecall.

NA-213, W4, Alabama State Group: OPs of the Kennehoochee Amateur Radio Club
will use the special callsign K4D in CW, SSB and digital modes from the
Sand Island lighthouse on Dauphin Island from Sep 25-30.
QSL via bureau, LoTW, eQSL. See also: http://www.w4bti.org

OC-019, KH6, Hawaiian Islands: Tommy,VK2IR, Peter,VK2NN, and their families
will stay on Hawaii from Sep 22 until Oct 6 and plan to work in holiday
style as KH6/homecalls on 40m-10m during this time. QSL via VK2IR.

OC-045, KH8, Tutuila Island: John,KH8/N7CQQ, and Ron,KH8/N6XT, will be QRV
on the HF bands from Tutuila Island (USi AS-007S, WLOTA 4385) between
Sep 20 and Oct 1. QSLs only direct via homecall.

AS-194, JA6, Senkaku Islands (Japan): On Sep 14 the tensions between Japan
and China escalated. Six Chinese patrol boats have entered the waters
of the Senkaku Islands (known as Diaoyu) which are controlled by Tokyo
and claimed by Beijing. It is very likely that this is the end of a
planned activation of one of the most wanted IOTAs for a long time.

Episode 22: Women in Ham Radio

Mary Moore WX4MM

Rick talks to Gary for a bit about Ham Radio Deluxe. And rumor

has it that there are some women in Ham Radio. That's unconfirmed,

but our conversation with former YLRL President WX4MM almost

has us convinced.

Watch them at our web site, www.HamRadioNow.tv.

And thanks to all the hams who have been both contributing

and leaving nice comments on email, YouTube, here on QRZ, etc! The recent

programs have been well received.

KG4WSS, Killed in Consulate Attack

Posted: 18 Sep 2012 01:37 PM PDT
http://forums.qrz.com/showthread.php?361941-KG4WSS-Killed-in-Consulate-Attack&goto=newpost

09/18/2012 Sean P. Smith, KG4WSS, of Falls Church, Virginia, was killed
when the US Consulate in Benghazi, Libya, was attacked on September 11.
He was 34. Smith was one of four Americans, including Chris Stevens --

the US Ambassador to Libya -- who was killed in the attack.

MMMonVHF Newsletter No. 1/ WEEK 38 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-09-19
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

** DXCC: ZK2 ; Niue ; Square: AH51 ; start 2012-09-07

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
LATEST NEWS from W7GJ, dated 2012-09-08:
Arrived in Niue Friday afternoon September 7 local time (I am 11 hours behind GMT,
so it was early September 8 GMT). Weather this afternoon was great. E6M license is
in hand. Not currently able to send email or update my web page with this slow and
intermittent internet connection. Watch ON4KST EME CHAT page for updates.
21' mast is assembled and a location for it has been prepared...a few of the more
obvious offending palm fronds have been broken off and pulled out of the way now.
The 6M8GJ yagi should clear the metal house roof by about a foot when I am aimed
to the east over the house. I will start assembling the yagi today at first light
today (Saturday, September 8 GMT) and hopefully will be able to recruit some helpers
from down the road to help raise the antenna later in the day. It will require some
extra help with all the trees and bushes around, preventing a normal clean raising.
6m station is currently set up except for the antenna.

VY 73, Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

NEWS by W7GJ, dated 2012-09-03:
Hello! Well, I wanted to provide as much advance time as I could so you could mark your calendars and/or get everything in your 6m station optimized by the end of August ;-)
As those of you know who completed JT65A mode contacts with me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows - especially during the optimum days of the month for 6m EME.
The callsign is not in hand yet (but assured by email), and the QTH has not been finalized, but all the plane tickets have been purchased (as usual, any contributions are VERY welcome),
and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the works.
As soon as the license is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a takeoff shot
over water on moonrise. However, that is not necessary to work NA stations during their moonsets (I will be elevating),
so we will get the ground gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2;
Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure
time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

Bodo, DF8DX, qrv from SV9 on HF and 23cm EME

Equipment will be like on my previous DXpeditions IC7000 with transverter (100W) and 59ele yagi.
call: SV9/DF8DX
Grid: KM25 (exact locator will be given later)
IOTA: EU-015
Activity on 23cm EME:
October 2, 2000-2130z (for EU)
October 3, 0400-0600z (for NA)
with backup dates:
October 3, 2030-2200z (for EU)
October 4, 0430-0600z (for NA)
Frequency: TX first on 1296.090MHz / RX on my own echo frequency (just like in CW)

I am one week on SV9 but I would prefer you work me on the suggested times because i want to spend some time with my wife on this vacation and also enjoy some HF (CW only) activity as well
as maybe activity from EU-187. Further skeds on request (if necesary). Check www.mmmonvhf.de for updates.

Request for Proposals to Fund a Radio Propagation-Related Project:

Posted: 18 Sep 2012 05:03 PM PDT
http://www.eham.net/articles/28991

The RSGB's Propagation Studies Committee is inviting proposals to fund a radio propagation-related project, up to a maximum of £1,000. The PSC was recently bequeathed £1,000 by the late Charlie Newton, G2FKZ, who died earlier this year. Charlie was an active member of PSC and also helped educate other amateurs about propagation matters through talks and lectures. He was also the author of the book Radio Auroras, which is viewed as a definitive guide to this type of propagation. His bequest was made to help fund propagation-related research and the PSC is looking to hear from any person or group who might have a detailed proposal for how the money could be used.

First two Amateurs to licensed in The Republic of South Sudan

Posted: 19 Sep 2012 01:07 PM PDT
http://forums.qrz.com/showthread.php?362072-First-two-Amateurs-to-licensed-in-The-Republic-of-South-Sudan&goto=newpost

The Republic of South Sudan is finally active on the Amateur bands thanks to the help and guidance from the Ministry of Telecommunications and Postal Services located in Juba. The first amateur to be licensed is James Pratt (Z81A). James is from Lake Stevens, WA and licensed as K7QI. The QSL manager for Z81A is Frank Remington (K7GSE). The second operator is Diya (Z81D), and works for the UN-WFP (World Food Program). His QSL manager is Stefan Horecky (OM3JW). Also to note is the approval of the third amateur (Z88Z) who has plans to setup and operate remotely. With the list of call signs the ITU-R1 has given to South Sudan, Diya and I will work closely with the Ministry to spread the group of call signs through out all 10 States of South Sudan. For now, only Z81A and Z81D are active so please be patient with us as we do our best to confirm as many QSO's as possible.

convention>.

==> + LOOKING AHEAD TO WRC-15

From an Amateur Radio perspective, the 2012 World Radiocommunication
Conference (WRC-12) was very successful. According to IARU Secretary
```

Rod Stafford, W6ROD, the IARU Administrative Council will meet in the next 45 days and will address the agenda items for the 2015 World Radiocommunication Conference (WRC-15) with an eye to building the best strategy for dealing with those items in a way that is most favorable to the Amateur Radio Service. While the IARU will be watching all agenda items in 2015, there is one agenda item that focuses on the Amateur Radio Service, and another four that may have an effect the Amateur Radio Service. Read more here <http://www.arrl.org/news/looking-ahead-to-wrc-15>.

==> + SILENT KEY: SEAN SMITH, KG4WSS, KILLED IN CONSULATE ATTACK

Sean P. Smith, KG4WSS, of Falls Church, Virginia, was killed when the US Consulate in Benghazi, Libya, was attacked on September 11. He was 34. Smith was one of four Americans, including Chris Stevens -- the US Ambassador to Libya -- who was killed in the attack. Smith, a native of San Diego, enlisted in the Air Force in 1995 at age 17. He served six years as a ground radio maintenance specialist, including a deployment to Oman, before leaving the service in 2002 as a staff sergeant. He was awarded the Air Force Commendation Medal. Smith, who had worked at the State Department for 10 years, was in Libya on a temporary assignment when he was killed. Prior to his temporary assignment to Benghazi, Smith served for the State Department in Brussels, Baghdad, Pretoria, Montreal and The Hague. Read more here <http://www.arrl.org/news/sean-smith-kg4wss-killed-in-consulate-attack>.

==> + ARDF UPDATE: A BAKER'S DOZEN OF MEDALS FOR ARDF TEAM USA

By ARRL Amateur Radio Direction Finding Coordinator Joe Moell, K0OV

As they packed their suitcases in preparation for the World Championships of Amateur Radio Direction Finding (ARDF), the members of Team USA were eager, but they had no idea that they would return home with 13 medals. Team USA has participated in these biennial championships since 1998, and the most medals they had won any time so far had been two, with no golds. This year, however, would be different; their practice sessions and training camps would make them better prepared than ever.

The sport of ARDF -- also called foxtailing, foxhunting and radio-orienteering -- has undergone many changes since the first World Championships in 1980, but the basics remain unchanged. A championship course has five transmitters in a mapped area of rural and wooded terrain, typically 1000 acres or more. When Fox #1 comes on the air, contestants set out from the start as and try to be the fastest to "punch in" at all required transmitters and then make it to the finish line in another part of the forest. Read more here <http://www.arrl.org/news/ardf-update-a-baker-s-dozen-of-medals-for-ardf-team-usa>.

==> FEDERAL EMPLOYEES CAN HELP SUPPORT ARRL THROUGH THE 2012 COMBINED FEDERAL CAMPAIGN

For the past 11 years, the US Office of Personnel Management has designated the ARRL as a participant in the Combined Federal Campaign (CFC). This campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $192,000 for ARRL programs since it first became an option for federal employees to donate to the League. The CFC provides an easy way to support the ARRL's effort to represent its members and all radio amateurs. Read more here <http://www.arrl.org/news/federal-employees-can-help-support-arrl-through-the-2012-combined-federal-campaign>.

==> + ON THE AIR: LAST MAN STANDING PLANS SPECIAL EVENT STATION

The crew of the hit ABC comedy Last Man Standing <http://www.arrl.org/news/em-ham-radio-in-hollywood-em-amateur-radio-makes-its-debut-on-em-last-man-standing-em>
is planning a radio event on Sunday, October 28 to kick off the show's second season. Last Man Standing features Tim Allen as Mike Baxter, KA0XTT. According to Last Man Standing Producer John Amodeo, NN6JA, Mike's station is back this year with even more gear. In addition, all the antennas that were in the catwalk last year have been relocated to the studio's roof.

Using special event call sign K6T, the show's crew will operate on HF, VHF, UHF, D-STAR, EchoLink and IRLP to communicate with fans of the show; 12 members of the Last Man Standing crew are licensed amateurs. Members of the Los Angeles-based PAPA System <http://www.papasys.com/> will assist the crew with running the event. The crew will use several PAPA System repeaters to run analog VHF, UHF and D-STAR communications. They will also be monitoring the Disney Amateur Radio Interconnect repeater system, which has repeaters in New York City (W2ABC <http://w2abc.org/index2.php>), Florida (WD4WDW <http://www.wd4wdw.org/> and WD4WDW-B/D-STAR <https://dstargw.wd4wdw.org/>) and California (KB6AJE <http://www.qrz.com/db/wb6aje>), as well as EchoLink capability. A list of frequencies and an operating schedule will be posted on the KA0XTT Facebook page <https://www.facebook.com/KA0XTT?ref=ts> and on Amodeo's Twitter feed <https://twitter.com/nn6ja> in the next few weeks. A special QSL card will be sent to all hams who contact K6T; hams do not need to send a self-addressed, stamped envelope, nor do they need to send postage or "green stamps."

Last Man Standing <http://beta.abc.go.com/shows/last-man-standing> begins its second season on Friday, November 2 at 8/7 Central.

==> SOLAR UPDATE

Tad "The summer Sun knows me by name <http://www.youtube.com/watch?v=NaCCG7QkM_c>" Cook, K7RA, reports: The average daily sunspot numbers dropped this week, from 83.1 to 56, while the average daily solar flux declined from 118.9 to 101.4. The latest forecast shows the predicted solar flux at 115 on September 20-22, 120 on September 23-25, then 125 and 130 on September 26-27, and rising to

140 on September 28-October 1. On October 2, it drops to 135, 130 on October 3-5, and back down to 125 on October 6-7. The flux values then dip below 100 on October 14-16, and peak again around 140 on October 25-28. The predicted planetary A index is 10 on September 20, 12 on September 21-22, 10 on September 23 and 5 on September 24-28, 10 again on September 29, and 5 on September 30-October 2. Look for more on the ARRL website on Friday, September 21. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Brady Bunch's It's a Sunshine Day <http://en.wikipedia.org/wiki/It%27s_a_Sunshine_Day>.

==> + DXCC NEWS: ARRL DXCC DESK APPROVES 11 OPERATIONS FOR DXCC CREDIT

On September 19, the ARRL DXCC Desk approved the following 2012 operations for DXCC credit: 3B8/IW5ELA (Mauritius); E40VB (Palestine); JY8VB (Jordan); 9A8VB (Croatia); E7/UA4WHX (Bosnia-Herzegovina); 4O7VB (Montenegro); Z38VB (Macedonia); ZA/UA4WHX (Albania); YU9VB (Serbia); EY8/UA4WHX (Tajikistan), and UN/UA4WHX (Kazakhstan).

==> THIS WEEK IN RADIOSPORT

This week:

- September 21 -- NCCC Sprint Ladder
- September 22 -- FOC QSO Party; AGCW VHF/UHF Contest
- September 23 -- BARTG Sprint 75
- September 24 -- QRP Homebrewer Sprint
- September 25 -- 222 MHz Fall Sprint (local time)
- September 26 -- SKCC Sprint
- September 26-27 -- CWops Mini-CWT Test

Next week:

- September 29 -- Microwave Fall Sprint (local time)
- September 29-30 -- Texas QSO Party; CQ WW RTTY Contest
- October 2 -- ARS Spartan Sprint
- October 3 -- German Telegraphy Contest
- October 3 -- 432 MHz Fall Sprint (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Morse Code Chat Rooms Now Open:

Posted: 20 Sep 2012 08:34 AM PDT
http://www.eham.net/articles/28994

Internet chat rooms devoted to Morse code are now in use at www.cq2k.com! This complimentary service from the people at Code Quick allows user choice of speeds, and a choice of text and CW or just CW. QRM rooms, as they are called, should give everyone a great way to practice and sharpen their ability to copy or work the World when the bands are dead.

1806. Encouraging news: most Morse-only era hams are dead

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-21 01:23:12 UTC
From: Klystron <xxx@yyy.zzz>
Message-ID: <xxx-EB6F76.21231220092012@nntp.aioe.org>
Source record: 1973

The majority of hams who got their licenses prior to the introduction of the no-code technician license are now dead. In the not too distant future, Morse code will exist only in historical reenactments in which old geezers in period costume show small children how to make beeping sounds with nothing more than a wood-burning, steam-powered code key.

Nope.

If they got their license the same year code was eliminated for technician
and were 16 at the time, they would now be 37.

Given the current life expectancy you've got about 50 years to go on that.

Funny thing is now that the requirement is gone, there is a resurgance
in interest in the code, especially among the younger crowd.

It appears that absent it being forced on people, many people are finding
it a fun thing to do.

Ham radio appeals to an older demographic. The AVERAGE ham is
probably 50+, although there is little hard data on that point. Still,
the advertising department of the Geritol company believes that ham
radio contests are a good place to spend advertising dollars. Why do you
suppose they think that?

How many people make up a "resurgence"? How many people are "many"?
Morse code related products appear to be disappearing from catalogs and
web sites.

>> Nope.
>>
>> If they got their license the same year code was eliminated for technician
>> and were 16 at the time, they would now be 37.
>
>
> Ham radio appeals to an older demographic.

Ummm, no.

Though the older demographic has the time and money to persue it.

> The AVERAGE ham is
> probably 50+,

Well, given that the average age of all Americans is about 40 and there
are few people younger than the teens that get licensed, that is not
surprising.

> although there is little hard data on that point. Still,
> the advertising department of the Geritol company believes that ham
> radio contests are a good place to spend advertising dollars. Why do you
> suppose they think that?

There is no such thing as "the Geritol company", troll.

1811. NZART Headquarters Infoline Issue 259

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-21 06:12:05 UTC

NZART Headquarters Infoline Issue 259

21 September 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Conference 2013 – Masterton

· FMTAG Notes

· From the VHF-UHF-SHF-EHF Contest Committee

· Marlborough Branch 22, 80th Celebrations

· Update on ZL9HR DX'Pedition to Campbell Island

Debby says…The end of another week and we are getting ever closer to Christmas. This brings me to several reminders…

Branches should now be considering any remits they may wish to send in for consideration by Council and next year's AGM in Masterton.

Also anyone who is considering standing for a position on Council or President should be making it known within their branch. The call for nominations by the Returning Officer will be included in the October issue of Break In.

Subscriptions are due by 31 December 2012. However if you wish to take advantage of the $10 rebate, please ensure I receive your payment by the end of November, this year.

Finally any items of interest or up-coming events that you want advertised to a wider network, please let me know, so I can include it in HQ Info-line. Cut off dates for receipts of articles can be found at the end of each issue.

Talk soon…ZL2DL

FMTAG NOTES

Proposals

None this time.

Final Recommendation to NZART Council

Branch 39 Tauranga has applied to change the frequency of its 885 Repeater at Papamoa, located at TOPO50 BD37 894.73 184.87. The proposed repeater transmit frequency is 433.025 MHz and the proposed receive frequency is 438.025 MHz.

NZART Council Approval

NZART Council, at its September meeting, approved the following Final Recommendations, published as Proposals in HQ InfoLine 257:

Branch 34 South Canterbury 144.575 MHz Digipeater at Mount Studholme, located at TOPO50 CA18 352.25 531.31.

Branch 63 Upper Hutt 6-metre Repeater at Mount Climie, located at TOPO50 BP32 798.83 423.94. The repeater transmit frequency will be 53.950 MHz and the receive frequency 52.950 MHz.

Comments & Applications

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

******

FROM THE VHF-UHF-SHF-EHF CONTEST COMMITTEE

The Nest Contest

The next contest is the Microwave Contest, 921 MHz and up, on Saturday the 6th and Sunday the 7th of October 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The contest after that is the Field Day Contest, all bands 50 MHz and up, on Saturday the 1st and Sunday the 2nd of December 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The Contest Rules are available at:

www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz

with Contest Log in the subject line.

Or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

ZL9HR DX’Pedition to Campbell Island

MONSTER ANTENNA! - The HARAOA president and DX'Pedition leader Tommy VK2IR has just finished construction of a 40metre, 2 element Moxon antenna – yes that's right a two element 40 metre beam is gong on the ZL9HR DX'Pedition to Campbell Island (IOTA OC-037) for the activation between November 28th. and

December 9th. The element length is 15 ½ metres long! To see the construction of this monster simply search for ZL9HR on Youtube.

The fitting out of the four shipping containers to take all the equipment has also been finished and they are being packed. All of this is on schedule to be ready to be shipped out of Sydney in just a few days around the 15th of September.

The team are also delighted to have received several more sponsors, both commercial, associations and clubs and individuals – all of which are listed on the web site at ZL9HR.com. Again a great vote of thanks to all of the sponsors without whom this DX'Pedition could not take place.

So where will ZL9HR operate? On which bands and which modes? While the aim is to operate on as many bands as possible and try to give as many amateurs as possible the chance to work this rare DX location, your vote on the website will affect some of the plans – so if you haven't already done so, please go and vote for your preferred mode and band by going to ZL9HR.com and clicking on the survey button at the top of the home page. Presently 10m is by far the most requested band followed by 160m, as for modes CW leads Digital followed by Sideband.

The ZL9HR “Logistics team” are very pleased to announce that the packed equipment crates have left the DX’Pedition’s Sydney base heading south to New Zealand, on schedule and in plenty of time to progress through the required quarantine formalities with the authorities on the New Zealand mainland before the final leg of the trip by sea with the operations team down to Campbell Island in the great southern ocean for the activation between November 28th. And December 9th.

Please refer to the web site ZL9HR.COM for the full, up to date, information about this major DX’Pedition to the Great Southern Ocean.

73 from Ed VK2ARE Australian publicity Officer for ZL9HR.

******

HISTORIC DAY IN THE REPUBLIC OF KOSOVO

The following is from the Z60K team in Prishtina, Kosovo.

It was 23 years ago that most radio amateurs went off the air in Kosovo. A long period of silence came to an end when eleven Amateur Radio licenses were issued today, valid for an immediate activation of this fledgling sovereign republic. When they suddenly come on the air, the first steps of the licensees are obviously difficult as world demand runs high. Great patience is required as you hear the following reborn hams entering the world of Amateur Radio starting today:

Sabit Zymberi, Z61AA; Durmishali Smani, Z61DD; Feti Fazli, Z61FF; Arif Derbati, Z61AB; Avni Jashari, Z61AJ; Vjollca Belegu, Z61VB; Mustafa Xhoni, Z61LA; Agim Sadiku, Z61AS; Agron Sadiku, Z61XO; Driton Sadiku, Z61DX; Naim Sadiku, Z61NS.

The official opening ceremony took place at 1900 hours local time, with all parties present. First QSOs were with G3BJ, G3UML with Sabit, Z61DS and Driton, Z61DX at the controls.

Additionally, the newly born Amateur Radio Association of Kosovo (SHRAK) was

allocated the callsign Z60K today and that callsign will be used for training purposes as well as for celebrating this wonderful event.

Today, an all-day seminar was held with Government representatives, a majority of Kosovo's Amateur Radio population (with an estimated up to twenty to become active immediately) as well as with Telecommunications Regulatory Authority (TRA) officials and foreign delegation members present. Part of the event was televised on the Prishtina TV network.

It was a memorable event for those coming back from a 23-year hiatus and for

the hams present.

The foreign lecturers welcomed the new group and represented five (5) supporting countries; Hans, PB2T; Nikola, 9A5W; Nigel, G3TXF; Bob, N2BB and Martti, OH2BH.

The mission is to support these new hams and bring them on the air.

Please kindly welcome them to the ranks of Amateur Radio.

QSL for Z60K via G3TXF

RADIO POLITICS: HOUSE MAJORITY REPORTEDLY WANTS SPECTRUM CLEARING RATHER THAN SHARING

According to news reports, the majority control in the United States House of Representatives favors clearing federal spectrum for commercial use instead of seeking sharing arrangements. This, according to the majority staff memo circulated for a House of Representatives hearing prior to a meeting held recently in Washington D.C.. And there is a chance that any decisions could impact on future access to the highest Ultra High Frequency and Super High Frequency bands used by ham radio. Amateur Radio Newsline's Don Carlson, KQ6FM, takes a look at what's transpiring in the national capital:

--

On September 13th, House members of the Communications and Technology subcommittee were to discuss the subject of Creating Opportunities through Improved Government Spectrum Efficiency. But in rejecting a report from the President's Council of Advisors on Science and Technology, the memo said that sharing spectrum in the way it envisions is less useful than clearing spectrum and too untested to be the focus of the subcommittee's spectrum strategy.

The memo went on to say that such sharing should be reserved for cases in which federal clearing is impossible. However the President's Council of Advisors on Science and Technology and the National

Telecommunications and Information Administration both endorse public-private spectrum sharing. They also claim that clearing the spectrum would cost more than $18 billion and 10 years to clear the targeted airwaves.

But the staff memo claims that this figure was inflated and unconfirmed by independent analysis. Instead it calls the figure merely aggregated the estimates of the federal agencies currently using the spectrum. The memo claims that the NTIA and the President's Council of Advisors on Science and Technology never fully investigated the agencies' relocation estimates. Nor has it determined whether the agencies need all the spectrum they have, or whether they could get by with less if they had more efficient equipment or relied more on commercial services.

At this moment its not known exactly what spectrum would be impacted if a non-sharing plan is eventually passed. That said, it could impact negatively on amateur radio if the reallocated spectrum was that shared between Part 97 users and government agencies as quite a bit of the U-H-F and higher bands are today. And while am eventual compromise between the two factions is most likely, this is yet another matter that the nations ham radio community will have to watch closely in the days, weeks and months ahead.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

For its part, the President's Council's proposed a sharing arrangement is similar to unlicensed devices in the broadcast bands, which use a dynamic database to check for open frequencies. However the majority House staff appears to have rejected that approach. (Adapted from TV Technology)

**

RADIO POLITICS: SARL SAYS IT SUPPORTS RSGB STAND ON BPL/PLT

Over on the other side of the world, the South African Radio League says that it supports the Radio Society of Great Britain's concerns over Access Broadband over Powerline also known as Powerline Technology. These are the internet access ports carried on unshielded in-home and powerline to home wiring.

As reported last week, the RSGB had written an official letter to the International Amateur Radio Union Region 1 Electromagnetic Compatibility Working Group. In it the U-K national ham radio society asked that the Working Group reconsider its policy on the draft European Broadband over Power Line standard. One that the RSGB claims to threaten a 38dB increase in RF pollution over much of the short wave radio spectrum.

Now, in its own public statement, the South African Radio League days that it fully supports the RSGB's views. It says that any relaxation in emission levels can have far reaching negative effects which ultimately may impact on South Africa as well. (SARL)

**

HAM RADIO IN SPACE: NEW CUBESATS NOW ON-ORBIT

What might best be called a flotilla of new cubesats operating in the ham radio bands are now on-orbit. Amateur Radio Newsline's George Bowen, W2XBS, has the details:

--

The long awaited launch of a number of new ham radio cubesats has finally taken place. The group of tiny birds winged their way to Earth orbit on September 13th on board a The Atlas 5 launch vehicle from Vandenberg Air Force Base in California.

The launch carried a satellite for the National Reconnaissance Office. Also aboard this flight at four cubesats as part of NASA's Educational Launch of Nanosatellites mission and seven cubesats for government use. The non government mini-birds include the Cubesat for Ion, Neutral, Electron, Magnetic fields that downlinks its science telemetry is in 2200 to 2300 MHz range.

Also now on-orbit is the Colorado Student Space Weather Experiment that can be heard on 437.345 MHz transmitting 9k6 modulation in AX.25 protocol. Another is CP5 also known as PolySat with its downlink at 437.405 MHz at 1 watt, AFSK on Lower Sideband in AX.25 protocol. Rounding out the set is XBN which is a Cosmic X-Ray Background Nanosatellite with its downlink 437.525 MHz running G-F-S-K also in AX.25 protocol.

Several hours after launch Justin Foley, KI6EPH, announced via the Cubesat Internet Rely Channel that all of the microsats had been successfully deployed. A detailed article of the launch can be found on-line at tinyurl.com/microsats-to-orbit.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, monitoring the sky at the North East Bureau in Albany New York.

--

A detailed article on the payloads of this mission and the reason for the launch delays can be found on-line at tinyurl.com/multi-microsat-launch. (ANS)

**

HAM RADIO IN SPACE: FIVE CUBSATS TO GO ON-ORBIT FROM ISS

The long awaited deployment of five CubeSats from the International Space Station will take place on Thursday, September 27. Four of the micro sized birds carry amateur radio payloads. These are identified

as F-1, FITSAT-1, WE-WISH and TechEdSat. More about this microsat project is on- line at tinyurl.com/iss-micro-birds. (AMSAT-UK)

**

AMATEUR RADIO IN SPACE: THREE HAMS RETURN TO EARTH

Three astronauts hams have returned safely to Earth after completing a four month mission aboard the International Space Station. The Expedition 32 crew made up of American Flight Engineer Joe Acaba, KE5DAR with Russian Commander Gennady Padalka, RN3DT, and Flight Engineer Sergei Revin, RN3BS, undocked their Soyuz TMA-04M spacecraft from the orbiting space lab at 7:09 p.m. EDT. They landed in northern Kazakhstan at 10:53 p.m. EDT Sunday night.

The homeward bound Soyuz fired its orbital engines one last time at 9:56 p.m. The descent module then separated from the spacecraft and fell through the atmosphere. It then deployed its parachutes and fired landing engines shortly before touchdown to soften the impact.

The successful landing wraps up a mission that began on May 17 with the Expedition 32 crew spending 125 days in space. (ARRL, Southgate, others)

**

DXCC NEWS: ARRL APPROVES A DOZEN OPERATIONS FOR DXCC

A busy day at the ARRL's DXCC Desk with word that an even dozen operations have been approved for DXCC credit. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with the list:

--

According to Bill Moore, NC1L at the ARRL Awards Desk, the following 2012 operations have been approved for DXCC credit. In no particular order they are the 3B8 stroke IW5ELA operation from Mauritius Island; E40VB from Palestine; JY8VB from Jordan; 9A8VB from Croatia; E7 stroke UA4WHX from Bosnia-Herzegovina; 4O7VB from Montenegro; Z38VB from Macedonia; ZA stroke UA4WHX from Albania; YU9VB from Serbia, EY8 stroke UA4WHX from Tajikistan and the UN stroke UA4WHX operation from Kazakhstan.

And that's quite a list.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

If you missed any of that you can find the entire list in this week's printed Amateur Radio Newsline report. (ARRL DXCC Desk)

**

BREAK 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WB0QXW repeater serving St. Louis Missouri.

(5 sec pause here)

**

BREAKING DX NEWS: N8HS SWAINS ISLAND OPERATION GOES QRT EARLY

The NH8S team on Swains Island is now QRT and is reported to be in the process of tearing down their camp. This, for a possible early departure.

Sanford Houston, K5YY, who is the DXpedition's Pilot Station. He says that the decision to go silent before the announced September 18th end of operations date was due to several factors. This included bad weather conditions, antennas that had come down, a number of operators that had fallen ill with some wounds requiring medical care.

During its stay on Swains the NH8S team has made a total of 105,455 QSOs with 26,010 Unique callsigns. Of these 43,126 were on SSB, 54,128 on CW and 8,201 made using RTTY.

Direct QSLs can be mailed to the Swains Island DXpedition, P.O. Box 5005, Lake Wylie, South Carolina. 29710, in the USA. Bureau QSLs go to AA4NN.

More information on this operation is on-line at http://nh8s.org And we will have more DX related news later on in this weeks Amateur Radio Newsline report. (OPDX)

**

RADIO CRIME: HAM RADIO EMCOMM REPEATER VANDALIZED

Steven Tidwell, KF5NDG, reports to Amateur Radio Newsline on a recent case where a repeater used for Skywarn and other ham radio emergency communications was criminally damaged. The only good news us that it appears the perpetrators have been caught. Amateur Radio Newsline's Cheryl Lasek, K9BIK has the details:

--

It all happened a few weeks ago at about 4:15 a.m. local time on August 20th. That's when the 147.12 MHz hub of the W5RHS linked repeater system in Benton, Arkansas, was taken off the air by an act of vandalism.

The repeater site is located on a water tower that sits behind a fence and locked gate. The suspects managed to break in to the site, and cut the hard-line going to the repeater and the link antennas. They also cut the coax going to the Water Association radio system. The latter is the commercial radio system communicates between the plant and the

water tower.

According to KF5NDG the system owner is Kelly Hesters, whose call is W5RHS. He reportedly noticed that his repeater was off the air when he was leaving work about 7 AM. He made a stop at the repeater site and noticed a Toyota pickup truck outside the gate. He then went inside he found the damage.

The next day when he went back to see what parts and supplies he needed to get the repeater back on the air he found a key that the suspects dropped on the ground. He contacted the Saline County Sheriffs office which determined that the key belonged to the vehicle. As a result of some detective work by the local authorities the suspects in the break-in have been arrested.

Meantime W5RHS is waiting on the delivery of some new hard-line to get the repeater back on the air.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

By way of reference, the W5RHS repeater is the main hub for a multi-linked repeater system in Arkansas. This repeater system is also very involved in Skywarn operations as well as carrying NOAA weather radio alerts. (KF5NDG)

**

ENFORCEMENT: FCC AFFIRMS $15000 NAL TO UNLICENSED MIAMI BROADCASTER

The FCC has affirmed a $15000 monetary forfeiture previously issued to Jeffrey Darius. This for his alleged operation an unlicensed transmitter in the Miami, Florida area.

Back on March 6th the Enforcement Bureau's Miami Office issued a Notice of Apparent Liability for Forfeiture to Darius after tracing an unlicensed broadcast operation on 88.7 MHz to him. To date, Darius had not filed a response to the proposed fine. As a result the forfeiture has been affirmed.

As is the custom, Darius was given the usual 30 days from the September 14th release date of the order to pay or file an appeal. (FCC)

**

RADIO BUSINESS: ICOM AMERICA ANNOUNCES NEW SUBSIDIARY IN BRAZIL

Icom America has announced the establishment of Icom Brazil. This as a subsidiary with headquarters located in Belo Horizonte which is the capital city of Minas Gerais state.

The creation of the new subsidiary will allow the radio manufacturer to solidify its brand visibility in an emerging South American market.

According to the Central Intelligence Agency's "World Factbook" publication, Brazil became the world's seventh largest economy in terms of gross domestic product in 2011.

The initial objective of Icom Brazil will focus on the public safety industry with Brazil's government. The new subsidiary will also help existing distributors expand their dealer networks nationwide. (Icom, Southgate)

**

NAMES IN THE NEWS: BECKY SCHOENFELD, W1BXY, NAMED QST MANAGING EDITOR

The ARRL has announced that Book Editor Becky Schoenfeld, W1BXY, has been promoted to QST Managing Editor. A Connecticut native, Schoenfeld has more than two decades of publishing experience.

Prior to her employment at ARRL Headquarters, Schoenfeld served as Senior Editor at Teaching Kindergarten through 8th grade magazine and Senior Project Editor for textbook publisher Macmillan/McGraw-Hill. She is also the founder of Amaranth magazine which is a highly successful poetry journal.

W1BXY holds a Masters of Fine Arts from Emerson College and a Bachelor of Arts from Fairfield University. Her Amateur Radio activities include chasing grid squares in pursuit of her 6 meter VUCC award and DX hunting on 10 meters.

Schoenfeld replaces the position formerly held by Joel Kleinman, N1BKE, who died tragically in a house fire several weeks ago. (ARRL)

**

NAMES IN THE NEWS: AMSAT 2012 BOD ELECTION RESULTS ANNOUNCED

Tom Clark, K3IO, Lou McFadin, W5DID, and Gould Smith, WA4SXM, will serve on the AMSAT North America Board of Directors for the next two years. The first alternate is Mark Hammond, N8MH and the second alternate is Patrick Stoddard, WD9EWK. In all some 700 AMSAT North America members cast ballots in this year's election. (AMSAT)

**

HAM HAPPENINGS: HUNTSVILLE ARC TO ACTIVATE THREE LIGHTHOUSES

The Huntsville Alabama Amateur Radio Club says that it will be activating three light houses in Mobile Bay for Alabama Lighthouse Weekend. The event takes place beginning at 1800 Central Time on October 5th and runs through 1800 Central on the 7th. During that period the club will be on the air as N4L from the Sand Island lighthouse near the entrance to Mobile Bay, W4L which is the Mobile Point lighthouse at Fort Morgan , and K4L at the MidBay lighthouse in Mobile Bay. Operations will be on the High Frequency bands. For more information please contact the event organizer Warren Alford by e-mail

to KJ4RAQ (at) comcast (dot) net. (HARC)

**

HAM HAPPENINGS UPDATE: W5KUB TO WEBCAST MFJ 40TH ANNIVERSARY

The 40th anniversary hamfest gathering of MFJ Enterprises will be streamed live to the Internet thanks to Tom Medlin, W5KUB. The event takes place October 5th and 6th from the grounds of the company's production complex in Starkville Mississippi. As reported last week, there will be all sorts of fun activities and now those hams unable to travel to the gathering will be able to enjoy it vicariously thanks to Tom and his highly skilled video production crew. As in past webcasts Tom will be offering prizes to some of those who tune in. Updated information will be posted to Tom's Facebook webpage at facebook.com/groups/w5kub/. The on-line address to enjoy all of what looks to be a fun gathering at MFJ is simply w5kub.com. (W5KUB)

**

HAM HAPPENINGS: PACIFICON TO FEATURE NEW MEDIA AND SOCIAL NETWORKING

And an update on plans for the joint Pacificon and ARRL 2012 National Convention. A major theme this year is New Media and Social Networking. And to emphasize its importance the Mount Diablo Amateur Radio Club and Pacificon have teamed up to host "Night of the New Media Elmers" with well-known amateur radio podcasters.

At airtime, speakers scheduled to appear include Jerry Taylor, KD0BIK, Randy Hall, K7AGE, Chris Matthieu, N7ICE, and Ham Nation co-host Gordon West, WB6NOA.

Jim Siemons, AF6PU, is the event's co-General Chairman. He says that forums and seminars are the very heart and soul of Pacificon:

--

AF6PU: "Pacificon specifically is a forum driven event and we have fantastic speakers from all over the country. We've had Nobel Laureates and astronauts and all sorts of folks come out and talk about whatever you are into in amateur radio we are going to have something for you."

--

The New Media and Social Networking gathering takes place at 7 P.M. on Friday night, October 12th. The location is in the Sedona Ballroom of the Satern Conference Center at the Mariott Hotel and Convention Center in Santa Clara, California.

Pacificon has also created a Facebook page where you can post photos, videos, comments, and get up-to-date announcements about what's happening at the convention. To join it sign onto Facebook and then go to facebook.com/Pacificon2012 and click "Like" to join the page.

(MDARC, Pacificon)

EMERGING TECHNOLOGY: ULTRA HIGH DEFINITION TV SYSTEM EXPECTS ITU APPROVAL

The next generation of super high definition television may soon be on its way as we hear from Amateur Radio Newsline's Jim Damron, N8TMW:

--

Ultra High Definition Television also known under the acronym Super Hi-Vision, will likely be approved by the International Telecommunication Union as the next generation universal global television standard.

Developed by public broadcaster NHK at its Science and Technical Research Laboratories, Ultra High Definition Television is a system that delivers 16 times the resolution of current high definition images. The new format can deliver images with 33 million pixels through 7,680 horizontal lines and 4,320 vertical lines. It also boasts a video refresh rate of 120 frames per second, as well as 22.2 channel multi-dimensional sound.

The system is collaboration between NHK along with electronics manufacturers Panasonic and Sharp.

>From Charleston West Virginia, I'm Jim Damron, N8TMW, reporting.

--

Test broadcasts are scheduled to begin in Japan by 2020. (Published News Reports)

RADIOSPORTS: CALIFORNIA AND PENNSYLVANIA QSO PARTIES COMING

Two of the nations most popular radiosporting events are looming on the near horizon. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with the details:

--

The first weekend of October, it's the granddaddy of all state QSO parties - the California QSO Party. It's sponsored by the Northern California Contest Club.

The action starts on Saturday, Oct. 6 and wraps up Sunday, Oct. 7.

The following weekend, Saturday, Oct. 13 and Sunday, Oct. 14, it's the Pennsylvania QSO sponsored by the Nittany Amateur Radio Club in State College, PA.

It's promoted as the "Friendly QSO Party."

Let's start right up front here.

You don't have to be a contester to take part in either of these events.

In fact, most of the operators competing in either of the parties like to hear from the many casual operators who might turn on their radios during the weekend, hear some activity, and tune up and down the HF bands offering a simple contact and, perhaps, a much needed multiplier.

So, you're just as valuable, sometimes even more valuable, than you might think.

Don't be afraid. Squeeze the mic or touch the CW paddles or the key and give a fellow ham a hand.

California's party features activity from all 58 counties in the Golden State and has special competitions for Y-Ls, youth operators, first-time contesters and even school clubs.

Club competitions are highly encouraged, so if you decide to jump in, put the name of your radio club into the entry form.

The California Party gives away a host of plaques for various operating categories, offers unique T-shirts to those who are interested, and even awards special prizes for the top 20 California and top 20 non-California single operator stations. See their website for more on that.

The following weekend, the bands get active again as operators fan out across Pennsylvania's 67 counties for a great operating event.

It's one of the few competitions where lots of non-contesters get together with friends to set up Field Day- style stations to activate some of the rare Pennsylvania counties.

There's lots of buzz in the months before the party on a reflector operated by the party organizers.

And, there are plaques and certificates awarded to contestants both within Pennsylvania and across the country. Even DX stations are recognized.

First-timers also are welcome in the PA Party. And, there are T-shirts for those who to get one.

So, is your station ready?

If you're a contester, maybe you consider each of the parties a warm-up for the fall contest competition.

If you're not a contester, get on anyway. Pick up a few counties in Pennsylvania or California, maybe a few unique call signs if you're a prefix hunter.

The bottom line: Have some fun.

We'll see you on the air!

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the California QSO Party is on line at tinyurl.com/cal-qso-party. The website for the Pennsylvania QSO Party is simply tinyurl.com/pa-qso-party. We say good luck in both contests.

(NT3V)

Radiosports: ARRL 2011 EME CERTIFICATES IN THE MAIL

Sean Kutzko, KX9X, who is the ARRL's Contest Branch Manager says that Certificates for the Leagues 2011 E-M-E Contest were mailed out on September 18th. Winners should see them begin to arrive shortly. Awards processing for ARRL contests can be tracked at arrl.org/plaques-and-certificates. (ARRL)

**

ON THE AIR: GB1LM CELEBRATES UL LIVERPOOL MARATHON

On the air, listen out for GB1LM which is the special event call sign for the United Kingdom's famed Liverpool Marathon. The station will be active on the High Frequency bands through October 14th. For QSL information please check GB1LM on QRZ.com. (Southgate)

**

DX

In DX, The Republic of South Sudan has issued its first amateur radio license. The call Z81A went to Jim Pratt who holds the United States call letters of K7QI. The second license issued was Z81D. It went to Diya Al Sadi, YI1DZ. Both are reportedly now on the air.

Also new, on September 17th, shortly after 1700 U-T-C, a combined group of international and local operators started operating as Z-6-zero-K

from near Pristina, Kosovo on both 20 and 17 meter SSB. Operators included 9A9A, MD0CCE, OH2BH and OH2TA. Local television recorded the historic moment live on air. QSL via G3TXF.

And word that the Martello Tower Group will be activating the Island of Herm which from October 4th to the 8th. Operations will be on 80 through 10 meter SSB and RTTY. QSL via G6NHU.

Lastly ON6KE will be active as 9H3AK from Gozo Island through September 28th. His activity will be holiday style on 40, 30 and 20 meters operating about 5 watts QRP on CW only. QSL only electronically via Logbook of the World or eQSL. No printed cards will be available for this operation.

(Above from various DX news sources)

**

THAT FINAL ITEM: LAST MAN STANDING GETS SPECIAL EVENT CALL K6T

And finally this week, word from Last Man Standing Producer John Amodeo, NN6JA, that the callsign K6T has been approved for use for the shows special event operation to be held on Sunday, October 28th. NN6JA says that K6T will take to the air at approximately 9 a.m. Pacific with exact bands and frequencies to be announced as the date gets closer. And according to Amodeo, he wants this to be a fun event that everyone can share in:

--

NN6JA: "We at the show are so excited about ham radio and we have so much incredibly cool amateur radio here; not to mention some 12 licensed amateur radio operators on the staff; that we decided why not share our good fortune with hams out around America and our ham (radio) fans in particular and get on the air and talk directly to our ham (radio) fans through all of our great gear.

"So we took a few minutes, put all of our antennas on the roof so we could improve our range; tuned everything up; and we are ready to go.

"So we are hoping everybody from around the country will take a few minutes away from contesting, because that is a big contest afternoon, and come on over (to where we are operating) and call us up."

--

NN6JA says that the current plan is to operate on the High Frequency, VHF and UHF bands as well as D-STAR, Echolink and IRLP. This should make it possible for hams anywhere to make contact with K6T.

--

NN6JA: "We are going to provide a large number of paths for people to get in so we kind of feel that everyone in the country should be able to find some path to get to our stage (ham radio operation) to talk to

our crew and the PAPA members who are helping us out."

--

According to Amodeo, members of the LA based PAPA System will assist the licensed operators who are part of the shows the crew in running the event. They will use several PAPA System repeaters to run its local and linked communications. The operators will also be monitoring other linked repeater systems from around the country as well.

As the day approaches further information will be posted on Facebook at www.facebook.com/KA0XTT. Amodeo also says to monitor @nn6ja on Twitter for the fastest updates.

Last Man Standing stars actor and comedian Tim Allen as Mike Baxter, KA0XTT. The show airs on ABC.

(NN6JA, ARNewsline(tm))

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

'Feedback Feedback'

With thanks and appreciation for those members who keenly raced to the
new WIA News Broadcast Feedback page at
http://www.wia.org.au/members/broadcast/feedback
The inaugural letter writers were:

Ed VK2ARE - pointing out that we missed the publicity of the ZL9HR DXpedition
which we will hear more about in Ed's audio submission later in the show.

David VK6DWB - accusing us of entertaining him all the way to work in the morning! hihi!

and a listener who picked us up on the use of 'Chairperson' in one of
last week's reports. The listener pointed out the Latin root of the word 'Chairman'

refers to 'manus' meaning 'hand', and is not a gender specific reference to which the ever vigilant forces of political correctness feel they need to correct.

Please submit your feedback to the new Feedback Form and tell us how we're doing.

David VK3RU - New WIA Secretary

Continuing our series of interviews getting to know members of the WIA, today we speak with David VK3RU.

Ballarat Amateur Radio Club Inc.
Contact: Roger de Valle VK3ADE, 03 5330 3082 or roger@genette.biz
News Release: Ballarat Amateur Radio Hamvention ?" 2012.

The Ballarat Amateur Radio Group will hold its annual Hamvention on Sunday the 21st of October 2012 in the usual venue provided by the Ballarat Greyhound Racing Club in Rubicon St, Redan. Doors open for traders at 8am and general access is at 10am.

Those that have attended in the past will know that this is a good day out in a really roomy, indoors venue with historically around 60 to 70 tables of new and preloved amateur radio gear, test gear and general bits and pieces on sale.

We work very hard to make the event a place where both first timers and regulars are welcomed, be they traders, browsers or buyers and each and everyone is given every assistance to ensure that they have a great day out.

Entry for everyone, including traders is $6 per head and tables are available for $10 per 1.6 metre section.

We would really encourage people to use the opportunity to turn over some of that gear that has been sitting in the shack for a little too long and those bit and pieces that you have been struggling to find a use for, give another amateur a chance to put it to use and make yourself a few dollars in the process.

If you dont think you could support a full table then the Ballarat Club has a table where they are more than happy to sell the goods for you for a small commission.

Historically we have had a really strong representation of commercial traders and dealers and we are pleased to continue this tradition into 2012.

No amateur gathering is ever complete without a bit a food, a place for a coffee and a good catch up with friends, there is a well catered food area designated and it is provided with a goodly amount of seating with generous sized tables.

If you love building equipment then how about a bit of show and tell, there is a special section for home brew projects with sections for novices, skilled and very skilled with generous prizes for each category, amateurs just love seeing other amateurs projects and admiring their ingenuity.

If you come every year we look forward to seeing you again, if you haven&#65533;(tm)t been to Ballarat for a while then please consider paying us a visit, it&#65533;(tm)s a truly beautiful town with lots to do for families and we would really be delighted to see you at the Hamvention.

If you need more information then please visit the BARG web site at www.barg.org.au or you can contact us via Roger VK3ADE on 03 5330 3081 or Ian VK3AXH on 03 5341 3012.
For bookings you can contact us via hamvention2012@barg.org.au

TARC Does the Comedy Revue

TARCadians and friends will once again be thoroughly entertained when they head along to this year&#65533;(tm)s Townsville Choral Society Comedy Revue on Saturday evening November 3rd.

A stellar cast will regale the audience with Music - Comedy - Songs - Sketches and stunts designed to keep the name of Thuringowa alive and well.

This year there is no dinner provided, however complementary wine and cheese will be served before the entertainment and drinkies will be available.
Roll up around 6-30pm to get a parking spot. Doors open 7pm with everyone to be seated by 7-15pm.

A fantastic show, excellent company and it only costs $25 per head.
See the Master of Time and Space - Iain VK4IGM to book and pay for your seats.
Act Now - as the event is very popular and places will go in a flash !

(Gavin VK4ZZ)

OPERATIONAL NEWS - DATELINE 2012

WW Oceania Dx Contest SSB October 6
WW Oceania Dx Contest CW oceaniadxcontest.com Oct 13
VK Spring VHF / UHF Field Day November 24-25

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Oceania DX Contest - 3 Weeks Away !

The 2012 Oceania DX contest is now only 3 weeks away, with the Phone SSB section on the first weekend in October and the CW section on the second weekend in October. This will be a great opportunity to work a lot of DX stations in the Oceania region, as well as giving your station a test drive for the new DX contest season and the CQ WW contest events later in the year.

The PHONE section runs 08:00 UTC Sat 6 October to 08:00 UTC Sun 7 October with CW running at the same times the following weekend. All activity is on non-WARC bands from 160M to 10M.

The organisers are expecting a good turn out from VK, ZL and YB stations, as well as stations from some of the rarer Pacific entities. The main aim of the contest is to promote HF contacts with stations in the Oceania region. Oceania stations can work other Oceania and non-Oceania stations. Non-Oceania stations can only work Oceania stations.

More information and the rules are available from the contest section of the WIA website.
(VK4TS)

The Keith Roget National Parks Award

The first to achieve all 45 Victorian National Parks is Peter Fraser VK3ZPF. It has taken him from the warm Sunset country in the northwest to the cooler climates of the distant Gippsland Parks.

Peter VK3ZPF will be on air with others over the forthcoming special VK3 National Parks Weekend of November the 16th to the 18th.

Keep an ear out that weekend for at least the National Parks at Heathcote-Graytown, Barmah, Gunbower, Terrick Terrick, Kinglake and St Arnaud.

If you intend to activate a National Park on November the 16th to the 18th then put on a Master List on the Amateur Radio Victoria website www.amateurradio.com.au which contains the rules and endorsements.
(Tony Hambling VK3VTH)

MONSTER ANTENNA!

The HARAOA president and DX'Pedition leader Tommy VK2IR has just finished construction of a 40metre, 2 element Moxon antenna ?" yes that's right a two element 40 metre beam is gong on the ZL9HR DX'Pedition to Campbell Island (IOTA OC-037) for the activation between November 28th. and December 9th. The element length is 15 ½ metres long! To see the construction of this monster simply search for ZL9HR on Youtube.

The size of this antenna meant that it needed to have its own special shipping crate built and over the last couple of weeks all crates have been built and the fitting out of the four shipping containers finished. All of this is on schedule and all equipment will be shipped out of Sydney before the end of the month.

The team are also delighted to have received several more sponsors, both commercial, associations and clubs and individuals &#65533;" all of which are listed on the web site at ZL9HR.com. Again a great vote of thanks to all of the sponsors without whom this DX'Pedition could not take place.

So where will ZL9HR operate? On which bands and which modes? While the aim is to operate on as many bands as possible and try to give as many amateurs as possible the chance to work this rare DX location, your vote on the website will affect some of the plans &#65533;" so if you haven't already done so, please go and vote for your preferred mode and band by going to ZL9HR.com and clicking on the survey button at the top of the home page. Presently 10m is by far the most requested band followed by 160m, as for modes CW leads Digital followed by Sideband.

Please refer to the web site ZL9HR.COM for the full, up to date, information about this major DX'Pedition to the Great Southern Ocean.

73 from Ed VK2ARE&#65533; Australian publicity Officer for ZL9HR.

THE QNEWS WORK BENCH - the nuts and volts report ?" Measure Twice cut Once.

CONTROLLED CARRIER AM -SOMETHING OLD IS NEW AGAIN

An old modulation technology is making a comeback for A-M broadcast stations in a new and money saving way. Amateur Radio Newsline?(tm)s George Bowen, W2XBS, says that back in the days of full carrier A-M transmission one very popular and low cost way to put ones voice onto a carrier wave was to modulate the final power amplifier?(tm)s screen grid.

A variation on this that required no heavy modulation transformer was to vary the output power of the transmitter at an audio rate by varying the final amplifier?(tm)s screen voltage at an audio rate. This system was called controlled carrier A-M and it was made very popular on the ham bands in the 1940?(tm)s, 1950?(tm)s and 1960?(tm)s in such budget priced transmitters as the Heathkit DX-35, DX-40 and DX-60 to name only a few.

With the advent of single sideband transmission, full carrier A-M fell out of favour in the ham radio world but it has remained a staple in the broadcast industry and other services that want to get their message to the public. And now, carrier control modulation is making a comeback among broadcasters but not in the way it was done by radio amateurs of the past.

For broadcasters who spend 10?(tm)s of thousands of dollars a year paying for electric service, the ability to raise and lower power levels can be a major cost cutting factor. And because of this a number of stations have received waivers from the FCC to experiment with several new forms of carrier control technology.

In one instance, transmitter manufacturer Harris Broadcast and New York City powerhouse WOR-AM say they have had success with a power-saving

Modulation Dependent Carrier Level
algorithm. This with no effect on Arbitron
Portable People Meter data encoding/decoding, the
stations H-D Radio signal coverage or digital audio quality.

Harris engineers worked with Tom Ray, W2TRR , who
is the Corporate Director of Engineering WOR AM
in New York, to test the compatibility of two
Harris Modulation-Dependent Carrier Level
algorithms. Amplitude Modulation Companding
provided the largest reduction in transmitter
power consumption, by saving 37 per cent in
average AC power input to the transmitter. WOR
estimated this translates up to a $3,000 per
month savings on the electric bill at his New Jersey transmitter site.

So will this new form of Amplitude Modulation
Companding bring back full carrier AM to the ham
bands? While a tiny segment may decide to
experiment with it more than likely SSB will
remain the preferred voice system among ham radio
operators worldwide. At least until it�(tm)s
replaced by a digital voice system at some time in the future.

Nautel, another transmitter manufacturer has
estimated that a 50 kilowatt AM transmitter using
this technology and operating 24 hours a day, 7
days a week could easily save $20,000 a year or
more in electricity costs. This based on modest
electricity rates of 10 cents per kilowatt hour.

The complete story can be found on-line:-
tinyurl.com/harris-modulation

(arnewsline sep10)

INTEL SAYS THE FUTURE OF EVERYTHING IS WIRELESS

Intel Corp. believes that in the future all equipment have to be completely
wireless, whether it is a laptop, a display or something else. To achieve that,
Intel wants to integrate radio in every applicable chip it makes, which
essentially adds wireless tech to any client chip these days, given the trend
towards highly-integrated system-on-chip devices.

"In the future, if it computes, it connects. From the simplest embedded sensors
to the most advanced cloud datacenters, we are looking at techniques to allow
all of them to connect without wires," said Justin Rattner, chief technology
officer of Intel, at Intel Developer Forum.

WW SPECIAL INTEREST GROUPS --- ARISS

ARISS Contact with Maroochydore state School

What a buzz for the kids at Maroochydore State School on Wednesday afternoon
of this week just gone. They had an exciting opportunity to to talk to Aki
KE5DNI who is currently travelling on the International Space Station. Local
communications were handled by President Richard VK4RY from the Sunshine Coast
Amateur Radio Club along with a few helpers. Also involved was Shane VK4KHZ

out at Glendon, Tony VK5ZAI in Kingston SA and JOhn AG9D in Montgomery USA.

Communications started at about 5:03 and lasted for only 10 minutes before the
ISS was over the horizon, but what an opportunity for the school kids and an
opportunity for us as Amateurs to show what radio can do. There is no other

way to talk to the astronauts so hopefully some of this might stick in their heads in the years to come.

Until next time, this is Gordon VK4VP.

This contact was also publicised on Breakfast show on 612 ABC Brisbane. A program blog post with audio is available on their site:
http://blogs.abc.net.au/queensland/2012/09/maroochydore-primary-talks-with-outer-space-.html

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

Amateur Radio CubeSats to deploy from ISS

JAXA have announced that the deployment of five CubeSats from the International Space Station (ISS) will take place on Thursday, September 27
Four of the CubeSats carry Amateur Radio payloads.
The five CubeSats on this mission include:
+ Raiko (Japanese: "thunder drum")
2U cubesat, photography, Ku-band beacon
+ We Wish
Infrared camera for environmental studies
+ FITSat 1
High-speed data test, high power LED visual tracking
+ F-1 Vietnam Student CubeSat
On-board camera for earth observation mission
+ TechEdSat

More information, including link modes and frequencies can be found in the AMSAT news section at amsat.org
(amsat news service)

WW SPECIAL INTEREST GROUPS --- RADIO SCOUTING

CALLING FREQUENCIES
Please QSY off the calling frequency after establishing communication.

Australian voice calling frequencies:
3.650, 7.090, 14.190, 21.190, 28.590, 52.160

World CW calling frequencies:
3.570, 7.030, 14.060, 18.080, 21.140, 24.910, 28.180, 50.160

World voice calling frequencies:
3.690 & 3.940 MHz, 7.090 & 7.190, 14.290, 18.140, 21.360, 24.960, 28.390, 50.160

Calling frequencies for Slow Scan TV (SSTV):
3.630, 7.033, 14.227

Calling Frequencies for PSK31
14.070

St George Amateur Society Activity

The St George Amateur Society will be running a JOTA station at Bonna Point Reserve Kurnell, NSW this year as part of the annual scout and guide Boree Regatta event.

The station will have two VHF transceivers on 2 metres and 70 centre metres and two HF transceivers operating on 80, 40 and 20 metres. The call sign will be VK2LE.

The station will have over 500 scouts and guides on the air from 10am Eastern Daylight Saving Time, EDST Saturday morning till 10pm EDST Saturday night and again from 9am EDST Sunday morning to 2pm EDST Sunday afternoon.

The look forward to making 2012 a truly memorable Jamboree On The Air.

For further information, check out the St George web site at http://www.sgars.org/jota

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

ARRL Simulated Emergency Test

The American Radio Relay League (ARRL) holds its Simulated Emergency Test next month to try out equipment, operating skills and emergency deploymentplans.

Setting the date as October 6 to 7, it has invited the Amateur Radio Emergency Service, the National Traffic System, the Radio Amateur Civil Emergency Service, SKYWARN, the ARRL Field Organisations and other groups involved.

In the US many volunteers are active in disaster preparedness communications with a variety of agencies that rely on radio amateurs to provide serviceduring emergencies.

The ARRL has agreements or Memoranda of Understandings with several including the American Red Cross, the National Weather Service, the Federal Emergency Management Agency and the Salvation Army.

The membership of the ARRL and the number with a callsign are growing slowly. A factor is the continuing interest in emergency, disaster, and public servicecommunications.
(Jim Linton VK3PC)

YAESU DONATES NEW GEAR TO HELP REBUILD RAST STATION HS0AC

Yaesu has donated a pair of FT-2000D transceivers to the Radio Amateur Society of Thailand. This to help rebuild its headquarters station HS 0 AC that lost its radio gear during severe flooding last year.

The presentation of the two transceivers to the Radio Society of Thailand was made by Dennis K 7 BV, who is the company&#65533;(tm)s Executive Vice President

Amateur Radio Sales and also holds the call sign HS 0 ZKS.

In his note, K 7 BV said that Thailand is what he called extremely "radioactive" with over 300,000 hams most of whom are on VHF. However, that is in the process of changing.

Dennis says that after seven years of waiting, Thai hams are once again able to test for a license that gives them operating privileges on the HF bands. According to K 7 BV some 40 applicants have already passed the new exam this year and at least one more test is schedule before years end.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh ‘and always if the news room is to read your item write in the 3rd person.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK3DN@wia.org.au on behalf of the National WIA.

Windfarm Developers: Amateur Operators Can Use 'Alternative Frequencies'.

Posted: 07 Sep 2012 03:34 AM PDT
http://forums.qrz.com/showthread.php?360589-Windfarm-Developers-Amateur-Operators-Can-Use-Alternative-Frequencies&goto=newpost

Of interest to UK amateurs, where wind energy is currently undergoing a
huge boom, will be this statement by developers RWE Innogy:

'Amateur radio operators have a variety of ways to improve

radio system performance. These are mostly associated with

changes to aerials and radio equipment or increasing

transmitted power levels.'

which goes on to state that, as RWE's view of how amateurs should cope with
any interference by using:

'...alternative amateur radio frequencies or technologies'

That's nice. Legally licensed operators working protected bands can take a
hike, or pay - if they get planning permission - to erect bigger, higher
antennas! All terrbily realistic, I'm sure.

The problem is that the law does not protect us from path interference by
physical structures, just interference arising from other sources.

Anyone with concerns can submit their views, as I did, using the forms
found here.

The document from which the above statements are taken can be found here.

Welcome to AGB-NEMIGA-2012 Contest

AGB NEMIGA 2012 Contest

21.09.2012 = 2100-2400 UTC = 80m

on English

http://www.ev5agb.com/contest/agb_nemiga.htm

on Russian

http://www.ev5agb.com/contest/agb_nemiga_rus.htm

on Czech

http://www.ev5agb.com/contest/agb_nemiga_cz.htm

all questions to EU1EU@mail.ru

Special for This Contest for All Contesters, who will send LOGs will

be AGB-NEMIGA Contest Award-Certificate in PDF format. For All

Contesters, who sent LOGs.

Also PLUS Special "Award AGB-NEMIGA-2012" during in this Contest ONLY.

This Award in PDF format and gratis (kostenloss) for AGB-NEMIGA
contesters.

Its for contacts with 5 AGB-members during AGB-NEMIGA-2012-Contest.

I'll send PDF-files of Awards by email for Personal !!!

But Contesters must be send Application with Logs for

"AGB-NEMIGA-2012" Award.

Also nice points for This Contest =

ONE HOUR (You can working in the Contest one hour Only .... I know,

than many amateurs radio have many Years and not so gut Health and

its hard for 3 hour Contest-job ...).

== RULES ==

The object of the Contest: Licenced amateurs radio worldwide and SWL;
Invitation for all amateurs radio.

CONTEST CALL: CW - TEST AGB; SSB - CQ AGB CONTEST;

MODE: CW, SSB, Digital (RTTY, PSK, STTV ...);

FREQUENCIES: CW (3510 - 3555); SSB (3700 - 3750) - recomende; Digital (3570
- 3600)

Pilot frequency in begin contest: CW-3540, SSB-3720

REPEAT: Each 15 minutes (12 periods) you can make CW-QSO, SSB-QSO,
Digital-QSO with every station.

There are periods -

2100 - 2114, 2115 - 2129, 2130 - 2144, 2145 - 2159,

2200 - 2214, 2215 - 2229, 2230 - 2244, 2245 - 2259,

2300 - 2314, 2315 - 2329, 2330 - 2344, 2345 - 2400,

In DIGITAL Entry - You can make Digital QSO next Digital-mode during every
15-munute period. As an Example: RTTY + PSK + SSTV ...

ENTRY:

A Single Operator MIXED (CW + SSB) AGB-member

B Single Operator CW AGB-member

C Single Operator SSB AGB-member

D Single Operator MIXED (CW + SSB)

E Single Operator CW

F Single Operator SSB

G Single Operator MIXED (CW + SSB) QRP (Max 10W)

H Multi Operator

I - SWL

J - Digital (RTTY, PSK, AMTOR, PACKTOR...)

K - ONE HOUR (You can working in the Contest one hour Only .... I know,
than many amateurs radio have many Years and not so gut Health and its hard
for 3 hour Contest-job ... You can workin more than one hour, but select

one hour in Log summary sheet)

EXCHANGE: No AGB member stations - RST + number of QSO (599-001);

AGB member station - RST + number QSO + AGB-number (599-001/60);

...

...

== =========

Also, You can see info of special AGB-TROPHY for

W-100-C == Worked in 100 Contest (competitions)
http://ev5agb.com/award/trophy_w100c_e.htm

W-250-C == Worked in 250 Contest (competitions)

Learn some statistics and look up life expectancies and you will learn that
the numbers mean the majority, which means greater than 50%, are still alive,
ignorant twit.

Jock Soutar: Radio Man:

Posted: 20 Sep 2012 06:14 PM PDT
http://www.eham.net/articles/29005

Jock Soutar has lived in Barstow since 1962, when his father, Jim Soutar, started his auto dealerships in Barstow. Jock was born in San Bernardino at St. Bernadine's Hospital and graduated from Barstow High. Previous to that, the family lived in Running Springs in the San Bernardino Mountains -- a community without a hospital at that time. Q: Describe a special memory you have in the High Desert. A: I enjoy the desert and its surrounding areas. Q: What do you do in your free time? A: I retired two years ago from the Barstow Unified School District.
Since then I have increased my activities with amateur or ham radio. I am the current President of the Barstow Amateur Radio Club and we participate in many events either using our communications expertise for various civic and radio associated events. Our members are always ready to help if a group needs communications for their events. Q: Tell us one thing that most people don't know about you. A: Probably about Amateur Radio being my main hobby.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Changes followed by "|".

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

SARLNEWS 23 September 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other newsreaders change to suit).

SILENT KEYS

It is with regret that it must be announced that the keys of two radio amateurs went silent recently, they are:

That of Rowan Baumgarten, ZS6BIB, on the 15 September 2012. Rowan was a valued committee member of the Alberton Amateur Radio Club. He promoted amateur radio at Jota, Scopex, War museum, Air shows and where ever he could and was part of the RP foundations Cycle race - Ride for Sight as lead and commentary vehicle for 18 years.

That of Martin Harper, ZS6MSG, previously ZS5VO, became silent on the 17th September. Marten was a keen Hamnet member.

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

In the news today:

HERITAGE DAY SPRINT

RADIO TECHNOLOGY IN ACTION SYMPOSIUM

MTN RADIO AMATEUR OF THE YEAR AWARDS

LOOKING AHEAD TO WRC-15

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

HERITAGE DAY SPRINT

Aim is to stimulate activity on 40 m and to promote public relations with respect to the various Heritage sites in South Africa on 24 September starting at 10:00 UTC and ending at 13:00 UTC (12:00 to 15:00 CAT. Only frequencies in the following segments may be used. CW: 7000 to 7025 kHz; phone: 7060 to 7100 kHz and 7130 to 7200 kHz. A maximum output power of 100 W is allowed.

The exchange is call sign, RS(T) signal report, a serial number commencing with 001 and the letter indicating the station type - B for blockhouses, H for other heritage sites and G for general stations. Example: 59 001 B. For stations at blockhouses and heritage sites, field station rules apply as per the SARL blue book.

Scoring - CW - 12 points for every contact with a station at a South African block house or other heritage site and 4 points for every other station. Radio Phone scoring - 8 points for every contact with a station at a South African block house or other heritage site and 2 points for every other station.

Multipliers - Blockhouse (B) and Heritage (H) stations use a multiplier of 3 (x3); General (G) stations use no multiplier (x1). Electronic logs are required and may be in any standard logging format or MS Excel. No paper logs, scanned images or pdf files will be accepted, except as check logs. E-mail logs to riaanzs4pr[at]gmail[dot]com and send a copy to fwolff[at]global[dot]co[dot]za.

Closing date for log submissions is 9 October 2012.

RADIO TECHNOLOGY IN ACTION SYMPOSIUM

Pre-booking for Cape Town closes Wednesday evening.

The last in the 2012 series of the SARL Radio Technology in Action Symposiums will be held in Cape Town on 29 September at the Cape Peninsula University of Technology Bellville Campus. The full programme and registration forms are now available from the SARL website. Click on RTA or the link in the news update centre stage on the home page.

Pre-booking assists with catering arrangements and guarantees that you will be able to get the CD and the SDR kit at the meeting. Pre booking closes on Wednesday evening. After that bookings will only be taken on the day.

The challenge is on for the Western Cape Radio Amateurs to beat the Gauteng record of close to 100 participants, currently pre-bookings are approaching 50. Please make use of the pre-booking facility and stand a change to win an ARRL Basic Antenna book. The booking form can be downloaded from the SARL website.

MTN RADIO AMATEUR OF THE YEAR AWARDS

Nominations close on 5 October.

Here is an opportunity to recognise a radio amateur that has made a contribution to amateur radio. There are three categories:

GARTH MILNE TECHNICAL INNOVATION AWARD The award is made for the support, development and application of Technological Innovation in Amateur Radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or a tertiary education institution.

MTN RADIO AMATEUR OF THE YEAR AWARD The award is made for the support and development of the Amateur Radio Service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her expertise and time to the promotion of Amateur Radio in South Africa.

MTN AMATEUR RADIO COMMUNITY SERVICE AWARD Annually the South African Amateur Radio Development Trust is recognising a radio amateur or a group of radio amateurs for service to the community.

Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Nomination forms are available on www.amateurradio.org.za or by sending a mail request to saardt@intekom.co.za. The closing date for nominations has been extended till 5 October 2012.

NEW QST MANAGING EDITOR

The ARRL has announced that Book Editor Becky Schoenfeld, W1BXY, has been promoted to QST Managing Editor. A Connecticut native, Schoenfeld has more than two decades of publishing experience.

Prior to her employment at ARRL Headquarters, Schoenfeld served as Senior Editor at Teaching Kindergarten through 8th grade magazine and Senior Project Editor for textbook publisher Macmillan/McGraw-Hill. She is also the founder of Amaranth magazine which is a highly successful poetry journal.

W1BXY holds a Masters of Fine Arts from Emerson College and a Bachelor of Arts from Fairfield University. Her Amateur Radio activities include chasing grid squares in pursuit of her 6 metre VUCC award and DX hunting on 10 metres.

Schoenfeld replaces the position formerly held by Joel Kleinman, N1BKE, who died tragically in a house fire several weeks ago.

LOOKING AHEAD TO WRC-15

>From an Amateur Radio perspective, the 2012 World Radio Communication Conference (WRC-12) was very successful. According to IARU Secretary Rod Stafford, W6ROD, the IARU Administrative Council will meet in the next 45 days and will address the agenda items for the 2015 World Radio Communication Conference with an eye to building the best strategy to deal with those agenda items in a way that is most favourable to the Amateur Radio Service.

WRC-15 Agenda Item 1.4 calls on the delegates "to consider possible new allocation to the Amateur Service on a secondary basis with the band 5 250-5 450 kHz in accordance with Resolution 649 (WRC-12). "According to Stafford, the IARU will be spending a lot of time and effort to garner support and to ensure the passage of this Agenda Item.

Agenda Item 1.1 is "to consider additional spectrum allocations to the mobile service on a primary basis and identification of additional frequency bands for International Mobile Telecommunications (IMT) and related regulatory provisions, to facilitate the development of terrestrial mobile broadband applications, in accordance with Resolution 233 (WRC-12)."

"With seemingly everyone around the world gaining some degree of broadband access, the search for radio spectrum to satisfy the needs for mobile connectivity will become even more intense as we draw closer to WRC-15, Stafford explained. "National telecommunication authorities around the world and the ITU are in search of spectrum to fill these mobile connectivity requirements. As this agenda item develops, the IARU will be there to maintain the Amateur Radio spectrum."

Other WRC-15 Agenda Items the IARU will be closely monitoring include the following:

Agenda Item 1.6.1: "To consider possible additional primary allocations to the fixed satellite service (Earth-to-space and space-to-Earth) of 250 MHz in the range between 10 GHz and 17 GHz in Region 1."

Agenda Item 1.10: "To consider spectrum requirements and possible additional spectrum allocations for the mobile-satellite service in the Earth-to-space and space-to-Earth directions, including the satellite component for broadband applications, including International Mobile Telecommunications (IMT), within the frequency range from 22 GHz to 26 GHz, in accordance with Resolution 234 (WRC-12)."

Agenda Item 1.18: "To consider a primary allocation to the radiolocation service for automotive applications in the 77,5-78,0 GHz frequency band in accordance with Resolution 654 (WRC-12)."

"A lot of radio amateurs are aware of the increasing use of amateur spectrum by small satellites, mainly by universities," Stafford noted. "It is becoming an increasingly difficult situation."

To accommodate the number of small, non-commercial satellites within the amateur bands. These education-based satellites do not really fit within the definition of the Amateur Radio Service, but have been accommodated there. These small satellites are categorized as nanosatellites (weighing between 1-10 kg) and pico satellites (weighing less than 1 kg). The ITU is trying to deal with this issue in an orderly manner and a 'preliminary' WRC-18 agenda item is to consider whether these satellite operations can be accommodated in an already crowded radio spectrum. As these issues develop, the IARU will keep its Member-Societies, such as the SARL, aware of developments."

COMPETITION NEW2S

SARL 80 m CLUB CHAMPIONSHIP

>From 17:30 to 18:30 UTC on Wednesday evening 26 September 2012, the SSB contest will be on the air. The exchange is a RS report and a serial number starting at 001. You can participate as a Single Operator or Multi-operator station with activity on 3 600 - 3 650 kHz and 3 700 -3 775 kHz. Each QSO counts one point.

Each session is a contest in its own right, and log entries must be submitted to zs4bfn@netactive.co.za within seven (7) days of the contest, thus 23:59:59 CAT 3 October 2012.

CONGRATULATIONS BERNIE ZS4TX

Bernie van der Walt, ZS4TX, participated in the 2011 CQ WW DX CW Contest on 28 MHz using high power and made 2 208 429 points. This score ensured that Bernie was awarded the Single Operator, Single Band, World 28 MHz trophy. Well done Bernie.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Only a few sunspot regions are currently visible. Big new Sunspot 1 575 will hopefully increase the solar activity levels in the weeks to come.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 62.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be less frequent due to the lower solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 24 September - That is tomorrow, Heritage Day Sprint from 12:00 to 15:00 CAT. 26 September - SARL 80 m club championship competition from 17:30 to 18:30 UTC. 29 September - Radio Technology in Action Symposium in Cape Town. Pre-booking closes Wednesday evening. 29 September - Flea market of the West Rand Amateur Radio Club. 3 October - Log sheets for the SARL 80 m club championship competition to be in to zs4bfn@netactive.co.za. 5 October - Nominations for MTN sponsored SAARDT awards to be in to saardt@intekom.co.za. 9 October - Heritage Day Sprint logs to be in to riaanzs4pr@gmail.com and a copy to fwolff@global.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Martin Schwella, ZS4MS, and edited George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

International Space Station Chat Gives Students Higher Education:

Posted: 21 Sep 2012 05:03 PM PDT
http://www.eham.net/articles/29009

Students at Sunset Hills Elementary School in Rancho Penasquitos had some questions about what it's like to be an astronaut, and they knew just how to get the best answers. They called the International Space Station as it passed overhead Thursday morning. "What do you do when you're not working?" student Isabella Hambuck asked Akihiko Hoshide, an engineer and Japan Aerospace Exploration Agency astronaut aboard the space station. "What do you do for fun?" "When we're not working, most of the time we go to the window and take a look outside," Hoshide said. "We can see the Earth, and we can see a lot of different towns, forests, mountains, oceans. You name it. And that itself is really a lot of fun." The unusual opportunity to chat one-on-one with an astronaut was arranged by members of the ham radio network Papa System, which covers Southern California. Local members organized a similar call to the International Space Station last year at Sundance School and two years ago at Adobe Bluffs School, both in Rancho Penasquitos. Ham radio operator Kerry Banke, also at Sunset Hills on Thursday morning, said astronauts on the International Space Station talk with students over amateur radio about three times a week.

//
Radio Club Celebrates 50 Years:

Posted: 21 Sep 2012 05:03 PM PDT
http://www.eham.net/articles/29008

The Cleveland Amateur Radio Club will mark its 50th anniversary with several special activities Saturday. Early records show the club was formed early in 1962, and the weekend events culminate a yearlong celebration of the club's many contributions to the community. The celebration will start at 9 a.m. with an open house of the organization's clubhouse at 560 Johnson Blvd. Simultaneously, club members will be operating their powerful communication equipment to demonstrate how amateur radio enhances a community and to explain the enjoyment they receive from the hobby. In times of disaster, amateur radio can be the only means of communication when the infrastructure of traditional communications is damaged or destroyed. Such is the case when hurricanes with their 100-plus mph winds and heavy rain can sever an affected area from communication with the rest of the world. In these situations, amateur radio is able to step in and

become the only link to relay critical details of storm damage and injuries to those needing that information.

//
Call to Reveal Hidden Morse Code Message:

Posted: 21 Sep 2012 05:03 PM PDT
http://www.eham.net/articles/29007

NORMANDY veterans are calling for 'one of Torquay's best kept secrets' to be revealed more publicly. They claim visitors to the D-Day embarkation slipways are frequently unaware there is a Morse code message hidden in the lights on the harbourside. Now they are asking mayor Gordon Oliver if it is possible to make the secret message easier to de-code by including an information board teaching people Morse code. Ken Sturdy, chairman of South Devon and Torbay Normandy Veterans' Association, says school pupils and pilgrims to the notable historic site would be able to unravel the Morse code message if more information was given. The Morse code reads 'Vanishing Point' and is set into the granite floor.

//
Propagation Forecast Bulletin #39 de K7RA:

Posted: 21 Sep 2012 02:31 PM PDT
http://www.eham.net/articles/29006

Average daily sunspot numbers dropped this week, from 83.1 in the September 6-12 week, to 56 in the recent September 13-19 period.
Average daily solar flux declined from 118.9 to 101.4.

Look at the DISTRIBUTION of ages of all hams who were alive just
before the no-code tech license appeared (announced 1990, issued 1991).
There were some that were 16, but there were others that were 90. Add 21
years to all of those ages. If the average was 50+ then, the average of
that cohort (pre-no-code era hams) is now 70+. Half (or so) of the total
are older than average (the skew toward the younger side of the graph is
not that much of an issue, in this day and age; in other words, people
who die young don't change the shape of the graph by all that much).
Most of the older than average half has been pushed past typical life
expectancies by the passage of 21 years.

While there is no hard data about license holder's ages, research
done by third parties (equipment manufacturers, magazine publishers,
etc.) supports the claim that hams, overall, are older than the general
population.
Remember that we are talking about a RANGE of ages. Visualize it as a
histogram. The general population graphs as one histogram and the ham
population graphs as another. The ham histogram has much shorter bars on
the left side.

I have no intention of going to a drugstore to read the label of a
bottle of Geritol to get the name of the manufacturer. Nevertheless, the
parent corporation, whoever it is, has spent corporate funds providing
sponsorship for amateur radio contests. Why do you suppose that is? It
clearly suggests that they have developed demographic data that is
consistent with what I have posted.

Since there are no 1 year old licensed amateurs and very few younger than
about 15 or 16, that is to be expected.

The general population starts at age 0 while the amateur population starts
at the age old enough to understand and pass the tests.

The driver, pilot, and many other age historgrams have little to no very
young population which makes the average age older than the general
population.

Even if true, which is doubtful, so what?

Are you trying to say that being older is somehow a bad thing?

Since therer are no amateurs who got their license at age 0 to 5, and
very few at 6 to 13, of course the average amateur population is older
than the general population.

That, however, does not change the above.

October Sky-Rocket Boys Festival Special Events Station October 6, 2012

Posted: 22 Sep 2012 11:28 AM PDT
http://forums.qrz.com/showthread.php?362370-October-Sky-Rocket-Boys-Festival-Special-Events-Station-October-6-2012&goto=newpost

The Black Diamond Amateur Radio Club in Beckley,WV will operate a special
events station celebrating The 2012 October Sky-Rocket Boys Festival. The
event will feature Homer Hickam and the Rocket Boys from the Book and Movie
by the same name. It will be held at the Beckley Exhibition Coal Mine. For
more information on the Festival go to rocketboysfestival.com. The Special
Events Station will operate from 1500-2100 zulu on 7.250 and 14.290 plus or
minus qrm and nets, on October 6, 2012.

//
Aeroham 2012

Posted: 22 Sep 2012 03:29 AM PDT
http://forums.qrz.com/showthread.php?362330-Aeroham-2012&goto=newpost

A group of Kazakh radio amateurs will sign /AM from hot air balloon near Almaty, Kazakhstan early in the morning on September 23, 2012. This is the first ever official airtime mobile operation from Kazakhstan to date.

1) UN8GC/AM and UN8GU/AM (led by Mike, UN8GC). Mode of operation - CW.

2) UN6QC/AM and UN6GAO/AM (led by Sergey, UN6GAO). Mode of operation - SSB.

Timing:

UN8GC/AM + UN8GU/AM - from 0200 to 0300 UTC

UN6QC/AM+UN6GAO/AM - from 0300 to 04:00 UTC

Working frequencies: UN8GC/AM+UN8GU/AM - 14025 kHz+/-QRM

UN6QC/AM+UN6GAO/AM - 14155 kHz+/-QRM

Both teams will use transceivers with 100 W output. Antenna - dipole.

It's expected for the hot air balloon to reach the altitude of 1000m AGL (about 1900 m ASL).

Each station who manages to log a QSO with /AM stations will be entitled to receive a special certificate. Certificates in electronic format will be provided free of charge. Printed ones - at cost of postage.

Certificates and electronic QSLs will be available via www.cqham.kz, LoTW. Paper QSLs via direct (don't forget SAE + 1 IRC). QSL info - www.qrz.com

Any questions - write to mike.chirkov@gmail.com

73,

Mike

First two Amateurs licensed in The Republic of South Sudan

Posted: 19 Sep 2012 01:07 PM PDT
http://forums.qrz.com/showthread.php?362072-First-two-Amateurs-licensed-in-The-Republic-of-South-Sudan&goto=newpost

The Republic of South Sudan is finally active on the Amateur bands thanks to the help and guidance from the Ministry of Telecommunications and Postal Services located in Juba. The first amateur to be licensed is James Pratt (Z81A). James is from Lake Stevens, WA and licensed as K7QI. The QSL manager for Z81A is Frank Remington (K7GSE). The second operator is Diya (Z81D), and works for the UN-WFP (World Food Program). His QSL manager is Stefan Horecky (OM3JW). Also to note is the approval of the third amateur (Z88Z) who has plans to setup and operate remotely. With the list of call signs the ITU-R1 has given to South Sudan, Diya and I will work closely with the Ministry to spread the group of call signs through out all 10 States of South Sudan. For now, only Z81A and Z81D are active so please be patient with us as we do our best to confirm as many QSO's as possible.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 23rd September 2012

South Eastern Amateur Radio Group

After the group's very successful outing to the Inistioge Vintage Rally in August SEARG have been invited by IVETA (Irish Vintage Engine & Tractor Association) to take part in the National IVETA Indoor Show which takes place on the 14th October in the Cavan Equestrian Centre which is just on the outskirts of Cavan town. We will be putting on a display of old type radios and amateur radio gear from times gone past. We will also be running a station from the event and in keeping with the theme of the event we will be using CW with the call EI2WRC/P. Any amateurs in the area of the event who would like to drop in and use the station is very welcome to do so. Further information can be got by checking our website www.searg.com or by contacting Mark (EI7IS) on 087-76302026

The current sessions of theory classes will come to an end on Wednesday the 26th September. The 4th of October is fast approaching for all those sitting the exam and SEARG would like to wish all the candidates sitting the exam the very best of luck and a special message of good luck to the "class of 2012" who have done the theory course with us. We look forward to having that much awaited first QSO with all of you soon. SEARG hope to run further classes in the near future if demand is great enough.

The next monthly meeting of the club will take place in Roanmore Social and Sports Centre, Cleaboy Road, Waterford at 8.30 p.m. on Monday the 24th September. The meeting will be preceded by a committee meeting at 8.00 pm. New members are always welcome.

Cork Radio Club

Cork Radio Club will meet on Tuesday next, September 25th at the Community Centre in Carrigtwohill at 8.30pm. All amateurs and Shortwave Listeners very welcome. Enquiries to Jeremy EI5GM on 083-3317710 .

South Dublin Radio Club - Saorview

Talk on Saorview Tuesday 25th of September. With only a matter of days until analogue TV transmissions cease in Ireland, South Dublin Radio Club will be again giving a public talk on Saorview and what people need to do before October 24th. With nearly 200,000 households not yet ready, facing possible loss of TV channels now is the time to inform and help neighbours and relatives with this technology challenge.

South Dublin radio club will be giving a talk, a demonstration and answering questions on what is happening and what new channels and equipment are available. The talk will also be useful for those who want to save money by switching from pay TV providers to the free Saorview platform.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held October 3rd, October 17th, October 31st. All are welcome to enrol and this will be a fun learning experience. More information from www.ei7dar.com or secretary at ei7dar dot com.

DX News

Further to last week's mention of possible activity from the Republic of South Sudan two stations are now active on the bands. Jim KQ7I is now on the air as Z81A and Diya YI1DZ is signing Z81D. QSL Z81A via K7GSE and Z81D via OM3JW.

On the evening of 17 September a station signing Z60K started up on 20m SSB. This station is operating from the Republic of Kosovo. Among the international operators are well known calls such as Martti OH2BH, Nigel G3TXF and Bob MD0CCE. At the time of writing it is unclear if this station will count as a new entity for DXCC.

A multi-national team will activate Conway Reef in the South Pacific starting 26 September until 5 October. The callsign will be 3D2C and QSLs go via YT1AD. The IOTA reference for this one is OC-112.

Martin G3ZAY and Rob M0VFC are on the way to Tristan da Cunha in the South Atlantic. They hope to arrive there around 27 September and be active until 4 October. They will use the callsign ZD9UW and operate on CW, SSB and RTTY. IOTA reference is AF-029.

The well-travelled DXer Willi DJ7RJ will be QRV from Reunion Island as FR/DJ7RJ from 26 September until 21 October. He plans to be active on all bands 160-10m CW and SSB.

IRTS Shop update

Our friends at RSGB the Society has agreed to give a 10% discount to IRTS members on purchases from the RSGB Shop. IRTS members should select the "Non members Price" before placing the order and then enter the special IRTS Discount Code during the checkout process. At this point the 10% discount will be calculated. IRTS members, who are also RSGB members, should continue to select the "RSGB Member's Price" to get the RSGB Member's discount and not use the IRTS Discount Code. It is not possible to obtain both discounts! The IRTS Discount Code will change from time to time and will be published for members in Echo Ireland. Just follow the 'Book Sales' link on the IRTS website.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th-September, through Sunday, 23rd-September there were 219 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5W, 5X, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D6, DL, DU, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T33, T5, T7, T8, TA,

TF, TG, TI, TJ, TK, TR, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9X, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z6, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2/C, CONWAY REEF. A large multi-national team of 19 operators will arrive on Conway Reef (OC-112) located in the South Pacific Ocean on September 26th, and complete their DXpedition on October 5th. Activity will be on 160-2 meters using CW, SSB, RTTY, SSTV and PSK31. Suggested frequencies were in OPDX.1045. QSL via YT1AD, direct (w/SAE or SASE + 1 USD for normal postage, 2 USDs for Airmail), by the Bureau or use the OQRS on the Web page. For more details and updates, visit the 3D2C Web page at: http://www.yt1ad.info/3d2c/index.html

5H, TANZANIA. Harald, DL7VSN, will once again be active from Tanzania between September 23rd and October 13th. Activity this time will be from two locations (dates not provided) using the following callsigns: 5H1HS from Zanzibar Island (AF-032) and 5H1HS/3 from Lazy Lagoon Island (not an IOTA). Operations are usually 160-10 meters using mainly CW and RTTY. He will use various dipoles with 100 watts. QSL via his home call-sign. Visit his Web page at: http://www.qsl.net/dl7vsn

C6, BAHAMAS. Jay, K2TTT, will be active as C6ATT from New Providence Island (NA-001) between June 8-15th, 2013. Activity will be on 40-10 meters. QSL via K2TTT.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operations are approved for DXCC credit:
3B8/IW5ELA (Mauritius) JY8VB (Jordan)
9A8VB (Croatia) UN/UA4WHX (Kazakhstan)
4O7VB (Montenegro) YU9VB (Serbia)
E40VB (Palestine) Z38VB (Macedonia)
E7/UA4WHX (Bosnia-Herzegovina) ZA/UA4WHX (Albania)
EY8/UA4WHX (Tajikistan)
All operations were conducted in 2012

FR, REUNION ISLAND (Cancelled). Willi, DJ7RJ, who was expected to be active as FR/DJ7RJ from Reunion Island between September 26th and October 21st, has announced he had to cancel his trip. No reason given.

FS, ST. MARTIN. Operators John/K9EL and Nick/K9NB will be active as FS/K9EL and FS/K9NB from St. Martin between November 20-28th. Their activity will include the CQWW DX CW Contest (November 24-25th). Outside of the contest, they will be active on 80-10 meters using CW, SSB and RTTY. Schedules are welcome before and after the contest. QSL via their home callsigns. They plan to upload their logs to ClubLog and LoTW during the operation.

IOTA NEWS.............
AS-136. Operators Dale/BA4TB (Leader), Mi/BD4TQ, Tim/BD4TJ, Ni/BD4TR,
and Zhou/BG4TVT will be active from Hengsha Island between
October 1-4st. Activity will be on 40-10 meters. QSL via
their home callsigns.

EU-114. Members of the Martello Tower Group (G0PKT) will be activating
the Island of Herm as GP0PKT between October 4-8th. Herm is
one of the smallest Channel Islands, and although it's part of
the EU-114 IOTA group, it's not activated very often. Activity
will be on 80/40/20/15/10 meters using SSB and RTTY. There
will be two stations running simultaneously. QSL via G6NHU.
For more details, see: http://www.martellotowergroup/gp0pkt

NA-213. Members of several clubs from Atlanta will activate Sand Island
Lighthouse (ARLHS USA-723), Dauphin Island, in the state of
Alabama, between September 25-30th. The special callsign will
be K4D from this rarely activated island. Operators mentioned
are Ricky/K4JTT (team leader), Steve/KC4YBO, Tim/WK4U, Ernie/
KJ4VUX, John/KI4IYC, James/N4DU and Joe/WD4FGB. Activity will
be on or around the IOTA frequencies on 40/20/17 meters using
CW, SSB and the Digital modes. Depending on propagation, other
bands may be activated. All QSOs will be confirmed with a 4
color QSL card, by the Bureau or direct (see QRZ.com). Also,
log will be uploaded to LoTW and eQSL. For more details and
updates, see: http://www.w4bti.org
ADDED NOTE: There will be "Live Video Streaming" during this
operation at: http://www.radioodyssey.com/K4D.html

SA-087. Members of Radio Club Ria Deseado (LU1XB) report that they
having received verbal permission to be active from Pinguino
Island and are expected to be active between November 2-4th.
More details will be forthcoming.

KH0, MARIANA ISLANDS. Shuji, JA1FMN, will be active as KH0/JA1FMN from
Saipan Island (OC-086) between October 13-15th. Activity will be holiday
style on 17 and 15 meters using SSB and PSK31. He informs OPDX that if
there is a request for 12 and 10 meters, he may operate on those bands.
Operations will take place after 1800 his local time. QSL via his home
callsign, direct, by the Bureau or eQSL.

KP2, U.S. VIRGIN ISLANDS. Bob, NQ3X, and his wife are moving to St. Croix at the end of the month. He informs OPDX that he will be "active on as many HF bands as possible as soon as possible; shipping times will dictate when I get on the air and what bands. I plan on having 80-10 available by CQWW SSB. 6m will follow when I can erect a decent antenna. I operate phone and CW. Haven't gotten into any other modes yet, though I hope to get digital modes squared away over the winter. Antennas will consist of verticals and wires (because verticals over salt-water ground planes ROCK); power will be barefoot." Bob plans to be active as KP2/NQ3X (or use a KP2 callsign) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. QSL via his home callsign, direct (preferred), LoTW or eQSL.

LX, LUXEMBOURG. Operators Werner/DC8QT, Peter/DL2YCA, Hans-Peter/DF7EME, Burkhard/DF8XC, Frank/DL8LR, Helmut/DF7ZS and Philippe/LX2A will be active as LX7I during the CQWW DX RTTY Contest (September 29-30th) as a Multi-2 entry. QSL via LX2A. Visit the LX2A Web page at: http://www.lx2a.com

MJ, JERSEY. Operators Kiki/SV1BRL and Fivos/SV8AQY are planning to visit Jersey Island after the annual meeting of the CLIPPERTON DX CONVENTION, and will operate for some days starting possibly on September 25th. Look for MJ/SV1BRL and MJ/SV8AQY to be active on SSB and on 80-6 meters. QSL via their home callsigns or RAAG.

MT0, ISLE OF MAN. Members of the Sands Contest Group will be active as MT0SCG from Isle of Man between September 22-28th. Operators mentioned are Andrew/G0LWU, Hughie/G4UME, Steve/G1TLQ and Paul/2E0EET. Activity will be on various HF and VHF bands. QSL via M0SCG. Visit the SCG Web page at: http://www.m0scg.org.uk

OD, LEBANON. Ted, K8NA, informs OPDX that John, OD5RW, is once again active after being off the air for a period. He is active on 80/40/20/15/10/2 meters and 70cm using SSB, FM, Packet, AMTOR, Pactor, Clover, RTTY, SSTV CW, PSK31, WEFAX and recently D-STAR. K8NA is his QSL Manager.

P29, PAPUA NEW GUINEA (Update). An international team will visit five islands belonging to Papua New Guinea between October 19th and November 4th. Operators mentioned are Derek/G3KHZ, Hans/SM6CVX, Hans-Peter/HB9BXE, Eddy/K5WQG, Axel/DL6KVA and Non-ham Stig Nyman. The team will use the boat "M/V Barbarian", and start their travels from Kokopo in New Britain on November 18th, sailing via Kavieng to Emirau. The islands scheduled by the full team will be:
October 20-24th - Callsign P29VCX; Emirau Island (OC-103) in the St. Matthias IOTA Group. QSL via SM6CVX.
October 27-31st - Callsign P29NI; Tatau Island (OC-099) in the Tabar IOTA Group. QSL via G3KHZ.
November 2-4th - Callsign P29VPB; Lihir Island (OC-069) in the Lihir

IOTA Group. QSL Manager TBA.
The main team will fly home on November 6th. However, Hans/SM6CVX
and Stig Nyman will continue to Buka on the "M/V Barbarian", and plan
to activate the following:
November 6-9th - Callsign P29VCX; Buka Island (OC-135) in the Solomon
Island IOTA Group. QSL via SM6CVX.
November 9-12th - Callsign P29VCX; Manu Island (OC-205) in the Admiralty
Island IOTA Group. QSL via SM6CVX.

Activity will probably be 40-10 meters using mostly CW with some SSB
just like last year's activity. They do have a Web page at:
http://www.p29ni.yolasite.com

PJ4, BONAIRE. Marco, PE2MC, is planning to return to Bonaire between
November 9-17th, and be active as PJ4/PE2MC. Watch for more details
and updates at: http://www.pe2mc.nl/bonaire-here-we-come-pj4pe2mc
QSL via his home callsign.

SILENT KEY (Ham Killed In Attack). The ARRL Web page reports: "Sean P.
Smith, KG4WSS, of Falls Church, Virginia, was killed when the U.S.
Consulate in Benghazi, Libya, was attacked on September 11th. He was 34.
Smith was one of four Americans, including Chris Stevens -- the U.S.
Ambassador to Libya -- who was killed in the attack. Read the complete
story at:
http://www.arrl.org/news/view/sean-smith-kg4wss-killed-in-consulate-attack
OPDX and its readers send out our deepest sympathy to the family and
friends of KG4WSS.

T33, BANABA ISLAND. It was announced by Jay/W2IJ and David/N1EMC: "We are still looking for a few operators, so if you have previous DXpedition experience working SSB/CW pileups, don't mind a few days on a boat, and love to operate in miserable conditions on tiny equatorial islands in the middle of nowhere that nobody's ever heard of, please send an E-mail to <banaba@t33a.com>. Serious inquiries only please."

TF, ICELAND. Members of the "Tango Fox Radio Foxes" will be active as TF2RR during the CQWW RTTY DX Contest (September 29-30th) as a Multi-Single entry. QSL via TF3AO. Operators mentioned are Andres/TF3AM, Seli/TF3AO and Jon/TF3PPN.

VK0, MACQUARIE ISLAND. The "DX-World.net" is reporting that Steve, VK3ZAZ, hopes to be active from Macquarie Island over the 2013/14 winter. Activity will be on all bands with priority given to 6m. More details will be forthcoming.

VP2V, BRITISH VIRGIN ISLANDS. Larry, KE2VB, will be active as VP2V/KE2VB from a house 450 ft. above Cooten Bay on Tortola between the evening of February 27th and March 4th. He informs OPDX that he will leave the island on March 5th. He is going there to be in the ARRL DX SSB Contest (March 2-3rd) as a Single-Op/All-Band/Low-Power entry. He also mentions that he will using a TH-3 tribander and dipoles on 40 and 80 meters; no 160, no WARC. Larry will be active on both SSB and CW before the contest. QSL via KE2VB. ADDED NOTE: Larry states, "This is my first ARRL DX SSB contest from the Caribbean since I left my contest station, WP2Z, in 1998. I am the builder and original operator of the WP2Z station on St. Croix."

VP5, TURKS AND CAICOS ISLANDS. Dave, W5CW, will once again be active as VP5/W5CW from the VP5JM Hamlet QTH on the Island of Providenciales (NA-002, WLOTA 1476) between November 20th and December 11th. Activity will be on 160-6 meters using CW and SSB. Dave also plans to be in the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry and using the callsign VP5CW. QSL direct to his home callsign (QRZ.com address) at: PO Box 88, Morris, OK 74445-0088 U.S.A.

VP9, BERMUDA. Operators Ray/ND8L and Jamie/WW3S will once again be active as VP9I from Ed/VP9GE's QTH for the CQWW RTTY DX Contest (September 29-30th). QSL VP9I via N1HRA only. Outside of the contest, look for them to be active as VP9/WW3S and VP9/ND8L. The duo will be there between September 27th and October 1st. Conditions permitting, there will be an emphasis on the 30/17/12 meter bands pre and post contest. QSLs for VP9/ND8L are preferred though LoTW or his home CBA with SASE. LoTW QSOs from VP9/ND8L will be uploaded by 10/5/2012. QSLs for VP9/WW3S are via his home CBA with SASE or LoTW.

YJ, VANUATU. Daniel, VK4AFU, will be active as YJ0AFU, from Port Vila between November 3-10th. Activity will be on 80-6 meters using mainly the JT65A mode. They may be "a little" 160 meters. Daniel states that 6 meters will be priority when open and should be mostly on CW, SSB and JT65 on request. He will be using a FT857 w/100w into a 2 element ◆ wave vertical phased 40m, OCF Dipole 80-10M and a 2 element F8DR beam

for 50 MHz. QSL via NA5U.

Z6, KOSOVO (WFWL!). The big news this week has been the activity from the Republic of Kosovo. As this was being written, NOTHING has been announced yet from the ARRL's DXCC Desk on the DXCC status for Kosovo. The ARRL Great Lakes Division Director Jim Weaver, K8JE, informed everyone on September 19th: "Of interest to DXers is the current operation from Kosovo -- Z60K. I want to ensure that everyone interested in QSOing this activity understands it does not qualify for DXCC credit. This is because Kosovo is neither a member of the United Nations nor does it have an ITU-issued callsign block. At this time, Kosovo does not meet the established requirements of the DXCC program. It is legal and fun to work the station, but as the situation currently exists, it will not count toward DXCC."
During the past week, the OPDX Desk has been sending out a few special bulletins via the mailing lists and the NODXA FaceBook page trying to keep everyone up-to-date. In short, activity by Z60K has been seen on 40/30/20/17/15 meters on the DXCluster network. Currently, on the Kosovo's Telecommunications Regulatory Authority (TRA) Web page, under regulations of the "Amateur Radio Services" (which is a draft and can be downloaded) it does not provide authorization of operations on 80, 12, 10 or 6 meters. This can be viewed at: http://www.art-ks.org/?cid=13,419&sqr=ateur
Excerpts from press releases on the TRA Web page and QRZ.com, state that the Z60K callsign is issued to the new Amateur Radio Association of Kosovo, SHRAK, and will be active from new premises as soon as these are fixed. SHRAK President, Sabit, Z61AA, together with Ali, Z61DD, are heading these efforts. Many individual new licensees are scheduled to be operating at the new Z60K station very soon. Also, individual visitor licensing is now in place, and the first visitor license was issued at a gathering hosted by the Administrators and attended by all new local hams as well as their instructors. Emir, 9A6AA, part of the Kosovo IARU Project, was issued the callsign Z6/9A6AA and was active as this was being written. He informed OPDX that he made 300 QSOs as ZA/9A6AA. An application for a visitor license can be printed from the Administrators' (TRA) Web site but, in the short term, you can obtain an application form from any of the current Kosovo instructors; G3TXF, N2BB/MD0CCE, OH2TA or OH2BH. They also suggest, "Be prepared as the contesting season is also just around the corner, and make sure to add Z6 to your master multiplier database and expect Z6 stations to appear on the air."
ADDED NOTE: On Thursday, September 20th, a copy of the Z60K license appeared on QRZ.com, showing that the license was issued by the TRA to IARU Region 1 President Hans Blondeel Timmerman, PB2T, good between September 17-24th. <http://files.qrz.com/k/z60k/Z60Kauthorization.jpg>
However, reports indicate the operation went QRT on the 22nd.
Currently, the Z60K operation has posted the log online at ClubLog at: http://www.clublog.org/charts/?c=0K#r
As of 1658z, September 22nd, Z60K has made a total of 18545 QSOs with 8676 Unique callsigns (10167/CW and 8378/SSB). Breakdown by continent is: 203/AF, 0/AN, 2305/AS, 11283/EU, 4428/NA, 102/OC and 224/SA. QSL Z60K via G3TXF.

ZD9, TRISTAN DA CUNHA (Update). The ZD9UW team of Martin/G3ZAY and Robert/M0VFC is now down to one operator for the upcoming Tristan da Cunha operation. According to the ZD9UW Web page: "Martin, G3ZAY, has been forced to cancel his onward journey from Cape Town to Tristan. Rob, M0VFC, will still continue and be active as ZD9UW. This means that it's now a single operator activation and will concentrate primarily on SSB with some RTTY. Since our goal is to enable as many people as possible to work ZD9 for the first time, this means the number of bands we can activate will be limited - concentrating mostly on the higher bands. We're sorry if this means you don't get to work us on the particular slots you were after - we'll do our best given the situation!"
By the time you read this, Rob, M0VFC, will be aboard the MV "Baltic Trader" and embark on a seven day journey over the South Atlantic Ocean. Weather permitting, he should arrive on Tristan around the 27th of September, where he will operate until the 4th of October before returning to Cape Town. For more details and updates, visit their Web page at: http://www.zd9uw.org.uk

ZL9, CAMPBELL ISLAND (Press Release). Ed, VK2ARE, Australian publicity Officer for ZL9HR, sent out the following on September 20th: "IT'S ON IT'S WAY! - The ZL9HR 'Logistics team' are very pleased to announce that the packed equipment crates have left the DX'Pedition's Sydney base heading south to New Zealand, on schedule and in plenty of time to progress through the required quarantine formalities with the authorities on the New Zealand mainland before the final leg of the trip by sea with the operations team down to Campbell Island in the great southern ocean for the activation between November 28th and December 9th. Please refer to the Web site ZL9HR.COM for the full, up-to-date, information about this major DX'Pedition to the Great Southern Ocean. 73 from Ed VK2ARE"
By the way, the ZL9HR team also has a FaceBook page which shows the packed equipment crates at: https://www.facebook.com/#!/Zl9hr

It is widely believed that hams are significantly older than the
general population and that that is not the result of having an
(effective) minimum age as a result of licensing. It is because ham
radio appeals to an older demographic, much like shuffleboard or
canasta. Do you wish to offer any sort of substantiation for your
position? I mentioned Geritol's corporate involvement in support of my
statement.

> >> > although there is little hard data on that point. Still,

> Even if true, which is doubtful, so what?

Why is it doubtful? Look it up. I heard contesters exchanging numbers just a year or two ago ('my Geritol number is x'). Perhaps you could ask someone who is involved in contests. For someone who has strong opinions and makes a lot of emphatic statements, actual, objective facts don't seem to play much of a role in your life.

> Are you trying to say that being older is somehow a bad thing?

I stated that most of the pre-no-code-era hams are now dead. All of this is to corroborate that statement, which you have disputed.

So what?

Lots of things are "widely believed" that are not true and even if this
is true, so what?

> I stated that most of the pre-no-code-era hams are now dead. All of
> this is to corroborate that statement, which you have disputed.

Nope, you said the majority, which means greater than 50% while most
implies a more significant percentage.

Even if the majority have died, that would mean there are close to 400,000
who haven't.

Again, so what?

I offered some factual details on that point and you edited that out.
You aren't really trying to get to the truth, are you?

> > I stated that most of the pre-no-code-era hams are now dead. All of

You are a fool and I will not respond to any more of your posts.

> Again, so what?

It means that Morse is going away. Its zealots are dying off. Beeps
are headed for the dustbin of history. Soon, the only place that you
will hear beeps will be at historical reenactments where people in
period costume operate wood-burning, steam locomotives and send beeps to
inform the next station that they are on their way.

The Pocket Mirror: Major Bowes Amateur Hour
Midland Daily News
Probably the closet thing to “American Idol” now on television would be the radio equivalent of Major Bowes Amateur Hour back in the 1930s and 1940s. It didnt matter where you lived. Everybody knew who Major Bowes was and most of us listened at least ...

I have seen nothing but some bad statistics and veiled innuendo that
being old is bad and having passed a morse test is bad.

What is your point, if any?

OK, now I got it.

You were never able to do even 5 WPM and hated everyone that could and here you are years after the requirement is gone still drooling, spiting bile and obsessing over your failure.

It must really put your panties into a twist that interest in morse is growing these days even though there is no requirement for it.

GB2RS NEWS

Sunday 23rd September 2012

The news headlines:

* First RSGB ARDF world champion

* Olympics temporary operating restrictions end tonight

* RSGB Convention looks to be best ever

The Amateur Radio Union of Serbia hosted the 16th IARU World ARDF Championships last weekend and one of the RSGB M70 team gave the Society its first gold medal winner. Bob Titterington, G3ORY won the M70 section in the Second ARDF Classic, run on September 14. He completed the course in 98 minutes 59 seconds, finding all four hidden transmitters on the course and finishing almost a minute in front of second placed DL9MFI. Congratulations to Bob for this well deserved gold medal. The ARDF Committee will have a stand at the RSGB Convention this year and Bob will be giving a talk on the ARDF Championships on Saturday 13 October.

Following the success of the London 2012 Olympic Games, the Ofcom temporary operating restrictions on 70cm and the microwave bands comes to an end at midnight tonight, Sunday 23 September. For those who took part in the Olympics QSO Party, remember that logs should be submitted by 30 September. A talk on the Olympics & Amateur Radio will feature at the RSGB Convention on 13 and 14 October.

Tickets for the RSGB Convention 2012 have been selling very well and the Saturday night dinner is now sold out. Convention packages are still available that include the dinner. Other individual elements including a limited number of rooms, day tickets, Friday dinner etc are still available. The continued success of the RSGB Convention is such that we continue to grow year after year and 2012 looks like being the best yet. If you would like to book a package or other elements of the RSGB Convention 2012 please visit www.rsgbevents.org.

The Fife Digital repeater GB7DE is now reconnected to the D-Star network. GB7DE, which operates on the 2m and 70cm bands, has been without an internet connection since December 2010. A new admin team was formed and they have all donated the equipment, materials and time to get this D-Star repeater back onto an internet gateway connection to allow linking to the outside world. The admin team hope that repeater users will continue to support the repeater so that the annual rental

and maintenance can continue. Visit the website at www.gb7de.co.uk for details.

The long awaited deployment of five CubeSats from the International Space Station will take place on Thursday, September 27. Four of the micro sized birds carry amateur radio payloads. These are identified as F-1, FITSAT-1, WE- WISH and TechEdSat. More about this microsat project is online at www.uk.amsat.org/10119.

The Republic of South Sudan has issued its first amateur radio licence. The callsign Z81A went to Jim Pratt, who also holds the US callsign K7QI. The second licence was Z81D, issued to Diya Al Sadi, YI1DZ. Both are reportedly now on the air.

This weekend sees the fifth annual Railways on the Air event – a celebration, not a contest. Bishop Auckland RAC organise the weekend so that radio amateurs have a good time and promote amateur radio while helping to celebrate the unique position railways hold in our national heritage. Approximately 30 groups and individuals have registered for the event by approaching a preserved railway, asking if they are celebrating the birth of passenger railways in this country and whether they would like to have an amateur radio station as part of their event to promote awareness of their railway. The list of participating groups can be seen on the web site http://rota.barac.org.uk. This year both the participating groups and any amateur who contacts 5 or more ROTA special event stations over the weekend will receive a personalised poster recognising their efforts. These can be obtained after the event by submitting logs in pdf format as detailed on the website.

Copyright – RSGB 2012. Not for public release before Monday 24 September 2012 except as a GB2RS broadcast. Videos of presentations given to the AMSAT-UK International Space Colloquium 2012 on Saturday, September 15 are now available online. Thanks to the British Amateur Television Club volunteers the presentation are available at www.batc.tv. Click on Film Archive and select AMSAT 2012 in Category box.

And now for the details of rallies and events for the coming week

The Great Northern Hamfest takes place today, 23 September, at the Barnsley Metrodome, Queens Road, Barnsley. The post code for those with a satnav is S71 1AN. Follow the large brown Metrodome signs from the A roads into town. There will be trade stands, special interest groups and clubs, disabled facilities, family attractions, prize draw, free parking and extensive catering facilities including a licensed bar and restaurant. Doors open at 11am. For more information contact Ernie, G4LUE, on 01226 716 339.

The National Hamfest, brought to you by the RSGB in association with the Lincoln Short Wave Club, takes place on Friday 28 and Saturday 29 September in the George Stephenson Pavilion, Newark and Nottinghamshire Showground, Lincoln Road, Winthorpe, Newark NG24 2NY. The venue is

close to the junction of the A1, A46 and A17. There will be a wide variety of trade stands as well as a Bring & Buy and RSGB bookstand inside the main hall. Outside will be the car boot sale area. Several RSGB Committees will be represented, including the RSGB QSL Bureau, and there will also be a number of HQ staff present.

Advance notice now for a free to attend talk by the IET on the future of the radio spectrum. It takes place in Bromley on 3 October. The use of the radio spectrum is continuously evolving with new standards, services and the ever higher number of devices and users. What this all means to spectrum management and interference problems will be discussed by Richard Holmes. The lecture takes place at 10am for a 10.30am start at Bromley Central Library, High Street, Bromley BR1 1RS. There is no need to pre- register for this event.

Now for the news of special events

To celebrate the 39th Ryder Cup, GB39RC will be operational from Verulam Golf Club in St Albans until 30 September. Operation will be on 10, 15, 20 and 40m using mostly CW and RTTY. Full details of the QSL route is given on QRZ.com.

Taking part in Railways on the Air over this weekend will be South Lancs ARC using GB1BAS, Huntingdonshire ARS operating GB0NVR, GB50WVR from the Keighley & Worth Valley Railway and Preston ARS activating GB0LMR.

And now the DX news compiled from 425 DX News and other sources

The World-Wide DX Group will operate as 3D2C from the remote South Pacific atoll of Conway Reef. This DXpedition will take place from 24 September to 5 October. They plan to target European contacts during those periods when propagation is possible and will ask Japan and North America to stand by during those brief periods when the bands are open to Europe. QSL Manager is YT1AD. They will have OQRS (online QSL request) and will accept direct and bureau QSL cards. They plan to upload the logs to Club Log on a daily basis.

Harald, DL7VSN will be on the air as 5H1HS from Zanzibar from 23 September to 13 October. This includes 5H1HS/3 during a short trip to Lazy Lagoon Island. QSL to his home callsign.

Enrico, IK2FIL will be active as 6V7X from Le Calao, Senegal from September 24 to October 4. Activity will be on the HF bands. This includes an entry in the upcoming CQ WW RTTY contest as a Single Op/Low Power entry. QSL via the operator's instructions.

Ron, N6XT and John, N7CQQ are on the air as KH8/home callsign from Tutuila Island, IOTA OC-045, until October 1. Activity is on the HF bands. QSL direct to home calls.

Tommy, VK2IR, Peter, VK2NN and their families will stay on Hawaii until 6 October and plan to work in holiday style as KH6/homecalls on 10m to

40m during this time. QSL via VK2IR.

Copyright © RSGB 2012. Not for public release before Monday 24 September 2012 except as a GB2RS broadcast. Now the contest news

Today, Sunday 23rd, the Practical Wireless 70MHz Contest runs from 1200 to 1600UTC. It has a Low Power section, that's 10 watts in this contest, and Open sections. Scoring is 1 point per contact, multiplied by the number of Locator squares worked. Using all modes on the band, the exchange is signal report, serial number and locator. As this is the 80th anniversary year of Practical Wireless, expect a good turnout.

The BARTG Sprint 75 also takes place today, 23 September. Available sections are Single Operator Expert and Single Operator All Band. Running from 1700 to 2100UTC and using bands from 3.5 to 28MHz, the exchange is the serial number.

On Tuesday, the 50MHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

Also on Tuesday, the SHF UK Activity Contest takes place from 1900 to 2130UTC. Using all modes on the 2.3 to 10GHz bands the exchange is signal report, serial number and locator.

The 80m Cub Sprint takes place from 1900 to 2000UTC on 27 September. Using CW only, the exchange is both callsigns, serial number and name.

The final weekend of the month brings the CQWW DX Contest. This month it's RTTY and it runs for the whole 48 hours of 29 and 30 September. Using the 3.5 to 28MHz bands the exchange is signal report and Zone, which in the UK is 14.

The final event in September is the UK Microwave Group Cumulatives, which take place on the 5.7 to 24GHz bands for six hours between 1000 and 1500UTC on Sunday 30th. The exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 14th to Thursday the 20th of September, compiled by Neil Clarke on Friday the 21st of September.

As forecast, the quiet side of the Sun was looking our way and with it solar activity was at very low levels, at least till the 17th when activity increased to low levels. Occasional C class solar flares started to take place every day from the 17th until the end of the period. This rise in activity was due to a couple of sunspot groups approaching the solar limb prior to rotating into view on the 18th and the 19th. Solar flux levels increased from 97 units on the 16th to 117 by the 20th. The average was 104 units. The 90 day solar flux average on the 20th was 122 units, that's one unit down on last week. X-ray flux levels increased slightly from B1.5 units on the 14th to B2.7 by the 20th. The average was B2 units. Geomagnetic activity started at

quiet levels but by mid afternoon on the 19th a weak coronal hole disturbance commenced and lasted just about to the end of the period. The most disturbed day was the 19th, with an Ap index of 14 units. The average was Ap 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 350 kilometres per second on the 16th to 620 kilometres per second on the 20th. Particle densities were low but increased to 14 particles per cubic centimetre on the 20th. Bz varied between minus 3 and plus 4 nanoTeslas on the quietest day and between minus 11 and plus 13 nanoTeslas on the most disturbed day.

And finally the solar forecast from Sunday the 23rd of September. This week solar activity is expected to be at low levels, however, there is a chance that activity could increase to moderate levels on some days particularly later in the week. Solar flux levels should increase every day and by next weekend be around the 130's, or maybe slightly higher. Geomagnetic activity is expected to be quiet but could increase late in the week due to a small recurring coronal hole. MUFs during daylight hours at equal latitudes should be around 25MHz for the south and 22MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to Japan should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 19MHz. The best time to try this path will be between 0900 and 1200 hours UTC.

And that's all for this week from the propagation team.

On Wednesday Denby Dale Radio Club is having a night on the air from 7.30 on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday Goole Radio and Electronics Society is having a dish antenna update by Steve, G8VHL. Contact Ken, G6YYN, on 01757 638 539.

On Friday East Cleveland Amateur Radio Club is having a bring in something interesting evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society has Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Lothians Radio Society is visiting the Museum of Communication, Burntisland, for a talk on marine communication by Prof Tom Stevenson. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Friday Cockenzie & Port Seton Amateur Radio Club is holding its second 144MHz DF hunt. Meet in the Old Ship Inn car park. More information from Bob, GM4UYZ, on 01875 811 723.

Copyright © RSGB 2012. Not for public release before Monday 24 September 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Farnborough & District Radio Society is running a Top Band net on 1.995MHz on Monday from 8pm. On Wednesday there is a talk on tuned circuits by John, G3KND, at 7.30 for 8pm. Friday sees a 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Worthing & District Amateur Radio Club is putting GX3WOR on the air on Wednesday. Thursday sees the 80m CW Sprint contest. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. Today, East Kent Radio Society has its Stelling Minnis meeting and picnic. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday Braintree & District Amateur Radio Society is running a 70cm club net. For more information contact John, M5AJB, on 01787 460 947.

On Tuesday Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Dorking & District Radio Society is having a talk on the Sun and HF radio propagation by Dr Colin Forsyth of MSSL. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday Harwell Amateur Radio Society has a shack activity night. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday Stevenage & District Amateur Radio Society is watching the BS7H, 3B7C & T32C DXpedition videos. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday Chesham & District Amateur Radio Society is on the air and holding a club net via GB3VA & GB3AL. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Hastings Electronics and Radio Club is at the Taplin Centre, with a talk on medical electronics by Steve Balkam. Details from Gordon, on 01424 431 909.

On Wednesday Havering & District Amateur Radio Club is having an informal evening. More information from John, M0UKD, on 07890 222 111.

On Wednesday Newbury & District Amateur Radio Society will commence a period of operations from Crofton Beam Engines using GB4CBE. All are welcome; please get in touch to confirm the actual days of activity. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday Norfolk Amateur Radio Club is having an informal meeting and Bright Sparks, with the shack and workshop open. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Bredhurst Receiving and Transmitting Society is having a visit by an RSGB representative and holding an open forum. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday Darenth Valley Radio Society is having a talk on coastal navigation by Mike, G8AXA. Details from Bob, M0RAW, on 01322 663 804.

On Thursday Edgware & District Radio Society is running short bursts of operating in between chores and other activities. More information from Mike, G4RNW, on 02089 500 658.

On Thursday Huntingdonshire Amateur Radio Society is having a talk on hardware for PSK operation by M0VTG. Details from David Leech, G7DIU, on 01480 431 333.

On Thursday Shefford & District Amateur Radio Society is visiting Duxford Amateur Radio Club. Details from John Burnett, M6JBU, on 07860 804 793.

Copyright © RSGB 2012. Not for public release before Monday 24 September 2012 except as a GB2RS broadcast. On Thursday Vange Amateur Radio Society is having a natter night. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Cambridge & District Amateur Radio Club is having a talk on the Dark Arts by John, M0JWS. Contact Ron, G3KBR, on 01223 501 712.

On Friday Itchen Valley Amateur Radio Club is having a talk on broadband and mobile data myths by Geoff, G3ROG. Details from Liz, M0ACL, on 02380 254 599.

On Friday Mid-Sussex Amateur Radio Society is having a radio night. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Radio Society of Harrow is having a talk. More information from Linda, G7RJL, on 02083 868 586.

On Friday Wimbledon & District Amateur Radio Society is having an Australian radio evening with Dick Shanahan. Contact Andrew Maish, G4ADM, on 02083 353 434.

Next Sunday Chelmsford Amateur Radio Society is operating GB100MWT at Sandford Mill Science and Discovery Day. Contact Martyn, G1EFL, on 01245 469 008.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Exeter Amateur Radio Society is having a discussion on designing your dream shack on Monday from 7pm at the Moose Centre. The 2m net is on Tuesday and the 4m net is on Thursday. Contact Nick, 2E0NRJ, on 01363 775 756.

South Bristol Amateur Radio Club is holding an open house and on the air night on Thursday. Friday sees a visit to the RSGB National Hamfest. Details from Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Monday Bristol RSGB Group Phil Whitchurch, G3SWH will speak about 3DA0PW Swaziland. Details from Robin, G3TKF, on 01225 420 442.

On Monday Riviera Amateur Radio Club is having a portable RV. Contact Alan, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday Thornbury & South Gloucestershire ARC is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday Newquay Radio Club is having a talk on My Raspberry Pi and I by Keith Holland, G3MCD. Contact Kevin Francks, M0BFB, on 01637 851 923.

On Thursday Swindon & District Amateur Radio Club is having an activity night. Contact Den, M0ACM, on 07810 317 750.

On Friday Torbay Amateur Radio Society is having a talk by Tony, 2E0CKY on his role as a Paramedic. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday Appledore & District Amateur Radio Club is running a special event station at Appledore Book Festival. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

NEWS FOR WALES On Thursday Aberystwyth & District Amateur Radio Society is having a club night on the air on 145.500 then 145.550MHz. Details from Ray, GW7AGG, on 01970 611 853.

"Tickets for the RSGB Convention 2012 have been selling very well and the Saturday night dinner is now sold out. Convention packages are still available that include the dinner. Other individual elements including a limited number of rooms, day tickets, Friday dinner etc are still available. The continued success of the RSGB Convention is such that we continue to grow year after year and 2012 looks like being the best yet. If you would like to book a package or other elements of the RSGB Convention 2012 please visit www.rsgbevents.org."

Imagine having to go for a meal with the sort of people you see at radio rallies! Unwashed, poor personal hygiene, DIY haircuts, unlaundered clothes, poor table manners etc.
Disgusting idea, and people are expected to pay to join in. A sad reflection on the hobby indeed.

1853. Weekly Highlights of Solar and Geomagnetic Activity, 17 - 23 September 2012

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
17 - 23 September 2012

Solar activity reached low levels this week. C-class x-ray flares
were observed on 17-20 and 23 September. The largest, a C2/Sf, was
recorded from Region 1576 (S21, L=180, class/area Dso/70 on 20
September) at 19/1512 UTC. The remainder included a C2 flare from
Region 1575 (N08, L=181, class/area Eko/320 on 22 September) at
17/1406 UTC, a C1 at 18/1009Z, and a C1 from Region 1574 (S22,
L=302, class/area Cao/40 on 20 September) at 20/1139 UTC, and a
long-duration C1 from beyond the east limb at 23/1556 UTC. The
long-duration C-flare was associated with a vivid CME in LASCO C2
imagery. Estimated plane-of-sky speed was around 600 km/s.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit reached
moderate levels each day of the week except the 20th when it
remained at background levels.

The geomagnetic field ranged from quiet to active levels during the
week, with minor storm levels observed at high latitudes on all but
the first and last days. The week began with the geomagnetic field
at quiet to unsettled levels. Geomagnetic field activity increased
to active levels late on the 19th when a corotating interaction
region (CIR) became geoeffective. A coronal hole high speed stream
followed on the 20th bringing mostly quiet to unsettled conditions.
Between the 19th and the 20th, the solar sector changed from
positive to negative, consistent with the geoeffective coronal hole
polarity. Solar wind speed at the ACE spacecraft fluctuated between
600 and 400 km/s between the 20th and 21st, before beginning a slow
decline late on the 21st. Solar wind speed by the end of the week
had dropped to about 350 km/s. The Bz component of the
interplanetary magnetic field reached its maximum of approximately
-11 nT late on the 19th with the arrival of the CIR.
```

Forecast of Solar and Geomagnetic Activity
24 September - 20 October 2012

Solar activity is expected to be at low levels with an increasing chance for moderate activity during the first two weeks of the period as active regions rotate onto the visible disk.

A slight chance for a proton event exists due to potential activity associated with returning regions from 24 September through 08 October.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels on 8-9 October and again on 17-18 October.

Geomagnetic field activity is expected to remain mostly at quiet to unsettled levels except for 3-5 October, 09-10 October, and 16-17 October when recurrent coronal hole high speed streams are expected to bring a chance for active levels.

WIA President SK

With deep sadness I report the sudden and unexpected passing of
Wireless Institute of Australia President Michael Owen VK3KI on Saturday
afternoon.

Michael is survived by his wife Nan, who accompanied Michael on
many Amateur radio occasions, most recently at the WIA national Convention
in Mildura, and his daughters.

Our deep condolences go to Michael□s family and friends.

A funeral is to be held 10:30am this Friday the
28th of September at St Andrews Anglican Church Corner of New & Church
Streets, Brighton.

If you would like to send a message of condolence please email the message
to condolences@WIA.org.au

Condolences can be sent by post to Nan and daughters at

PO Box 2042, Bayswater Vic 3153

Bob VK6POP

WIA Director

SIR DAVID JASON

PLEDGES SUPPORT FOR NATIONAL AIR AMBULANCE WEEK 24-30 SEPTEMBER 2012

One of Britain□s most famous and respected actors Sir David Jason is getting behind the first National Air Ambulance Week. Sir David has come a long way from his days as an electrician; since then he has won many prestigious awards for his work, with roles greatly varying from the comical Del Boy in Only Fools and Horses, to the more serious role of Jack Frost in A Touch of Frost.

Sir David became interested in flying when he was young and has a keen interest in space exploration and all things aeronautical. He started out his own flying experience in gliders and then progressed to helicopters. Because of this keen interest Sir David became involved with the Association of Air Ambulances (AAA) and in March 2009 Sir David was asked, and agreed to lend his support to the work of Air Ambulance Charities by becoming Patron of AAA.

Speaking of his involvement, Sir David said:

"I am honoured to be fronting the very first united National Air Ambulance Week campaign across the UK. It is vitally important that we spread the word that Air Ambulance Charities up and down the UK are not Government funded and rely on public donations to remain operational. Everyday lives are being saved by the highly skilled Air Ambulance crews. Please give whatever you can spare to support your local Air Ambulance."

The heart of the week long Appeal will be very much encouraging the communities and businesses across the country to support their local Air Ambulance charity. By doing so it will make a huge difference and effectively help to save lives in the community that you live in. Every penny really goes a long way in helping save lives.

NAAW is an initiative put together by the Association of Air Ambulances (□AAA□), the trade body which unites not only Air Ambulance charities from across the country, but also operators and ambulance services.The Association gives a national voice to a local service.

Clive Dickin, Director of the Association of Air Ambulances (AAA) said □We are delighted to have Sir David Jason as our patron. It really does help us to raise awareness of our members and the essential work that they carry out locally. Our members are encouraging fundraising very much at a grass roots level □ for example mufti or a dress up/dress down days at schools, colleges or work places? Fundraising should be fun!□

□You may wish to organise your own event □ maybe you want to hold a cake sale, fete, or do something more daring like a parachute jump or sponsored swim. Whatever you decide to do, rest assured that all monies raised will stay local, helping to keep your local Air Ambulance flying.□

To show your support and find out more about how you can help your local Air Ambulance please log onto the AAA website at

http://www.aoaa.org.uk/naaw/

But you just don't get the great unwashed attending the Convention.
Those of us who attend tend to be a cut above the rest, shall we say ;-)

You wouldn't get in of course ...

The Saturday evening meals are quite formal affairs and most enjoyable. The
Friday sessions are a little more relaxed but in no way lacking in decorum.

The key factor is that they are serious about the hobby.

The Convention is a great event- packed with radio- the only "problem" is
deciding which sessions to forego as you simply can't get to them all.

Reaching for the Stars: Students Use Ham Radio to Talk to Space Station:

Posted: 23 Sep 2012 05:16 PM PDT
http://www.eham.net/articles/29013

LaFAYETTE, Ga. -- When Jody Carter was 8 years old, his father tried unsuccessfully to contact the space shuttle via ham radio. Thirty years later, the second time was the charm. Just after 11 a.m. Friday, Carter, who's now a math and science teacher at LaFayette Middle School, radioed Sunita "Suni" Williams, commander of the International Space Station. "Can you read me, over?" Carter asked as some 900 sixth-, seventh- and eighth-grade students sat in bleachers and cross-legged on the school gymnasium floor. LaFayette elected officials and other VIPs sat amidst the students in folding chairs. After some static and initial garbled words, Williams came through loud and clear and answered questions asked by students in the Rambler Radio Club, an after-school club that Carter leads. Questions included: How do astronauts cook food? "All we do is heat it up," Williams said. What hours do you keep on the space station? "We wake up at 6 and go to bed at 10," she replied. How do astronauts do laundry? "We wear our clothes for a week or so," Williams said. What could she see as the ship flew 220 miles above the Earth? "I can see all the way up to the northern parts of Canada and the central parts of South America." Carter and his student ham radio operators spent 10 months preparing for the 10-minute conversation.

//
Ham Radio Enthusiasts Gather at Peoria Superfest:

Posted: 23 Sep 2012 05:13 PM PDT
http://www.eham.net/articles/29012

PEORIA -- Larry Wessels started learning about ham radios when he was in junior high. "I was in the library and the teacher instructed us to pick out a book we could write a book report on," Wessels said. "So I found a thin one with big print." He wasn't sure how to pronounce the name of the book, "CQ CQ," but more than 50 years later, he regularly sends out this invitation phrase to anyone who might be listening. Wessels, known as KB4FIO over the airwaves, traveled with two friends to converge with about 2,000 other amateur radio enthusiasts at the 2012 Peoria Superfest on Saturday at Expo Gardens. "It's like a club, too. Every ham is a good guy," Al Grudzinski, one of Wessels' companions, said. Ham radios have been used for 100 years and remain one of the most reliable methods of communication

during emergencies. But mostly, these radios are used for chatter among enthusiasts. "It's the original social networking - only better," said Merle Joiner, Peoria-area Amateur Radio Club president.

//
Essay Contest Gives Students Chance to Talk to Astronauts On Space Station:

Posted: 22 Sep 2012 05:20 PM PDT
http://www.eham.net/articles/29011

WEST PALM BEACH -- Select students and teachers will get a chance to talk live through amateur radio to astronauts on the International Space Station as it is orbits over Florida the week of Oct. 22. The School District of Palm Beach County, working with the South Florida Science Museum, has invited students in grades 3-12, and teachers, to participate in an essay contest on "Why is space exploration important and what does it mean to me?"

//
Commission Hears Report from County Ham Operator:

Posted: 22 Sep 2012 05:19 PM PDT
http://www.eham.net/articles/29010

BLOOMFIELD, Mo. -- Jim Harris, ham radio operator and manager of the county Ham Radio Association, expressed his gratitude to the Stoddard County Commission and updated them on progress the group is making in organizing communication in the event of a disaster. The commission reviewed several items on a rather routine agenda. Harris assured the commission the ham radio operators were working closely with County Emergency Management Agency Director Kent Polsgrove. He said three VHF repeaters and one 440 repeater have been purchased to improve emergency communications. He told the commission that repeaters were installed on the Missouri Southern Healthcare towers and provided good communication for the southern and eastern parts of the county. He said improvements were being made to provide better access to the northern and western parts of the county. He assured the commission that the ham operators were not seeking funds from the county, but rather were applying for grants to make the upgrades. "We have the right people," Harris stated. "We will start teaching classes, the first of which will be on ethics and ham radio operation." Harris noted that Assistant Manager Bob Gosnell was also helping with these improvements. He said he had been using ham radios for 20 years, and they would be a big asset to the county by providing communication during a disaster. He said an ice storm disaster drill has been set for Oct. 20 that will include all of the Bootheel.

Mound Amateur Radio members to host public 50th celebration
Dayton Daily News
“Some Mound employees visited the Kansas City lab and found they were using Ham radios as a backup, which was more secure. When they returned, they started up the Mound Amateur Radio Association (MARA).” Melke, a West

Carrollton native and ...

ZS, SOUTH AFRICA
Bernie,ZS4TX, announced to join the WWDX RTTY Contest in the SOABHP category. The log will be uploaded to the LoTW.

DXCC: Following DXpeditions of 2012 were approved for DXCC credit:
3B8/IW5ELA (Mauritius)
9A8VB (Croatia)
4O7VB (Montenegro)
E40VB (Palestine)
E7/UA4WHX (Bosnia Hercegovina)
EY8/UA4WHX (Tajikistan)
JY8VB (Jordan)
UN/UA4WHX (Kazakhstan)
YU9VB (Serbia)
Z38VB (Macedonia)

Republic of Kosovo "on air" soon (update): Z60K near Pristina commenced amateur radio operation on Sep 17 shortly after 1700 UTC. The call has been issued to the clubstation o the Amateur Radio Association of Kosovo (SHRAK). QSL via G3TXF and logsearch at ClubLog. The first individual licenses were issued as well (Z61AA, Z61AB, Z61AJ, Z61AS, Z61DD, Z61DX, Z61FF, Z61LA, Z61NS, Z61VB and Z61XO) and 9A6AA received the first guest license (Z6/9A6AA).
Since the Kosovo is neither a member of the United Nations nor does it have a callsign block allocated by the ITU Kosovo does not meet the established requirements of the DXCC program at this time. The website of the local PTT is online already.

SILENT KEY: Sean Smith,KG4WSS, was one of the four Americans who was killed
in the storming of the US consulate in Benghazi on Sep 11.
Our condolences and sympathy are with Seans family and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 23 BARTG Sprint 75
Sep 24 DIG-PA Contest
Sep 29/30 CQ WWDX RTTY DX Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Rob,EA8/DL7VOA, will be QRV mainly in CW
working holiday style from the west coast of Tenerife between Sep 30
and Oct 6. QSL via homecall.

AF-029, ZD9, Tristan da Cunha Islands: Depending on the weather Rob,M0VFC,
will be active as ZD9UW from Tristan da Cunha between Sep 27 and Oct 4.
Rob works in SSB on 80m-10m. Activities on 160m and 6m are not planned.
If time and pile-ups permit he may work also in RTTY. An OQRS system
(for direct and bureau QSLs) will be offered as well.
See also: http://www.zd9uw.org.uk

WLOTA 1373) were announced for the WWDX RTTY Contest:
- Marko,OH8KVY, will be QRV as OH0I in the SOSB 20m category.
QSL via OH3BHL (d).
- Juha,OH9MM, will be QRV as OH0Z in the SOSB 15m class. QSL via W0MM.
- Raimo,OH3BHL, will show up as OH0KAG in der SOSB 40m category.
QSL via OH1KAG (d).

EU-003, CU1/2, Eastern group; EU-089, CU8/9, Western group; EU-175, CU3-7,
Central group: A large group of 18 international HAMs together with
11 local HAMs will activate the nine populated islands of the Azores
from Sep 29 (1200 UTC) until Sep 30 (1200 UTC). Some activities will
start already on Friday, Sep 28, after the stations were set up:
CU1ARM (Ilha de Santa Maria, EU-003, DIP AZ-001, WLOTA 2978)
CU2ARA (Ilha Sao Miguel, EU-003, DIP AZ-002, PIP AC-002, WLOTA 2016)

CU3URA (Ilha Terceira, EU-175, DIP AZ-003, PIP AC-003, WLOTA 0524)
CU4ARG (Ilha Graciosa, EU-175, DIP AZ-004, PIP AC-004, WLOTA 0113)
CU5AM (Ilha Sao Jorge, EU-175, DIP AZ-005, PIP AC-005, WLOTA 1004)
CU6GRP (Ilha do Pico, EU-175, DIP AZ-006, WLOTA 1321)
CU7CRA (Ilha do Faial, EU-175, DIP AZ-007, WLOTA 1830)
CU8ARF (Ilha das Flores, EU-089, DIP AZ-008, PIP AC-008, WLOTA 0947)
CU9AC (Ilha do Corvo, EU-089, DIP AZ-009, WLOTA 0707)
Following frequencies were announced:
CW: 7000-7015 kHz, 18080-18090 kHz, 14050-14065 kHz
SSB: 7175-7195 kHz, 18120-18135 kHz, 14250-14275 kHz
Those stations making a QSO with at least five different islands can join a lottery for a free trip to the Azores. Additionally, the first 25 operators making QSOs with all nine islands will be eligible for a second lottery. The lottery will be drawn on Oct 15.
All QSOs will be confirmed with a special QSL via bureau.
Direct QSL requests can be sent to CU2CE.

AMSAT NEWS SERVICE

ANS-267

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

September 23 Last Day for Reduced Symposium Registration Rate

AMSAT announces the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th. See the AMSAT Web Store to complete your on-line registration.

Symposium Registration including Proceedings

Through September 23, 2012: $ 45.00Starting September 24, 2012: $ 50.00At the Door: $ 55.00

Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page.

The Symposium Hotel is the Holiday Inn at Orlando-International Airport is located one mile from the Orlando International Airport (MCO). The AMSAT discount rate is $99 + taxes per night. The reservation block code used when calling the hotel directly is AMT. The hotel telephone number is 407-851-6400. Cutoff date for reservations is Oct 6, 2012.

The Symposium Schedule web page has been updated with links to find more information about the planned activities.

[ANS thanks the 2012 Symposium Committee for the above information]

2012 Barry Goldwater Amateur Radio Award to Bill Tynan, W3XO

The Radio Club of America announced this week that William A. Tynan, W3XO, is the recipient of its 2012 Barry Goldwater Amateur Radio Award. The award recognizes Bill's lifelong service to the public through amateur radio. It will be presented at the club's annual awards banquet in New York on November 16th. ARRL CEO David Sumner, K1ZZ, like Bill a club Fellow, will be the keynote speaker.

Bill, one of AMSAT's charter members, is a past President and Chairman of the Board. For many years, he conducted QST's monthly column, "The World Above 50 MHz." He is also a past President of the Central States VHF Society. Bill played a key role in the origination of amateur radio from the Space Shuttle and the International Space Station.

The Radio Club of America, founded in 1909, is the world's oldest radio communications association.

Congratulations, Bill!

[ANS thanks Ray Soifer, W2RS for the above information]

AMSAT Awards

AMSAT Director Contests and Awards, Bruce Paige, KK5DO says congratulations are in order for our latest AMSAT Awards recipients.

The following have entered into the Satellite Communicators Club for making their first satellite QSO.

Steven Holland, KC9TTQRon Reiter, KD8SEVDan Kowell, AL7RSMichael Mustachia, KF5PHARandy Morden, VE6RGUGlyn Dodwell, GM4CFS

The following have earned the AMSAT Communications Achievement Award.

Kenneth Holland, KC9TTR, #550

The following have earned the South Africa Satellite Communications Achievement Award.

Kenneth Holland, KC9TTR, #US179

The following have earned their Robert W. Barbee, Jr. W4AMI Award.

Theo Doty, AA5CK, #79

To see all the awards visit http://www.amsat.org.

[ANS thanks Bruce Paige, KK5DO for the above information]

Silent Key: John Beanland, G3BVU

AMSAT has received the sad news on the passing of John Beanland, G3BVU. John was an avid AMSAT member and helped man the AMSAT booth at the Boxboro Hamfest over the years. His friends remember John to be outgoing and enthusiastic about amateur radio in space. AMSAT President Barry Baines, WD4ASW noted, "AMSAT has lost a good friend and enthusiastic member."

Charles "John" Beanland, born in Witney, England was 85 years old passed away on September 21, 2012 after a long illness. John enlisted in the UK Navy during WWII. He was first licensed as G3BVU in 1947. He worked for Post Office in Engineering and English Electrical Valve where he worked on Guided Weapons. He later joined Texas

Instruments and finally Microwave Associates, UK where he developed VHF solid state power amplifiers all while attending and receiving BS degrees in Electrical Engineering, Radio and Telecommunications.

Microwave Associates transferred him from the UK to Burlington, MA in 1963. In 1966 he joined the MITRE Corporation in Bedford, MA as a Member of the Technical Staff working on microwave systems and Over The Horizon Radar (OTHR) HF direction finding systems until his retirement in 1993. During that time he received his Masters Degree in Electrical Engineering from Northeastern University. In 1972 he acquired Spectrum International, specializing in antennas, filters, VHF transverters and satellite tracking systems which he operated until his passing. He later received his US call sign, AA1YE and taught Amateur Radio licensing courses and HF radio propagation at local radio clubs.

John was married to Dorothy Beanland for over 57 years. They have 3 children and 3 grandchildren. He resided in West Acton, MA. A wake will be held on Monday, September 24th from 5-8 PM at the Acton Funeral Home on Rt. 111 in Acton, MA. A burial service will be held at the Church of the Good Shepherd in Acton, MA at 10 AM, Tuesday, September 25th followed by burial in Acton, MA.

[ANS thanks Joe Reisert, W1JR and Barry Baines, WD4ASW for the above information]

Official Statement of the AMSAT-DL BoD About P3E & P5

Dear All,

The following News will appear as an Editorial in our up-coming AMSAT-DL Journal.

Because of the importance of the contents the AMSAT-DL BOD and Project Leaders decided to give this information to all team members who are currently or who were directly or indirectly involved in the past ... We want to make sure that our members get it from us and not from any rumours on the net ... Thanks.

While the decision of DLR is hitting us hard, this is not yet the end. I recently had some interesting meetings in China and if we can't do Rocket Science in DL, we have to look for other countries.

But please read below ... We hope you will support us also in future and if you want to re-join, you are also much welcome. AMSAT needs YOU!! If we missed someone from the members, please forward this e-mail.

Best wishes

Peter DB2OS

Hartmut DL1YDD

Michael DD5ER

DLR rejects P5-/Mascot-2 project

Dear Members and Friends of AMSAT-DL, discussions with the German Ministry of Economics and the German space agency DLR spanned more than 5 years. Amongst others, we met with State Secretary for Space and Aerospace Hinze, DLR chairman Prof. Wörner and the DLR Program Board. In 2009 AMSAT-DL, in collaboration with the DLR Institute for Space Systems in Bremen, conducted two complex Concurrent Engineering studies.

They were jointly presented to the DLR program board in Köln-Porz in 2010.

The final documentation confirmed the feasibility of the P5 project, both to the Moon and to Mars.

In October and November 2011 another two P5 meetings with DLR chairman Prof. Wörner, Ministry MinDirig Engelhard, representatives of DLR IRS Bremen and AMSAT-DL BOD took place. Topics were feasibility and financing model.

It turned out that the ministry had a different perception of the (DLR-) payloads.

DLR was asked to reconsider their payloads. Both AMSAT-DL BOD and IRS Bremen left the meetings with positive feelings.

Then it turned out that, since completion of the 2009 joint study, the P5 scientific appeal is apparently no longer attractive. Therefore it was jointly searched for modifications to regain a payload appeal that was attested in 2009. AMSAT-DL proposed landing part of the payload on Mars

moon Deimos or Phobos. Our calculations showed that this is feasible with reasonable effort. The landing would be a particularly unique feature of the P5 mission.

After repeated enquiries we received a letter from DLR at end of June where they stated that "the DLR Program Board comes to the conclusion, that pursuit of the P5 idea is infeasible and also financially infeasible."

We repeatedly approached the DLR Program Board since then. The assertion was that any P5 mission will not fly with DLR: the scientific attraction was, compared with the current Mars missions, insufficient.

The primary reason for this is that the P5 MARS orbit is limited due to the low-cost character of the mission. From this orbit no attractive science is possible. Obviously our P5 mission is now compared with regular missions which cost hundreds of millions of Euro.

This rejection has a wide impact on AMSAT-DL. Activities of all involved persons, including in the P3-E project, was shaped for years by the P5 mission.

It was assumed that P3-E was to be launched as part of the P5 mission. This path is obstructed now.

We maintain our contacts with the various launching agencies able to launch P3-E into an appropriate orbit. The tremendous launching costs kept us from more concrete talks so far. Just recently good contact with AMSAT China (CAMSAT) was established. China has suitable launchers to bring payloads into GTO. Moreover, China has discovered that amateur radio is a means of motivating young people to technical university studies.

Furthermore we are very actively exploiting a potential shared ride of an amateur radio payload on a new geostationary satellite. We have already submitted a formal project proposal. The satellite will be visible from Europe.

No antenna tracking will be necessary. The big advantage of this project is that due to the operational requirements of the primary payload, our launching and commissioning is tied to the not too far future.

The 20m dish antenna at Bochum observatory was originally refurbished and upgraded for the P5 mission and is presently used for Deep Space Mission and amateur radio purposes. The automatic reception of the STEREO probes and data transfer to NASA will continue. In collaboration with NASA and AMSAT-DL the modulation scheme will be

changed to use Turbo coding. Both hardware and software is currently being designed by AMSAT-DL and will be used by the partner STEREO receiving stations worldwide. Our funding application is already approved. The project funding runs until the end of 2015.

The AMSAT-DL Marburg Lab will be preserved at least in medium term to be able to do work on P3-E and, should the situation arise, on the transponder of the mentioned geostationary satellite.

We pursue a near-term meeting with all P5 project team members to identify ways for a project continuation. The necessary procedures should be coordinated then.

Although we regret the DLR refusal of the P5 project (particularly because some DLR payload will not fly in any foreseeable time frame), and although it places serious challenges to AMSAT-DL, this is not the cancellation of a HEO amateur radio satellite. We will aggressively follow up all potential possibilities. We hope to be able to report positively at the AMSAT-DL AGM in autumn.

Since the Marburg University's withdrawal from the ZEL, the surrounding conditions have changed significantly, again. However, we will do everything we can do to get an amateur satellite launched into HEO.

We do trust in our volunteers and members.

The AMSAT-DL BOD:

Peter Guelzow, DB2OS

Hartmut Paesler, DL1YDD

Michael R. Lengruesser, DD5ER

Dedicated University CubeSat Downlinks on the Table for ITU WRC-18

IARU Secretary Rod Stafford, W6ROD, reports that the IARU Administrative Council will meet in the next 45 days to address the agenda items for the 2015 World Radiocommunication Conference (WRC-15).

Planning for the dedicated spectrum for university research cubesats will begin for WRC-15 but the actual allocation of frequencies may not occur until the 2018 World Radiocommunication Conference.

In an article posted on the ARRL web, Stafford noted, ☐A lot of radio amateurs are aware of the increasing use of amateur spectrum by small satellites, mainly by universities. It is becoming an increasingly difficult situation to accommodate the number of small, non-commercial satellites within the amateur bands. These education-based satellites do not really fit within the definition of the Amateur Radio Service, but have been accommodated there. These small satellites are categorized as nanosatellites (weighing between 1-10 kg) and picosatellites (weighing less than 1 kg). The ITU is trying to deal with this issue in an orderly manner and a ☐preliminary☐ WRC-18 agenda item is to consider whether these satellite operations can be accommodated in an already crowded radio spectrum. As these issues develop, the IARU will keep its Member-Societies, such as the ARRL, aware of developments.☐ with an eye to building the best strategy to deal with those agenda items in a way that is most favorable to the Amateur Radio Service."

Read the full article, including many other IARU agenda items at:

http://www.arrl.org/news/looking-ahead-to-wrc-15

[ANS thanks the ARRL for the above information]

BUAA-SAT 435/145 MHz FM Amateur Radio Satellite Planned for 2014

BUAA-SAT is a university micro-satellite project developed by the students of Beihang University (Beijing University of Aeronautics and Astronautics). It carries an amateur radio 435/145 MHz FM voice transponder

The satellite has a mass of 30kg, dimensions of 30cm*30cm*50cm and aims to go into a 600-800 km Sun Synchronous Orbit (SSO) from Taiyuan in late 2014.

The primary missions are:

To study the application of COTS components used in the onboard electronic systemTo demonstrate the coilable mast deployment mechanismTo carry out imaging using three CMOS cameras

Moreover, it provides a 27dBm U/V FM voice transponder for the use of radio hams world-wide as well as a 20dBm CW beacon and a 27dBm AX.25 beacon also in the 145 MHz band.

BUAA-SAT website: http://sat.buaa.edu.cn/

BUAA-SAT Group in Google English: http://tinyurl.com/BUAA-SAT-Group

ARISS Rolls on With Successful School Contacts

News from the Amateur Radio on the International Space Station (ARISS) Status Report - September 17, 2012

Maroochydore, Queensland, Australia

Students attending Maroochydore State School in Maroochydore, Queensland, Australia participated in an Amateur Radio on the International Space Station (ARISS) contact on Wednesday, September 12 via telebridge station VK4KHZ in Australia. Akihiko Hoshide, KE5DNI answered 14 questions of the students before the ISS went over the horizon.

Approximately 40 students and guests were in attendance and the contact received coverage by radio, television and newspapers. The contact was integrated into a comprehensive space curriculum, with lessons focused on the Venus Transit, the Juno mission and the Curiosity mission.

Dorado, Puerto Rico

An ARISS contact was held between Joe Acaba, KE5DAR on the ISS and Marcelino Canino Canino Middle School in Dorado, Puerto Rico on Wednesday,

September 12 via telebridge station K6DUE in Greenbelt, Maryland. The session was conducted in Spanish, with all 16 questions answered. The students are involved in a Microsatellite Hardware program through which they design, build, launch, track and retrieve their microsatellites with the assistance of many local amateur radio operators.

Sindelfingen, Germany

On Thursday, September 13, Sunita Williams, KD5PLB spoke with students at the Gymnasium Unterrieden in Sindelfingen, Germany through an ARISS contact and answered their space-related questions. One hundred people showed up for the event, including 4 media outlets. The audio was broadcasted via 2 amateur radio relays. The contact was integrated into several other amateur radio activities which included the students preparing for entry level amateur radio licenses and building a satellite receiving station. Video has been posted.

NASA Goddard Space Flight Center in Greenbelt, Maryland

A second ARISS contact that Akihiko Hoshide, KE5DNI took part in last week was with children at the NASA Goddard Space Flight Center in Greenbelt, Maryland on Thursday, September 13. The students had 21 questions answered during the ISS pass, and as the coordinating person at Goddard had previously asked another astronaut for answers to the questions, the remaining students still received "official" answers to their questions. Nearly 100 people were in attendance, with 4 media cameras recording the event. Prince George's County Community TV reported on the event.

Oak Hill, Florida

On Thursday, September 13, an ARISS contact was held between children at the Burns Sci-Tech Charter School in Oak Hill, Florida and Sunita Williams KD5PLB on the ISS. Daytona Beach Amateur Radio Association supported the school in this endeavor. The contact was integrated into lessons on radio waves, electricity, communications, geography and languages.

Kolo, Poland

Zespól Szkól Technicznych w Kole, Kolo, Poland participated in an Amateur Radio on the International Space Station (ARISS) contact on Wednesday, September 19. Besides learning about space, amateur radio and satellite tracking in the classroom, students are also attending lectures on astronautics, engineering and astronomy. They are involved with related hands-on activities and competitions, with the winners receiving the opportunity to question the ISS astronaut. In addition, the school is forming astronomy and amateur radio clubs for the youth. The event was broadcast live.

San Diego, California

An Amateur Radio on the International Space Station (ARISS) contact was completed with Sunset Hills Elementary School in San Diego, California on Thursday, September 20 at 17:24 UTC. Students are learning about the radio

and space through age-appropriate hands-on activities. NASA education Web site materials are being used and guest speakers from the local Amateur Radio club will give a presentation to the students.

LaFayette, Georgia

Lafayette Middle School, La Fayette, Georgia completed an Amateur Radio on the International Space Station (ARISS) contact on Friday, September 21. The school used the ARISS contact to promote the areas of Science, Technology, Engineering, and Mathematics within its entire system. It arranged for Skype interviews with guests for the ARISS event: Dr. Rob Suggs and Dr. Bill Cooke of Marshall Space Flight Center in Huntsville, Alabama; Cristi Whitworth, Educational Director for Pisgah Astronomical Research Institute; and Dr. June Scobee Rodgers, Founding Chair of the Challenger Center at the University of Tennessee at Chattanooga.

NASA Offers Opportunity to Use Communications Testbed on ISS

The SCAN testbed is a communications, navigation and networking demonstration platform based on the STRS. The experimental platform began its initial checkout activities on the space station August 13 and will operate for as long as three years.

NASA is announcing opportunities for academia, industry and government agencies to develop and carry out research and technology demonstrations on the International Space Station using the newly installed Space Communications and Navigation (SCAN) testbed.

There are two announcements of opportunity. The SCAN Testbed Experiment Opportunity invites industry and other government agencies to enter into Space Act Agreements with NASA to use the space station's SCAN platform.

The SCAN Testbed Cooperative Agreement Notice invites academia to develop proposals to use the orbiting laboratory's SCAN testbed research capabilities. NASA expects the first demonstrations by late 2013 or early 2014.

These opportunities will allow researchers to develop new software according to the Space Telecommunications Radio Standard (STRS) architecture for radios and reconfigure how radios communicate in space.

Experiments will provide waveforms and software components to the STRS waveform repository and enable future hardware platforms to use common reusable software modules. These new capabilities could enable greater scientific return from future NASA missions.

Details and specifications are available from NASA:

Satellite Shorts From All Over

AMSAT's Keeper of the Keps, Ray Hoad, WA5QGD reports that the ELaNa cubesats launched 9/17/2012 have been added to this week's KEPs: AENEAS - Cat #38760; CSSWE - Cat #38761; CP5 - Cat #38763Photos and a video of the Atlas launch from Vandenberg can be viewed on-line. This launch carried satellites for the National Reconnaissance Office. Also aboard this flight at four cubesats as part of ELaNa IV mission and seven cubesats for government missions.A photo of the Soyuz TMA-04M spacecraft as it lands with Expedition 32 Commander Gennady Padalka of Russia, NASA Flight Engineer Joe Acaba and Russian Flight Engineer Sergie Revin in a remote area near the town of Arkalyk, Kazakhstan, on September 17 can be seen on-line.NASA Explorer Schools is offering students in grades 4-12 an opportunity to ask questions of Bob Cabana, astronaut and Director of NASA's Kennedy Space Center. Join the video chat on Sept. 25, 2012, from 1-1:45 p.m. EDT to ask Cabana questions about his education, astronaut training, living and working in space and the future of space exploration. Students do not need to be in a school participating in the NASA Explorer Schools project in order to ask questions during this video chat. Submit questions during the chat through a chat window, or send them to: NASA-Explorer-Schools@mail.nasa.gov. To learn more about NES, visit http://www/explorerschools.nasa.gov. For more information and to view the video chat, visit: http://tinyurl.com/explorer-chat (nasa.gov)NASA has announced their "Space Place Prime," the new NASA magazine for iPad. This free, brand new app gathers some of the best and most recent Web offerings from NASA. It taps engrossing articles from The Space Place website, enlightening NASA videos and daily images such as the Astronomy Picture of the Day and the NASA Earth Observatory Image of the Day. For more information about the new magazine, visit http://spaceplace.nasa.gov/ios/. (iPad is a registered trademarks of Apple Inc.)The Houston AMSAT Net meets every Wednesday at 0100z (this is Tuesday evening in North America) on Echolink - Conference *AMSAT* . The MP3 audio is also streamed http://www.amsatnet.com. After the net a Podcast is available at: http://www.amsatnet.com/podcast.xml or iTunesThe next Hudson Valley Satcom net date is Thursday, September 27, 8 PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). An echolink connection is available on the N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)The Canadian Space Agency announced that a British Columbia artisan-made organic cereal is one of 12 Canadian foods to accompany Canadian Astronaut and Mission 35 Commander Chris Hadfield on the December space mission to the International Space Station where he will live and work for six months as part of the crew. We wonder how many students will ask how the crew is enjoying their cereal described at: http://spaceref.com/news/viewpr.html?pid=38629How would you like to be famous? If you know any scientific, math, or electronics puns send them to k9jkm@amsat.org. The winners will occasionally be included in the ANS bulletins.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind that programming today is a race between software engineers striving to build bigger and better idiot-proof programs, and the Universe trying to produce bigger and better idiots. So far, the Universe is winning.

1864. ARRL 2012 International Humanitarian Award

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-25 20:56:42 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20120925202808.8F28A203AF@bmail.arrl.org>
Source record: 1831
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.info

The nomination period for the 2012 ARRL International Humanitarian Award is now open. Here is more information:

ARRL INVITES NOMINATIONS FOR 2012 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2012 ARRL International Humanitarian Award <http://www.arrl.org/international-humanitarian-award>. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize Amateur Radio operators who have used ham radio to provide extraordinary service to others in times of crisis or disaster.

A committee appointed by the League's President recommends the award recipient(s) to the ARRL Board, which makes the final decision. The committee is now accepting nominations from Amateur Radio, governmental or other organizations that have benefited from extraordinary service rendered by an Amateur Radio operator or group.

Amateur Radio is one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, thereby spreading goodwill across political boundaries. The ARRL International Humanitarian Award recognizes Amateur Radio's unique role in international communication and the assistance amateurs regularly provide to people in need.

Nominations should include a summary of the nominee's actions that qualify the individual (or individuals) for this award, plus verifying statements from at least two people having first-hand knowledge of the events warranting the nomination. These statements may be from an official of a group (for example, the American Red Cross, The Salvation Army, a local or state emergency management official) that benefited from the nominee's particular Amateur Radio contribution. Nominations should include the names and addresses of all references.

All nominations and supporting materials for the 2012 ARRL International Humanitarian Award must be submitted in writing in English to ARRL International Humanitarian Award, 225 Main St, Newington, CT 06111 USA.

Nomination submissions are due by December 31, 2012. In the event that no nominations are received, the committee itself may determine a recipient or decide to make no award.

The winner of the ARRL International Humanitarian Award receives an engraved plaque and a profile in QST and other ARRL venues.

Andrey Fedorov, RW3AH/KL1A, was the recipient of the 2011 ARRL International Humanitarian Award. The former chief coordinator of the Russian Amateur Radio Emergency Service (RARES), Fedorov has been involved in providing communications support via Amateur Radio for almost 25 years.

LaFayette Middle School Amateur Radio Club Contacts ISS:

Posted: 24 Sep 2012 05:52 PM PDT
http://www.eham.net/articles/29015

The LaFayette Middle School Amateur Radio Club (W4LMS) had the opportunity to be one of 18 schools in the entire world to make contact with the International Space Station (NA1SS), specifically with Commander Suni Williams. The students who are members of the middle school's amateur radio club asked about 15 to 16 questions to Commander Williams about life on the space station. The space station was visible in the sky for about 10 minutes, so it was a quick question and answer session. It was a great opportunity for the students, and I hope that this sparks an interest in engineering or the hard sciences.

//
Dr. Robert Carrel Honored for Invention, Community Service:

Posted: 24 Sep 2012 05:52 PM PDT
http://www.eham.net/articles/29014

The Fannin County Amateur Radio Club, along with the Plano, McKinney, and Grayson clubs, hosted a reception for Dr. Robert Carrel on Saturday afternoon, September 15, at the Family Life Center in Bonham. Dr. Carrel was honored for his research and development of the Log Periodic antenna which resulted in his being designated as the antenna's co-inventor in 1963. This type of antenna was the basis for many home TV antennas in the 1960s and 1970s. This design continues to see broad use in amateur, commercial and government service around the world. Bonham Mayor Roy Floyd presented a certificate of commendation to Dr. Carrel for his technical achievements as well as his support of many organizations in and around Fannin County.

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

September 26, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Digging Digital - CQ World Wide RTTY
- Big State Bashes - California and Texas QSO Parties
- The Webinars - They're Back!
- Wavemaking at Stanford
- Late Call from Lithuania
- You've Got Plaque!
- Tabletop Exercises
- Maker Machine Madness
- Lowering the Broom

NEW HF OPERATORS - THINGS TO DO

Here comes a pair of major state QSO parties - California and Texas.
The Texas QSO Party <http://www.txqp.net/> is this coming weekend and
the California QSO Party <http://www.cqp.org/> is the following
weekend. These are great contests for new HF operators in North America
- both are domestic (meaning modest stations do quite well) and there
is enough activity to keep the weekend interesting without intense
crowding. You may also hear some Chinese stations mixed in with the
Californians - this is the weekend for the Worked All Provinces of
China <http://www.mulandxc.org/> contest - the first-ever Chinese DX
contest!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

K3EST's has been a member of the WRTC Sanctioning Committee for 16
years, not 26. Your editor is losing his ability to subtract,
apparently. (Thanks, Bob W6RGG)

The QST edition of Contest Corral for September should have listed the
CQ WW RTTY Contest and Texas QSO Party as starting on Sept 29th. The
```

online PDF version <http://www.arrl.org/contest-calendar> is correct.
(Thanks, Dick W0RAA)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Sep 29-30

- SKCC Straight Key Sprint-- (Sep 26)
- 902 MHz Fall VHF Sprint
- CQ WW RTTY Contest
- Texas QSO Party

Oct 6-7

- ARRL EME Contest
- ARS Spartan Sprint--CW (Oct 2)
- OK1WC Memorial Contest (Oct 2)
- 432 MHz Fall VHF Sprint (Oct 3)
- SNS and NS Weekly Sprints--CW, Digital (Oct 5)
- DX/NA YLRL Anniversary Party (Oct 5)
- PSK Rumble - The Fall Classic
- Worked All Provinces of China
- EPC Russia DX Contest--Digital
- Oceania DX Phone Contest
- Worked All Britain HF Contest--Phone
- California QSO Party
- EU Autumn Sprint--Phone
- RSGB 21/28 MHz Contest

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The World Wide Radio Operator Foundation <http://www.wwrof.org/>
(WWROF) has assumed sponsorship of the popular PVRC Webinar series
beginning with "A Look at the Upcoming PA & CA QSO Parties". PA QSO
Party chairman Mike Coslo N3LI and CA QSO Party representative John
Miller K6MM will provide an overview of their upcoming QSO parties. The
webinar will be presented on Monday, Oct 1 at 9 PM EDT and registration
<https://www2.gotomeeting.com/register/925057098> is free as always.
(Thanks, Ken K4ZW)

This year's package of Sweepstakes information (rules, records,
writeups, forms, etc) is now available online at the ARRL Sweepstakes
web page <http://www.arrl.org/sweepstakes>. This is a great
introduction and reference to the oldest of the domestic contests, held
on the first and third weekends of November. (Thanks, Sean KX9X)

All 58 California counties should on the air during the upcoming
California QSO Party as shown in this activity map/cheat sheet
<http://www.cqp.org/Counties-Plan-2012.html>. There are also some new
club contesting rules <http://www.cqp.org/Rules.html> designed to (1)
encourage county expeditions and mobile operations in the rarer

California counties and (2) to clarify how proportional points are awarded for club totals when a club member participates in a multi operation. In addition, Ontario (VE3, not the southern California city) remains a single multiplier for CQP. The partition of Ontario into four different RAC sections does not affect CQP scoring. (Thanks, Bob N6TV and Alan K6SRZ)

The web site for the Stew Perry Top Band Distance Challenge <http://www.kkn.net/stew> has been successfully moved to its new host, just in time for the Oct 20/21 Stew Perry Warmup. (Thanks, Tree N6TR)

Also on October 20-21, Jamboree on the Air <http://www.scouting.org/jota> (JOTA) is getting closer. The Scouting website has been updated with a great deal of supporting content. They have also just posted a promotional video <http://youtu.be/s2ef3PJQ4vQ> directed at hams letting them know what it is and how to get involved. Right on the heels of School Club Roundup <http://www.arrl.org/school-club-roundup> during the preceding weekdays, JOTA is a great opportunity to introduce ham radio to kids and young adults. (Thanks, National Jamboree on the Air Organizer, Jim K5ND <jim.wilson@scouting.org>)

From the AMSAT <http://amsat.org> News Service bulletin ANS-260 comes an article <http://thespacereview.com/article/2155/1> that discusses how CubeSats have captured the attention of space agencies and universities world-wide due to the significant amount of science that can now be packed aboard.

If you sometimes use paper to log contest contacts, Charlie KX7L reports, "For turning old paper logs into ADIF, I've used something called Fast Log Entry <http://df3cb.com/fle/> (FLE) by DF3CB. It's very simple. You enter the date, mode and band once and they stay the same for subsequent QSOs until you change it. Then just enter time and call for each QSO. You don't even need to enter the whole four digits of time, just the minutes will do if that's all that changed. It's free and simple. ADIF2CABR <http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=27508>, by SP7DQR looks pretty good (converting ADIF to Cabrillo format). You can pick which ADIF fields get converted into the Sent and Received exchanges. If you enter the received mult as a comment in FLE (enter '#' after the call, then the comment) then you can tell ADIF2CABR to use the CMT field."

Web Site of the Week - Stanford Magazine recently featured a great article, "Members Make Waves <http://alumni.stanford.edu/get/page/magazine/article/?article_id=55978>", about the W6YX club, perched high in the hills above the Palo Alto campus. In an interview, the club's current trustee, Dave W6NL, recounts some of the club's history which includes famous names like Packard, Villard, and Terman. (Thanks, Steve K6AW and Bob N6TV)

WORD TO THE WISE

3830 - what is this 3830 business, anyway? Before the web, there was 75 meters. After the contest participants would gather near 3830 kHz to exchange scores, excuses, and embellishments. The collected scores would then wend their way through the contest community by various media. An email reflector named "3830" was created by Trey N5KO (then WN4KKN) in the early-1990s, the name recognizing the over-the-air, post-contest watering hole. A few years later, Bruce WA7BNM created a claimed-score reporting website <http://www.hornucopia.com/3830score/> that sent collected information to the email reflector and Dink N7WA added the score compilations, completing the electronic claimed-score posting system we all use today.

==> SIGHTS AND SOUNDS

One very interesting story of examples of how ham radio has proven to be significant in technology and politics is this video story <http://www.youtube.com/watch?v=NZtBsUQ9nkA> of the Lithuanian revolt and QSOs with the ham station in the parliament building that helped keep the world informed. (Thanks, Dave W6NL)

The Van Allen Belts - regions of high-energy charged particles trapped in the Earth's magnetic field - live up above the ionosphere. Learn more about these interesting features of our planet's immediate vicinity in this NASA Earth Observatory article <http://earthobservatory.nasa.gov/IOTD/view.php?id=78985>.

Things get a little scary around the 1-minute mark in this controlled demolition video <http://www.youtube.com/watch?v=hPmXEuSHwKY> of a tower being dropped in place. Just before the 2-minute mark, watch the antenna at the top waving "bye-bye"! (Thanks, Tim K3LR)

==> RESULTS AND RECORDS

☐2011 ARRL EME Contest certificates went out the door recently. CW Sweepstakes certificates will be following them today (Wednesday) and Phone Sweepstakes certificates shortly thereafter, just in time for motivating you during this year's contests! You'll like the return of the stickers including the new post-adjudication Clean Sweep stamp as seen at right! Plaques will be shipping soon, too. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

The preliminary results for the September CW Sprint <http://www.ncjweb.com/sprintcwprelim.php> are now posted online. Congratulations to Trey N5KO on another victory. (Thanks, CW Sprint Manager, Tree N6TR)

Results for the 2011 running of the Arizona Statehood QSO Party <http://www.azqsoparty.org/> are now online for your viewing pleasure. Plaques and certificates will be following shortly!

The 16th Amateur Radio Direction Finding World Championships <http://www.arrl.org/news/ardf-update-a-baker-s-dozen-of-medals-for-ardf-team-usa> were recently held in Serbia. The USA team really stepped up this time, bringing home 13 medals, including the first-ever American gold medals!

ARDF, quite popular around the world, has been attracting more and more attention stateside - watch for more ARDF action in your area or help your club sponsor an event!

OPERATING TIP

Contest Elbow - that painful outcome of resting your arm on the elbow while you tune the radio for a long contest. Veteran of many hours at the rig, Ken K6LA/VY2TT suggests, "The best solution for forearm soreness problems is football elbow pads. I cut the cloth lengthwise and add Velcro straps across the pads to keep them on but loose enough to be comfortable." Game on!

==> TECHNICAL TOPICS AND INFORMATION

As the fall contest season continues to ramp up to full intensity, there has been lots of discussion about table height for contesting. Most tabletops are placed 29-31 inches from the floor but always seem just a little "too" one way or the other. The solution may lie right under you - in an adjustable chair. A small footrest can go a long way towards improving operator comfort as well. Gary K9GS identified an alternate solution, "You can buy very heavy duty adjustable leveling feet that will give you several inches of adjustment. Again Google is your friend but you can probably start with Rockler <http://rockler.com/>, Woodcraft <http://woodcraft.com/>, or Lee Valley <http://leevalley.com/> to find what you need." Jim K8MR has "...installed a slide-out keyboard shelf which rests the keyboard 24 inches above the floor. This works out to be almost literally in my lap." He also suggests, "Use a chair without arms, or at least a chair wide enough that you can drop your arms by your side without using the arm rests. It is much more relaxing...(and)...your wrists will not be bending sideways. Have enough extra cables on your radios that you can slide them to the very front edge of desk. With this, there is only an inch or two of forward motion required to move between the keyboard and the radio...(or)...radios can also be shoved back to a more conventional position, with your arms resting on the desktop. Change of position is always a good thing." He also notes that armless chairs help you stay awake!

Many counties provide the National Electrical Code (NEC) as a downloadable PDF file such as this 2008 version <http://www.garnernc.gov/Publications/Inspections/2008%20National%20Electrical%20Code.pdf> , since it is written into their inspection code requirements. (Thanks, Steve W3AHL)

A tale of telephone RFI on 10 meters from Eddy VE3CUI/VE3XZ recounts his amazement of discovering that "the coiled handset cord while I was seated was immune to RFI but as soon as it was outstretched, it must have acted like a resonant (antenna) on 10 meters!" It just goes to show that anything can act as an antenna - either receiving or transmitting!

The graphic at right shows a method of draining charge from an antenna while also providing some protection against high voltages from static electricity. The basic idea is presented on the K2AV Folded Counterpoise <http://www.w0uce.net/K2AVantennas.html> antenna website. The value of the 5-Mohm resistor is not critical and just needs to be high enough to minimize its effect on antenna impedance while surviving normal operation. Power ratings of 2 watts or better are generally recommended in this application. The spark plug can be mounted directly to a grounded plate, as well.

Based on some reasonable assumptions about converting materials into cost-per-dB, Tom W8JI came up with a reasonable order of progression for low-band station builders:

- A good TX omni antenna
- Good basic RX antennas that fit your location
- An amplifier
- Better RX antennas or bigger amp, depending on your results at this stage
- After the legal power limit is reached and if people still have problems hearing you, only then comes transmitting antenna gain

Dave K6LL reminds us of a method <http://lists.contesting.com/archives/html/Towertalk/1998-11/msg00371.html> for testing coax loss even with an antenna connected. It takes advantage of an antenna's likelihood of presenting a high-impedance at some out-of-band frequency to act as a nearly open circuit. Dave presents a formula for converting the resulting SWR into line loss. The lower the SWR at the high-impedance frequency, the higher the loss.

Along with VE3CUI's discovery on transmitting RFI, Dale K9VUJ also discovered that receiving RFI can be caused by anything. "I myself a few years ago had a random sporadic noise, crackling and very strong especially on the lower bands. One day I had the receiver volume turned up so I could hear it in another room and while I was walking though the kitchen I heard the "crackle crackle" while I walked. I went to the basement and started looking all around. What I found was the metal wire that is used to hang suspended ceiling tile was barely touching a metal electrical conduit above the tile and any amount of vibration would cause static in the radio."

The round "flip-top" containers for chewing gum lozenges make great small-parts holders for toolboxes and on the workbench. The labels peel right off so you can easily see what's inside and the small flip-up hatch makes it easy to get out one part at a time.

What is the worst radio location in the world? Well, it's not actually on this world, according to the Popular Science <http://www.popsci.com/> article "Satellite Radio" in the October 2012 issue. The worst place turns out to be on the dark side of the Moon but the noise floor is really, really low!

Technical Web Site of the Week - 3D printing is a technology that is going to be increasingly common in ham radio as evidenced by this

Makezine review
<http://blog.makezine.com/2012/09/09/makes-3d-print-shop-weekend-day-1/>
of 15 different consumer-grade 3D printers. Consider that just a few
years ago, these were high-end industrial products costing five figures
and up. Now we have "consumer grade" and more than a dozen available
plus online plans for building your own. (Photo of Charlotte hamfest)

==> CONVERSATION

Lowering the Broom

Not to mix a metaphor or anything but there is a lot of low-hanging
fruit to be swept up in this year's ARRL November Sweepstakes
<http://www.arrl.org/sweepstakes>. The contest's manager, Larry Hammel
K5OT observes that we will "be surprised at the number of opportunities
that exist in both modes on the all-time records list
<http://www.arrl.org/contest-records>!" Of course, there are the four
new Ontario sections to push the top scores up by three more
multipliers - a built-in bonus of nearly four percent!

The two new Low-Power categories added in 2011 still have 111
section-level records unclaimed in Multi-op, Low Power and 54 in
Unlimited, Low Power. (That includes both Phone and CW.) Where there is
really a lot of opportunity is in the School Club category. At the
section level, there are 49 CW records for which an entry has never
even been submitted and 31 on Phone! Don't you have a high-school or
college club nearby that might like to claim a record of their own?
Even if the club is not formally organized, the multi-operator
categories are wide open.

Larry has done quite a bit of review in the Sweepstakes records and
you'll see a more extensive article by him in the upcoming issue of the
National Contest Journal <http://ncjweb.com/>. In the meantime, a visit
to the online records would certainly be in order, don't you think?

Speaking of those clubs, you have some great opportunities to
motivate some young radio aficionados with the School Club Roundup
<http://www.arrl.org/school-club-roundup> on October 15-19 that is
followed by Jamboree On The Air <http://www.scouting.org/jota> (JOTA).
Invite some of these potential hams to your shack for a few hours of
radio time and see if a few of them might not like to put in a few
hours during Sweepstakes. A challenge with another local group is a
good motivator, too! I also recommend a post-contest pizza party.

For personal efforts, shooting for a record is a great way to stay
engaged throughout the contest and fight off fatigue. Make an
hour-by-hour chart of your best effort, then add the record line and
see how close you can get this year. Maybe you'll be able to add your
own call sign to the list. A note to contest managers - if your club
sponsors a contest, be sure to keep your record list up to date. It
attracts participation and makes the results more interesting when you
can talk about new records being set.

The unique "clean sweep" of Sweepstakes multipliers has always been represented by "the broom". Many a time, a station is one of the rarer sections will hear "Thank for the sweep!" as a final section is logged and checked off the list. The new clean sweep stickers are also being added to Sweepstakes certificates this year - maybe you'll see one in your mailbox soon? Why not hand out specially-decorated brooms to your club's high achievers? It makes a great program event at the annual holiday party!

Crossing off each section as you log them is one of contesting's great traditions, whether you are computer logging or not. The list was printed at the bottom of the paper entry forms - it was great to send in a log with all sections marked off! The excitement of the new Ontario sections, expectations for high-band activity, and a whole raft of records within reach should have every broom-wielding clean sweep mug chaser counting the days to the first and third weekends in November. Let's lower our brooms to the noise floor and get to work!

73, Ward N0AX

==> CONTESTS

26 September through 9 October

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

SKCC Straight Key Sprint--CW from Sep 26, 0000Z to Sep 26, 0200Z. Monthly on the 4th Wednesday UTC. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, SKCC nr or power. Logs due: 5 days. Rules <http://www.skccgroup.com/sprint/sks>

CQ WW RTTY Contest--Digital from Sep 29, 0000Z to Sep 30, 2400Z. Bands (MHz): 3.5-28. Exchange: RST, CQ zone and State/VE area (US/VE). Logs due: Nov 1. Rules <http://www.cqwwrtty.com/>

Texas QSO Party--Phone,CW,Digital from Sep 29, 1400Z (multiple operating periods, see website). Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW--20 to 50 kHz above band edge; Phone--25 kHz above edge of General segment. Exchange: RS(T), county or S/P/C. Logs due: Oct 31. Rules <http://www.txqp.net/>

ARS Spartan Sprint--CW from Oct 2, 0200Z to Oct 2, 0400Z. Monthly on the first Monday evening local time. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

OK1WC Memorial Contest--Phone,CW from Oct 2, 1600Z (see website). First through fourth Monday of each month. Bands (MHz): 3.5, 50, 144, see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules http://www.hamradio.cz/ok1wc

SNS and NS Weekly Sprints--CW,Digital from Oct 5, 0200Z to Oct 5, 0300Z. Weekly on Thursday evenings local time. Bands (MHz): 1.8-14. Exchange: Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/>

DX/NA YLRL Anniversary Party--Phone,CW,Digital from Oct 5, 1400Z to Oct 7, 0200Z. Bands (MHz): 1.8-28. Exchange: Serial, RST, and section/province/country. Logs due: 30 days. Rules <http://www.ylrl.org/>

PSK Rumble - The Fall Classic--Digital from Oct 6, 0000Z to Oct 6, 2400Z. Bands (MHz): 1.8-28, 50. Exchange: Name and call area (see website). Logs due: Oct 31. Rules <http://www.n2ty.org/>

Worked All Provinces of China--Phone,CW from Oct 6, 0000Z to Oct 6, 2359Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial or province abbreviation. Logs due: Oct 31. Rules <http://www.mulandxc.org/>

EPC Russia DX Contest--Digital from Oct 6, 0400Z to Oct 7, 0359Z. Bands (MHz): 1.8-28. Exchange: EPC member nr or serial and grid square. Logs due: Oct 22. Rules <http://www.epc-ru.ru/>

Oceania DX Phone Contest--Phone from Oct 6, 0800Z to Oct 7, 0800Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: Nov 7. Rules <http://www.oceaniadxcontest.com/>

Worked All Britain HF Contest--Phone from Oct 6, 1200Z to Oct 7, 1200Z. Bands (MHz): 14-28. Exchange: RS, serial, DXCC entity or WAB area. Logs due: Oct 28. Rules <http://www.worked-all-britain.co.uk/>

California QSO Party--Phone,CW from Oct 6, 1600Z to Oct 7, 2200Z. Bands (MHz): 1.8-28, 50,144. Exchange: Serial and state/prov/"DX" or CA county. Logs due: Oct 31. Rules <http://www.cqp.org/>

EU Autumn Sprint--Phone from Oct 6, 1600Z to Oct 6, 1959Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

RSGB 21/28 MHz Contest--Phone,CW from Oct 7, 0700Z to Oct 7, 1900Z. Bands (MHz): 21,28. Exchange: Serial and UK district. Logs due: Oct 22. Rules <http://www.rsgbcc.org/>

VHF+ CONTESTS

ARRL EME Contest--Phone,CW,Digital from Oct 6, 0000Z to Oct 7, 2359Z. Bands (MHz): 2.3G+. Exchange: Call signs, sig rpt, acknowledgement. Logs due: Jan 1. Rules <http://www.arrl.org/contests>

902 MHz Fall VHF Sprint--Phone,CW,Digital from Sep 29, 7 AM to Sep 29, 1 PM. Bands (MHz): 902+. Exchange: 6-character grid locator. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

432 MHz Fall VHF Sprint--Phone,CW,Digital from Oct 3, 7 PM to Oct 3, 11 PM. Bands (MHz): 432. Exchange: 4-character grid square. Logs due: 4 weeks. Rules <http://www.svhfs.org/>

Texas QSO Party--Phone,CW,Digital from Sep 29, 1400Z (multiple operating periods, see website). Wisconsin - Fox Cities Amateur Radio Club 2012 Swapfest!

Posted: 25 Sep 2012 10:10 AM PDT
http://forums.qrz.com/showthread.php?362676-Wisconsin-Fox-Cities-Amateur-Radio-Club-2012-Swapfest!&goto=newpost

Fox Cities Amateur Radio Club 2012 Swapfest! NEW LOCATION!!

Fellow HAM-Sters...

Hamfest weekend in Wisconsin is coming! The Milwaukee Repeater Club Hamfest is Saturday, November 3rd in Milwaukee and the FCARC Hamfest is November 4th in Appleton, Wisconsin. Why not enjoy a full weekend of hamfesting and send the family to our beautiful shopping malls for a great weekend of pre-holiday shopping?

The Fox Cities Amateur Radio Club is having another great hamfest on Sunday, November 4th, 2012 at Monarch Gardens, 2311 W. Spencer St. in Appleton, Wisconsin. Our hamfest could be one of the best kept secrets in Wisconsin. Raffle tickets are $2 or 3 for $5. Tables are only $10 in advance and general admission is only $5 in advance. Vendor setup is at 6AM with general admission starting at 8AM.

WE HAVE AWESOME RAFFLE PRIZES!

This year's top raffle prizes!

KENWOOD HS-5 Communication Headphones

The Best Headphones Ever Made! Butter for your ears!

ASTRON RS-20A Power Supply

The REAL power supply for your shack.

The Powerwerx / Wouxun KG-UV3D 2m/440 Dual Band HT Version 3.

128 memories / 1700MAH LI-ON Battery / Stand up charger

Kenwood TM-V71A 2m/440 Dual Band Mobile

50 Watts on BOTH VHF and UHF

Cross band and same band receive

Excellent for APRS

Great ARRL gift certificates!

Get that Antenna Handbook or Yearly Handbook or Great ARRL Stuff!

This is one of the last hamfests of the year. We always have a great fest with tons of good quality equipment. Stay in the area for lunch and watch the game!

VE Testing will be available for those folks that want to upgrade or get their new license!

See http://www.fcarc.us/hamfest.php for more information. Hope to see you there!!!

73,

Tony, AB9IO

Update: HRD 6.0 in beta with Continuing Development

Posted: 25 Sep 2012 03:51 PM PDT
http://forums.qrz.com/showthread.php?362722-Update-HRD-6-0-in-beta-with-Continuing-Development&goto=newpost

HRD Software, LLC Tampa, FL September 25, 2012

HRD Software, LLC wants to update the status of Ham Radio Deluxe version 6.0 for the ham community.

Ham Radio Deluxe 6 is now in beta test as development continues. The beta team continues their fine job of testing the code before release.

In addition to QA and beta testing, Chris Peters, N4KIT and Ferry Holsderver, PD9FER have joined the support team. Having Chris in the U.S.A. and Ferry in Europe allows HRD software to expand its email and ticket support hours.

In addition, HRD and QRZ have been working on speeding up callsign lookups. This increase will be seen in HRD 5.24.36 and even faster lookups with release 6.0.

The 6.0 features will include, but are not limited to:

New awards reporting for DXCC, WAS and other major awards.

Improved ☐Worked Status☐ icons for spots to show if needed on band/mode or all time new one

Support for AR, CC and Spider Packet clusters.

QSX on split spot

Better Cluster filtering

Worked Status Icons in the DX cluster spots.

Enhanced callsign lookups in Logbook and DM-780.

FSK for RTTY

Supersweeper, CW, RTTY and PSK for decoding multiple signals

New rotor support (M2, RT-21 and MDS RC-1 and more)

New and enhanced radio support.

Added callsign lookups for Buckmaster web, calllook.info XML , RAC and SAM CD's

Improved ADIF

The retail price for version 6.0 is $79.95, but you can pre order and save $10. To purchase and download the product go to http://www.ham-radio-deluxe.com.

http://forums.qrz.com/showthread.php?362725-2012-Arizona-Centennial-QSO-Party-Announcement!&goto=newpost

Announcing the 2012 Arizona Centennial QSO Party, sponsored by the ARRL
Arizona Section and Catalina Radio Club, from Oct 13 1600Z to Oct 14 0600Z
and Oct 14 1400Z to Oct 14 2359Z. Phone, CW and Digital modes on
160/80/40/20/15/10/6/2 meters. Single-Op, Multi-Op, Arizona Multi-Multi,
Arizona County Expedition and Mobile categories. Work stations once per
band and mode. Mobiles may be worked once per band and mode in each county.
County Line operations (two counties max) count as 2 QSOs. Outside Arizona
exchange name and location (State, Province, or DXCC Prefix). Arizona
Stations send a year of significance in Arizona History (see rules) and
State/County abbreviation. Suggested Frequencies (kHz): CW: 1812, 3548,
7048, 14048, 21048, 28048, 50048. SSB: 1848, 3848, 7189, 14248, 21348,
28448, 50148. FM Simplex: 146.48MHz. One point per Phone QSO, two points
for CW and Digital QSOs. Multipliers for non-AZ entries are the 15 AZ
counties by band and mode. Multipliers for AZ entries are States,
Provinces, and DXCC Countries by mode. Final score is total QSO points
times total multipliers + 100pts for Bonus Station W7SA. Mail logs no later
than Oct 31 to Catalina Radio Club, C/O Gary Keck, PO Box 17811, Tucson, AZ
85731 or via email to logs@azqsoparty.org . For full rules, along with log
and summary sheets, Cabrillo electronic file format, and Award information,
see http://www.azqsoparty.org.

Looking forward to hearing you on the air!

1874. MMMonVHF Newsletter No. 1/ WEEK 39 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-26 18:44:02 UTC
From: MMMonVHF Newsletter <noreply@mmmonvhf.de>

MMMonVHF Newsletter No. 1/ WEEK 39 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-09-26
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

The UKSMG would like help in compiling a survey of your Most Wanted
Countries on 6m. We first conducted a survey in 2007 and the results
proved very popular in helping a number of leading Dxpeditioners decide
where to go next. The results of this survey will be published in the
January 2013 issue of Six News.
Once you have ticked the boxes on the attached PDF, please ensure you
have included your callsign in the necessary box, and then click on the
last box to email me your results.
Please note that this is not a survey of the most wanted countries
world-wide.
This separate survey can be accessed by going to:
http://www.uksmg.org/most-wanted-form.php

Thank you. Peter, *G3ZSS*, Editor of Six News.

****

** DXCC: GU & GJ ; Guernsey & Jesrey ; Square: IN89 ; start 2012-09-29

NEWS by Hermann, DL2NUD, dated 2012-09-22:
All is ready to take of. As well the time schedule is now fixed:
sept. 30th till oct. 5th the TEAM will be qrv from GJ!
On 5th to 6th they will move to GU by ferrie and be qrv from GU until oct. 9th (
latest mid of the day to start their back trip).

Hermann, DL2NUD, and Peter, DJ4TC, will be qrv some days from GU and GJ
during sept. 29th and oct. 09th, 2012
Main goal are the higher bands these time. Activity on 144 MHz will be only short!
The Team will be ready with following equipment:
144: 9 el 7KF hor./vert. abt. 400W
432: 21 el hor. 120W (400W sometimes)
1296: 62 el hor. 200W (400W sometimes)

Source: tnx to Hermann, DL2NUD, direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2012-10-01

Bodo, DF8DX, qrv from SV9 on HF and 23cm EME

Equipment will be like on my previous DXpeditions IC7000 with transverter (100W) and 59ele yagi.
call: SV9/DF8DX
Grid: KM25 (exact locator will be given later)
IOTA: EU-015
Activity on 23cm EME:
October 2, 2000-2130z (for EU)
October 3, 0400-0600z (for NA)
with backup dates:
October 3, 2030-2200z (for EU)
October 4, 0430-0600z (for NA)
Frequency: TX first on 1296.090MHz / RX on my own echo frequency (just like in CW)

I am one week on SV9 but I would prefer you work me on the suggested times because i want to spend some time with my wife on this vacation and also enjoy some HF (CW only) activity as well
as maybe activity from EU-187. Further skeds on request (if necesary). Check www.mmmonvhf.de for updates.

RAC Bulletin 2012-057E - Distracted Driving Bulletin: Ontario Extends Exemption
2012-09-25

The Radio Amateurs of Canada are today announcing written confirmation from Minister Bob Chiarelli of the Ontario Provincial Government regarding a five year extension of exemption to the Ontario distracted driving law. In his letter, Minister Chiarelli explains that the current exemptions for both Amateur Radio and Two Way Commercial Radios will be extended until January 1st, 2018.

Minister Chiarelli expresses his hope that in that time commercial hands free alternatives will be found for two way radios. While RAC finds victory in the five year extension, a permanent solution is desired and required.

The Radio Amateurs of Canada will continue to pursue a permanent exemption for Amateur Radio operators in Ontario. Similar exemptions already exist in many other provincial jurisdictions in Canada - thanks in part to the efforts of local amateurs and RAC's national strategy to address distracted driving legislation.

The Radio Amateurs of Canada is Canada's national voice for Amateur Radio. Our efforts not only promote the Amateur Radio Service but protect it from regulatory interference that may lead to less capability to provide emergency communications. Not already a RAC member? Why not join today at www.rac.ca and find out about the many benefits our members enjoy across the country and the world beyond.

Mound Amateur Radio Members to Host Public 50th Celebration:

Posted: 25 Sep 2012 05:46 PM PDT
http://www.eham.net/articles/29018

In 1962, the Miamisburg Mound Laboratory's basic communications were by telephone. "The phone system was federal, but could be taken down," said Jack Melke, Mound employee from 1969-2003. "Some Mound employees visited the Kansas City lab and found they were using Ham radios as a backup, which was more secure. When they returned, they started up the Mound Amateur Radio Association (MARA)." Melke, a West Carrollton native and resident, is the current president of MARA. He started his career at the Mound as a radiation control technician and ended as a building engineer, taking care of the underground technical building. "MARA could pass information on in emergency situations and communicate with local civil defense - our major underground building was a civil defense shelter. I knew about MARA and was interested, but didn't become a Ham operator and join until 2007," the 63-year-old said.

//
Zombie Apocalypse Survival Gear: Ham Radios:

Posted: 25 Sep 2012 05:45 PM PDT
http://www.eham.net/articles/29017

The zombies are coming! Quick: What should you scavenge together for the impending attack? Baseball bat, check. First aid kit, check. Ham radio equipment? You better hope so. Earlier this week, Dragon Con -- the annual sci-fi, fantasy and comic book convention -- hosted a panel covering communication in a post-apocalyptic world. According to Wired's coverage of the conference, several attendees may have been disappointed by the panel's primary topic of discussion: amateur radio. While amateur radio may not be as exhilarating as fighting zombie hordes, it may be the most effective tool during an apocalypse. So why invest in amateur radio equipment for a potential zombie apocalypse (you can never be too prepared!)? Like most investments, amateur radio's success depends on diversification. The amateur radio community has millions of members worldwide and several hundred thousand licensed operators in the United States. This fact combined with the dedication of local radio clubs makes ham radios one of the best communication systems during a zombie attack. Amateur radio operators can send out signals from their personal stations either in their homes, on the road, or even from the International Space Station. If these

operators send their signals on the right frequency, local radio repeaters can detect the signal and re-broadcast them.

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Vale Michael J. Owen VK3KI (sk)

With extreme sadness and surprise we record the death of the WIA President,
and IARU Region 3 Chairman, Michael Owen VK3KI at his home on the afternoon
of Saturday the 22nd of September. Our sincere condolences to Michael's
family and friends.

Michael was influential over many decades through his membership of the WIA
Victorian Division Council, and then through the ranks of administration both
here and overseas.

He was a director of the IARU Region 3 when it formed in 1968, a Federal
WIA President 1969-1972, WIA Honorary Life Member, and on the Australian
delegation at the ITU World Administrative Radio Conference in 1979 which
delivered the so-called WARC bands.

Michael is mainly known by today's radio amateurs as leading the WIA in partnership with the late Chris Jones, from its federal structure to a national organisation.

In May 2004 the WIA adopted a new Constitution, changing the structure to one of direct membership, governed by a board of directors.

A few weeks later the administration (ACA) released its findings on a major review of Amateur Radio in Australia.

Michael had carriage of the end to Morse code as an Australian licence requirement, reduction of licences to two, the Advanced and the Standard, plus introduction of the new Foundation Licence.

He achieved all this and more within in a decade on the domestic scene but Michael never took his eye off the international arena.

Amateur radio societies around the world have benefited from Michael's enthusiasm and experience. While away overseas he was the IARU Vice President for 10 years.

He participated in many IARU committees and was a member of the IARU Observer Team at a number of World Radiocommunications Conferences, in particular WRC03.

There he was responsible for Article 25. It included the abolition of mandatory Morse code, a freeing up of amateur radio involvement in emergency communications and third party traffic.

On his return home the WIA became highly regarded by government agencies and the ACMA.

He became the Chairman IARU Region 3 at Bangalore in 2005, and was preparing for the next regional meeting in Ho Chi Minh City, in November.

He was survived by his wife Nan, who accompanied him on many official functions, and his two daughters. A Funeral was held on Friday the 28th of September, at St Andrews Anglican Church, Brighton, Victoria.

Michael's legacy will live on through the formation of the WIA Foundation, a new venture for which Michael so strongly championed.

Phil Wait VK2ASD.

Tributes to Michael Owen have come from right around the world. They are too numerous to mention all in detail, but on this special broadcast we will include a few of those testimonies to a truly remarkable man, and a couple of voice clips of himself.

Tributes have been received from the IARU, the member societies of the IARU Regions 1, 2 and 3, radio clubs and the many individuals who knew him.

Michael was influential in shaping the hobby of Amateur Radio and then progressing through the ranks of administration both here and overseas.

The very early days saw him team up with David Wardlaw VK3ADW.

As a young man Michael was, first licensed in 1957 as VK3ZEO, and was a foundation member of
The Radio club at Melbourne University
In 1961 he joined me on the WIA Victoria Division Council, a position he held for many years,
Michael with his legal background was always interested in the Wireless Telegraphy Act which later in 1983 became the Radiocommunications Act. During the drafting of this act Michael had many meaningful discussions with officers from the Department.
He went on to help form the IARU Region 3 Association.
His achievements through the IARU are legendary particularly .as a director of region 3 and for 10 years as Vice President of the IARU.
He spent 12 weeks in Geneva, as a member of the Australian delegation to ITU WARC 79 one of the most important ITU conferences in the history of amateur radio
At the time of his death he was chairman of IARU Region 3
I feel a great sadness having lost Michael a good friend to me and my family .

Michael took an interest in the early days of space exploration. Here he is talking at the Project Australis amateur satellite gathering at the Royal Melbourne Institute of Technology.

(Audio Of Michael At Project Australis)

Michael was a member of the group who provided the secretariat for the Region 3 Association when it formed in 1968 and became a Director in 1971.

He was WIA Federal President 1969-1972.

During the early years, and on a number of occasions since then, Michael came across an individual who followed him later in WIA affairs and to the IARU Region 3.

Let us listen to a tribute paid by Jim Linton VK3PC.

It was Michael Owen who signed me in as a Junior Associate of the WIA in 1962.

Our paths crossed during the decades, including my time as WIA Victoria President, at Federal Conventions including the sharing of notes on the Radiocommunications Act.

We became partners through his involvement in the Bangalore conference where he entered as the WIA representative and left as its leader.

At the Centenary Celebrations Committee meetings he drew heavily on the expertise, experience and knowledge that existed within all of us.

It was only a few days since we met to discuss the next regional meeting in Ho Chi Minh City.

On behalf of the Council of Amateur Radio Victoria, the IARU Region 3 Disaster Communications Committee, and all who knew Michael Owen, he will be a sadly missed colleague that cannot be replaced.

Our deep thoughts go to his family and friends at the sad loss.
Jim Linton VK3PC

Mentioned in that piece is a lot on information that will be picked up and expanded by future speakers.

Representing the IARU Region 3 at Michael's funeral was Peter Lake ZL2AZ. Let us now hear his thoughts.

Michael Owen will truly be missed by many radio amateurs world-wide.

Having known him for many years I remember him taking on the lead role of the IARU Region 3 at the Bangalore conference in 2006.

With his vast experience and knowledge, both in amateur radio and as a corporate lawyer, he was able to put the regional organisation on the right course.

On behalf of all on the IARU Region 3 board of directors, we have lost aleader.

To his family, the IARU and the WIA goes our sincere prayers.

Peter Lake ZL2AZ, Director of the IARU Region 3.

Now we take you back to the start of the IARU Region 3 being formed and the years that followed, through the help of his colleague David Sumner, Chief Officer of the ARRL.

I recall first meeting Michael Owen 36 years ago at the first ever meeting of all three IARU regions to coordinate global preparations for the 1979 World Administrative Radio Conference.

In Florida in April 1976 Michael came as an IARU Region 3 Association Director, to represent the IARU Member-Societies of the Asia-Pacificregion.

He was not simply a colleague; he was a friend.

Among the assignments that Michael drew at WARC-79 was to draft a resolution to exempt the Amateur-Satellite Service from coordination procedures that otherwise would have bogged us down in endless paperworkand great expense.

As an attorney it was just the sort of thing he was good at. His work has stood the test of time.

His death is a searing loss for both the IARU and the WIA.

Our thoughts are with his family and friends at this very sad time.

David Sumner K1ZZ, ARRL Chief Executive Officer

One of the many influenced by Michael is the current IARU President, Tim Ellam VE6SH. Here is his tribute.

I am very saddened to hear about Michael?s sudden passing.

I was only speaking to him a few days ago. Michael was a good friend and mentor to many of us in IARU.

His drafting skills were second to none, and his ability to clearly articulate his position on a number of issues was of immeasurable help to us.

The IARU is indebted to his work at the World Radio Conferences and many regional Asia Pacific Telecommunity meetings. He certainly taught me a greatdeal.

The IARU extends sympathies to his family, IARU Region 3 and WIA. I speak for all of my colleagues when I say he will be very sorely missed.

Tim Ellam VE6SH, IARU President

Michael received many awards over the years. He was Federal WIA President 1969-1972 and a WIA Honorary Life Member.

He was a recipient of the Ron Wilkinson Achievement Award with David Wardlaw VK3ADW for their work at the ITU World Administrative Radio Conference 1979.

Michael also received from the Board of the RSGB the prestigious Calcutta Key award, for "Outstanding service to International Friendship through amateur radio".

On his return from overseas Michael was much sought after. Many of today's radio amateurs see him as taking the WIA, in partnership with the late Chris Jones, from its federal structure to a national organisation. In May 2004 the WIA adopted a new Constitution, a lot of work indeed, changing
the structure to one of direct membership, governed by a board of directors.

A few weeks later the administration "Australia Communications Authority " released its findings on a major review of Amateur Radio in Australia.

There was to end the Morse code licence requirement, reduction of five licence grades to two, and the introduction of the beginners or Foundation Licence.

Working on the project with Michael were many others including those conducting assessments through the WIA Exam Service, and appointing a Registered Training Organisation for assessor training and accreditation.

He was also very passionate about the WIA Centenary Celebrations, with its unbeatable WIA Convention held in Canberra.

Now let us listen to Michael speak at the time.

(Audio of Michael)

The Australian Communications and Media Authority have paid their tribute.As follows ...

"The ACMA is saddened to hear of the death of Michael Owen.

He was responsible for significant reform of the WIA, was well known across the ACMA and had worked closely with many staff on a range of issues, including several meetings and discussions in recent weeks.

The ACMA extends its condolences to the amateur community that Michael so tirelessly and effectively represented, as well as to his friends and family."

He also had a close interest in supporting 'Amateur Radio', the magazine. With a view of Michael's contribution is the magazine's editor, Peter Freeman VK3PF.

Michael Owen took a deep interest and showed a true passion toward the WIA journal Amateur Radio magazine and the annual callbook.

His visits to the WIA Publications Community meetings developed into an exchange of ideas that lead to standard of product that was reached, and within budget.

Through his enormous knowledge and wisdom, the members and advertisers truly have an on-time and worthy monthy magazine.

I know his work was appreciated by the Publications Committee, which expresses its deep sadness to all of his family and friends.

Peter Freeman VK3PF, Editor of Amateur Radio magazine.

Many radio societies from around the world have sent messages of condolence ...Here are a few ...

Please extend our deepest condolences to Michael Owen's Family and WIA.73
Cesar Pio Santos HR2PEMCOR IARU R2

Please convey the deepest condolences from the Executive Committee and Members of the Hong Kong Amateur Radio Transmitting Society to family members of Michael J. Owen and the WIA. Wishing him rest in peace.
Sunny Chan VR2XGE
For and on behalf of
Hong Kong Amateur Radio Transmitting Society (HARTS)

Please extend our deepest condolences to his family and WIA.
FROM CRSA and CRAC
de BA1RB / Fan Bin

Please convey our sincere condolences to Michael Owen's family and WIA.
It is a great loss to all amateur radio community.>From KARL

Please relay our Heartfelt condolences to his family.
>From all in Malaysia.Choy 9W2PCK

Through Michael being President, the WIA became highly regarded by government agencies and the ACMA for its professionalism and efficiency.

This was also evident on the Broadband over Powerlines issue, the WIA examination service, the management of callsigns, and many other matters.

Highly respected by all who knew him, both in his professional career as a lawyer and for his work with Amateur Radio, Michael J Owen VK3KI will be very sadly missed.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh ‘and always if the news room is to read your

item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

http://forums.qrz.com/showthread.php?362829-ESPN-SPECIAL-EVENT-THIS-FRIDAY-September-28-20
12&goto=newpost

WE1SPN will be operating a special event station in conjunction with
ESPN's "Safety & Awareness" day. We will be demonstrating our club's
ability to operate in an emergency communications mode by making as many
contacts as possible in this two hour window. We will be on or around
7.195, 14.305 or 21.355 at 1100 - 1300 EDT or 1500 - 1700 Z on sideband. We
will most likely be QRP with a 10 watt Elecraft KX3, but we may also press
our Icom 7000 into service. Antenna will be a Buddipole. Power will be from
battery, and we'll be outside at the fair in our own tent with full audio
for passersby. Please feel free to QSL, we will upload to LoTW after the
event, but we'll also reply to paper QSLs if you include a business size
SASE (US/Canada) or two green stamps with a business size SAE. Sorry, but
we're a budgetless club and have no funds for postage.

==> + ON THE AIR: HAMS FROM FIVE COUNTRIES HELP PUT KOSOVO ON THE AIR
FOR THE FIRST TIME

On September 12, the Autoriteti Rregullativ i Telekomunikacionit
(ART) -- Kosovo's telecommunications regulatory authority -- created
the necessary legal framework for the development of an Amateur Radio
Service in the Republic of Kosovo by approving its Regulation for
Amateur Radio Services. Although not formally assigned a prefix by the
International Telecommunication Union, Kosovo will use the Z6 prefix.
Currently, Kosovo does not count toward the ARRL's DXCC Award, as it
has not been assigned a prefix by the ITU (per DXCC rule II.1.a), nor
```

has it been recognized by the United Nations (per DXCC rule II.1.b).

Nigel Cawthorne, G3TXF, and Bob Barden, MD0CCE/N2BB -- members of the Chiltern DX Club (CDXC) -- were part of a team of operators led by IARU Region 1 President Hans Blondeel Timmerman, PB2T, that activated Z60K, the first Amateur Radio station in the Republic of Kosovo. Along with Cawthorne, Barden and Blondeel Timmerman, the team included the following radio amateurs: Nik Percin, 9A5W; Emil Balen Zdravko, 9A9A; Emir Mahmutovic, 9A6AA; Martti Laine, OH2BH; Jorma Saloranta, OH2KI, and Pekka Holstila, OH2TA. Click here <http://www.arrl.org/news/a-first-hand-look-at-the-z60k-activation-in-kosovo> for Cawthorne's and Barden's account of the Z60K activation.

==> + FORMER AMSAT PRESIDENT BILL TYNAN, W3XO, TO RECEIVE RCA'S GOLDWATER AWARD

The Radio Club of America (RCA) has announced that William A. Tynan, W3XO, of Kerrville, Texas, will receive its 2012 Barry Goldwater Amateur Radio Award. First given in 1994, the Goldwater Award is given to an RCA member who is also a licensed amateur, in recognition of a long record of service to the public through the use of Amateur Radio. Tynan -- an RCA Fellow and an ARRL Life Member -- will receive the award at the RCA's 103rd annual awards banquet, held in New York City on November 16. ARRL Chief Executive Officer David Sumner, K1ZZ, also an RCA Fellow, will be the banquet's keynote speaker. Read more here <http://www.arrl.org/news/former-amsat-president-bill-tynan-w3xo-to-receive-rca-s-goldwater-award>.

==> + SILENT KEY: IARU REGION 3 CHAIRMAN MICHAEL OWEN, VK3KI (SK)

IARU Region 3 Chairman Michael Owen, VK3KI, passed away September 22. He was 75. Owen, who was also President of the Wireless Institute of Australia (WIA) -- that country's IARU Member Society -- was active in the IARU and served as a member of the IARU Observer Team at a number of World Radiocommunication Conferences. He is perhaps best remembered for his work on Article 25 -- a package of revisions to the international Radio Regulations that are specific to the Amateur and Amateur-Satellite Services -- at WRC-03.

Amateur Radio societies around the world have benefited from Owen's enthusiasm and experience; he was passionately involved with the Amateur Radio Service since the 1960s, and served as IARU Vice President from 1989-1999.

"I am very saddened to hear about Michael's sudden passing," IARU President Tim Ellam, VE6SH, told the ARRL. "I was only speaking to him a few days ago and he was very enthused about leading the IARU Region 3 Conference in Ho Chi Minh City in a few weeks. Michael was a good friend and mentor to many of us in IARU. His drafting skills were second to none, and his ability to clearly articulate his position on a number of issues was of immeasurable help to us. The IARU is indebted to his work at WRCs and at many regional Asia Pacific

Telecommunications meetings." Read more here
<http://www.arrl.org/news/iaru-region-3-chairman-michael-owen-vk3ki-sk>.

==> + ARRL EXECUTIVE COMMITTEE TO MEET IN COLORADO THIS WEEKEND

The ARRL Executive Committee will meet Saturday, September 29 in Denver, Colorado. ARRL President Kay Craigie, N3KN, serves as Chairman of the Executive Committee. Five Division Directors who are elected by the ARRL Board of Directors are also on the committee: Midwest Division Director Cliff Ahrens, K0CA; Northwestern Division Director Jim Fenstermaker, K9JF; Central Division Director Dick Isely, W9GIG; Rocky Mountain Division Director Brian Mileshosky, N5ZGT, and West Gulf Division Director David Woolweaver, K5RAV. ARRL Chief Executive Officer David Sumner, K1ZZ, and ARRL First Vice President Rick Roderick, K5UR, are non-voting members of the Executive Committee. ARRL General Counsel Chris Imlay, W3KD, and Second Vice President Bruce Frahm, K0BJ, will also attend the meeting. Click here
<http://www.arrl.org/news/arrl-executive-committee-to-meet-in-colorado>
for the meeting's agenda.

==> FEDERAL EMPLOYEES CAN HELP SUPPORT ARRL THROUGH THE 2012 COMBINED FEDERAL CAMPAIGN

For the past 11 years, the US Office of Personnel Management has designated the ARRL as a participant in the Combined Federal Campaign (CFC). This campaign for federal government civilian employees, US Postal Service workers and members of the military has generated almost $192,000 for ARRL programs since it first became an option for federal employees to donate to the League. The CFC provides an easy way to support the ARRL's effort to represent its members and all radio amateurs. Read more here
<http://www.arrl.org/news/federal-employees-can-help-support-arrl-through-the
-2012-combined-federal-campaign>.

==> + AT THE WORKBENCH: ATTENTION KIT BUILDERS -- THE ARRL WANTS TO HEAR FROM YOU!

The ARRL wants to hear from kit builders about simple, useful, educational and exciting kits. These kits should have a high probability for success and would serve as stepping stones for more advanced projects. We are looking all sorts of kits, but RF detector kits that work in the 380 MHz-2.5 GHz range are of special interest. The kits should also have a "Wow, I built this and it works!" factor. If you know of such a kit, please let us know by filling out a simple form here <http://www.arrl.org/technology> by October 31.

==> SOLAR UPDATE

Tad "We all shine on, like the Moon and the stars and the Sun
<http://www.youtube.com/watch?v=EqP3wT5lpa4>" Cook, K7RA, reports: The average daily sunspot numbers rose this week from 56 to 81.3, while the average daily solar flux increased from 101.4 to 129.7. This increase is expected to continue over the next few days, with the solar flux

peaking at 150 on September 28-29, then going to 145 on September 30-October 1, 140 and 135 on October 2-3, 130 on October 4-5, 125 on October 6-7, 120 on October 8, 115 on October 9-10, 120 on October 11, 115 on October 12-13, and 120 on October 14-15. It is then expected to rise to a peak of 150 on October 20 and 150 again on October 25-26, with the average solar flux on October 21-24 around 141. The average planetary A index declined from 7.4 last week to 4.3 this week. The predicted planetary A index values are 5 on every day through October 2, then 10 on October 3, 8 on October 4-5, and 5 on October 6-11. Look for more on the ARRL website on Friday, September 28. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Lennon's Instant Karma! <http://en.wikipedia.org/wiki/Instant_Karma!>

==> ARRL HQ SEEKS APPLICANTS FOR QST TECHNICAL EDITOR

The League is currently looking to fill the position of QST Technical Editor at ARRL Headquarters in Newington. Connecticut residency or the ability to relocate to Connecticut is required. The QST Technical Editor will provide leadership to the technical Amateur Radio community by developing and promulgating a vision of the state of the Amateur Radio art through the pages of QST.

Qualifications:

- Broad knowledge of and experience with Amateur Radio and electronics.
- Broad knowledge of and experience with the design and construction of Amateur Radio equipment, antennas and accessories.
- Broad knowledge of and experience with Amateur Radio software.
- A bachelor or graduate college degree, preferably in a technical field. Exceptional related work history can be substituted for a degree.
- A minimum of three years of writing or editing experience.
- Demonstrated ability to work effectively and productively with a variety of people.
- Proficiency with Microsoft Office, especially Word and Excel.
- An Amateur Extra class license.

Click here <http://www.arrl.org/employment-opportunities> for more information and an application. To apply, please send your cover letter and resume via e-mail <mlevesque@arrl.org?subject=Technical20Position>, or complete the application, print it out and mail it with your resume and cover letter to Monique Levesque, ARRL, 225 Main St, Newington, CT 06111. You can also fax your application, cover letter and resume to 860-594-0298. Please include your salary history and salary requirements. The ARRL is an equal opportunity employer.

==> + SILENT KEY:ETHIOPIAN AMATEUR RADIO SOCIETY CHAIRMAN SID T. MAY, ET3SID (SK)

Ethiopian Amateur Radio Society (EARS) Chairman Sid T. May, ET3SID/G4CTQ/AB3OZ, passed away September 25. In 1993, May established ET3AA, the first Amateur Radio club in Ethiopia. According to Hailemelekot Negussie, AB3OX, of EARS (Ethiopia's IARU Member Society), May taught Amateur Radio licensing classes in Ethiopia for more than 15 years. An accredited ARRL Volunteer Examiner, May administered the FCC Amateur Radio license exam to prospective Ethiopian hams. He took part in administering an FCC exam session in December 2011 where more than 50 Ethiopians received US call signs; May gave his last exam session on September 10, with 18 sitting for the exam. "Sid was a teacher, a mentor and a father to all of us at ET3AA," Negussie explained. "We feel very saddened about the news, and extend our condolences to his family and wish for his soul to rest in peace. Sid is survived by hundreds of ambitious radio hams and engineers who will forever be inspired by his humbleness and vision." Read more here <http://www.arrl.org/news/ethiopian-amateur-radio-society-chairman-sid-t-may-et3sid-sk>.

==> SILENT KEY: EVERETT GRACEY, WA6CBA (SK)

Everett Gracey, WA6CBA, of Grass Valley, California, passed away on August 26. He was 90. In 1979, Gracey -- along with Ken, K6HCP, and Jacqui Holladay -- founded Mirage Communications in Gilroy, California. After selling Mirage, Gracey founded RF Concepts in 1986. Both Mirage and RF Concepts sold and manufactured VHF and UHF amplifiers. After Gracey sold RF Concepts, he continued to lead the company's marketing team for the next six years. In August 2000, Gracey joined forces with LDG Electronics as its dealer representative and marking consultant. Gracey was also responsible for bringing Alinco Electronics -- a radio manufacturer in Osaka, Japan -- into the USA marketplace. Read more here <http://www.arrl.org/news/everett-gracey-wa6cba-sk>.

==> + LAST MAN STANDING PRODUCER CANCELS SPECIAL EVENT

Due to concerns over perceived violations of Section 97.113(a)(3) <http://www.gpo.gov/fdsys/pkg/CFR-2011-title47-vol5/pdf/CFR-2011-title47-vol5-sec97-113.pdf>,
Last Man Standing Producer John Amodeo, NN6JA, has cancelled the Last Man Standing Special Event Station planned for October 28 <http://www.arrl.org/news/em-last-man-standing-em-plans-special-event-station>.
Amodeo had applied for and received a 1�1 call sign -- K6T -- to use for the event that would have taken place on the show's set. Last Man Standing stars Tim Allen as Mike Baxter, KA0XTT. "Although the intent of the Special Event Station was to celebrate and promote ham radio, it might be interpreted as promotion for the show and that cannot be permitted," Amodeo explained. "While we are disappointed with the cancelation of what would have been a fun, one-of-a-kind event, I know that as a licensed amateur and producer of broadcast programs, compliance with the FCC rules takes precedence. We will find other fun ways to use our station and promote ham radio soon. Mike Baxter's fictitious station, KA0XTT, will continue to appear on the set of Last

Man Standing, but the radios will remain silent." Last Man Standing
<http://beta.abc.go.com/shows/last-man-standing> begins its second
season on Friday, November 2 at 8/7 Central.

==> THIS WEEK IN RADIOSPORT

This week:

- September 29 -- Microwave Fall Sprint (local time)
- September 29-30 -- Texas QSO Party; CQ WW RTTY Contest
- October 2 -- ARS Spartan Sprint
- October 3 -- German Telegraphy Contest
- October 3 -- 432 MHz Fall Sprint (local time)

Next week:

- October 5 -- NCCC Sprint
- October 5-7 -- YLRL DX/NA YL Anniversary Contest
- October 6 -- TARA PSK Rumble Contest; EU Autumn Sprint (SSB)
- October 6-7 -- ARRL EME Contest <http://www.arrl.org/eme-contest>;
California QSO Party; EPC Russia DX Contest; Oceania DX Contest (SSB);
WAB HF Phone Contest
- October 7 -- UBA ON Contest (SSB)
- October 10 -- 10-10 International 10-10 Day Sprint; NAQCC Straight
Key/Bug Sprint
- October 10-11 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 28-29 -- SEDCO/W4DXCC VIII Convention

**

HAM RADIO IN SPACE: DEDICATED CUBESAT DOWNLINKS FOR DISCUSSION AT WRC-18

IARU Secretary Rod Stafford, W6ROD, reports that the International Amateur Radio Union's Administrative Council will meet in the next 45 days to address the agenda items for the 2015 World Radiocommunication Conference. Planning for the dedicated spectrum for university research cubesats will begin at that gathering, but the actual allocation of frequencies may not occur until the 2018 World Radiocommunication Conference.

In an article posted on the ARRL web, Stafford noted, "A lot of radio amateurs are aware of the increasing use of amateur spectrum by small satellites, mainly by universities. It is becoming an increasingly difficult situation to accommodate the number of small, non-commercial satellites within the amateur bands. These education-based satellites do not really fit within the definition of the Amateur Radio Service, but have been accommodated there.

According to W6ROD, these small birds are categorized as nano-satellites weighing between 1 to 10 kilogram and pico-satellites weighing less than 1 kilogram. The International Telecommunications Union is trying to deal with this issue in an orderly manner and a `preliminary' WRC-18 agenda item is to consider whether these satellite operations can be accommodated in an already crowded radio spectrum is being researched.

Stafford concludes by noting that as these issues develop, the IARU will keep its Member-Societies, such as the ARRL, aware of developments with an eye to building the best strategy to deal with those agenda

items in a way that is most favorable to the Amateur Radio Service.

You can read the full article, including many other IARU agenda items at tinyurl.com/looking-at-tinysats. (ANS, ARRL)

RESCUE RADIO: UK PARISHES ABANDONING EMCOMM SYSTEM FOR CELLPHONES AND RAYNET

An emergency radio system that has provided a lifeline to Heathfield in the United Kingdom for 25 years is to be scrapped and to be replaced by cellular telephones. But users of the ageing service have criticized the decision to rely on patchy mobile phone service in an emergency. Bill Pasternak, WA6ITF, has the details:

--

That's right Jim. It is supposed to go away and here's why.

The radio system was created back in 1987 after what has been called the Great Storm. Six parishes still have the gear in service to use emergency situations.

But the district council now wants to abolish them because they are too expensive to maintain. The council pays 3,600 British Pounds a year to maintain the radio gear and a repeater that they are used through.

Parish councilor Bob Wood who has one of the old radios. He says that while thee gear my be old and possibly inadequate for what they want, that doing away with them is silly. He notes that mobile phone networks can only hold a certain number of calls at a time if an emergency happens.

But according to Jim van den Bos, of the District Council, the Wealden emergency radio network radio equipment is now old, less reliable and more difficult to repair. He says that last year a survey of parishes was conducted asking which had been active in the network over the past three years. Out of the 15 who took part, only seven were in favor of continuing.

So what will happen when the old emergency radio system falls silent? According to van den Bos it will likely be ham radio that will be used to augment the cellular network. In a statement he said that the council supports local members of a network of amateur radio users called RAYNET who are willing to respond in an emergency.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

RAYNET in the UK would be quite similar to a combined RACES and ARES here in the United States. (Sussix Courier, Northcliff Media, Southgate)

**

RADIO LAW: OFCOM LIFTS TEMPORARY SPECTRUM RESTRICTIONS ON UHF AND SHF BANDS USED FOR OLYMPICS

UK telecommunications regulator Ofcom has announced that as of midnight on September 23rd, temporary operating restrictions on parts of the 70 centimeter and several microwave bands have come to an end. The restrictions on spectrum usage by British radio amateurs had been put in place to permit use of several spectral parcels in relation to the now conceded 2012 London Summer Olympic and Paralympic Games. (RSGB)

**

BREAKING DX NEWS: KOSOVO NOW OFFICIALLY ON THE AIR

The Republic of Kosovo is now officially on the air. Station Z-60-K near Pristina commenced amateur radio operation shortly after 1700 UTC on September 17th. The call had been issued to the club station of the Amateur Radio Association of Kosovo. For this operation QSL via G3TXF or using ClubLog.

It has to be noted that as Kosovo is not yet a member of the United Nations nor does it have an assigned callsign block allocated by the International Telecommunications Union, it does not meet the established requirements of the ARRL's DXCC program at this time. However CQ has recognized Kosovo as a separate entity for its award and contest programs since 2007. More is on line at www.art-ks.org (DXNL, CQ Newsroom)

DX SPECIAL: AZORES 9 ISLANDS HUNT SEPT 29 - 30

While short notice, all nine of the Azores islands will be operational from 12:00 UTC on Saturday, September 29th through 12:00 UTC on Sunday September 30th. This a part of the Azores 9 Islands Hunt operating event.

Callsigns to be used are CU1ARM from Santa Maria; CU2ARA from San Miguel; CU3URA on Terceira; CU4ARG from Graciosa; CU5AM on Sao Jorge; CU6GRP on Pico; CU7CRA from Faial; CU8ARF on Flores and CU9AC operating on Corvo.

Operations on CW will be from 7.000 to 7.015, 14.050 to 14.065 and 18.080 to 18.090 MHz. SSB phone operations will be found on 7.175 to 7.195, 14.250 to 14. 275 and 18.120 through 18.135 MHz.

But that's not all. Those holding a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores. Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery.

All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via CU2CE. More information on this activation and trip give-away is on-line at azores-islands-hunt.com. And we will have more DX related news at the end of this weeks Amateur Radio Newsline report. (OH2BH)

ENFORCEMENT: YET ANOTHER FLORIDA UNLICENSED BROADCASTER BUSTED BY THE FCC

>From the seemingly never ending Florida unlicensed radio station scene comes word that the FCC's Miami Office has issued yet another Notice of Apparent Liability to Monetary Forfeiture. This time the recipient of a proposed $10,000 fine is Burt Byng of Miami who the regulatory agency claims operating an unlicensed radio transmitter on the frequency 107.1 MHz. Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

By way of background, this past February 9th agents from the Enforcement Bureau's Miami Office T-hunted the source of a signal on the 107.1 MHz to a transmitting antenna mounted on the roof of a commercial property in Miami. The agents determined that the signals on 107.1 MHz exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. While monitoring the transmission, the agents also heard the station identify itself on the air as "WEROC Radio." Commission records showed that no authorization was issued to Burt Byng or to anyone else for operation of an FM broadcast station at or near this address.

On the same date, agents from the Miami Office, accompanied by the property owner, inspected the unlicensed station's antenna and transmitter located on the rooftop of the commercial building. According to information provided by the property owner, a company called J & B Enterprise US, Inc. was the tenant of the particular area where the transmitting equipment was located.

The property owner provided a copy of Burt Byng's driver's license and identified him as the individual who rented the rooftop space. According to Florida records, Byng is the President of an inactive business named "J & B Enterprises US, Inc."

While researching the matter the agents also discovered that Mr. Byng registered the domain name, ww.werocradio.com, a webpage for "WEROC

Radio." The agents also noticed that the phone number listed in the domain registration was the same phone number listed on in the information provided by the property owner.

In issuing the $10,000 NAL the FCC says that it finds that the record evidence in this case is sufficient to establish that Burt Byng violated Section 301 of the Act by operating radio transmission equipment without the required Commission authorization. As such he is liable for the proposed fine.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles

--.

As is usual, Byng was given the customary 30 days to pay the $10,000 NAL or to file an appeal. (FCC)

**

RADIO LAW: FCC EXTENDS COMMENTARY DEADLINE ON MD DOCKET 12-201

The public as well as concerned industries have been given more time to tell the FCC what they think of the agency's process for collecting regulatory fees as outlined in MD Docket 12-201. Originally, comments on commission proposals to reform the way in which it evaluates the regulatory fees for the industries it regulates were due by September 17th. While that date has passed, the agency has announced that the new commentary cutoff date is October 9th, with reply comments due by October 23rd.

The FCC also says that it would also like to receive comments on a recent report from the Government Accountability Office. That report is titled "The Federal Communications Commission Regulatory Fee Process Needs to Be Updated." In that document the Accountability Office observes, among other things, that the commission's regulatory fee, Notice of Proposed Rulemaking proposes some fundamental changes to FCC's regulatory fee program that relate to many of the concerns raised in its report. (FCC, RW)

**

HAM HAPPENINGS: LAST MAN STANDING K6T SPECIAL EVENT CANCELLED

The highly publicized Last Man Standing K6T operating event will not take place. This according to the television shows Producer John Amodeo, NN6JA.

The thank you to the ham radio community had been slated to happen on Sunday, October 28th. According to Amodeo the decision to cancel was based on concerns about a possible violation of FCC Regulation 97.113(a)(3).

For those not aware, this rule bars any communications using ham radio in which the station licensee or control operator has a pecuniary interest. It also precludes any communications on behalf of an employer.

In making the announcement Amodeo notes that while everyone involved with the planned operation are very disappointed with the cancellation of what would have a fun, one of a kind event, that as a licensed radio amateur and producer of broadcast programs, compliance with FCC rules must take precedence.

Special event station K6T would have worked hams from around world on HF, VHF, UHF, D-STAR and IRLP. While that's not going to take place the good news is that the ham station that is a part of the set of Last Man Standing will remain and continue to be a part of the shows ongoing plot line. (NN6JA)

**

PUBLIC SERVICE: HAM RADIO AT THE USAF MARATHON

David Crawford, KF4KWW, reports that over fifty amateur radio operators from all over the greater Dayton, Ohio. area and coming from as far away as Detroit, Michigan, recently converged on Wright Patterson Air Force Base. This, support the 2012 United States Air Force Marathon held on Saturday, September 15th.

Ham radio operators provided emergency and logistic communications between the race director and his staff. They also assisted with communications to the hydration stations positioned throughout the course.

The United States Air Force Marathon is described as a world class event with over 15000 participants registered and another estimated 15000 volunteers and spectators in attendance. Amateur radio operators were indispensable in communicating information on runner's locations and status, weather heat indexes settings, severe weather notifications and logistic issues.

Robert Aguiar is the marathon Race Director. He says that the senior base leaders of the event have come rely on the communication skills of the amateur radios operators and use them a as a vital resource. He adds that this race would be extremely difficult if not impossible to accomplish without their support and dedication. More about this event is on-line at www.usafmarathon.com. (KF4KWW)

**

HAM HAPPENINGS: AMATEUR RADIO TO ASSIST AT VK NATIONAL FUN FLIGHT DAY 2012

Amateur Radio will once again be a part of Australia's National Fun Flight Day this coming November 4th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has the details:

--

National Fun Flight Day is an event staged by Australian flying clubs to provide pleasure flights for children and families touched by adversity. Amateur radio began its association with this event back in 2011. Thats when the Victoria-based Midland Amateur Radio Club and its station VK3CMZ were invited to participate in the National FunFlight Day by the Bendigo Flying Club. The Midland Club was more than happy to oblige and an operating High Frequency, VHF and UHF station was set up at the event site. A handheld in a plane also provided communication back to children on the ground.

The operation was deemed a major success and the Midland Committee saw it as a worthwhile national amateur radio event. So it then approached the FunFlight manager regarding other amateur clubs' participation. The result of the meeting was very positive and contact information has now been provided to participating flying clubs so that they can contact their nearest amateur radio club.

For the amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

More event information on this fun in the sky event down-under is on-line at www.funflight.org. (Midland Amateur Radio Club)

THE CHANGING OF THE GUARD: WIA PRESIDENT MICHAEL OWEN, VK3SI - S.K.

The changing of the guard in our service continues. This, with the sad news that Michael Owen, VK3KI, the Chairman of Region III of the International Amateur Radio Union and President of the Wireless Institute of Australia has became a Silent Key.

Owen's sudden passing came after suffering what is only being described as a medical condition at his home on Saturday, September the 22nd.

During his many volunteer years, Owen, who was age 75 at the time of his passing, participated in many IARU committees and had been a member of the IARU Observer Team at a number of World Radiocommunication Conferences. He served as IARU Vice President from 1989 to 1999 and is perhaps best remembered for his work on a package of revisions to the international Radio Regulations. These were specific to the Amateur Radio and Amateur Satellite services and presented at the 2003 World Radiocommunications Conference.

Michael Owen, VK3KI, is survived by his wife Nan, and his two daughters. His funeral was to be held on Friday, September 28th at St Andrews Anglican Church in Brighton. Australia. Condolence messages can be sent via the Wireless Institute of Australia by e-mail to condolences (at) WIA (dot) org (dot) au or direct to the surviving family members at PO Box 2042, Bayswater, Victoria 3153 Australia. (WIA, VK6POP)

WORLDBEAT: NEW FOCUS FOR RADIO NETHERLANDS WORLDWIDE

The Board of Supervisors of Radio Netherlands Worldwide has appointed William Valkenburg as editor-in-chief. This, effective January 1st of 2013.

According to the announcement, Valkenburg will set out the new course for the organization with the recently appointed director general Robert Zaal. The broadcaster will focus on free speech in countries where press freedom is limited and Valkenburg will take responsibility

for journalism within the organization.

As of 2013, Radio Netherlands Worldwide's main focus will be on Africa, and the Arab World, as well as countries such as China, Cuba and Venezuela. (RW)

WORLDBEAT: FRENCH POLYNESIA GETS BROADBAND ACCESS

Another remote area of the world is now on-line. Amateur Radio Newsline's Skeeter Nash, N5ASH, has the details:

--

High speed Internet access has come to the islands of the South Pacific. This with word that OmniAccess has expanded its network coverage in the remote French Polynesian islands.

The news follows the company's investment into the opening of a high-capacity network on the Intelsat 18 satellite that first became operational in November 2011. This provides the capacity to enable enhanced broadband internet coverage and network services via Ku-band coverage platform to that isolated part of the world.

As a result, for the first time private yachts, charter yachts and commercial vessels cruising in the region can now benefit from high quality uninterrupted broadband connectivity via the new high speed service.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH, reporting.

--

More on this new service can be found by going to www.noonsite.com and using the search engine at that website. (noonsite.com via K4CPX)

DX

In DX, G0VJG will be operational stroke 3A from Monaco between October 1st and the 5th. His activity will be on the High Frequency bands using 100 watts on SSB only. QSL via G4DFI.

A multi-national team is on the air from Conway Reef in the South Pacific Ocean. They plan to be there through October 5th using the callsign will be 3D2C. Their QSL manager is YT1AD.

DL7VSN will be active from Tanzania through October 13th. His operation will be from two locations using the 5H1HS from Zanzibar Island and 5H1HS/3 from Lazy Lagoon Island. Activity is expected on 160 through 10 meters using mainly CW and RTTY. QSL via his home callsign. More about his operation is on-line at Visit his Web page at www.qsl.net/dl7vsn

Lastly word that DJ7RJ who was expected to be active stroke FR from Reunion Island between September 26th and October 21st, has announced he had to cancel his trip. No reason for the cancellation was given. (Above from various DX news sources)

**

THAT FINAL ITEM:

And finally this week, hidden transmitter hunters held their world championships this month and hams from the USA came home with more medals than ever. Amateur Radio Newsline's Joe Moell, K0OV, the details.

--

Every two years, on-foot hidden transmitter hunters get together to see who is best in the world. The Sixteenth World Championships of Amateur Radio Direction Finding, or ARDF, took place at a ski resort in the mountains of central Serbia. In these big forests, about 330 foxhunters from 33 countries searched for transmitters on two meters and 80 meters using direction finding gear, maps, and compasses, but no GPS. USA was represented by nine men and four women from six states. They ranged in age from 27 to 71.

In previous world championships, USA has won no more than two medals, and no golds. But this year, the team members packed thirteen medals into their suitcases, including four golds.

Standing on the medal podium and hearing the Star-Spangled Banner the most times was Bob Cooley KF6VSE of Pleasanton, California. He won two

golds in the division for men over age 70 in the World Cup competition for individuals and another gold for his two-meter run during the main ARDF competitions. Also winning a playing of our national anthem was Vadim Afonkin KB1RLI of Newton, Massachusetts, who was this year's Team Captain. His gold medal was in the 80-meter ARDF competition.

Other Team USA members on the podium included Jay Hennigan WB6RDV of Goleta, California, who was a silver medalist on 80 meters. Winning bronze in their divisions on that band were Alla Mezhevaya of Loves Park, Illinois, Ruth Bromer WB4QZG of Raleigh, North Carolina and Karla Leach KC7BLA of Bozeman, Montana.

Team USA members earned their right to go to Serbia by medaling in the USA ARDF Championships this June at Mt. Laguna, California and in earlier US championships.

You can read more about Team USA and the ARDF World Championships at www.homingin.com. There are plenty of photos, plus links to the complete results. That's homingin, as one word, homingin.com.

>From southern California, where ARDF activities take place all year long, this is Joe Moell, K0OV, for the Amateur Radio Newsline.

--

Again, more information is on-line at www.homingin.com. And "homingin" is spelled as one word. (K0OV)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.

And a reminder to those of you who still receive these newscasts over our 661-296-2407 dial in line rater than downloading the MP3 file from our website. Of late we have noticed a major decline in the number of those calling into it and as such we are giving consideration to discontinuing it by years end. But before we do, we want to know how many people are actually using it. If you are one of those who call in each week on the phone, please send us a note telling us who you are and the reason you are using telephone access rather than simply downloading the newscast from the Internet.

Our address is the Amateur Radio Newsline, 28197 Robin Avenue, Saugus California, 91350. Or, as we said, you can e-mail us at newsline (at) arnewsline (dot) org. We look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Jim Damron, N8TMW, saying 73 from Charleston, West Virginia. And, as always, we thank you for listening.

QRZ Expands Capacity with New Cloud Server

Posted: 27 Sep 2012 05:59 PM PDT
http://forums.qrz.com/showthread.php?362956-QRZ-Expands-Capacity-with-New-Cloud-Server&goto=newpost

This evening we're happy to report that we've added an additional server to the QRZ system and moved a few things around to improve performance for all users. Our servers are hosted in the Amazon Web Services cloud and this week we purchased an additional server instance and added it to our mix.

Here is a summary of the changes:

- The previous system consisted of 1 large server and 1 x-large server.

- The QRZ Forums, previously on the 'large' server, are now hosted by the new x-large server

- The QRZ XML service, responsible for Logbook Data Subscriptions, is now on its own dedicated machine.

- The QRZ Callsign server (callsign pages), is now on a dedicated, x-large server.

- All of our servers were upgraded to the latest Ubuntu Linux Edition 12.04

- We finally located a software bug that was needlessly tying up the server CPU

So far the performance looks really great on all parts of the system. The callsign server, which was routinely at 90% busy or more, now loafs along at around 50%. As always however, the change-over was complicated because many things had to be reconfigured and there were quite a few reboots needed to make sure we had it right.

There were also some minor hiccups which were embarrassing but it looks like they're all behind us now. For a short period, we tried out a new load balancing proxy server and it caused our callsign (web) server to loose all incoming IP addresses. When this happened, user logins were temporarily scrambled and it appeared that folks were being logged into other people's accounts. Our separate secure server, which handles accounting, finance, sales, subscriptions, etc., was not involved and no personal information was ever at risk. The whole episode lasted about 10 minutes and was promptly corrected.

Earlier today, we had a problem where people could not login. This was a configuration item that was easy to fix, but, we didn't catch it before some 180 support tickets came onto our desk. We answered each one individually, and that took a while.

Again, we're sorry that there were hiccups, but at the same time we're very happy that the system is now in excellent health and ready for action. Thank you all for your patience and support.

73, AA7BQ

Man's Ham Hobby Becomes a Business:

Posted: 27 Sep 2012 07:30 PM PDT
http://www.eham.net/articles/29037

MANSFIELD -- Byron Nelson has transformed his hobby of being an amateur radio operator into a business selling and repairing ham radios. Nelson, whose wife Pamela Nelson owns Nelson Enterprises at 791 Springmill St., got his start with ham radios while serving in the U.S. Army. He sent a message home to his wife in Mansfield during the Vietnam War, letting her know he was OK. A career Army man, he retired as a mechanic with more than 30 years of service. The new shop, which celebrated its grand opening Sept. 15, sells ham radio equipment and citizen band radio equipment.

//
Solar Maximum? Oh, You Just Missed It:

Posted: 27 Sep 2012 07:29 PM PDT
http://www.eham.net/articles/29036

WAITING for solar fireworks to reach a grand finale next year? Um, sorry, looks like you already missed them. Structures in the sun's corona indicate that the peak in our star's latest cycle of activity has been and gone, at least in its northern hemisphere. The southern hemisphere, meanwhile, is on a sluggish rise to solar maximum and may not hit its peak until 2014. This bizarre asymmetry strengthens a theory that has been bubbling among sun watchers for the past few years: our star is headed for hibernation. Having the sun's outbursts turned off for a while would provide a better baseline for studying how they influence Earth's climate. Observations of magnetic footprints called sunspots revealed in the 1800s that the sun moves through a roughly 11-year cycle of activity. Around a solar maximum, the star ramps up production of sunspots, flares and ejections of plasma. During a solar minimum, things quieten down.

//
Morse Code on Earth:

Posted: 27 Sep 2012 07:20 PM PDT
http://www.eham.net/articles/29035

My last post described the Morse code being laid down on Mars by the Curiosity Rover's tire treads. I got a couple of messages on the theme of "Morse code? People still use that?" Many commercial and military

services have abandoned Morse in favor of any one of hundreds of digital modes, delivered via HF, VHF, UHF, or satellite. Even amateur radio licensing no longer requires a test in Morse code. So why is it that on certain weekends of the year, the HF amateur bands are jam-packed with tens of thousands of hams blasting their CW signals around the world? (see notes below) I suppose there are a few reasons. First, any active ham can tell you that CW, being a narrow-band mode, can "get through" in marginal conditions when wider-bandwidth modes (like voice) cannot. There are certainly newer digital modes using various flavors of FSK and PSK, some with error-correction built in, but these require some sophisticated electronics to generate and decode, and at the end of the day, they generally provide lower throughput than Mr. Morse's code. You can generate Morse code on a radio by touching two wires together, and decode it by ear. Pretty simple. I know several hams that were licensed in the period after the Morse test was required, and they discovered quickly that making long-distance contacts was a lot harder on voice. They chose to learn the code and started using it.

Amateur Radio Newsline□ Report 1833 □ September 28 2012

Amateur Radio Newsline report number 1833 with a release date of September 28 2012 to follow in 5-4-3-2-1.

The following is a QST. Dedicated Cubesat downlinks to be discussed at WRC 2018; Ofcom lifts spectrum restrictions imposed because of London Summer Olympics; Kosovo takes to the ham radio airwaves and the results of the World Radio Direction Finding competition. Find out the details are on Amateur Radio Newsline□ report number 1833 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: DEDICATED CUBESAT DOWNLINKS FOR DISCUSSION AT WRC-18

IARU Secretary Rod Stafford, W6ROD, reports that the International Amateur Radio Union☐s Administrative Council will meet in the next 45 days to address the agenda items for the 2015 World Radiocommunication Conference. Planning for the dedicated spectrum for university research cubesats will begin at that gathering, but the actual allocation of frequencies may not occur until the 2018 World Radiocommunication Conference.

In an article posted on the ARRL web, Stafford noted, ☐A lot of radio amateurs are aware of the increasing use of amateur spectrum by small satellites, mainly by universities. It is becoming an increasingly difficult situation to accommodate the number of small, non-commercial satellites within the amateur bands. These education-based satellites do not really fit within the definition of the Amateur Radio Service, but have been accommodated there.

According to W6ROD, these small birds are categorized as nano-satellites weighing between 1 to 10 kilogram and pico-satellites weighing less than 1 kilogram. The International Telecommunications Union is trying to deal with this issue in an orderly manner and a ☐preliminary☐ WRC-18 agenda item is to consider whether these satellite operations can be accommodated in an already crowded radio spectrum is being researched.

Stafford concludes by noting that as these issues develop, the IARU will keep its Member-Societies, such as the ARRL, aware of developments with an eye to building the best strategy to deal with those agenda items in a way that is most favorable to the Amateur Radio Service.

You can read the full article, including many other IARU agenda items at tinyurl.com/looking-at-tinysats. (ANS, ARRL)

RESCUE RADIO: UK PARISHES ABANDONING EMCOMM SYSTEM FOR CELLPHONES AND RAYNET

An emergency radio system that has provided a lifeline to Heathfield in the United Kingdom for 25 years is to be scrapped and to be replaced by cellular telephones. But users of the ageing service have criticized the decision to rely on patchy mobile phone service in an emergency. Bill Pasternak, WA6ITF, has the details:

--

That☐s right Jim. It is supposed to go away and here☐s why.

The radio system was created back in 1987 after what has been called the Great Storm. Six parishes still have the gear in service to use emergency situations.

But the district council now wants to abolish them because they are too expensive to maintain. The council pays 3,600 British Pounds a year to

maintain the radio gear and a repeater that they are used through.

Parish councilor Bob Wood who has one of the old radios. He says that while thee gear my be old and possibly inadequate for what they want, that doing away with them is silly. He notes that mobile phone networks can only hold a certain number of calls at a time if an emergency happens.

But according to Jim van den Bos, of the District Council, the Wealden emergency radio network radio equipment is now old, less reliable and more difficult to repair. He says that last year a survey of parishes was conducted asking which had been active in the network over the past three years. Out of the 15 who took part, only seven were in favor of continuing.

So what will happen when the old emergency radio system falls silent? According to van den Bos it will likely be ham radio that will be used to augment the cellular network. In a statement he said that the council supports local members of a network of amateur radio users called RAYNET who are willing to respond in an emergency.

For the Amateur Radio Newsline, I□m Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

RAYNET in the UK would be quite similar to a combined RACES and ARES here in the United States. (Sussix Courier, Northcliff Media, Southgate)

**

RADIO LAW: OFCOM LIFTS TEMPORARY SPECTRUM RESTRICTIONS ON UHF AND SHF BANDS USED FOR OLYMPICS

UK telecommunications regulator Ofcom has announced that as of midnight on September 23rd, temporary operating restrictions on parts of the 70 centimeter and several microwave bands have come to an end. The restrictions on spectrum usage by British radio amateurs had been put in place to permit use of several spectral parcels in relation to the now conceded 2012 London Summer Olympic and Paralympic Games. (RSGB)

**

BREAKING DX NEWS: KOSOVO NOW OFFICIALLY ON THE AIR

The Republic of Kosovo is now officially on the air. Station Z-60-K near Pristina commenced amateur radio operation shortly after 1700 UTC on September 17th. The call had been issued to the club station of the Amateur Radio Association of Kosovo. For this operation QSL via G3TXF or using ClubLog.

It has to be noted that as Kosovo is not yet a member of the United Nations nor does it have an assigned callsign block allocated by the International Telecommunications Union, it does not meet the established requirements of the ARRL□s DXCC program at this time. However CQ has recognized Kosovo as a separate entity for its award and contest programs

since 2007. More is on line at www.art-ks.org (DXNL, CQ Newsroom)

DX SPECIAL: AZORES 9 ISLANDS HUNT SEPT 29 - 30

While short notice, all nine of the Azores islands will be operational from 12:00 UTC on Saturday, September 29th through 12:00 UTC on Sunday September 30th. This a part of the Azores 9 Islands Hunt operating event.

Callsigns to be used are CU1ARM from Santa Maria; CU2ARA from San Miguel; CU3URA on Terceira; CU4ARG from Graciosa; CU5AM on Sao Jorge; CU6GRP on Pico; CU7CRA from Faial; CU8ARF on Flores and CU9AC operating on Corvo.

Operations on CW will be from 7.000 to 7.015, 14.050 to 14.065 and 18.080 to 18.090 MHz. SSB phone operations will be found on 7.175 to 7.195, 14.250 to 14. 275 and 18.120 through 18.135 MHz.

But that□s not all. Those holding a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores. Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery.

All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via CU2CE. More information on this activation and trip give-away is on-line at azores-islands-hunt.com. And we will have more DX related news at the end of this weeks Amateur Radio Newsline report. (OH2BH)

ENFORCEMENT: YET ANOTHER FLORIDA UNLICENSED BROADCASTER BUSTED BY THE FCC

From the seemingly never ending Florida unlicensed radio station scene comes word that the FCC□s Miami Office has issued yet another Notice of Apparent Liability to Monetary Forfeiture. This time the recipient of a proposed $10,000 fine is Burt Byng of Miami who the regulatory agency claims operating an unlicensed radio transmitter on the frequency 107.1 MHz. Amateur Radio Newsline□s Bruce Tennant, K6PZW, reports:

--

By way of background, this past February 9th agents from the Enforcement Bureau□s Miami Office T-hunted the source of a signal on the 107.1 MHz to a transmitting antenna mounted on the roof of a commercial property in

Miami. The agents determined that the signals on 107.1 MHz exceeded the limits for operation under Part 15 of the Commission☐s rules and therefore required a license. While monitoring the transmission, the agents also heard the station identify itself on the air as ☐WEROC Radio.☐ Commission records showed that no authorization was issued to Burt Byng or to anyone else for operation of an FM broadcast station at or near this address.

On the same date, agents from the Miami Office, accompanied by the property owner, inspected the unlicensed station☐s antenna and transmitter located on the rooftop of the commercial building. According to information provided by the property owner, a company called J & B Enterprise US, Inc. was the tenant of the particular area where the transmitting equipment was located.

The property owner provided a copy of Burt Byng☐s driver☐s license and identified him as the individual who rented the rooftop space. According to Florida records, Byng is the President of an inactive business named ☐J & B Enterprises US, Inc.☐

While researching the matter the agents also discovered that Mr. Byng registered the domain name, ww.werocradio.com, a webpage for ☐WEROC Radio.☐ The agents also noticed that the phone number listed in the domain registration was the same phone number listed on in the information provided by the property owner.

In issuing the $10,000 NAL the FCC says that it finds that the record evidence in this case is sufficient to establish that Burt Byng violated Section 301 of the Act by operating radio transmission equipment without the required Commission authorization. As such he is liable for the proposed fine.

For the Amateur Radio Newsline, I☐m Bruce Tennant, K6PZW, in Los Angeles

--.

As is usual, Byng was given the customary 30 days to pay the $10,000 NAL or to file an appeal. (FCC)

**

RADIO LAW: FCC EXTENDS COMMENTARY DEADLINE ON MD DOCKET 12-201

The public as well as concerned industries have been given more time to tell the FCC what they think of the agency☐s process for collecting regulatory fees as outlined in MD Docket 12-201. Originally, comments on commission proposals to reform the way in which it evaluates the regulatory fees for the industries it regulates were due by September 17th. While that date has passed, the agency has announced that the new commentary cutoff date is October 9th, with reply comments due by October 23rd.

The FCC also says that it would also like to receive comments on a recent report from the Government Accountability Office. That report is titled ☐The Federal Communications Commission Regulatory Fee Process Needs to Be

Updated.☐ In that document the Accountability Office observes, among other things, that the commission☐s regulatory fee, Notice of Proposed Rulemaking proposes some fundamental changes to FCC☐s regulatory fee program that relate to many of the concerns raised in its report. (FCC, RW)

**

HAM HAPPENINGS: LAST MAN STANDING K6T SPECIAL EVENT CANCELLED

The highly publicized Last Man Standing K6T operating event will not take place. This according to the television shows Producer John Amodeo, NN6JA.

The thank you to the ham radio community had been slated to happen on Sunday, October 28th. According to Amodeo the decision to cancel was based on concerns about a possible violation of FCC Regulation 97.113(a)(3).

For those not aware, this rule bars any communications using ham radio in which the station licensee or control operator has a pecuniary interest. It also precludes any communications on behalf of an employer.

In making the announcement Amodeo notes that while everyone involved with the planned operation are very disappointed with the cancellation of what would have a fun, one of a kind event, that as a licensed radio amateur and producer of broadcast programs, compliance with FCC rules must take precedence.

Special event station K6T would have worked hams from around world on HF, VHF, UHF, D-STAR and IRLP. While that☐s not going to take place the good news is that the ham station that is a part of the set of Last Man Standing will remain and continue to be a part of the shows ongoing plot line. (NN6JA)

**

PUBLIC SERVICE: HAM RADIO AT THE USAF MARATHON

David Crawford, KF4KWW, reports that over fifty amateur radio operators from all over the greater Dayton, Ohio. area and coming from as far away as Detroit, Michigan, recently converged on Wright Patterson Air Force Base. This, support the 2012 United States Air Force Marathon held on Saturday, September 15th.

Ham radio operators provided emergency and logistic communications between the race director and his staff. They also assisted with communications to the hydration stations positioned throughout the course.

The United States Air Force Marathon is described as a world class event with over 15000 participants registered and another estimated 15000 volunteers and spectators in attendance. Amateur radio operators were indispensable in communicating information on runner☐s locations and status, weather heat indexes settings, severe weather notifications and logistic issues.

Robert Aguiar is the marathon Race Director. He says that the senior base leaders of the event have come rely on the communication skills of the amateur radios operators and use them a as a vital resource. He adds that this race would be extremely difficult if not impossible to accomplish without their support and dedication. More about this event is on-line at www.usafmarathon.com. (KF4KWW)

**

HAM HAPPENINGS: AMATEUR RADIO TO ASSIST AT VK NATIONAL FUN FLIGHT DAY 2012

Amateur Radio will once again be a part of Australia□s National Fun Flight Day this coming November 4th. Amateur Radio Newsline□s Jim Meachen, ZL2BHF, has the details:

--

National Fun Flight Day is an event staged by Australian flying clubs to provide pleasure flights for children and families touched by adversity. Amateur radio began its association with this event back in 2011. Thats when the Victoria-based Midland Amateur Radio Club and its station VK3CMZ were invited to participate in the National FunFlight Day by the Bendigo Flying Club. The Midland Club was more than happy to oblige and an operating High Frequency, VHF and UHF station was set up at the event site. A handheld in a plane also provided communication back to children on the ground.

The operation was deemed a major success and the Midland Committee saw it as a worthwhile national amateur radio event. So it then approached the FunFlight manager regarding other amateur clubs□ participation. The result of the meeting was very positive and contact information has now been provided to participating flying clubs so that they can contact their nearest amateur radio club.

For the amateur Radio Newsline, I□m Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

More event information on this fun in the sky event down-under is on-line at www.funflight.org. (Midland Amateur Radio Club)

THE CHANGING OF THE GUARD: WIA PRESIDENT MICHAEL OWEN, VK3SI ☐ S.K.

The changing of the guard in our service continues. This, with the sad news that Michael Owen, VK3KI, the Chairman of Region III of the International Amateur Radio Union and President of the Wireless Institute of Australia has became a Silent Key.

Owen☐s sudden passing came after suffering what is only being described as a medical condition at his home on Saturday, September the 22nd.

During his many volunteer years, Owen, who was age 75 at the time of his passing, participated in many IARU committees and had been a member of the IARU Observer Team at a number of World Radiocommunication Conferences. He served as IARU Vice President from 1989 to 1999 and is perhaps best remembered for his work on a package of revisions to the international Radio Regulations. These were specific to the Amateur Radio and Amateur Satellite services and presented at the 2003 World Radiocommunications Conference.

Michael Owen, VK3KI, is survived by his wife Nan, and his two daughters. His funeral was to be held on Friday, September 28th at St Andrews Anglican Church in Brighton. Australia. Condolence messages can be sent via the

Wireless Institute of Australia by e-mail to condolences (at) WIA (dot) org (dot) au or direct to the surviving family members at PO Box 2042, Bayswater, Victoria 3153 Australia.

(WIA, VK6POP)

WORLDBEAT: NEW FOCUS FOR RADIO NETHERLANDS WORLDWIDE

The Board of Supervisors of Radio Netherlands Worldwide has appointed William Valkenburg as editor-in-chief. This, effective January 1st of 2013.

According to the announcement, Valkenburg will set out the new course for the organization with the recently appointed director general Robert Zaal. The broadcaster will focus on free speech in countries where press freedom is limited and Valkenburg will take responsibility for journalism within the organization.

As of 2013, Radio Netherlands Worldwide□s main focus will be on Africa, and the Arab World, as well as countries such as China, Cuba and Venezuela. (RW)

**

WORLDBEAT: FRENCH POLYNESIA GETS BROADBAND ACCESS

Another remote area of the world is now on-line. Amateur Radio Newsline□s Skeeter Nash, N5ASH, has the details:

--

High speed Internet access has come to the islands of the South Pacific. This with word that OmniAccess has expanded its network coverage in the remote French Polynesian islands.

The news follows the company□s investment into the opening of a high-capacity network on the Intelsat 18 satellite that first became operational in November 2011. This provides the capacity to enable enhanced broadband internet coverage and network services via Ku-band coverage platform to that isolated part of the world.

As a result, for the first time private yachts, charter yachts and commercial vessels cruising in the region can now benefit from high quality uninterrupted broadband connectivity via the new high speed service.

For the Amateur Radio Newsline, I□m Skeeter Nash, N5ASH, reporting.

--

More on this new service can be found by going to www.noonsite.com and using the search engine at that website. (noonsite.com via K4CPX)

**

EMERGING TECHNOLOGY: DARC AND GERMAN NSI COLLABORATE ON FIELD STRENGTH ARTICLE

The National Standards Institute of Germany in cooperation with the Deutscher Amateur Radio Club have jointly authored an article on the calibration of field strength monitors that has been published in the publication Advances in Radio Science'. The article covers a detailed description of a possible calibration setup including uncertainty calculations. You can download an abstract and the full article at tinyurl.com/field-strength-monitors. (DARC)

HAM HAPPENINGS: WESTERN STATES VHF/UHF WEAK SIGNAL NET ON SUNDAYS

The Western States VHF/UHF Weak Signal 75m Net meets every Sunday on 3.920 MHz at 17:30 Pacific Daylight Time. This net is a wide ranging discussion dealing with all aspects of VHF to microwave building, contesting, and operating. More about this weekly gathering is on-line at www.weaksig.net (N8DEZ)

**

DX

In DX, G0VJG will be operational stroke 3A from Monaco between October 1st and the 5th. His activity will be on the High Frequency bands using 100 watts on SSB only. QSL via G4DFI.

A multi-national team is on the air from Conway Reef in the South Pacific Ocean. They plan to be there through October 5th using the callsign will be 3D2C. Their QSL manager is YT1AD.

DL7VSN will be active from Tanzania through October 13th. His operation will be from two locations using the 5H1HS from Zanzibar Island and 5H1HS/3 from Lazy Lagoon Island. Activity is expected on 160 through 10 meters using mainly CW and RTTY. QSL via his home callsign. More about his operation is on-line at Visit his Web page at www.qsl.net/dl7vsn

Lastly word that DJ7RJ who was expected to be active stroke FR from Reunion Island between September 26th and October 21st, has announced he had to cancel his trip. No reason for the cancellation was given.

(Above from various DX news sources)

**

THAT FINAL ITEM:

And finally this week, hidden transmitter hunters held their world championships this month and hams from the USA came home with more medals than ever. Amateur Radio Newsline's Joe Moell, K0OV, the details.

--

Every two years, on-foot hidden transmitter hunters get together to see who is best in the world. The Sixteenth World Championships of Amateur Radio Direction Finding, or ARDF, took place at a ski resort in the mountains of central Serbia. In these big forests, about 330 foxhunters from 33 countries searched for transmitters on two meters and 80 meters using direction finding gear, maps, and compasses, but no GPS. USA was represented by nine men and four women from six states. They ranged in age from 27 to 71.

In previous world championships, USA has won no more than two medals, and no golds. But this year, the team members packed thirteen medals into their suitcases, including four golds.

Standing on the medal podium and hearing the Star-Spangled Banner the most times was Bob Cooley KF6VSE of Pleasanton, California. He won two golds in the division for men over age 70 in the World Cup competition for individuals and another gold for his two-meter run during the main ARDF competitions. Also winning a playing of our national anthem was Vadim Afonkin KB1RLI of Newton, Massachusetts, who was this year's Team Captain. His gold medal was in the 80-meter ARDF competition.

Other Team USA members on the podium included Jay Hennigan WB6RDV of Goleta, California, who was a silver medalist on 80 meters. Winning bronze in their divisions on that band were Alla Mezhevaya of Loves Park, Illinois, Ruth Bromer WB4QZG of Raleigh, North Carolina and Karla Leach KC7BLA of Bozeman, Montana.

Team USA members earned their right to go to Serbia by medaling in the USA ARDF Championships this June at Mt. Laguna, California and in earlier US championships.

You can read more about Team USA and the ARDF World Championships at www.homingin.com. There are plenty of photos, plus links to the complete results. That's homingin, as one word, homingin.com.

From southern California, where ARDF activities take place all year long, this is Joe Moell, K0OV, for the Amateur Radio Newsline.

--

Again, more information is on-line at www.homingin.com. And □homingin□ is spelled as one word. (K0OV)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's WIA News, that's all from the Amateur Radio Newsline□. Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's□ only official website located at www.arnewsline.org.

And a reminder to those of you who still receive these newscasts over our 661-296-2407 dial in line rater than downloading the MP3 file from our website. Of late we have noticed a major decline in the number of those calling into it and as such we are giving consideration to discontinuing it by years end. But before we do, we want to know how many people are actually using it. If you are one of those who call in each week on the phone, please send us a note telling us who you are and the reason you are using telephone access rather than simply downloading the newscast from the Internet.

Our address is the Amateur Radio Newsline, 28197 Robin Avenue, Saugus California, 91350. Or, as we said, you can e-mail us at newsline (at) arnewsline (dot) org. We look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editors□ desk, I□m Jim Damron, N8TMW, saying 73 from Charleston, West Virginia. And, as always, we thank you for listening.

Amateur Radio Newsline□ is Copyright 2012. All rights reserved.

//
6-7 october - EPC Russia DX Contest

Posted: 28 Sep 2012 09:42 AM PDT
http://forums.qrz.com/showthread.php?363027-6-7-october-EPC-Russia-DX-Contest&goto=newpost

The 4th EPC Russia DX Contest will be held from 04:00 UTC on 06.10.2012 to
03:59 UTC on 07.10.2012.

The Russian Section of the European PSK Club has the honour to invite the
radio amateurs all over the world to participate in the EPC Russia DX

Contest 2012. The objective of the contest is to establish as many contacts as possible between radio amateurs around the world and radio amateurs in Russia on BPSK63 mode. The Contest is annually held at the first weekend in October in BPSK63 mode on 160, 80, 40, 20, 15 and 10 meters bands. Every station can be contacted once per band. The operator may change the bands without any restrictions. The output power should not exceed 10 watts on 160 meters and 100 watts on other bands. Only one transmitted signal is permitted at any time.

Categories:

SOAB [Single operator, all bands. Those stations at which one performs all of the operating, logging, and spotting functions. Only one signal is allowed at any one time. The operator may change bands at any time.]

SOLF [Single operator, 160, 80 and 40 meters. Those stations at which one performs all of the operating, logging, and spotting functions. Only one signal is allowed at any one time. The operator may operate on 160, 80 and 40 meters only.]

SOHF [Single operator, 20, 15 and 10 meters. Those stations at which one performs all of the operating, logging, and spotting functions. Only one signal is allowed at any one time. The operator may operate on 20, 15 and 10 meters only.]

MOAB [Multi-operator station, all bands.]

Groups of Entrants:

There are two separate groups of entrants:

RUSSIA - All participants from the Russian Federation.

WORLD - All the rest participants.

Number Exchange:

RSQ is not sent. EPC-RU stations should send their EPC-RU number (4 digits) + Grid Locator, RSQ is not required (example 0262 KO95 separately). All the rest stations should send QSO number, starting 001 + Grid Locator, RSQ is not required (example 001 IO75 - Only separately). The recommended call is "CQ EPCRU TEST".

Log Instructions:

Mode BPSK63 should be designated in the report as PM and in any way differently! All times must be in UTC. All sent and received exchanges are to be logged. The Contest Committee accepts logs in the Cabrillo format ONLY. Name your Cabrillo file as your call sign (for example mm0epc.cbr, mm0epc.txt or mm0epc.log). You should send your log upload via the Web interface: http://ua9qcq.com/contests/submit_log_eng.php

All logs must be sent no later than 15 days after the contest (24:00 UTC 22 october 2012). Please, your questions or Cabrillo reports which you cannot load, send to the address of: epc(at)epc-ru.ru

MixW settings and statistics files for EPCRUDXC:
http://www.epc-ru.ru/index.php?optio...199&Itemid=113

Certificates and Awards:

Certificates and awards will be sent only in electronic format jpg. Each winner and prize-winner will be awarded a certificate by the organizers of the contest but only once for the highest of all rewarded prizes.

Certificates EPCRUDXC-2012 will be awarded to:

1) The participants from Russia:

- top five in sub-SOAB, SOLF, SOHF;

- all participants in the subgroup of MOAB;

- first three places in eight federal districts of Russia in the overall standings of the subgroups of SOAB, SOLF, SOHF;

- the first place overall in the subgroups of SOAB, SOLF, SOHF in each region, province, Republic of Russia regardless of the number of participants from the region.

2) among the participants of all world countries except Russia:

- the first five places in the world of SOAB, SOHF, SOLF;

- all participants in the subgroup of MOAB;

- the first place on every continent in the SOAB, SOHF, SOLF;

- the first three places on the continent in SOAB, SOHF, SOLF provided that at least 10 participants in the subgroup of the continent;

- the first place in every country by the list of DXCC award;

- the first three places in every country by the list of DXCC award provided that at least 10 participants from the country;

- all participants who will work for the first time in EPC Russia DX Contest should specify "My first EPCRUDXC" in SOAPBOX of the report for this purpose. At checking of the given statements ex-callsigns will be taken into account.

Special EPCRUDXC-2012 awards will be awarded to all radio amateurs who send reports (except Checklog and caught in the DQ) and make at least the following number of QSOs:

- for Russia - 200 QSO;

- for Europe and Asia - 100 QSO;

- for other continents (except Europe and Asia) - 50 QSO.

Special EPCRUDXC-2012 awards will be awarded to the participants who will operate portable or mobile call sign (/ p, / m, / mm), regardless of the number of QSOs, both within the European Traveller PSK Award Program ETPA

and from the other continents of the world. In the column "soapbox" (cabrillo format) it is necessary to specify the used equipment, antennas and the power supply which can be only the generator, the accumulator or solar batteries.

The organizers of the 4th annual EPC Russia DX Contest which will be held on October 6 and 7, 2012 have decided to sum up the results and reward those participants of the contest, who will operate portable and mobile callsigns within the limits of the European Traveller PSK Award Program (ETPA).

As a result of the contest, with the Clauses of which you may get acquainted on this page, the participants of ETPA-expedition besides the general counting in subgroups will be in addition highlighted in the subgroup SOAB-ETPA. In summing up the results in this subgroup points and multipliers will not be counted.

The places taken in SOAB-ETPA will be distributed according to amount of the QSOs which will be confirmed by the Contest Committee. The obligatory condition is an activation of the areas (regions), i. e. more than 50 QSOs.

The participants of ETPA-expedition must send to address epc(at)epc-ru.ru a short story and photos held activations of EPC EU Areas.

In the presence of 5 or more participants, a winner of this additional subgroup will be rewarded with special prize for the greatest number of QSO in SOAB-ETPA and with Memorable certificate. All participants who work on the program ETPA will receive this certificate.

Prizes:

EPCRUDXC plaques will be awarded to the winners in the following subgroups: SOAB-World, SOAB-Russia.

The Plaque will be awarded to the 1000th participant of the contest among all radiosportsmen (participants) who sent their reports on condition that Contest Committee will receive 1000 and more Logs (except for Checklog and those got in the DQ).

Traditionally, an interface "UnicomDual" - the prize from "Radioarena" will be drawn. After summing up the contest results the Russian participants who take 1st, 2nd and 3rd place in their area, province or the Republic of Russia.

The initiative group of the Russian section of the EPC invites all interested parties. Firms and teams as well as individual radio amateurs may establish their own prizes. We awaiting your suggestions to EPCRUDXC Organizing Committee: epc(AT)epc-ru.ru

SARL NEWS - SUNDAY 30 September 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

The chairman of Region 3 of the International Amateur Radio Union, Michael Owen, VK3KI, passed away on September 22. He was 75 years old. Owen, who was also President of the Wireless Institute of Australia, participated in many IARU committees and was a member of the IARU observer team at a number of World Radio Communication Conferences. He is perhaps best remembered for his work on Article 25 at WRC-03.-Article 25 is a package of revisions to the international radio regulations that are specific to the amateur and amateur-satellite services.

Amateur radio societies around the world have benefited from Owen's enthusiasm and experience; he was passionately involved with the amateur radio service since the 1960s, and served as IARU Vice President from 1989-1999.

"I am very saddened to hear about Michael's sudden passing," IARU President Tim Ellam, VE6SH, said. "I was only speaking to him a few days ago and he was very enthused about leading the IARU Region 3 Conference in Ho Chi Min city in a few weeks. Michael was a good friend and mentor to many of us in IARU. His drafting skills were second to none and his ability to clearly articulate his position on a number of issues was of immeasurable help to us. The IARU is indebted to his work at WRCs and at many regional Asia Pacific Telecommunications meetings.

"I remember working with him at an ITU special committee meeting in 2002. He certainly taught me a great deal about how do advocate at the international level, which helped me greatly when I was elected an IARU officer. Michael was also a brilliant lawyer and well known to many

colleagues in the profession around the world. The IARU extends sympathies to his family, IARU Region 3 and WIA. I speak for all of my colleagues when I say he will be very sorely missed."

"Among the assignments that Michael drew at WARC-79 was to draft a resolution to exempt the Amateur-Satellite Service from coordination procedures that otherwise would have bogged us down in endless paperwork and great expense. As an attorney it was just the sort of thing he was good at. His work has stood the test of time, and it remains in effect to this day. No good deed goes unpunished, so in 2003, he was brought back to Geneva as a member of the IARU team to handle the rewrite of Article 25, the rules that apply specifically to the Amateur and Amateur-Satellite Services. That turned out to be as much an exercise in diplomacy as in drafting, but Michael was up to the task.

Michael Owen was a strategic thinker; he saw past short-term pros and cons and could envision how decisions made today would affect the distant future. He also understood that working in the background -- doing one's homework -- was essential to success.

WIA Vice President Phil Wait, VK2ASD, has assumed the role of WIA President. Wait has served as a WIA Director since 2003 and was appointed in WIA Vice President in 2010. The SARL has extended it condolences to his family and the WIA. (PAUSE)

IN THE NEWS TODAY:

Last RTA for 2012 held Cape Town yesterday New Hamnet website Amateur radio remains at the cutting edge of technology Jamboree-on-the-air and CQ Hou Koers Doctorates in Engineering for two radio amateurs

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

LAST RTA FOR 2012 HELD CAPE TOWN YESTERDAY

More than 80 persons have attended the Cape Town RTA. A full report on the RTAs will be included in next week's SARLNews.

The SARL has already started planning the dates for next year. The proposed dates are:

Durban RTA on 15 June RTA; Port Elizabeth RTA on 27 July; Gauteng RTA on 31 August; and Cape Town RTA on 5 October.

Clubs are asked to check the dates for possible clashes with other events. Proposals for subjects to be covered are also invited. Please send comments to the web address rta@sarl.org.za Comments on how you experienced the 2012 events are also invited.

NEW HAMNET WEBSITE

In the October issue of the Hamnet bulletin that will be posted early this week, it is announced that Hamnet will launch a Hamnet website on 1 October

This domain has been dormant for many years but thanks to the efforts of Dawie Conradie, ZR6DHC, an initial site has been put together and will obviously grow with time.

This website fills the gap between the SARL website and the well established and popular Facebook site. All links have been incorporated in the website, including some international links.

Do pay us a visit at www.hamnet.co.za

EAST RAND RADIO CLUB'S FLEAMARKET

The East Rand Radio Club's Fleamarket is just around the corner. It will happen on 6 October 2012 from 12:00 till 15:00 at Arrowe Park in Ebeneazer road in Benoni. Please come and enjoy the day with us. Bring all the money you have to spend to make sure you don't miss out on any specials. There will also be boerewors rolls and cold beverages for sale. To book a table for R20 please contact Judy, ZS6JDY, on 079 730 2030. Bring the whole family and all your friends and come and enjoy a great day with us.

HAVE YOU PAID YOUR SUBSCRIPTION?

Membership fees for the SARL were due on 30 June 2012. If you have not renewed yet, please do so without delay. Reminders were posted during the past week. If you are not sure of the amount to pay, please call Mariska at 011 675 2393 on Monday. The SARL needs your support to ensure a strong voice for amateur radio.

AMATEUR RADIO REMAINS AT THE CUTTING EDGE OF TECHNOLOGY

Did you know that on 26 November 2011 at 15:02 UTC the Mars Science Laboratory (MSL) successfully launched an Atlas V 541 from the Cape Canaveral Air Force Station Space Launch Complex 41? It is carrying Curiosity, a 900 kg rover about the size of a small car. It has arrived at the "Red Planet" after a nine month flight. Just over 7 hours after launch at 21:45 UTC the X-band telemetry signal from the MSL was received using the Bochum amateur radio facility, restored and operated by members of AMSAT DL. The signal, received at a distance of 112 000 km, had a spin-modulation of +/- 3.5 Hz with 2 revolutions per minute. This is believed to be the first reception of the MSL outside the official NASA Deep Space Network (DSN) and the USN tracking station at Dongara, Australia.

The 20m dish at Bochum is also used by AMSAT-DL to automatically receive real-time solar data from the NASA STEREO A / B satellites. The data is transmitted to a NOAA server in the USA via the Internet.

Amateur radio still remains the most exciting of all science hobbies.

JAMBOREE-ON-THE-AIR AND CQ HOU KOERS

Scouts and Guides will be participating worldwide in the 55th Jamboree-on-the-Air and 16th Jamboree-on-the-Internet on Saturday 20 and Sunday 21 October 2012. This year's theme is "How big is your world?" JOTA is an annual event in which Scouts and Guides all over the world speak to each other by means of amateur radio contacts. Scouting experiences are exchanged and ideas are shared, over the radio waves.

The Voortrekkers in South Africa and Namibia will be participating in CQ Hou Koers on Saturday 20 October. CQ Hou Koers is an annual event where Voortrekkers have the opportunity to talk by amateur radio with other Voortrekkers from around the country. It is also a chance to practice skills required for badges such as Radio Speech and Radio Amateur. It gives the children exposure to a very interesting technical and scientific hobby that can be stimulating in terms of career choices.

Contact your local Scout Group, Guide Company and/or Voortrekker Commando and start the arrangements for this event. PLEASE do not invite them to your shack; visiting a dentist would be more exciting! Do not be lazy, get out and take your radios on an outing

DOCTORATES IN ENGINEERING:

It is not often that a father and son obtain doctorates in engineering during the same week.

Dr Gary ImmelmanZS6YI and his son Dr Quintin Immelman ZS6IY both acquired doctorates in engineering during the same week, but from different universities.

Gary obtained a Doctoris Technologiae (Honoris Causa) Engineering and Technology from the Vaal University of Technology in Vanderbijlpark and Quintin obtained a Ph.D. Mechanical-Nuclear Engineering degree from North West University in Potchefstroom. The two graduation ceremonies were not planned to fall within the same week, so chance made it at remarkable week to remember.

You may recall that last year this time Gary was recovering from gunshot wounds as a result of a brutal attack at his home on 25 July 2011. He has mostly recovered but still has pain in his right arm and abdomen, but it has not slowed him down at all.

NEW MEMBERS During the past week Andrew Baxter, G4SIU became a new member of the SARL. Andrew moved to SA from the UK in is obtaining a ZS license. Welcome to Andrew G4SIU.

CLUB NEWS The Pretoria Amateur Radio Club's AGM was held on 2012-00-08. There was a very good turnout and many certificates and trophies were awarde. The incumbent chairman was re-elected en several new committee members were added. The portfolios will be allocated at the firs committee meeting. The committee comprises: Chairman Pierre Holtzhausen ZS6PJH. Other elected committee members are: Fritz Sutherland ZS6SF; Jean de Villiers ZS6ARA; Andre van Tonder ZS6BRC; Johan de Bruyn ZS6JDB; Graham Reid ZR6GJR; Vincent Harrison ZS6BTY; Craig Symington

ZS6RH; Rudi van Dyk ZS6RVD; Pieter Fourie ZS6CN; Richard Peer ZS6UK. Almero du Pisani ZS6LDP was co-opted.

CONTEST NEWS

SARL 80 m QSO Party. The October leg of this popular contest, hosted by the Durban ARC, will be run on Thursday evening 4 October starting at 17:00 UTC and ending at 20:00 UTC (19:00 to 22:00 CAT). It is a phone only contest using 3603 to 3650 kHz and 3700 to 3800 kHz. The exchange is your call sign, a RS signal report and your name.

Ten (10) points are scored for every contact with a South African station and fifteen (15) points for every contact with a station outside South Africa. Your log submission must be sent to the Durban ARC, 17 Brownlee Place, Bluff, Durban, 4052 or you can send it by e-mail to zs5lp@vodamail.co.za . It must reach them by 19 October 2012.

PROPAGATION REPORT

Hans, ZS6AKV, reports that two C class flares have been detected. Geomagnetic conditions are at quiet levels. Local HF working frequencies range from unstable to 'elevated from monthly average predicted values'. Try 10 and 15 metres, propagation may surprise you.

Active area 1582 has the potential for M-class flaring due to its growing magnetic configuration. The outlook is that most active areas visible on the solar disk have simple magnetic configurations. Active areas 1575, 1579, and 1582 may have the chance of minor flare activity. Solar flare activity is expected to be low to moderate over the weekend. Visit www.spaceweather.co.za for up-to-date information

DIARY OF EVENTS

3 October - Log sheets for the SARL 80 m club championship competition to be in to zs4bfn@netactive.co.za. 4 October - SARL 80 m QSO-party. 17:00 UTC to 20:00 UTC 5 October - Nominations for MTN sponsored SAARDT awards to be in to saardt@intekom.co.za. 9 October - Heritage Day Sprint logs to be in to riaanzs4pr@gmail.com and a copy to fwolff@global.co.za. 20 October -Jjamboree-on-the-air and CQ Hou Koers

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur

frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Martin Schwella, ZS4MS, and edited by Fritz Sutherland ZS6SF.

Thank you for listening, 73. /EX

//
Manitoulin Amateur Radio Club Wins Major Competition:

Posted: 28 Sep 2012 05:07 PM PDT
http://www.eham.net/articles/29040

MANITOULIN -- The Manitoulin Amateur Radio Club are the winners of the annual Ontario QSO Party 2012 ham radio competition. "For members of our club, this type of event is part of club activity and kin to our emergency radio service training," said Jim McLean, vice president of the Manitoulin club, last week. "Our guys don't go out in the freezing cold because they like to, and on the day the contest took place it was bitter cold and windy. But they enjoyed it." "It's part of our ongoing training for amateur radio emergency services," said Mr. McLean. "In this contest the team that represented us competed against amateur radio clubs from all over Ontario, made up of hundreds of clubs." A release written by Igor Slakva (VE3ZF) of the Manitoulin club, states, "On April 21, 2012, a team from the Manitoulin Amateur Radio Club entered into the annual ham radio competition Ontario QSO Party at Twilight Isle located on the West End of Manitoulin Island. At this time the team got a privilege to use the call sign of the headquarters of Radio Amateur Radio Club of Canada 'VA3RAC'." Mr. Slakva explained, "first the team erected a 13-metre heavy duty tower with an antenna on top on the beach of the island. The antenna looked very impressive when erected on the beach of Lake Huron and turned for the first time toward Europe. Its elements were big enough to cover nearly half of the sky of this tiny island! It was a spectacular view."

//
Propagation Forecast Bulletin #39 de K7RA:

Posted: 28 Sep 2012 02:46 PM PDT
http://www.eham.net/articles/29039

Average daily sunspot numbers rose this week from 56 to 81.3, and average daily solar flux increased from 101.4 to 129.7. As reported in the ARRL Letter on Thursday, September 27, the increase was expected to continue over the next few days, with solar flux peaking at 150 on September 28-29, but what a difference a single day makes.

live broadcast of MFJ 40th anniversary

Posted: 30 Sep 2012 08:40 AM PDT
http://forums.qrz.com/showthread.php?363223-live-broadcast-of-MFJ-40th-anniversary&goto=newpost

It's time for the Live Broadcast of MFJ 40th Anniversary Celebration!!

MFJ Enterprises will be celebrating their 40th anniversary October 5th and 6th (Friday and Saturday) in Starkville, Mississippi! For those that can attend in person, there will be door prizes (must be present to win), free factory tours (MFJ, Ameritron, Cushcraft, Hy-Gain, Mirage, Vectronics, and MFJ Metal Shop), free lunch, free tailgating, free forums/discussions, and FCC license exams. Special guests will include:

Martin F Jue, K5FLU, president and founder of MFJ Enterprises Inc

Malcolm Keown, W5XX, ARRL Mississippi Section Manager

Harold Kramer, WJ1B, CEO American Radio Relay League

Chip Margelli, K7JA, CQ Advertising Manager and famous DXer

Janet Margelli, KL7MF, Ham Radio Outlet Anaheim Manager

Ray Novak, N9JA, ICOM America Amateur Radio Sales Manager

Ted Randall, WB8PUM, QSO Shortwave Radio Host

Dick Ross, K2MGA, CQ Magazine Publisher

George Thomas, W5JDX, Ham Nation, AmateurLogic.com

For additional information regarding the MFJ 40th Anniversary Celebration go tohttp://www.mfjenterprises.com/dayinpark.php.

If you cannot attend in person, please join the live, online broadcast of MFJ 40th Anniversary Celebration events at http://W5KUB.com where the fun begins!

MFJ 40th Anniversary Celebration broadcast hours:

Thursday, October 4: 2000 UTC (3:00 PM CT) drive from Memphis, Tennessee to Starkville, Mississippi (approximately 3 1/4 hour drive)

Friday, October 5: 1300 - 21:30 UTC (8:00 AM - 4:30 PM CT)

Saturday, October 6: 1300 UTC - 1900 UTC (8:00 AM - 2:00 PM CT) Saturday, October 6: 2000 UTC (3:00 PM CT) drive from Starkville, Mississippi to Memphis, Tennessee (approximately 3 1/4 hour drive)

You could be the winner of an online MFJ prize (not to be confused with the MFJ door prizes) which will be awarded during the W5KUB broadcast. Of course, no purchase is necessary to win a prize. W5KUB is not affiliated with any products or companies and does not sell any products or services.

During the live broadcast, you will also have the opportunity to meet and chat with other amateur radio operators from all over the world. The 2012 Dayton Hamvention broadcast had 47,400 viewers!

Please join our group on Facebook at https://www.facebook.com/groups/w5kub/ to keep up with us year-round.

Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you at MFJ!

73

Tom Medlin, W5KUB

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 30th September 2012

Z60K Activation in Kosovo

The somewhat controversial activation of Kosovo by a group of European radio amateurs earlier this month attracted a great deal of interest from the DXing community. This was because it is felt that Kosovo might at some stage be designated by ARRL as a separate DXCC entity.

Kosovo has recently declared independence, and the purpose of the recent amateur radio activation was to support the re-establishment of an amateur radio infrastructure in Kosovo. The visiting radio amateurs were joined by a number of local operators. The call sign prefix adopted by Kosovo - Z6 - is currently currently an unallocated national prefix.

Whether and when Kosovo becomes a separate DXCC entity remains to be seen, but for the time being there is no point in submitting Z60K QSL cards for DXCC credit.

Tipperary Amateur Radio Group

The next meeting of the Tipperary Amateur Radio Group will take place on Wednesday next the 3rd of October in Raheen House Hotel Raheen Road Clonmel at 8.30 pm All are welcome.

Limerick Radio Club

The next meeting of Limerick Radio Club will be on Wednesday 10 October in the Limerick Institute of Technology at 1930. Following on from a very active Summer period of events, the next number of meetings will concentrate on upcoming events including a possible IOTA dxpedition, theory classes and practical sessions. Keep an eye on www.limerickradioclub.ie for updates.

South Dublin Radio Club

On Tuesday 9th October at the South Dublin Radio Club Declan EI6FR will present a slideshow on his IOTA DXpedition to St. Kilda in May of this year.

On Tuesday 30th of October Chris G0FDZ will be giving a talk on the UK VHF beacon GB3VHF http://www.gb3vhf.co.uk

The club is open from 8pm every Tuesday and all visitors are more than welcome.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held October 3rd, October 17th, October 31st. All are welcome to enrol and this will be a fun learning experience. More information from www.ei7dar.com or secretary at ei7dar dot com.

DX News

No doubt many of our listeners will have noticed that HF band conditions have been superb over the last few days, with good openings to the Pacific on 10, 12 and 15 metres, while 20 metres has remained open long after sunset. Let's hope this continues!

Nobby G0VJG will be QRV from Monaco from 1 - 5 October. He will operate as 3A/G0VJG/M on SSB only. QSLs go via G4DFI.

A three-man team will operate from Niger in West Africa from 1 -15 October. They are the well known DXers TL0A, F6EXV and DJ8NK who will use the calls 5U5U, 5U6E and 5U8NK respectively. Operation will be on all bands 160 - 6m.

Dxers will be saddened to hear of the recent death of Sid ET3SID in Addis Ababa, Ethiopia. Sid, who also held the callsigns G4CTQ and AB3OZ, was instrumental in setting up the club station ET3AA and encouraging young students to get involved in amateur radio.

Two Japanese operators, JA6EV and JJ6GVX, will be active as JT1EV and JT1GVX from Mongolia from 2 - 8 October. They will operate from the Ulaanbaatar DX Club station.

A new one for the IOTA chasers will be on the air from 5 - 11 October. This will be 7Z7AB operating from Al-Dhahrah Island. The IOTA reference will be AS-190 and QSL info is via 7Z1CQ.

Frank Pulfer,HB9BXU,writes to state that from Nov 12th to 30th 2012 he will activate together with some other Swiss radio amateurs the dreamlike island of Aitutaki. This island belongs to the Cook Islands (E51) and is situated in the Polynesian Triangle of the Southern Pacific area. The island will be activated on the amateur radio bands from 10m to 80m (including WARC bands) in the modes SSB, CW and PSK31.

The DXpedition is "holiday-style" so that we can enjoy the fantastic world of the southern pacific in addition to the hard handling of endless pileups.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

//
Lack of Support Annoys Residents:

Posted: 29 Sep 2012 05:21 PM PDT
http://www.eham.net/articles/29054

Pyes Pa residents concerned about the proposed installation of a 20-metre radio aerial are disappointed the Tauranga City Council won't fight a legal battle on their behalf. Residents of Veda Glen yesterday petitioned the city council to appeal an Environment Court decision which allows amateur radio enthusiasts to erect radio masts up to 20m high. They said a radio aerial proposed by a neighbour would be an eyesore, create wind noise and devalue their properties. Councillors sympathised with the residents' plight but said, based on their legal advice, an appeal to the High Court would be pointless.

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

GB2RS NEWS

Sunday 30th September 2012

The news headlines:

Z60K now on the air from Republic of Kosovo

Visitor number to RSGB Convention set to be best yet

GB3NC off air for repair

The Republic of Kosovo is now officially on the air. Z60K, the club station of the Amateur Radio Association of Kosovo, located near Pristina, is now on the air. For this operation, QSL via G3TXF or use ClubLog. As Kosovo is not yet a member of the United Nations nor does it have an assigned callsign block allocated by the ITU, it does not meet the established requirements of the DXCC program at this time. However CQ has recognised Kosovo as a separate entity for its award and contest programs since 2007.

The RSGB Convention takes place at Horwood House near Milton Keynes on 12 to 14 October. With lectures on DXpeditions, technical topics, propagation and operating, there is something for all amateurs. Day tickets for the RSGB Convention are still available, as are a few limited packages. The continued success of the RSGB Convention is such that we continue to grow year after year and 2012 looks like being the best yet. If you would like to book for RSGB Convention 2012 please visit www.rsgbevents.org.

The GB3NC two metre repeater in Mid Cornwall will be off the air from Monday 1 October. There is a problem with the transmit filter and it needs to be removed for repair and realignment. It is hoped to resume the repeater service within a few days, but the timescale is dependent on the damage found. Information will be on the Group's website www.mcbarg.co.uk.

UKube-1, the UK Space Agency's first CubeSat mission, has booked its journey into space on a Russian Soyuz-2 rocket. The launch from Kazakhstan is expected to take place in March 2013. UKube-1 carries an amateur radio 435/145MHz linear transponder built by members of AMSAT-UK.

Nominations are open for the 2012 ARRL International Humanitarian Award. The award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international

understanding through amateur radio. Full details and the nomination process can be found on the website www.arrl.org/international-humanitarian-award.

The RSGB is deeply saddened to learn of the sudden death of Michael Owen, VK3KI, President of the Wireless Institute of Australia, and Chairman of IARU Region 3. Michael was one of the world influencers on the development of amateur radio. He had been Chairman of Directors of IARU Region 3 for some years, and had also been President of WIA since the restructure of the Institute in 2004. He had also been an RSGB member many years. He was IARU Vice President for 10 years from 1989, and before that was a director of IARU Region 3. He had been a member of the IARU Team at a number of World Radiocommunications Conferences, in particular WRC03, where he was responsible for the formative work done to reshape Article 25 of the Radio Regulations. He leaves a void in the world of amateur radio that will be hard to fill. The RSGB extends its deepest sympathies to Michael's wife and family on their very sad loss.

Copyright © RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast. We also regret to report that Sid T. May, ET3SID / AB3OZ / G4CTQ, chairman of the Ethiopian Amateur Radio Society has passed away. Sid set up the first amateur radio club of Ethiopia in 1993. Sid has been training amateur radio courses to Ethiopian students for more than 15 years. He administered the RSGB and ARRL examination many times and got more than 120 students through the examination. We feel very saddened about the news and extend our condolences to his family.

And now for the details of rallies and events for the coming week

There will be a free to attend talk by the IET on the Future of Radio Spectrum taking place in Bromley on 3 October. The use of the Radio Spectrum is continuously evolving with new standards, services and ever higher number of devices/users. What does this all mean to the way we manage it and resolve interference problems will be discussed by Richard Holmes. The lecture takes place at 10am for a 10.30am start at Bromley Central Library, High Street, Bromley BR1 1RS. There is no need to pre- register for this event.

The BATC Convention takes place next weekend, 6 and 7 October, at the Everest Community Academy, Basingstoke. There will be lectures, trade stands, special interest groups and a Bring & Buy. The event includes BATC Biannual General Meeting on Sunday 7th. More details on the website www.batc.org.uk.

The Autumn Militaria & Electronics & Radio Amateur Hangar Sale takes place on Sunday 7 October at Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Door open at 10am and there will be civil, military and vintage radio equipment plus vehicle spares and more. Contact Rod Siebert on 01270 623 353.

Also on Sunday 7 October, the Blackwood and District ARS Rally will be held in Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. Doors open at 10am and admission is £2. There will be trade stands, special interest groups and a Bring & Buy. More from Dave, GW4HBK on 01495 228 516.

Now for the news of special events

To commemorate the 100th anniversary of the use of ITU callsign prefixes, special event station PB100PREFIX will be on the air between 4 and 31 October. For more details, visit www.PB100PREFIX.nl. QSL via PB0P.

The RAFARS will put GB21FCB on the air from 1 October to 30 November from a location near Eastleigh.

And now the DX news compiled from 425 DX News and other sources

G0VJG will be operational stroke 3A from Monaco between 1 and 5 October. His activity will be on the HF bands using 100 watts on SSB only. QSL via G4DFI.

3D2C is on the air from Conway Reef in the South Pacific Ocean, IOTA reference OC-112. They plan to be there until 5 October. QSL manager is YT1AD.

DL7VSN will be active from Tanzania until 13 October. His operation will be from two locations using 5H1HS from Zanzibar Island and 5H1HS/3 from Lazy Lagoon Island. Activity is expected on 10 to 160 metres using mainly CW and RTTY. QSL via his home callsign.

Ilian, LZ1CNN has received his Afghan callsign and plans to be active as T6LG until next February. He'll be on all bands, CW and SSB, using an FT-897D and Acom 1000 with multiband ground plane and Transmatch. For

Copyright © RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast. Top Band he will have an inverted Vee. QSL cards go via LZ1ZF and all QSOs will be uploaded to Logbook of The World.

Willi, DJ7RJ will be on the air from Reunion Island as FR/DJ7RJ until 21 October. He plans to be active on all bands 10 to 160 metres using CW and SSB.

Now the contest news

The final weekend of the month brings the CQWW DX Contest. This month it's RTTY and it runs until 2359UTC today, 30 September. Using the 3.5 to 28MHz bands the exchange is signal report and Zone, which in the UK is 14.

The UK Microwave Group Cumulatives take place on the 5.7 to 24GHz bands for six hours between 1000 and 1500UTC today, Sunday 30th. The exchange is signal report, serial number and locator.

The first RSGB VHF event of October is the 2m UK Activity Contest on the 2nd between 1900 and 2130UTC. Using all modes the exchange is signal report, serial number and locator.

It's followed by the 1.3/2.3GHz Trophy Contest and the 432MHz &#65533; 248GHz IARU contest that both start at 1400UTC on Saturday 6th. The Trophy contest runs for eight hours, while the IARU runs for 24 hours. Those who enter either of these contests will have their logs automatically forwarded for entry into the IARU event unless they specify otherwise. In both contests the exchange is signal report, serial number and locator.

The 21/28MHz Contest has seen a distinct upswing in participation over the last couple of years, as increased solar activity has resulted in much improved conditions on the upper HF bands. Last year there were almost 200 entries. It takes place for twelve hours on Sunday 7th, starting at 0700UTC. There are Open, Restricted and QRP categories for UK stations, the same again for non-UK stations, plus you can enter CW-only, SSB- only or mixed modes. The exchange is signal report, serial number and locator.

The first weekend of October is really busy for international events. The first of them is the SSB leg of the Oceania DX Contest. It runs for 24 hours from 0800UTC on Saturday 6th. There are sections for single-op and multi-op stations, with the points for QSOs different on each band to encourage LF activity in particular. Work Oceania, that's VK, ZL and Pacific islands, only. The exchange is signal report and serial number.

The Worked All Britain HF Contest starts at 1200UTC on the 6th and runs for 24 hours on 20, 15 and 10m. UK stations send a signal report, serial number and WAB area, while non-UK stations send report, serial number and DXCC country. UK to UK QSOs do not count for points in this event. Full details of the rules and also log sheets can be obtained from the WAB website at www.worked-all-britain.co.uk.

The third event of the weekend is the IARU 432MHz-248GHz Contest that runs from 1400UTC on the 6th until 1400UTC on the 7th. The exchange is signal report, serial number and locator. In theory you could submit a log direct to IARU for this event but, in practice, UK stations that enter one of the RSGB events allow their logs to be forwarded by the Contest Committee.

The final event of the weekend is the first of the autumn EU Sprints, SSB leg. It takes place for four hours on Saturday 6th starting at 1600UTC. Using the 80, 40 and 20m bands the exchange is highly prescriptive, consisting of both callsigns, the serial number and your name, note no signal report.

Copyright &#65533; RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast. And now the solar factual data for the period from Friday the 21st to Thursday the 27th of September, compiled by Neil Clarke on Friday the 28th of September.

This week solar activity started at very low levels on the 21st and the 24th. However, on the 23rd as sunspot groups rotated into view solar activity increased to low with occasional small C class solar flares taking place everyday. Solar flux levels increased from 117 units on the 21st to 140 by the 25th. The average was 132 units. The 90 day solar flux average on the 27th was 124 units, that's two units up on last week. X-ray flux levels increased from B2.5 units on the 21st to B4.6 by the 25th. The average was B3.7 units. Geomagnetic activity was quiet everyday and the average was Ap 5 units. Solar wind data from the ACE spacecraft saw solar wind speeds decrease from 560 kilometres per second to 300 by the morning of the 26th. Speeds then increased to peak at 480 kilometres per second later the same day. Particle densities were low everyday. Bz varied between minus 8 and plus 9 nanoTeslas on the 26th. Fluctuations were less than this on the quieter days as expected.

And finally the solar forecast from Sunday the 30th of September. This week the active side of the Sun is expected to be looking our way. In recent days large sunspot groups have rotated into view. Solar activity should be low but could increase to moderate levels on the occasional day. Solar flux levels are expected to be at their highest for this solar rotation and be in the 130's at first but may decline as the week goes on. Geomagnetic activity is expected to be quiet but a recurring coronal hole is expected later in the week, however, the disturbance is expected to be small. MUFs during daylight hours at equal latitudes should be around 28MHz for the south and 25MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 26MHz. The optimum working frequency with a 90 per cent success rate will be about 21MHz. The best time to try this path will be between 1500 and 1900 hours UTC.

And that's all for this week from the propagation team.

Copyright © RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB

website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Lincoln Short-Wave Club is cleaning up after the National Hamfest today. On Tuesday they're taking part in the 144MHz UK AC. Wednesday sees G5FZ on the air and on Thursday it's the Lincoln Short-Wave Club repeater net on 145.725MHz from 8pm. The Saturday Surgery is on the 6th in the shack from 9am, followed by participation in the WAB HF Phone contest, which continues until noon on Sunday. For more information

contact Pam Rose, G4STO, on 01427 788 356.

Salop Amateur Radio Society is having a talk today by Tom, M6IDT, on making TV shows. On Thursday there's a natter night and committee meeting. Details on the club website at www.salop-ars.org.uk.

Wythall Radio Club is having a club net today and next Sunday on 145.225MHz. The Advanced course continues on Monday. On Tuesday the Morse class restarts, alongside a Free `n' Easy evening and taking part in the 144MHz UKAC The shack social takes place on Friday, then on Saturday there's the Wythall Beer Festival. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. Tuesday sees a club meeting, to which non members and SWLs are welcome. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020 for more information.

South Birmingham Radio Society is checking club equipment on Monday. On Wednesday there's a Morse class plus a talk in the main hall. Thursday sees training classes with Dave Murphy, G8OWL. On Friday there's shack and aerial work. Contact Don, on 01214 581 603.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is having a talk on propagation. Contact Albert, G0KFS, on 01922 614 169.

On Monday Gloucester Amateur Radio & Electronics Society is having a talk on SWR by Tony, G4HBV. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Monday Welland Valley Amateur Radio Society has its 2m club net on 145.275MHz FM. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday Central Radio Amateur Circle is running its Intermediate course via Skype. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Tuesday Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

Copyright © RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast. On Tuesday Loughborough & District Amateur Radio Club is holding its AGM. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is holding an open meeting, putting the shack on the air and holding training classes. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday Telford & District Amateur Radio Society is holding a committee meeting & putting GX3ZME on the air. Contact Mike, G3JKX, on 01952 299 677.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Denby Dale Radio Club is holding a surplus auction on Wednesday. Next Saturday they start their weekend event at Cartworth Moor for the WAB Contest. Details from Richard, M0RBG, on 07976 220 126.

Hornsea Amateur Radio Club is having an activity night on Wednesday. Next Sunday sees the club taking part in the RSGB 21/28Mhz contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Now we return to the traditional listing in date order. On Monday Angel of the North Amateur Radio Club is on the air and continues its Advanced course. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Bolton Wireless Club is having a talk on the UKFM Repeater Group by Kath and Dave Wilson. For details, send an email to boltonwireless@gmail.com.

On Monday Sheffield Amateur Radio Club is having a talk on iconic figures of amateur radio by Peter, G3PHO. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday Morecambe Bay Amateur Radio Society is discussing its Christmas meal. Contact Sheila, on 07867 516 836.

On Thursday South Manchester Radio and Computer Club is planning its expedition. Details from Ron, G3SVW, on 01619 693 999.

On Thursday Spen Valley Amateur Radio Society is having a talk on real time HF propagation prediction by Ian, M0INB. Details from Russell, G0FOI, on 01274 875 038.

On Sunday Tynemouth Amateur Radio Club is taking part in the RSGB 21/28MHz Contest. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND On Thursday Bangor & District Amateur Radio Club is having fun with antenna analysers in a hands-on night. Contact Mike, GI4XSF, on 02842 772 383.

Copyright © RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast.

NEWS FOR SCOTLAND On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group is discussing HF and VHF operating procedures. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Chelmsford Amateur Radio Society is operating GB100MWT today at Sandford Mill Science and Discovery Day Museum public open day. Tuesday sees the club AGM. Contact Martyn, G1EFL, on 01245 469 008.

Farnborough & District Radio Society is running a Top Band net on 1.995MHz on Monday from 8pm. On Wednesday there is CW net on 3.570MHz from 8pm. Friday sees a 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Southdown Amateur Radio Society is having a talk on Monday by Ted Awcock on the Diplomatic Wireless Station at Crowborough. Wednesday sees operation at the Hailsham shack. Details from John, G3DQY, on 01424 424 319.

Brede Steam Amateur Radio Society is at the shack on Tuesday and next Saturday. For more information contact Steve, on 01424 720 815.

Banbury Amateur Radio Society is having a talk on Wednesday on kit construction for amateur radio. Next Sunday sees the club operating a special event station for Banbury Canal Day. Details from John, G8OZH, on 07774 525 818.

Worthing & District Amateur Radio Club is having a discussion evening on Wednesday. Next Sunday sees the monthly breakfast meeting at The Goring Caf&#65533; from 9am. Contact John, G8FMJ, on 01273 593 232.

Now we return to the traditional listing in date order. On Monday Braintree & District Amateur Radio Society is having a video evening and is planning for JOTA. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club is having a surplus equipment sale. Contact Dave, G4XDU, on 01628 625 720.

On Monday Surrey Radio Contact Club is having a natter and fix it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday Leiston Amateur Radio Club is having a show and tell evening. Details from Andy, G3ZYP, on 01394 460 441.

On Wednesday Havering & District Amateur Radio Club has its fourth business meeting. More information from John, M0UKD, on 07890 222 111.

On Wednesday Norfolk Amateur Radio Club is holding a surplus equipment sale. Details from Chris Danby, G0DWV, on 01603 898 678.

Copyright &#65533; RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast. On Thursday Cray Valley Radio Society is having a talk on getting started with SDR by Martin, G3OQD. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Horsham Amateur Radio Club is holding a used equipment sale. Details are on the web at www.harc.org.uk.

On Thursday Shefford & District Amateur Radio Society is planning for CQWW. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday Vange Amateur Radio Society is holding a junk sale. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Crystal Palace Radio and Electronics Club is having a talk on the GB3VHF beacon project by Chris, G0FDZ. Contact Bob, G3OOU, on 01737 552 170.

On Friday Mid-Sussex Amateur Radio Society is having a radio night and post event equipment testing evening. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Wey Valley Amateur Radio Group is having an introduction to microwaves by Colin Boys, G8BCO. Details on the web at www.weyvalleyarg.org.uk.

On Saturday Reading & District Amateur Radio Club is running a Foundation course. Details from Pete, G8FRC, on 01189 695 697.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society has its HF net on Monday on 3.675MHz from 19:45. The 2m net is on Tuesday and the 4m net on Thursday. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday Riviera Amateur Radio Club is having a club night. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday Weston Super Mare Radio Society is on the air. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday Taunton & District Amateur Radio Club is holding its AGM. More information from Peter Robinson, G0EYR, on 07811 635 819.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a RepRap 3D printing demonstration by Paul, 2E0PSM. Contact Tony, G0WMB, on 01454 417 048.

On Wednesday Trowbridge & District Amateur Radio Club is having a talk by Roger Davis, G3IUZ, on his sixty years in and out of amateur radio. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday Cornish Radio Amateur Club is holding its main meeting. Details from Steve, G7VOH, on 01209 844 939.

On Thursday Saltash & District Amateur Radio Club has its annual junk sale. Contact Brian, M0BHG, on 01752 844 321.

On Thursday South Bristol Amateur Radio Club is looking at the multi band delta loop antenna. Details from Andrew Jenner, G7KNA, on 07838

695 471.

On Thursday Swindon & District Amateur Radio Club is having the third episode of technical stories from 40 years at the BBC by Tony Crake, G0OVA. Contact Den, M0ACM, on 07810 317 750.

Copyright © RSGB 2012. Not for public release before Monday 1 October 2012 except as a GB2RS broadcast. On Friday Poole Radio Society is having an activity night. Details from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and is running an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday Dragon Amateur Radio Club is having a talk on setting up a local commercial radio station by Chris Tanner, MW0LLK. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday Carmarthen Amateur Radio Society is having a demonstration by Chris, GW4DGU. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday Wrexham Amateur Radio Society is having a talk by guest speaker GW3WEQ, Contact Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

RAC Bulletin 2012-058E -An invitation from the family of Earle Smith, VE6NM
2012-10-01

An invitation from the family of Earle Smith, VE6NM:

There will be a service for Earle Smith in Southampton Cemetery in Nova Scotia on Oct 5, 2012 at 11 AM. A luncheon will follow at the Southampton Community Hall. Here is a map to the Cemetery location:http://www.rootsweb.ancestry.com/~nscumber/cemetery/southampton.html
<http://www.rootsweb.ancestry.com/%7Enscumber/cemetery/southampton.html>

For those of you that do not think you know Earle please pick up your TCA magazine from May/June 2012 (page 10). Take a look you probably knew him.

Here is a snippet of his bio fromhttp://www.obsd.com/qcwa-chapter151/ve6nm_bio.html(QCWA Chapter 15)

"First licenced in 1948 as VE1SA. During RCAF career 1948 - 1968 held calls VE3ADP, VE2ACW, VE2ATT, VE8AT, VE2ACH, VE8AT, VE3BMM, VE1ZQ/VE1WR, VE6APB, VE6NM/VE6EWS and VE8BY-B. Served as VE8 QSL Manager for several years. Served as ARLA Director for NW Alberta and also briefly served as Assistant Canadian Radio Relay League (CRRL) Director for NW Alberta, then various executive positions with Canadian Amateur Radio Federation (CARF) and worked on merger of CARF and CRRL to form Radio Amateurs of Canada (RAC), followed by many years involvement with RAC as Director for AB/NT/NU, various Executive roles and retired as President RAC December 2007. Also RAC Delegate Team Leader to several IARU Region II conferences. Currently Life Member of RAC, QCWA, SOWP, member of ARRL and member of several amateur clubs across Canada. Proud to be the sole Canadian recipient of the prestigious Azteca Award from Federacion Mexicana de Radioamateur Experimentadores A.C (FMRE) for services rendered to amateur radio in Canada and Mexico. Amateur wise my favourite band remains Six Metres. I continue to be involved in ARES. It was a privilege for me, while serving as RAC President, to visit every Canadian Province and Territory while meeting many amateurs. I've also attended several QCWA National conventions and enjoy meeting so many enthusiastic amateurs."

Jeffery Trevors, VE1CQD

Highlights of Solar and Geomagnetic Activity
24 - 30 September 2012

After a relatively unspectacular start, solar activity reached
moderate levels this week. The first four days saw only occasional
C-class flares. Regions 1575 (N08, L=181, class/area=Eko/320 on 22
Sep) and 1577 (N08, L=162, class/area=Dai/100 on 23 Sep) were the
most prolific regions, producing 11 and 9 C-class events,
respectively. One of the events from Region 1577, a C3/1f flare at
27/2357 UTC, was associated with a filament eruption northwest of,
and adjacent to the region. The CME was subsequently visible in
LASCO C2 imagery at 28/0018 UTC and LASCO C3 imagery 12 minutes
later. Radial velocity of the ejecta was estimated to be 872 km/s.
By midday on the 28th, x-ray background began rising, signaling an
increase in activity as Region 1583 began to grow rapidly. By 30
September at 0433 UTC, Region 1583 (N12, L=187, class/area=Dso/90 on
30 Sep) had produced an M1 flare. Later that day, Region 1575
produced the second largest flare of the week, a C9/Sf at 30/2339
UTC.

A 10 MeV integrated proton flux greater than 10 pfu event occurred
in conjunction with the C3 flare mentioned above. Proton flux
crossed the 10 pfu threshold on 28/0300 UTC, peaked at 28 pfu at
28/0445 UTC, and ended at 28/1040 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit reached
moderate levels each day of the week.

Geomagnetic field activity was quiet until the end of the week when
it reached active levels. The CME from 28 September described above
reached earth on the 30th. Two separate interplanetary shocks (IPS)
were observed at the ACE spacecraft. The first was at 30/1025 UTC,
followed by a 15nT geomagnetic sudden impulse (SI) observed at the
Boulder magnetometer at 30/1138 UTC. A second IPS was observed at
the ACE spacecraft at 30/2213 UTC followed by a 35nT SI at the
```

Boulder magnetometer at 30/2307 UTC. The first sudden impulse was followed by unsettled conditions; the second, by active conditions. The Bz component of the interplanetary magnetic field reached -15 at 30/2225 UTC and continues to hover between -15 and -20 nT at the time of this report.

Forecast of Solar and Geomagnetic Activity
01 October - 27 October 2012

Solar activity is expected to be at low levels, with a chance for moderate activity, particularly for the first two days of the forecast period and again in mid-October.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at background levels except for 7-9 October in association with a recurrent coronal hole.

Geomagnetic field activity is expected to begin the period ranging from minor to strong (G1-G3) levels due to the CME from 28 September. Conditions should quickly return to mostly quiet and for the period be generally quiet levels with the possible exceptions of 3-5 October and 15-17 October when coronal hole high speed streams are expected to be geoeffective.

GB2RS,
The Republic of Kosovo is now officially on the air. Z60K, the club
station of the Amateur Radio Association of Kosovo, located near
Pristina, is now on the air. For this operation, QSL via G3TXF or use
ClubLog. As Kosovo is not yet a member of the United Nations

No seat at the UN = the country doesn't exist.
Just like Palestine.
RSGB talking out it's arse again.

AMSAT NEWS SERVICE

ANS-274

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

From AMSAT HQ SILVER SPRING, MD.

September 30, 2012

To All RADIO AMATEURS

BID: $ANS-274.01

Satellite Operation from the USS IOWA for Scouting JOTA

Jim Jerzycke, KQ6EA says he will be operating for the BSA JOTA event from the USS IOWA in San Pedro, California on 20 October from 1600 UTC to 2300 UTC. The callsign will be NI6BB on FO-29, AO-27, and AO-7.

Jim will concentrate mostly on the linear birds but conditions permitting he will also try to make FM contacts. Pass predictions also show a couple of good ISS passes so operation will depend on its operating mode at that time.

The Jamboree-on-the-Air, or JOTA, is an annual Scouting event that uses amateur radio to link Scouts around the world, around the nation, and in your own community. For more information about JOTA

see: http://www.scouting.org/jota.aspx

[ANS thanks Jim Jerzycke, KQ6EA for the above information]

AMSAT 2012 Space Symposium Papers Due October 1

Symposium Proceedings Editor, Dan Schultz, N8FGV reminds authors the final copy of your paper for the 2012 Space Symposium is due by October 1, 2012. Dan requests a tentative title of your presentation as soon as possible, with final copy to be by October 1 for inclusion in the printed proceedings. Abstracts and papers should

be sent to Dan Schultz, N8FGV, at n8fgv at amsat.org

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

The Symposium Committee still has prime slots available on the speaker's schedule. The AMSAT Symposium depends on YOU to make it happen, without speakers there is no Symposium.

Please consider doing a presentation, even if you have never done so in the past. We are especially interested in papers and presentations involving our educational partnerships with K-12 and university level classrooms. Education is quickly becoming critical for our future rides to space.

Additionally registration for the 2012 AMSAT Space Symposium, to be held on Friday, October 26th through Sunday, October 28th is now open on-line. A mail-in option is also available those preferring this approach. See the AMSAT Web Store to complete your on-line registration.

Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page.

[ANS thanks 2012 Symposium Proceedings Editor Dan Schultz, N8FGV for the above information]

AMSAT 2012 Field Day Results

AMSAT Director Contests and Awards, Bruce Paige, KK5DO has released the results of the 2012 AMSAT Field Day. Bruce wrote, "Field day this year had some unexpected results. The full story with photos will be in an issue of the AMSAT Journal. This was one of the closest field day ever for the top 4 spots."

2012 Field Day Standings - in the event of a tie, the calls are alphabetical.

Silent Key: Michael Owen, VK3KI

AMSAT has received the sad news of the passing of IARU Region 3 Chairman Michael Owen, VK3KI, on September 22. He was also President of the Wireless Institute of Australia (WIA).

Owen's first notable contributions to amateur radio started at the 1979 World Administrative Radio Conference. WARC-79 is memorable primarily because it's where the Amateur Radio Service gained the bands at 10, 18 and 24 MHz. He also drafted the resolution to exempt the Amateur-Satellite Service from coordination procedures that otherwise would have bogged us

down in endless paperwork and great expense. He was a member of the IARU team who handled the rewrite of Article 25, the rules that apply specifically to the Amateur and Amateur-Satellite Services.

Owen is survived by his wife Nan, and two daughters. Funeral services were held on September 28 at St Andrews Anglican Church in Brighton, Victoria, Australia.

[ANS thanks the Wireless Institute of Australia, the IARU, and the ARRL for the above information]

UKube-1 Amateur Radio CubeSat Books a Ride on Soyuz-2

AMSAT-UK published this news on their web: http://www.uk.amsat.org/10497

UKube-1 - the UK Space Agency's first CubeSat mission - has 'booked' its journey into space on a Russian Soyuz-2 rocket. The launch from the Baikonur Cosmodrone in Kazakhstan is expected to take place in March 2013.

UKube-1 carries an amateur radio 435/145 MHz linear transponder built by members of AMSAT-UK.

The UK Space Agency have issued the following press release:

The UKube-1 nanosatellite is a collaboration between the UK Space Agency, industry and academia. It will allow the UK to fly educational packages, test new technologies and carry out new space research quickly and efficiently. It is envisaged as the pilot for a full national CubeSat programme.

Dr David Williams, Chief Executive of the UK Space Agency, said, "UKube-1 is almost ready to fly; the platform is nearly complete, 4 of the missions 5 payloads are mission-ready and we have now secured a launch with Roscosmos. We are eagerly awaiting the start of the innovative experiments that this small but mighty satellite will perform once in orbit around our planet."

The winning UKube-1 payloads from the UK Space Agency's payload competition include the first GPS device aimed at measuring plasmaspheric space weather; a camera that will take images of the Earth and test the effect of radiation on space hardware, using a new generation of imaging sensor; an experiment to demonstrate the feasibility of using cosmic radiation to improve the security of communications satellites and to flight test lower cost electronic systems; and a payload made up of 5 experiments that UK students and the public can interact with.

As well as providing a fantastic opportunity for innovative UK companies and UK academics to collaborate on a national space project, UKube-1 is also useful for training the next generation of space engineers and will include a tiny radio transmitter for science education, and a materials science experiment from which school students can receive data. The system, funded by volunteer members and friends of AMSAT-UK, is called FUNcube and will be integrated with UKube-1 as part of the programme.

[ANS thanks AMSAT-UK for the above information]

ARISS Status - 24 September 2012

1. Successful Contacts Held

Students from Zespól Szkól Technicznych w Kole in Kolo, Poland participated in an Amateur Radio on the International Space Station (ARISS) contact with Akihiko Hoshide, KE5DNI, aboard the ISS on Wednesday, September 19. Hoshide answered all 18 questions posed by the students during the overhead pass, which included topics on astronaut training, education, and skills and abilities needed on the ISS. Video of the event may be viewed here: http://www.livestream.com/arisspolsk...edium=ui-thumb

An Amateur Radio on the International Space Station (ARISS) contact was held between Sunset Hills Elementary School in San Diego, California and Akihiko Hoshide, KE5DNI on the ISS on Thursday, September 20. Students were able to have 13 questions answered about living on the ISS. Three television stations and other media covered the event. Video may be viewed at: http://www.ustream.tv/recorded/25558153

CBS has an article on its website: http://www.cbs8.com/story/19605202/l...-space-station and the North County Times ran a story: http://www.nctimes.com/news/local/po...c11532c9a.html

On Friday, September 21, Lafayette Middle School, La Fayette, Georgia took part in an Amateur Radio on the International Space Station (ARISS) contact with Sunita Williams, KD5PLB. The gymnasium was filled with students, guests and VIPs who listened as the school's Rambler Radio Club members spoke with the astronaut. The school hopes the ARISS contact will help get the students interested in the areas of Science, Technology, Engineering, and Mathematics. WRCB TV covered the event. See: http://www.wrcbtv.com/story/19610751...s-make-contact (line wrap)

2. ARISS International Team Meeting Held

The ARISS International Team monthly teleconference was held on Tuesday, September 18. Topics of discussion included a status on HamTV, as well as an update on the new VHF Ericsson which is expected to launch to the ISS later this year. Minutes have been posted. See: http://ariss.rac.ca/arisstel2012-09-18.htm

3. ARISS Status on Social Media

ARISS currently has 1480 followers on Twitter: http://twitter.com/ARISS_status

And as a reminder, ARISS news may also be found on Facebook. See:

http://www.facebook.com/pages/Amateu...53679794647788

4. ARRL Articles on ARISS

On September 20, the American Radio Relay League (ARRL) carried a story written by ARISS member Dave Jordan about "Teach-In Day," an annual event in Seminole County, Florida which provides opportunities for interested

parties to visit schools and teach the children about their area of expertise. The Lake Monroe Amateur Radio Society

visited English Estates School and talked about amateur radio, amateur satellites, the ISS and ARISS and the role of amateur radios during emergencies. English Estates participated in its own ARISS contact in May 2011. To view, "The 2011 English Estates Teach-In," see: http://www.arrl.org/the-2011-english-estates-teach-in

5. Stonepark Intermediate Announces Upcoming Contact

Stonepark Intermediate School in Charlottetown, PEI, Canada is preparing for an ARISS contact with Canadian astronaut Chris Hadfield, KC5RNJ/VA3OOG, who is scheduled to join the ISS Expedition 34 crew in December of this year. Sue Geddes, a teacher-librarian at Stonepark, was interviewed about the upcoming event:

http://www.cbc.ca/islandmorning/epis...hris-hadfield/

The school has also posted information about the contact on its Web site. See: http://stonepark.wordpress.com/ariss...communication/

6. South Florida Science Museum Holds Essay Contest for ARISS Contact

The South Florida Science Museum held an essay contest for students in the Palm Beach County School District to select fifteen K-12 students to participate in an ARISS contact in October. Deadline for submissions was September 24. For more information, see: http://www.sfsm.org/index.cfm?fuseac...&returnTo=main

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

HF Station Giveaway to Support Youth in HF Actvity

Posted: 30 Sep 2012 08:13 AM PDT
http://forums.qrz.com/showthread.php?363216-HF-Station-Giveaway-to-Support-Youth-in-HF-Activity&goto=newpost

Amateur Radio Supplies, LLC of Haverhill, MA has announced a special give away of a complete HF station to one lucky youth under the age of 21 that wants to get active on the HF bands with their very own station. Supporting youth in HF activities like DXing and Contesting is one of the primary philanthropic missions of the business and the QRZ readership is asked to spread the word!

The equipment is all new and will be delivered anywhere in the world to the lucky winner. To enter or nominate a youth that you know needs help getting on the air - simply follow the instructions at the Amateur Radio Supplies website.

Equipment in the give away includes:

Alinco DX-SR8T/E 160-6m All Mode Transceiver & 30 Amp PS

LDG AT-100 Pro II Desktop Antenna Tuner

Choice of Rugged All Band G5RV or HyGain DX-77A Vertical 100□ of

Premium RG-213 Coax

Vibroplex Brass Racer Iambic Paddles

SignaLink USB Sound Card for Digital Modes

Heil Pro Set Plus Headset

Spread the word and help us get a deserving young ham on the air!

73 N1SNB & The Amateur Radio Supplies Team

live broadcast of MFJ 40th anniversary

Posted: 30 Sep 2012 08:39 AM PDT
http://forums.qrz.com/showthread.php?363221-live-broadcast-of-MFJ-40th-anniversary&goto=newpost

It's time for the Live Broadcast of MFJ 40th Anniversary Celebration!!

MFJ Enterprises will be celebrating their 40th anniversary October 5th and
6th (Friday and Saturday) in Starkville, Mississippi! For those that can
attend in person, there will be door prizes (must be present to win), free
factory tours (MFJ, Ameritron, Cushcraft, Hy-Gain, Mirage, Vectronics, and
MFJ Metal Shop), free lunch, free tailgating, free forums/discussions, and
FCC license exams. Special guests will include:

Martin F Jue, K5FLU, president and founder of MFJ Enterprises Inc

Malcolm Keown, W5XX, ARRL Mississippi Section Manager

Harold Kramer, WJ1B, CEO American Radio Relay League

Chip Margelli, K7JA, CQ Advertising Manager and famous DXer

Janet Margelli, KL7MF, Ham Radio Outlet Anaheim Manager

Ray Novak, N9JA, ICOM America Amateur Radio Sales Manager

Ted Randall, WB8PUM, QSO Shortwave Radio Host

Dick Ross, K2MGA, CQ Magazine Publisher

George Thomas, W5JDX, Ham Nation, AmateurLogic.com

For additional information regarding the MFJ 40th Anniversary Celebration go tohttp://www.mfjenterprises.com/dayinpark.php.

If you cannot attend in person, please join the live, online broadcast of MFJ 40th Anniversary Celebration events at http://W5KUB.com where the fun begins!

MFJ 40th Anniversary Celebration broadcast hours:

Thursday, October 4: 2000 UTC (3:00 PM CT) drive from Memphis, Tennessee to Starkville, Mississippi (approximately 3 1/4 hour drive)

Friday, October 5: 1300 - 21:30 UTC (8:00 AM - 4:30 PM CT)

Saturday, October 6: 1300 UTC - 1900 UTC (8:00 AM - 2:00 PM CT) Saturday, October 6: 2000 UTC (3:00 PM CT) drive from Starkville, Mississippi to Memphis, Tennessee (approximately 3 1/4 hour drive)

You could be the winner of an online MFJ prize (not to be confused with the MFJ door prizes) which will be awarded during the W5KUB broadcast. Of course, no purchase is necessary to win a prize. W5KUB is not affiliated with any products or companies and does not sell any products or services.

During the live broadcast, you will also have the opportunity to meet and chat with other amateur radio operators from all over the world. The 2012 Dayton Hamvention broadcast had 47,400 viewers!

Please join our group on Facebook at https://www.facebook.com/groups/w5kub/ to keep up with us year-round.

Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you at MFJ!

Best Possible Taste - The Kenny Everett Story

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/C2EiFLR-2O0/best_possible_taste_the_kenny_everett_story.htm?utm_source=feedburner&utm_medium=email

Rob Mannion G3XFD – Editor of Practical Wireless – writes "An interesting programme is due to be transmitted by the BBC 4 channel on Wednesday October 3rd 2012. Due to be aired at 2100 hours, it tells the story of the late, well-known zany DJ and TV personality Kenny Everett (played by Oliver Lansley). But, you may be wondering , "What does this have to do with hobby radio and PW?"

11 Palm Beach County Students Win Chance to Talk to Astronauts on ISS:

Posted: 01 Oct 2012 05:20 PM PDT
http://www.eham.net/articles/29069

WEST PALM BEACH -- Eleven lucky students will gather this month at the South Florida Science Museum to speak, via amateur radio, to astronauts on the International Space Station as it passes overhead. The School District of Palm Beach County, working with the museum, invited students in grades 3-12, and teachers, to participate in an essay contest on "Why is space exploration important and what does it mean to me?" A panel of former astronauts as well as educators, scientists, and local media made the selections.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and WA8APD for the following DX information.

OPDX BACK ONLINE NOTICE/UPDATE. This is to inform OPDX Subscribers that the server which hosts the OPDX Mailing List and E-mail for the OPDX failed on September 20th. This is the reason why you did not receive the September 24th bulletin. The server had been down until October 1st. Please be advised that if you sent any information for the bulletin on or between September 20-30th, it was NOT received, and we request you send it again.
Within the next few hours, I will resend September 24th's bulletin (OPDX.1080) [because I know some DXers like to keep a record of the bulletins] and a special bulletin with some press releases.
Thanks for your understanding and special thanks goes to Dave, WA8APD, SysOp of the HAMNET.ORG Server, for getting things going again.

73 de Tedd KB8NW

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, W2VU, WA4DAN, K5GS, W5KUB and N0TG for the following DX information.

OOOPPSS DEPARTMENT. In the "OPDX BACK ONLINE NOTICE/UPDATE" special bulletin we just sent out a few minutes, there is a typo. The callsign for the SysOp of the HAMNET.ORG Server should be WB8APD (not WA8APD). Sorry Dave..... Again, thanks for getting things back online.

ARS GIVEWAY TO PROMOTE YOUTH IN AMATEUR RADIO (Press Release).
"To encourage youth in DXing and Contesting, the Amateur Radio Supplies (ARS) owner management team, Jeff/N1SNB and Randy/N0TG will provide a COMPLETE STATION to a deserving young ham, under AGE 21.
Many youth operators are unable to purchase the needed equipment to get on the air. Here at Amateur Radio Supplies, we want them to experience the joy that has propelled us in this hobby for many decades. Thus, on January 1, 2013, we'll be doing the first of many station sponsorships to support youth in DXing and contesting.
Amateur Radio Supplies will give a complete HF (high frequency) station to the selected applicant, including:
• Alinco DX-SR8T/E 160-6m All Mode Transceiver & 30 Amp PS
• LDG AT-100 Pro II Desktop Antenna Tuner
• Choice of Rugged All Band G5RV or HyGain DX-77A Vertical
• 100• of Premium RG-213 Coax
• Vibroplex Brass Racer Iambic Paddles
• SignaLink USB Sound Card for Digital Modes
• Heil Pro Set Plus Headset

Applicants under the age of 21 can apply by submitting a form located on the ARS web site at: http://www.amateurradiosupplies.com/youth-s/222.htm

Nominations will also be accepted. Nominations and Questions:
Contact Randy Rowe, N0TG, at randy@amateurradiosupplies.com "

CQ NEWS (Press Release). The following was sent out by Richard, W2VU, Editor of CQ Amateur Radio, on October 1st: "Randy Thompson, K5ZD, Named Director of CQ World Wide DX Contest -- CQ Contest Hall of Fame member and WPX Contest Director Randy Thompson, K5ZD, has been named Director of the CQ World Wide DX Contest, effective immediately. Randy succeeds Bob Cox, K3EST, who retired in September after 35 years at the helm of the world's most popular amateur radio contest.
Thompson, 53, has been a ham since age 13. He is an accomplished contester, having multiple wins in the CQ World Wide DX Contest and the CQ WPX Contest, among others. He has also competed in four World Radiosport Team Championships. In addition, Randy is a past editor of the "National Contest Journal" (a post he has held three separate times) and a co-founder of the eHam.net website. He is a longtime member of the Yankee Clipper Contest Club and an instructor at K3LR's Contest University. He has been Director of the CQ WPX Contest since 2008, coincidentally the same year in which he was inducted into the CQ Contest Hall of Fame.
'The CQ WW is the biggest event on the contest calendar,' commented Thompson. 'I am honored to be involved and follow in the giant footsteps of K3EST. With the great conditions we are seeing on the bands, this year should be the biggest CQ WW ever! The first order of business is to have the team ready for the new 5-day log deadline and faster results reporting.'
CQ Publisher Dick Ross, K2MGA, said Thompson's appointment marks the start of a new chapter in the history of CQ World Wide DX Contest, adding 'The CQ management team looks forward to working with Randy as CQWW Director. His four years as WPX Contest Director have already demonstrated his ability to successfully and creatively guide a major contest, and we are totally confident that he will take the CQWW to even greater heights.'
Thompson's appointment to the directorship of the CQWW creates a vacancy for director of the CQ WPX Contests. Anyone interested in taking on the challenge of leading a major contest should contact Randy at <k5zd@cqwpx.com>."

CY0, SABLE ISLAND (Press Release/Update). Operators Ron/AA4VK and Murray/WA4DAN have announced a two week delay in the start of the CY0 DXpedition. The new dates are October 22-31st. They state, "Unfortunately, circumstances beyond our control prevented us from being able to fly to Sable Island on October 8th, our original schedule. The revised schedule, however, will put us on Sable Island during the CQWW Phone contest weekend and even though we do not plan to compete in the contest, we do plan to provide a new country, Sable Island, to those in the contest. As previously advertised, focus will be on the 10, 12, and 15 meter bands where the most demand for CY0 exists..... WA4DAN/CY0 and AA4VK/CY0" For updates and more details, visit: http://www.cy0dxpedition.com

LIVE BROADCAST (from MFJ's 40th Anniversary Celebration). The following press release was sent out: "MFJ Enterprises will be celebrating their 40th anniversary October 5th and 6th (Friday and Saturday) in Starkville, Mississippi! For those that can attend in person, there will be door prizes (must be present to win), free factory tours (MFJ, Ameritron, Cushcraft, Hy-Gain, Mirage, Vectronics, and MFJ Metal Shop), free lunch,

free tailgating, free forums/discussions, and FCC license exams. Special guests will include:

Martin F Jue, K5FLU, President and founder of MFJ Enterprises Inc
Malcolm Keown, W5XX, ARRL Mississippi Section Manager
Harold Kramer, WJ1B, CEO American Radio Relay League
Chip Margelli, K7JA, CQ Communications, Director of Advertising Sales and Marketing
Janet Margelli, KL7MF, Ham Radio Outlet, Anaheim Manager
Ray Novak, N9JA, Icom America, Division Manager • Amateur & Receiver Products
Ted Randall, WB8PUM, QSO Shortwave Radio Host
Dick Ross, K2MGA, CQ Magazine Publisher
George Thomas, W5JDX, Ham Nation, AmateurLogic.com

For additional information regarding the MFJ 40th Anniversary Celebration go to: http://www.mfjenterprises.com/dayinpark.php

If you cannot attend in person, please join the live, online broadcast of MFJ 40th Anniversary Celebration events at http://W5KUB.com where the fun begins!

MFJ 40th Anniversary Celebration broadcast hours:
* Thursday, October 4: 2000 UTC (3:00 PM CT) drive from Memphis, Tennessee, to Starkville, Mississippi (approximately 3 1/4 hour drive)
* Friday, October 5: 1300 - 21:30 UTC (8:00 AM - 4:30 PM CT)
* Saturday, October 6: 1300 UTC - 1900 UTC (8:00 AM - 2:00 PM CT)
* Saturday, October 6: 2000 UTC (3:00 PM CT) drive from Starkville, Mississippi to Memphis, Tennessee (approximately 3 1/4 hour drive)

You could be the winner of an online MFJ prize (not to be confused with the MFJ door prizes) which will be awarded during the W5KUB broadcast. Of course, no purchase is necessary to win a prize. W5KUB is not affiliated with any products or companies and does not sell any products or services. During the live broadcast, you will also have the opportunity to meet and chat with other amateur radio operators from all over the world. The 2012 Dayton Hamvention broadcast had 47,400 viewers!

Please join our group on Facebook at <https://www.facebook.com/groups/w5kub> to keep up with us year-round.
Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you at MFJ! 73, Tom Medlin, W5KUB <http://w5kub.com>"

ZL9, CAMPBELL ISLAND (Update/Press Release). The following was received from Gene/K5GS and the ZL9HR team [edited]: "Thanks for your continued interest in ZL9HR Campbell Island DX-pedition.
We're making great progress during the planning and preparation phases. The Hellenic Amateur Radio Association of Australia members and the local ham community have pitched in to make this DX-pedition a reality.

Our current status:
6 Meters: We received approval for use of 50-51 MHz. Some areas in New Zealand use 50 MHz for television transmission; therefore it is not an Amateur allocation. Since Campbell Island is uninhabited we received a waiver from the NZ authorities to use those frequencies.

Additional Corporate Sponsors signed on since last update:
- Elecraft
- Rojone Pty Ltd
- Amateur Radio Supplies
- OptiBeam

DX Foundation, Club and Individual Sponsors: The list continues to grow. Please see the Web page for the most current list of supporters at: http://www.campbell2012.com/index.php/sponsors

Equipment: Our equipment is on the way to New Zealand. The gear was packed in crates and prepared for sea shipment from Sydney, Australia to Christchurch, New Zealand. Once through NZ Customs they will be trucked to Invercargill, New Zealand, and placed in a storage facility, arrival at the storage facility is scheduled for Oct. 11th. A bond was posted to get the equipment into New Zealand. In order to reclaim the bond we must remove the equipment from New Zealand upon completion of the DXpedition.

Quarantine Inspection: Before any person or equipment lands on Campbell Island an inspection of all personal items and equipment will be conducted by the NZ Department of Conservation. Our gear will be unpacked at the inspection station in Bluff, NZ on Nov. 24, 2012. Special attention is placed on items which may contain soil, rocks, stones, insects or other organic material. Boots and shoes must be scrubbed to remove any accumulated soil. Since the boat is used by the DoC for their expeditions were comfortable the boat is prepared for its inspection.

Island Logistics

1. As you may have seen with other DX-peditions to remote / uninhabited locations once on the island accommodations must be made for meals and sanitary considerations. Fortunately, the New Zealand Department of Conservation has allowed us to use several buildings and the toilet facilities in one of their buildings. These buildings were part of the weather station that once operated at Beeman Cove; they have been kept in good repair over the years since. Again, we appreciate the DoCs cooperation and assistance to the ZL9HR team. Sleeping accommodations will be on the boat, the team will shuttle back and forth from the island.

2. Since the weather will be cold and wet we'll wear layers and water-proof foul weather clothing.

3. We'll bring food, snacks, a medical kit, and other emergency supplies in the event we can't get back to the boat due to weather

conditions.

4. No trash is permitted to remain on the island; we'll be carting all refuse back to the boat for proper disposal. The boat is not permitted to empty its sanitary storage tanks while anchored in Perseverance Harbor so the skipper will occasionally take the boat out to sea to empty the tanks.

5. There's been recent Internet chatter about our antennas and their placement. Under the conditions of the landing permit antennas are permitted only in DoC designated spaces, all antennas must be inland. No antennas are allowed in or near the water, nor are we allowed to walk along the shoreline. While there are some optimum antenna locations on the island they are off limits to the team. We'll use vertical antennas for the Low Bands, and weather permitting, a 40 meter beam will be placed on a hill with a drop off towards the sea.

6. We've been advised there may be 2 scientific expeditions on the island while we are operating. The DoC does not anticipate any interaction between the DX-pedition team and the participants of these expeditions.

7. ZL9HR team member Dave Lloyd, K3EL, prepared some information about our antenna placement and propagation. You may read his articles at:
http://k3el.wordpress.com/dx/zl9hr/azimuthal_map/
http://k3el.wordpress.com/dx/zl9hr/antenna-choice-and-location/

8. As previously mentioned, we are governed by the conditions of the DoC issued landing permit, some of those conditions are:
a. Specified number of DX-pedition operating days
b. Antenna field designated by the DoC
c. Other than use of the wharf, no access to the shoreline
d. Team members restricted to island locations indicated on the permit
e. No overnight stays unless the weather prevents return to the boat
f. Second to personal safety is wildlife awareness and safety are highest priorities
g. Antennas must be marked to avoid bird strikes and ground borne wildlife may not be disturbed
h. Digging, trenching or other defacement / scaring of the land is prohibited.
i. We are permitted to install guy stakes for the antenna support structures

Team members have made their bookings to and from New Zealand, several will meet in Auckland before the DX-pedition, others will meet in Dunedin and eventually we'll first meet as a team in Invercargill, NZ on Nov. 23rd. In closing we want to thank our corporate sponsors, clubs, foundations and individuals who have provided products and funding to make the

activation of Campbell Island a reality after a long radio silence.

Next update in late October.

73, Gene K5GS and the ZL9HR team"

Upcoming Yaesu FTdx-3000

Posted: 03 Oct 2012 04:14 AM PDT
http://forums.qrz.com/showthread.php?363558-Upcoming-Yaesu-FTdx-3000&goto=newpost

I have the Yaesu FTdx5000MP and it is an awesome radio. I've been playing with Amateur radios for 20+ years as Extra Class starting with a Kenwood TS-940S in 1993 an moving on. But the 5000 is light years past the 940 and once you learn how it works you can dial in any contact with almost FM quieting quality on SSB. It is worth the big bucks you will have to spend to get one.

Then the FTdx3000 is about to go on sale with comparable recieve circuitry as the 5000 at half the price plus a built in Spectrum scope. Per my 5000 that was another expensive addition per the DMU 2000. Meanhile Yaesu now has it on their website per all the details and they also mention a CW decode on the LCD display. That will be interesting per CWers.

I'm a Field Day CW highly competitive operator. Thus I don't need two receivers per the band I am working. But the Spectrum scope will make it easier per quickly dialing into a strong contact. So I've got a standing order per my favorite dealer to ship me one when they get them in stock. I'll let you know how it works for CWers later.

CW90A - 90th Anniversary of the Uruguayan Radio Broadcasting

Posted: 02 Oct 2012 08:21 PM PDT
http://forums.qrz.com/showthread.php?363533-CW90A-90th-Anniversary-of-the-Uruguayan-Radio-Broadcasting&goto=newpost

November 6th, 1922, is the date on which culminates the Uruguayan radio broadcating founding process. That day was the first trasmission of Radio Paradizabal, the pioneer Uruguayan commercial broadcasting. Therefore, in 2012 we celebrated the 90th anniversary of radio broadcasting in Uruguay, and Radiogrupo Sur (http://radiogruposur.org) wants to commemorate this event with various activities, in particular activating the special callsign CW90A, which is operating in all amateur bands and all modes since September 15th.

We invite all amateurs and swl arround the Wolrd to follow CW90A in our web site http://cw90a.radiogruposur.org, or in Facebook and Twitter.

MMMonVHF Newsletter No. 1/ WEEK 40 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-10-03
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

I'm planning for the next year 2013 HF,50 Mhz and 144 Mhz EME a
"long" Dx-pedition in Wallis and Futuna (AH16VR).
Jean Jacques
TK5JJ

The UKSMG would like help in compiling a survey of your Most Wanted
Countries on 6m. We first conducted a survey in 2007 and the results
proved very popular in helping a number of leading Dxpeditioners decide
where to go next. The results of this survey will be published in the
January 2013 issue of Six News.
Once you have ticked the boxes on the attached PDF, please ensure you
have included your callsign in the necessary box, and then click on the
last box to email me your results.
Please note that this is not a survey of the most wanted countries
world-wide.
This separate survey can be accessed by going to:
http://www.uksmg.org/most-wanted-form.php

Thank you. Peter, *G3ZSS*, Editor of Six News.

LATEST NEWS from Bodo, DF8DX, dated 2012-09-28:
I am sorry but I will not take 2m Equipment this time.
For all that are interested in 23cm EME, please follow the link and fill out what time fits you best.
I try to find the best time to operate.
http://doodle.com/2nhcaiu8nfukdpzu
73 de Bodo, DF8DX

Bodo, DF8DX, qrv from SV9 on HF and 23cm EME
Equipment will be like on my previous DXpeditions IC7000 with transverter (100W) and 59ele yagi.
call: SV9/DF8DX
Grid: KM25 (exact locator will be given later)
IOTA: EU-015
Activity on 23cm EME:
October 2, 2000-2130z (for EU)
October 3, 0400-0600z (for NA)
with backup dates:
October 3, 2030-2200z (for EU)
October 4, 0430-0600z (for NA)
Frequency: TX first on 1296.090MHz / RX on my own echo frequency (just like in CW)

I am one week on SV9 but I would prefer you work me on the suggested times because i want to spend some time with my wife on this vacation and also enjoy some HF (CW only) activity as well
as maybe activity from EU-187. Further skeds on request (if necesary). Check www.mmmonvhf.de for updates.

(e-mail: dj1yfk@darc.de)

3D2, Fiji:
Alex PY2WAS (3D2AS), Orlando PT2OP (3D2OP), Rick PY2PT (3D2PT),
Fred PY2XB (3D2XB) and Faria PY7XC (3D2XC) plan to activate
Viti Levu Island (OC-016, WLOTA 0055) on the HF bands on their
route to their T30PY activity. They will be QRV October 8 - 14.
QSL via home call, direct (preferred) or bureau.

5U, Niger:
Christian, 5U5U (ex TL0A) is QRV from Niamey until October 15.
An October 1st, Paul, F6EXV (5U6E) and Jan, DJ8NK (5U8NK) joined
him. They are now QRV with 3 stations on HF/6m in SSB, CW and
Digimodes. QSL 5U5U only direct to: Christian Saint-Arroman,
Chemin de Mousteguy, 64990 Urcuit, France. QSL 5U6E via F6EXV
(direct, bureau and LoTW; OQRS on ClubLog). QSL 5U8NK via DJ8NK
(direct, bureau and LoTW; OQRS on ClubLog).
http://www.5x2013.com/ http://www.premiumorange.com/5u-2012/

8P, Barbardos:
Richard, G3RWL can be heard as 8P6DR until October 17th.
QSL via Homecall.

9M2, West Malaysia:
Shou, JA1XXI, will sign 9M2/JA1XXI from Port Dickson on 20, 15,
10 and 6m from October 5 to 15.. QSL via Homecall.

CT, Portugal:
Members of the "Portuguese Navy Hamradio Club" (CS5NRA)
will activate the castle S. Bruno, on October 6th.
(WCA: CT-00205, DCFP: F-029, DMHP: LX-35). QSL direct only.

G, England:
From October 7 to 12, the special call GB2BT will be active
from the "Bell Hill Telegraph" near Ibberton in Dorset (EU-005,

WAB ST80). QSL via M0XIG.

In October the ISWL-Club will use the following club calls:
GX4BJC/A Walton on the Naze (WAB, TM22, EU-005, WLOTA 1841) in Essex;
GX4BJC/POP Herbie, G6XOU; MX1SWL/A Hartford in Cambridgeshire
(WAB TL27, EU-005, WLOTA 1841) OP Tom, G3RPV
QSLs via G6XOU, eQSL.
http://www.iswl.org.uk/

HB0, Liechtenstein:
Between October 8 - 14, Frank, PA4N, will be QRV as HB0/PA4N
from 80 - 10m in CW with a focus on Asia and Japan.
Info and updates via Twitter: @frankoppedijk. QSL via Homecall.

JA, Japan:
Members of the "Kodaira-city Amateur Radio Club" (JE1YKR)
from Kodaira in the prefecture Tokyo on Honshu (AS-007,
WLOTA 2376, JCC 1012) celebrate the 50th anniversary of their
city using the special call sign 8N1YKR until November 30th.
QSL via Buero.

From October 6th to November 5th, the special call 8J6BAL
will be QRV from the "Hot Air Balloon International Festival"
in Saga (JCC 4101, JCG 41004) on Kyushu (AS-077, WLOTA 0963) QRV.
QSL via Buero. http://www.sibf.jp/e/

From October 1st to November 4th, 8J1ARK will be QRV on all
bands and modes from the 35th "Japan Three-Day March".
QSL via Buero.
http://www.walking.or.jp/tournament/document/35th-threeday.pdf

8J1KS is on the air to celebrate the 70. jubilee of Kisarazu city
(JCC 1206) in Chiba prefecture on Honshu (AS-007, WLOTA 2376) until
the end of the year. Operation will take place on all bands and in
all modes. QSL via Buero.

Also till December 31 there will be 8J1STGY to celebrate the
80th anniversary of Setagaya city in the Tokyo prefecture on
Honshu island (AS-007, WLOTA 2376). QSL via Buero.

Until November 30 watch out for 8N2100MD, a special call to
celebrate the 100th jubilee of the "Aikodai Meiden High School"
in Nagoya (Aichi prefecture) on Honshu (AS-007, WLOTA 2376JCC 2001)
QSL via Buero.

KH0, Mariana Islands:
Kazuo, JH8PHT, will be QRV as AH0KT from October 4 - 9 from the
rental shack on Saipan (OC-086, USi NI002S, WLOTA 1333, WW Loc.
QK25UF) from 80 - 6m. He'll also try to work 10m AM/FM.
QSL via Homecall, only direct, LoTW.

PA, Netherlands:
At the "London International Radiotelegraphic Convention",

100 years ago, the first official callsign prefixes were assigned.
The special station PB100PREFIX will be QRV in October to remember
this historic event. QSL via PB0P.
http://www.PB100PREFIX.nl

On October 5 - 8, the special event call PH4RTM/WHE will be on
the air on the occasion of the "World Horticultural Expo" (THE
FLORIADE) in Venlo on all bands and modes.
QSL via PH4RTM. http://www.floriade.com

SV, Greece:
The "Radio Amateur Association of Greece" (RAAG) will operate
SX100A from October 5 - 7 on the battleship memorial
"Georgios Averof" in "Trocadero Marine Park" (Paleo Falir,
hear Athens).
QSL via bureau. http://www.raag.org/news.asp?ITMID=428&LANG=EN

T8, Palau:
Kiichi, JF1LUT, will be T88IK from October 5 - 10 from
Arakabesan island (OC-009, WW Loc. PJ77fi) on 17 - 6m in SSB.
QSL via Homecall.

TT, Chad:
From October 3 to 16, Silvano, I2YSB, and the "Italian DXpedition
Team" will be QRV as TT8TT from N'Djamena on 160m-6m in
CW, SSB and RTTY. They'll try to put a focus on working Asia and
the US west coast.
QSL via I2YSB (direkt), IK2CIO (Buero), OQRS.
http://www.i2ysb.com http://bit.ly/NVQaav

VE, Canada:
Until October 28, the special call CG3X remembers the 50th
anniversary of the first Canadian satellite "Alouette".
QSL via VE3JPP.

VK9X, Christmas Island:
Pekka, OH2YY, and Pekka, OH1TV, will be QRV as VK9XM from October 6
to 12 with two stations from 40m to 10m in SSB and CW.
QSL via OH2YY.

W, USA: W4O (October 6/7) is a special callsign to celebrate the
24th annual "Oliver Hardy Festival" in Harlem/Georgia.
QSL via K4KNS.
http://ccarc.hamradioman.com/W4O.html

The "North American QRP CW Club" (NAQCC) celebrates its 8th
anniversary between October 7th and 13th. The soecial calls
N1A, N2A, N3A, N4A, N5A, N6A, N7A and N8A will be on the air
from all over the USA.
http://naqcc.info/

Z8, South Sudan:
Keith, W7DXX, acquired a license as Z88Z and plans to operate

an internet remote transceiver there like he previously did
with YI9DXX.
QSL direct via Homecall, LoTW, eQSL.

ZF, Cayman Islands:
Paul, VE1DX, will be QRV as ZF2TK until August 2013.
QSL via Homecall, direct only.

OPs wanted:
Alfredo, IK7JWY, is organizing a DXpedition to Djerba Island
(AF-083, WLOTA 1394, Tunisia) from April 27 to May 4th 2013 and
is looking for operators (ik7jwx2003[at]yahoo.it).

Contests:

3.10. DIG-Birthday-Contest CW
4.10. DIG-Birthday-Contest SSB
6.10. DARC HF-HELL Contest (80m)
6.10. European Sprint Contest
6./7.10. Oceania DX Contest

GTC CW Cup website
----
http://www.raag.org/displayITM1.asp?ITMID=516&LANG=EN

Silent Key:

Michael Owen, VK3KI, president of the "Wireless Institute of
Australia" and president of the IARU-Region III passed away
on September 22nd.

The chairman of the "Ethiopian Amateur Radio Society" (EARS) Sid
T. May, ET3SID passed away on September 25. He was a founding
member of EARS in 1993.

On September 26, Goran Savic, YT2A, died in a plane crash in
Belgrad. As a Serbian Air Force Major he was on a routine training
mission when the accident happened. His colleague ejected from the
plane while Goran stayed inside to sacrifice himself - not hitting

houses and people. He saved many lives.

Our condolences to their family and friends. We don't want to be sad
that we lost them; we want to be thankful that we had them as friends.
We will always remember them.

IOTA: Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)

Island activities

AF-027 FH; Mayotte Island: Sam/F6AML will be QRV as TO2M from October
4 to 19 on Mayotte Island (DIFO FH-001, WLOTA 0376, LOC LH27OE)
from 80 to 10m in CW and SSB. QSL via F6AML (d/B).

AS-101; HS; Malay Peninsula East group: Eddy/ON4AFU will, from October
7 - 24, be QRV from Koh Samui (WLOTA 1384) using the call HS0ZJF/8
on 40 - 10m only in CW. QSL via ON4AFU (d/B).
http://www.on4afu.net

AS-190; HZ; Red Sea Coast North (Tabuk Province) group: A team
consisting of Badar/HZ1BF, Abdul/7Z1CQ, Suli/7Z1SJ, Mohamad/HZ1MD,
Abdullah/HZ1BW, Hani/HZ1HN, Abdullah/HZ1AR, Abdul/HZ1DG,
Firas/HZ1FS and Nhaw/HZ1TL, is planning a DXpedition to Al-Dhahrah
Island. It's the first activation of this group. As 7Z7AB they
will be QRV from October 5 to 11 on 160-10m in SSB, CW and RTTY.
QSL via 7Z1CQ. OQRS will be set up. http://www.dxtool.com/7z7ab/

EU-015; SV9; Crete Island: Andreas/DL9USA spends his holidays on Crete
from October 5 - 15 and will be on the HF bands as SW9C.
QSL via DL9USA (d/B).
http://www.dl9usa.de/

EU-038; PA; Noord Holland/ Friesland/ Groningen Province group:
Ben/DO1BEN will be QRV PD/DO1BEN from October 8 to 14 from
Texel Island (WLOTA 0043, LOC JO23KD). Main activities will
be in the digital modes and a little SSB on the HF bands.
QSL via Homecall (d/B)
http://www.do1ben.de/index.php?page=texel-island-eu-038

EU-114; GU/MU; Guernsey group: GP0PKT/p will be the call sign of
the "Martello Tower Group", Keith/G6NHU, Tony/G0MBA, Yan/M0YNK,
Colin/M1EAK, Chris/M6GSD and Richard/G7HJK on their DXpedition to
Herm Island (WW Loc. IN89sl). From October 5 - 7 they will be
active on all bands and modes. QSL via GP0PKT (B) / G6NHU (d).
http://www.martellotowergroup/gp0pkt

EU-129; DL/SP1; Usedom Island: Between October 7 and 14, Peter
DK2RMP/p will be QRV from Usedom (GIA O-13, WLOTA 1640, DLFF-075).
QSL via Homecall (d/B).

EU-171; OZ; Jylland North group: Mike/DG5LAC and Petra/DB1LPS
will visit Vendsyssel-Thy (DIA NJ-001) from October 6 to 12,
using the call sign OZ/DG5LAC on the HF bands. QSL via DG5LAC (d/B).

The log will be uploaded to LotW and eQSL after the activity.

EU-172; OZ; Jylland East and Fyn group: Harry/PA1H and Nico/PA7PA
will be on the air from Lango Island (DIA FY-025), October 4 to 12,
as OZ/Homecall. Their focus will be on 30m in the digital modes.
QSL via Homecall (d/B).

NA-063; CY0; Sable Island: Murray/WA4DAN and Ron/AA4VK are planning
their third journey to Sable Island (CIsA NS004, WFF CYFF-001, WLOTA
0758). Between October 8 and 17 they'll use homecall/CY0 on the
HF bands with low power and simple antennas. OQRS will be available
at http://www.cy0dxpedition.com

NA-124; XE2; Baja California Sur State South East group:
Felix/XE2I, Saul/XE2HQI, Tony/XE2HVF, Enrique/XE2AA, Fred/KG6HGK,
Norma/XE2JNE, Craig/XE2HWJ, Ana/XE2IHA, Jose/KD6AFA and
Manuel/XE2HUQ are planning to be QRV as XF1F from October 7 - 13
from Isla San Francisco. It's the first activation of this island.
They will work on the HF bands in all modes. QSL via XE2HUQ.

NA-143; W5; Texas State East (Matagorda to Jefferson County) group:
On October 5 - 7, Joe/K5KUA will again be active from Galveston
Island as K5KUA/5 on 30-10m in CW only. QSL via K5KUA (d/B).

Non-IOTA:
Members of the "Delmarva Island Hoppers" plan to activate
Middle Island (USi DE016, Not IOTA, LOC FM28KO) as N3NAH and
Massey Island (USi DE014, Not IOTA, LOC FM28KP) as W3TL on
October 6th. QSL via QRZ.COM.

Hamfest Unites Amateur Radio Enthusiasts:

Posted: 02 Oct 2012 05:42 PM PDT
http://www.eham.net/articles/29071

SEVIERVILLE -- Amateur radio operators from around the country could finally put faces to voices at the 13th annual Ten-Tec Hamfest held Friday and Saturday. The two-day event drew over 1,000 people from nearby counties and elsewhere in the nation, according to Jim Wharton, vice president of Ten-Tec. "Basically, Hamfest is a way for us to give back to the community," Wharton said. "It's an open house, we have tours that go on, we show our products, and we have a flea market out here that's free admission." Ten-Tec primarily builds amateur, or ham, radio equipment, which it sells directly to the consumer. "Every year we try to announce some new products, and we hold a forum where our engineering manager and one of our salesmen talk to costumers about what new products they'd like to see," Wharton said. "It's a way for us to get feedback from our customers, to talk about new products and new features and how they would work."

Ham Radio Enthusiasts Demonstrate Emergency Skills:

Posted: 02 Oct 2012 05:41 PM PDT
http://www.eham.net/articles/29070

Robert Fairfield and Richard Haworth have hobbies that could be critical during a national emergency. Members of the West Valley Amateur Radio Club, the ham radio operators were in Surprise Park on Saturday demonstrating how their radio stations operate as part of National Emergency Preparedness Month sponsored by the Federal Emergency Management Agency. "It's a great hobby, but you can also do some good and help out, too," Fairfield said. The WVARC, which has 130 members, has backed up Banner Boswell and Del Webb medical centers for years with emergency communications and participates with both hospitals in their Homeland Security drills. Haworth, who lives in Sun City, said club members participate in national emergency drills every six months. "Today's drill gives us the ability to practice specifically if there is an emergency," he said. "And many times we take calls from our own homes."

==> + IARU NEWS: PETER LAKE, ZL2AZ, APPOINTED CHAIRMAN OF IARU REGION 3

The Directors in IARU Region 3 have voted to appoint Peter Lake,
ZL2AZ, of Wellington, New Zealand, as the Chairman of IARU Region 3. He
replaces Michael Owen, VK3KI, who passed away unexpectedly last month.
Owen, who was also President of the Wireless Institute of Australia,
had served as Region 3 Chairman since 2006. "I am extremely grateful to
my fellow Directors for their support in this difficult time, and for
the procedural work by [IARU Region 3] Secretary Ken Yamamoto, JA1CJP,
to formalize an appointment," Lake said in a statement. "I will do my
best to carry through all the work that we have in progress, much of it
due to items and ideas put in place by Michael. It is my privilege to
```

have the opportunity to serve you, the Member Societies and fellow amateurs in Region 3." Read more here <http://www.arrl.org/news/peter-lake-zl2az-appointed-chairman-of-iaru-region-3>.

==> + ARRL INVITES NOMINATIONS FOR 2012 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2012 ARRL International Humanitarian Award. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize those radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster. As one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need. Read more here <http://www.arrl.org/news/arrl-invites-nominations-for-2012-international-humanitarian-award>.

==> + CHECK OUT THE NOVEMBER ISSUE OF QST

Ever since the dawn of civilization, man has looked to the heavens and pondered his existence. Thousands of years later, we still look to the stars, but with radio, the stars seem a little closer. The November issue of QST features a group of middle school students from Arizona who reached for the stars with a high-altitude balloon launch and a QSO with the International Space Station. Join them on their adventure as you delve into the latest issue of QST.

Kaci Heins, KF7RCV, is a sixth grade teacher in Flagstaff, Arizona. In addition to her teaching duties, she leads the Space Spartans, an after-school science club. In her article "Reaching for the Stars with Radio," Heins tells how she used Amateur Radio -- including a high-altitude balloon launch with a repeater and a radio telescope project -- to capture her students' imaginations, both in and out of the classroom. Many states have laws against using cell phones in your car, making it illegal to talk or text behind the wheel. But what about using your mobile rig while driving? In his article "Distracted Driving and Amateur Radio -- A Civil (Law) Perspective," ARRL Volunteer Counsel John Swartz, WA9AQN, points out that operating mobile isn't just a legislative issue.

Amateur Radio clubs are always looking for projects they can do together. In his article "A Club Project -- Automatic Mobile Power Control," Jim Cook, W8WKE, details a simple and inexpensive APRS group project to give hams a way to experience the thrill of the workbench. With the advent of computers with built-in sound cards, the digital modes have gained popularity. Thomas W. Brooks, KE1R, has always been

fascinated -- and mystified -- by PSK31. In his article "PSK31 -- A Different View," Brooks found a way to not only hear the PSK31 tones, but to see them, too.

ARRL Contributing Editor H. Ward Silver, N0AX, takes a look at the Array Solutions AIMuhf vector impedance analyzer in this month's Product Review. He says this accessory "offers reflection and impedance-only measurements for dedicated and popular measurement functions. The host software creates easy-to-read displays and easy-to-use pre-programmed functions." ARRL Test Engineer Bob Allison, WB1GCM, checked out the DZKit HT-7 40 meter AM handheld transceiver, saying that it "is a fully functional single channel, crystal controlled 40 meter AM handheld transceiver kit that is fun to build and fun to operate. Users must accept the challenges of making contacts with low power and limited antennas while portable."

Of course, there are the usual columns you know and have come to expect in the November QST: Happenings, Hints & Kinks, The Doctor is In, Short Takes, Technical Correspondence, Vintage Radio, How's DX? and more, including lots of new books and products. Look for your November issue in your mailbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join, or to renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + SILENT KEY: GORAN SAVIC, YT2A, KILLED IN PLANE CRASH

While on a routine training mission, Serbian Air Force Major Goran Savic, YT2A, was killed trying to direct his plane away from a residential area in Nova Pazova, Serbia. According to Nova Pazova Municipal President Dorde Radinovic, the plane crashed into the yard of a private house. Due to Savic's skill in maneuvering the aircraft, there were no casualties on the ground. "The aircraft went down between two structures, Radinovic explained to B92 <http://www.b92.net/eng/news/society-article.php?yyyy=2012&mm&dd=26&nav_id=82361>,
a Serbian news outlet. "One pilot ejected, while the other made an effort until the last moment (before ejecting) not to hit a house in this residential area. Once the plane stopped, there was no explosion either." According to B92, Savic was found close to his plane and was in serious condition when medical teams reached him. He later died at the hospital. Savic's co-pilot, Lieutenant Colonel Tomislav Becagovic, managed to jump out of the aircraft before impact and survived the crash.

==> + PUBLIC SERVICE: THE WEATHER CHANNEL TO BEGIN NAMING WINTER STORMS

Beginning this winter, The Weather Channel will begin naming what it calls "noteworthy winter storms." As The Weather Channel explained on its website, "[a] storm with a name is easier to follow, which will mean fewer surprises and more preparation. In addition to providing information about significant winter storms by referring to them by

name, the name itself will make communication and information sharing in the constantly expanding world of social media much easier." Unlike the National Hurricane Center -- which has named tropical storms and hurricanes since the 1940s -- the National Weather Service does not name winter storms. Read more here <http://www.arrl.org/news/the-weather-channel-to-begin-naming-winter-storms> <http://www.arrl.org/news/the-weather-channel-to-begin-naming-winter-storms>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things the ARRL is doing on behalf of its members. This installment -- which covers the month of September -- takes a look at how the ARRL is laying the groundwork for its 100th birthday celebration, planning for the 2015 World Radiocommunication Conference, Section Manager training at ARRL Headquarters, operations approved for DXCC credit, improvements to W1AW, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-50>.

==> + AT THE WORKBENCH: ATTENTION KIT BUILDERS -- THE ARRL WANTS TO HEAR FROM YOU!

The ARRL wants to hear from kit builders about simple, useful, educational and exciting kits. These kits should have a high probability for success and would serve as stepping stones for more advanced projects. We are looking all sorts of kits, but RF detector kits that work in the 380 MHz-2.5 GHz range are of special interest. The kits should also have a "Wow, I built this and it works!" factor. If you know of such a kit, please let us know by filling out a simple form here <http://www.arrl.org/technology> by October 31.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: A coronal mass ejection (CME) hit the Earth on September 30, causing a jump in geomagnetic indices. The planetary A index on October 1 was 31, while the K index went as high as 7, making aurora visible across the northern tier of the United States. The far-northern latitude college A index was 23 (near Fairbanks, Alaska), about the same as the mid-latitude index -- which was 21 -- in Fredericksburg, Virginia. It is common during a geomagnetic disturbance to see indices go much higher toward the poles than anywhere else. The average daily sunspot numbers declined 8.3 points to 73, while the average daily solar flux was off exactly 1 point to 128.7. The latest prediction from NOAA/USAF has solar flux on October 4-7 at 110, 105 on October 8, 100 on October 9-11, 115 on October 12-13, 120 on October 14, and then rising to a peak of 150 on October 20. The same forecast has solar flux rebounding to 150 on November 16 after reaching a minimum of 110 on November 4-5. The predicted planetary A index is 5 on October 4-14, then 8, 12 and 10 on October 15-17, 5 on October 18-25, 10 on October 26, and then reaching a peak of 15 on October 29. Look for more on the ARRL website on Friday, September 28. For more information concerning radio propagation, visit the ARRL Technical

Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL RECOGNIZES: THOMAS SCHAEFER, NY4I, WINS SEPTEMBER QST COVER PLAQUE AWARD

The winner of the August QST Cover Plaque award is Thomas Schaefer, NY4I, for his article "Your Antenna is on Fire!" Congratulations Thomas! The QST Cover Plaque Award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the October issue today.

==> MFJ CELEBRATES 40TH ANNIVERSARY

In October 1972, Martin F. Jue, K5FLU, started MFJ in a hotel room in Starkville, Mississippi. 40 years later, MFJ Enterprises <http://www.mfjenterprises.com/> consists of six different ham radio companies that manufacture more than 2000 products. To celebrate this milestone, MFJ will host ARRL Day in the Park <http://www.mfjenterprises.com/dayinpark.php> this weekend (October 6-7) at McKee Park <http://www.mfjenterprises.com/> in Starkville. An ARRL-sanctioned event, ARRL Day in the Park will feature tours of the MFJ facilities (including the factory and metal shop), tailgating, forums, demonstrations and lunch -- all at no cost to attendees. Special Event Station K5MFJ <http://www.mfjenterprises.com/dayinpark_event.php> will also be on the air. ARRL Chief Operating Officer Harold Kramer, WJ1B, and ARRL Mississippi Section Manager Malcolm Keown, W5XX, will represent the ARRL. Click here <http://www.mfjenterprises.com/dayinpark.php> to go to the ARRL Day in the Park website.

==> ARRL HQ SEEKS APPLICANTS FOR QST TECHNICAL EDITOR

The League is currently looking to fill the position of QST Technical Editor at ARRL Headquarters in Newington. Connecticut residency or the ability to relocate to Connecticut is required. The QST Technical Editor will provide leadership to the technical Amateur Radio community by developing and promulgating a vision of the state of the Amateur Radio art through the pages of QST.

Qualifications:

- Broad knowledge of and experience with Amateur Radio and electronics.
- Broad knowledge of and experience with the design and construction of Amateur Radio equipment, antennas and accessories.
- Broad knowledge of and experience with Amateur Radio software.
- A bachelor or graduate college degree, preferably in a technical field. Exceptional related work history can be substituted for a degree.
- A minimum of three years of writing or editing experience.
- Demonstrated ability to work effectively and productively with a

variety of people.
- Proficiency with Microsoft Office, especially Word and Excel.
- An Amateur Extra class license.

Click here <http://www.arrl.org/employment-opportunities> for more information and an application. To apply, please send your cover letter and resume via e-mail <mlevesque@arrl.org?subject=Technical20Position>, or complete the application, print it out and mail it with your resume and cover letter to Monique Levesque, ARRL, 225 Main St, Newington, CT 06111. You can also fax your application, cover letter and resume to 860-594-0298. Please include your salary history and salary requirements. The ARRL is an equal opportunity employer.

==> THIS WEEK IN RADIOSPORT

This week:

- October 5 -- NCCC Sprint
- October 5-7 -- YLRL DX/NA YL Anniversary Contest
- October 6 -- TARA PSK Rumble Contest; EU Autumn Sprint (SSB)
- October 6-7 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; California QSO Party; EPC Russia DX Contest; Oceania DX Contest (SSB); WAB HF Phone Contest
- October 7 -- UBA ON Contest (SSB)
- October 10 -- 10-10 International 10-10 Day Sprint; NAQCC Straight Key/Bug Sprint
- October 10-11 -- CWops Mini-CWT Test

Next week:

- October 12 -- NCCC Sprint
- October 13 -- EU Autumn Sprint (CW); FISTS Fall Sprint
- October 13-14 -- Arizona QSO Party; Pennsylvania QSO Party; Makrothen RTTY Contest; Oceania DX Contest (CW); QRP ARCI Fall QSO Party; Scandinavian Activity Contest (SSB)
- October 14 -- North American Sprint (RTTY); SKCC Weekend Sprintathon

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

- Have you built a project using an Arduino microcontroller?
- Do you subscribe to any Amateur Radio e-mail lists (reflectors)?

- Do you prefer extended conversations on the air, or short contacts?
- Was public service the primary motivation for getting your Amateur Radio license?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the January 2013 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> AMATEUR ASTRONOMY GROUP SOLICITS PAPERS FOR NEW MEXICO CONFERENCE

The Society of Amateur Radio Astronomers (SARA <http://www.radio-astronomy.org/>) -- an organization for those interested in radio astronomy -- is soliciting papers for presentation at its 2013 Western Regional Conference <http://www.radio-astronomy.org/node/394>, February 9-10, 2013 in Socorro, New Mexico. Papers on radio astronomy hardware, software, education, research strategies, observations and philosophy are welcome. SARA members or supporters wishing to present a paper should e-mail <westernconference@radio-astronomy> a letter of intent, including a proposed title and informal abstract or outline no later than December 1, 2012 (please inform SARA if more time is needed). Be sure to include your full name, affiliation, postal address and e-mail address, and indicate your willingness to attend the conference to present your paper. Submitters will receive a response via e-mail, typically within one week. Formal printed Proceedings will be published for this conference and all presentations can be made available on CD.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- October 6-7 -- ARRL Day in the Park <http://www.arrlmiss.org/>, Starkville, Mississippi

GOOD NEWS SPREADS FAST!
LTE Trial in Bendigo Ends

The ACMA has advised the WIA that the 700 MHz LTE trial in the Bendigo
region has now ended. In effect this means that Advanced Amateur licence
holders that were within the exclusion zone can now apply to the ACMA for
a variation to their existing licences to operate up to 1 kW on the primary
HF bands during the trial period. More information on how to apply can be
found on the WIA website at
http://www.wia.org.au/licenses/licensing/hfhighpowertrial/

The 700 MHz LTE trial in the Perth area is still continuing where an
exclusion zone for High Power HF operation is in place. Details of the

exclusion zone can be found on the WIA web site.

FIELD DAY 'HEADS UP'
November 24-25 is the SPRING VHF-UHF Field Day

The VHF-UHF Field Days provide VHF-UHF operators with the opportunity to "head for the hills" and see how far they can work.

The Field Days have separate sections for single and multiple operator stations. The duration of the Field Day is 24 hours, but there are also 8 hour sections for operators who may not be able to camp overnight.

Most club stations prefer to operate for the full 24 hours.

The Field Days also generate plenty of activity from home stations, so there is also a separate Home Station section.

The scoring is based on grid locator squares. Each new square worked gives quite a boost to the score, and this encourages the entrants to operate from locations in grid squares that normally don't have a great amount of amateur activity.

There are no mode restrictions, except that all contacts must be simplex so contacts through repeaters or satellites are not allowed.

It is possible to do very well with only modest antennas if you pick a good hilltop. Another option, if your station is easily transportable, is to operate from more than one grid square during the contest period.

The overriding aim is to get away for the weekend and have fun!

But next after that, the aims are:

to encourage more activity on VHF and microwave bands;

to encourage people to work greater distances than usual by operating portable and to provide opportunities for people to activate or work into new grid squares.

HAMS ACROSS AUSTRALIA.

INVITATION TO IEEE LECTURE

You are all invited to attend a Technical Seminar AT JCU School of Engineering and Physical Sciences & IEEE Northern Australia Section.

Tuesday 9th October 5:30pm Building DA 003, Room 002 - Humanities Block, James Cook University, Douglas Campus.

Seminar is by Dr Trevor Bird, President-elect of the IEEE Antennas & Propagation Society, Principal, Antengenuity & CSIRO Fellow

>From Wireless to Astronomy: lessons from an engineering career

The wireless revolution in progress has produced dramatic changes in our work and social activities. The speaker, Dr Bird, was fortunate to have witnessed first-hand some of the wireless research that caused some of these changes.

In the 1980's and early 1990's he participated in a project that aimed to achieve the then ten times the current data rate for indoor wireless local area networks. His research in antennas and propagation for WLANs anticipated later research by a CSIRO team that resulted in a patented approach that is now incorporated in most wireless chips in use today.

(Gavin VK4ZZ)

TARC WIA Exams Information

Exam sessions in the North Queensland region are held on demand with WIA Assessors and assessment packs available for all 3 levels of licensing.

Contact theTARCinc WIA Exams Regional Co-ordinator Ray/VK4NET on home phone 47 23 43 51 to have a mutually suitable date and WIA Assessors assigned to your assessment.

MIENA HAMFEST

This is the big VK7 hamfest that happens every two years in the Central Highlands of Tasmania thanks to the Central Highlands Amateur Radio Club of Tasmania.

Miena is booked for the first of December 2012 with the usual line up of traders making the journey across the ditch.

NWT-ATV Group JOTA/JOTI

Planning for this event is continuing and the Club will again be providing resources and operators over 2 days at the Paton Park Camp at Ulverstone.

Operators offering their assistance at this time with communications and control are Neil VK7NX, Ross VK7WP, Paul VK7HPD, Jim VK7JH, Graham VK7NGA, and Tony VK7AX.

An invitation is extended for anyone else to assist, (you do not need to have a Call) as there will be a full call operator in attendance at all times. Please let the Club know if you are interested.

October NTARC Meeting

To be held on Wednesday 12 October, this will again be the yearly pilgrimage to Mt Barrow. Last year this was a really great evening and those that attended thoroughly enjoyed themselves, especially in the extended twilight that came with the introduction of daylight saving just days before.

This formula will also apply in 2012, so get along.

Arrive any time in the afternoon and NTARC have the site overnight so if you are appropriately equipped, why not camp until next morning. There are members who regularly do just that and they would love to have your company.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, AR Victoria and the WW sources of the WIA.

Peter Lake, ZL2AZ, Appointed Chairman of IARU Region 3

The Directors in IARU Region 3 have voted to appoint Peter Lake, ZL2AZ, of Wellington, New Zealand, as the Chairman of IARU Region 3. He replaces Michael Owen, VK3KI, who passed away unexpectedly last month. Owen, who was also President of the Wireless Institute of Australia (WIA), had served as Region 3 Chairman since 2006.

"I am extremely grateful to my fellow Directors for their support in this difficult time, and for the procedural work by [IARU Region 3] Secretary Ken Yamamoto, JA1CJP, to formalize an appointment," Lake said in a statement. "I will do my best to carry through all the work that we have in progress, much of it due to items and ideas put in place by Michael. It is my privilege to have the opportunity to serve you, the Member Societies and fellow amateurs in Region 3."

Lake -- who has been a licensed amateur for more than 50 years -- has been involved with IARU activities for more than 25 years and a Director of Region 3

since February 2005. He began his professional career as an engineer, first with the New Zealand Post Office and then with Telecom New Zealand. He followed this with 14 years at a small and specialized telecommunications consulting company in Wellington that included a wide variety of assignments in the Pacific, Asia and Southeast Asia.

�My �style� will probably be different from Michael�s in some ways,� Lake explained, �but our goals are the same -- to ensure a growing and successful IARU Region 3.�
[arrl.org]

SOUTH SUDAN, ON THE AIR

The Republic of South Sudan has issued its first amateur radio licenses. The call Z81A went to Jim Pratt who holds the United States call letters of K7QI.

The second license issued was Z81D. It went to Diya Al Sadi, YI1DZ. Both are reportedly now on the air.
(Above from various DX news sources)

LOOKING AHEAD TO WRC-15

>From an Amateur Radio perspective, the 2012 World Radiocommunication Conference (WRC-12) was very successful. According to IARU Secretary Rod Stafford, W6ROD, the IARU Administrative Council will meet in the next 45 days and will address the agenda items for the 2015 World Radiocommunication Conference (WRC-15) with an eye to building the best strategy for dealing with those items in a way that is most favorable to the Amateur Radio Service. While the IARU will be watching all agenda items in 2015, there is one agenda item that focuses on the Amateur Radio Service, and another four that may have an effect the Amateur Radio Service.
[ARRL Letter]

End of an era for MKARS at Bletchley Park

On the 1st January, 2013, the eighteen year association of the Milton Keynes Amateur Radio Society (MKARS) and Bletchley Park will finally come to an end, due to MKARS having to vacate their current clubhouse on the estate.

The main reasons for Bletchley Park serving notice on MKARS are due to;

The building currently occupied by MKARS as their clubhouse, being required to make way for the creation of a new park entrance and access road to the coach park.

No additional space being available on the estate which MKARS could occupy.

It has been deemed that the Milton Keynes Amateur Radio Society will not fit into the future World War II profile of the Bletchley Park Museum.

Having attained Museum status, Bletchley Park will eventually have regular opening and closing times after which there will be no public access.

The Milton Keynes Amateur Radio Society and its members have been both privileged and proud to have been associated with the world renowned Bletchley Park, its history, its outside events and its place in the public consciousness. By representing the voice of both Amateur Radio and Bletchley Park to the world, the call sign GB2BP has made the Milton Keynes Amateur Radio Society friends in many countries, creating interest in the amazing work that was carried out within Bletchley Park during WWII.

Although GB2BP may no longer be in residence on Bletchley Park after the 1st January, 2013 it will re-appear occasionally as a special event station supporting public events on Bletchley Park.
(Lyn Vk4SWE EI/VK4EI)

(Rob.. you've been to Bletchley Park, haven't you?)

Distracted Driving Bulletin: Ontario Extends Exemption

The Radio Amateurs of Canada are today announcing written confirmation from Minister Bob Chiarelli of the Ontario Provincial Government regarding a five year extension of exemption to the Ontario distracted driving law. In his letter, Minister Chiarelli explains that the current exemptions for both Amateur Radio and Two Way Commercial Radios will be extended until January 1st, 2018.

Minister Chiarelli expresses his hope that in that time commercial hands free alternatives will be found for two way radios. While RAC finds victory in the five year extension, a permanent solution is desired and required.

The Radio Amateurs of Canada will continue to pursue a permanent exemption for Amateur Radio operators in Ontario. Similar exemptions already exist in many other provincial jurisdictions in Canada - thanks in part to the efforts of local amateurs and RAC's national strategy to address distracted driving legislation.

WEIRD AND WONDERFUL

Nestle to Find UK Customers via GPS Chips in Candy Bars

Chips in candy bars? No, not potato chips, but silicon chips.
In a new twist to the old 'Winning Ticket in a Chocolate Bar Wrapper' Trick, Nestle have announced a marketing campaign in the UK that will disguise 6 self-activating GPS location trackers in wrappers of the companies various chocolate bars.

Once activated, Nestle representatives will track down the lucky winners within 24 hours and exchange the tracker for a cheque in the amount of ten

thousand British pounds.

Other modernizations on this stalwart of the confectionary industry advertising, is the inclusion of QR-codes -- 2-dimensional barcodes that can be read by smartphones -- to a portion of the public advertising posters. Other posters will have 'NFC' added; NFC is Near Field Communications, a technology building upon 13.56Mhz RFID tags that is being used for Access Control, Event Ticketing, Contactless Payments and Media Sharing; and starting to be found embedded in the recent generation of smart phones.

So, it appears Nestle values your 3-minute chocolate eating experience at around 200,000 pounds per hour. Not a bad job, if you can get it, and not an Oompaloompa in sight!

OPERATIONAL NEWS - DATELINE 2012

WW Oceania Dx Contest SSB October 6
WW Oceania Dx Contest CW oceaniadxcontest.com Oct 13
VK Spring VHF / UHF Field Day November 24-25

Distance Based Scoring Proposal.

A proposal for a change to distance based scoring has been published by Andrew VK1DA and Colin VK5DK. It follows several years of discussion among some of the operators in the VHF/UHF Field days, who have found that the scoring system used in these contests seems to have problems for operators in country areas. This proposal has been developed after several months of discussion via email.

The proposal outlines the problems seen with the grid square based scoring scheme. It points out that grid squares, apart from not being square, have different sizes depending on your latitude. Thus the grid square scoring system does not give all vk operators the same rewards for making the same distance contacts.

While many operators think of vhf dx as the contacts made on 6m or (much less often) on 2m via the ionosphere, the primary interest of VHF and UHF specialists is in tropospheric propagation which does not involve ionospheric reflection. The distance spanned by contacts is the primary measure of the difficulty of a contact, with the vital factors being the power used, the antenna gain and receiver sensitivity combined with operator skill to make successful long distance contacts.

The sponsors of the proposal believe that instead of rewarding operators on the basis of the grid squares worked, a distance based score would make more sense for vhf-uhf contacts and could be consistently applied in all parts of the country.

Well, what about rovers? Rovers are stations who try to operate from as many different grid squares as possible. As a distance formula

would not work well with rovers, it has been suggested that the rover stations would continue to use grid squares for their scoring. They could continue to make contacts with all stations, the contacts qualifying both operators for the points applying to their operating category.

The other major change proposed is the introduction of a separate category for the 6m, 2m and 70cm bands. This category caters directly for those operators who have multiband radios such as the popular FT857, FT897, IC706, IC7000, TS2000 and who do not have equipment for any higher bands. This would take away any concerns about the higher weighting given to the microwave bands. This proposal caters for the very large number of operators who are equipped for 6m, 2m and 70cm via their multiband radios, and gives them a separate category to compete in. Colin and Andrew think this will boost operator numbers in the event and give those excellent radios a little more use and a lot more radio amateurs who already have suitable equipment will consider operating in these events.

The proposal is available on the net for all to read. The address is simple: go to vk1da dot net (vk1da.net) and you'll find the first item on the home page is a link to the proposal. After reading the proposal you are invited to participate in a short survey which asks for some details of your past operating bands in these events, your future plans, whether you like the ideas in the proposal and invites you to make any other suggestions that you think will improve these field days in some way.

Just repeating that web address: go to vk1da.net and follow the links.
(Andrew VK1DA & Colin VK5DK)

2012 Remembrance Day Contest Winners Announced

http://www.wia.org.au/members/contests/rdcontest/
As promised on the WIA RD Contest page, the winners of this year's event were announced around September 25th with full details available in a number of files on the contest homepage, as well as a report to appear in the November AR magazine.

A quick run-through of the headline winners includes: VK7NET winning the Single-Op Phone category, and VK7RF taking out Single-Op CW.
Single Op Mixed - VK6ZRW, QRP Phone - VK6FLAB, QRP CW - VK3QB,
QRP Mixed - VK2IG, Multi-Single - VK2GGC, Multi-Multi - VK4XA

The Teams category was taken out by Wallaroo with 1898 points and the Lockyer Legends were close behind on 1819 with Elizabeth ARC in third.
Congratulations for VK2FWWD, VK6FMON and VK4FAAS who took out the top 3 placings in the Foundation Licence category.

Another exceptional year of participation and a hotly contested event under the new rules format.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

HAMS FROM 5 COUNTRIES HELP PUT KOSOVO ON THE AIR FOR THE FIRST TIME

On September 12, the Autoriteti Rregullativ i Telekomunikacionit (ART) -- Kosovo's telecommunications regulatory authority -- created the necessary legal framework for the development of an Amateur Radio Service in the Republic of Kosovo by approving its Regulation for Amateur Radio Services.

Although not formally assigned a prefix by the International Telecommunication Union, Kosovo will use the Z6 prefix. Currently, Kosovo does not count toward the ARRL's DXCC Award, as it has not been assigned a prefix by the ITU (per DXCC rule II.1.a), nor has it been recognized by the United Nations (per DXCC rule II.1.b).

Nigel Cawthorne, G3TXF, and Bob Barden, MD0CCE/N2BB -- members of the Chiltern DX Club (CDXC) -- were part of a team of operators led by IARU Region 1 President Hans Blondeel Timmerman, PB2T, that activated Z60K, the first Amateur Radio station in the Republic of Kosovo. Along with Cawthorne, Barden and Blondeel Timmerman, the team included the following radio amateurs: Nik Percin, 9A5W; Emil Balen Zdravko, 9A9A; Emir Mahmutovic, 9A6AA; Martti Laine, OH2BH; Jorma Saloranta, OH2KI, and Pekka Holstila, OH2TA.

Click here http://www.arrl.org/news/a-first-hand-look-at-the-z60k-activation-in-kosovo for Cawthorne's and Barden's account of the Z60K activation.

DXCC Desk Approves 11 Operations for DXCC Credit

On September 19, the ARRL DXCC Desk approved the following 2012 operations for DXCC credit:

3B8/IW5ELA (Mauritius)
9A8VB (Croatia)
4O7VB (Montenegro)
E40VB (Palestine)
E7/UA4WHX (Bosnia-Herzegovina)
EY8/UA4WHX (Tajikistan)
JY8VB (Jordan)
UN/UA4WHX (Kazakhstan).
YU9VB (Serbia)
Z38VB (Macedonia)
ZA/UA4WHX (Albania)
[ARRL]

DXCC Validity
Perhaps just a reminder for the keen DX'ers, and hopefully of some help to the newbies; there are occasional DXpeditions that have not been validated or approved for DXCC award purposes. Typical reasons include shipboard operation, operation not authorised but the relevant radio regulatory body, no documentation provided to prove operations, or that the location is not a recognised DXCC entity.

There are lists collated in various places, for instance on www.OK1RR.com, but if you have a particular query about a DXpedition or strange details on a QSL card, contact the DXCC desk at the ARRL directly. dxcc@arrl.net(check for accuracy)

WIRELESS HILL CENTENARY -- SPECIAL CALLSIGN

The aboriginal people once called Wireless hill Yagan's Lookout. Providing perfect views of the surrounding area In 1912 the federal government built one Australia first telecommunication stations. Using Morse code the telecommunication station communicated with ships off the Australian coast using a 120m mast.

In 1916 during the WWI it was used by the RAN using 60 KW Poulsan arc transmitter and valve operated receivers. In 1927 Applecross wireless station became a feeder station for international radio grams weather reports news bulletins and press reports. The awa installed a short wave beam system which extended transmitting range of stations enabling direct communication between England and Australia.

In 1932 the radio station 6PR starting broadcasting from Wireless Hill
In 1955 the WAVHF Group was established
In 1959 the first television in WA TVW7 was transmitted via the Applecross wireless station
In the 1960's 2 Rhombic and 2 log period antennas were installed for the NASA Space Mission

The Park played a significant role in the security and defence of the Australian coastline from 1912 thru to 1968. During the WWI the Applecross wireless station received an emergency signal from the Cocos Islands giving the position of German Light cruiser SMS Emden. The station relayed the info to the HMAS Sydney which was escorting a troop convoy close to the Cocos Island. The Sydney gave chase and captured the Emden in one of Australia's most famous sea battles of the WWI.

The Wireless hill centenary starts on the 29th of September for 2 weeks over the school holiday period. The special call sign of VI6VIP has been allocated the WAVHF group for this period. So get on Air and contact VI6VIP and participate in this special event. The WAVHF group also welcomes all clubs and their members to visit wireless hill to activate this special call sign. The allocation of VI6VIP is in tribute to the first call sign used at Wireless Hill.

[AUDIO UPLOADED]

Papua New Guinea Islands Tour

An international team will visit five islands belonging to Papua New Guinea between October 19th and November 4th.

Operators mentioned are Derek G3KHZ, Hans SM6CVX, Hans-Peter HB9BXE, Eddy K5WQG, Axel DL6KVA and Non-ham Stig Nyman.

The team will use the boat "M/V Barbarian", and start their travels from Kokopo in New Britain on November 18th, sailing via Kavieng to Emirau.

The islands scheduled by the full team will be:

October 20-24th - Callsign P29VCX; Emirau Island (OC-103) in the St. Matthias IOTA Group. QSL via SM6CVX.

October 27-31st - Callsign P29NI; Tatau Island (OC-099) in the Tabar IOTA Group. QSL via G3KHZ.

November 2-4th - Callsign P29VPB; Lihir Island (OC-069) in the Lihir IOTA Group. QSL Manager TBA.

The main team will fly home on November 6th. However, Hans SM6CVX and Stig Nyman will continue to Buka on the "M/V Barbarian", and plan to activate the following:

November 6-9th - Callsign P29VCX; Buka Island (OC-135) in the Solomon Island IOTA Group. QSL via SM6CVX.

November 9-12th - Callsign P29VCX; Manu Island (OC-205) in the Admiralty Island IOTA Group. QSL via SM6CVX.

Activity will probably be 40-10 meters using mostly CW with some SSB just like last year's activity.

They do have a Web page at: http://www.p29ni.yolasite.com
OPDX

PB 100 PREFIX, Netherlands Special Event

To commemorate the 100th anniversary of the ITU Prefixes, look for special event station PB 100 PREFIX to be active until October 31st.
QSL via PB 0 P.

After the tragic loss of the Titanic (Call sign MGY, the, "M", is from the Marconi company) in April 1912, there was an acknowledgement that there should be international standards for radio communications. Therefore, the leading colonial countries planned several meetings in the aftermath of the loss of the Titanic.

For more details, visit: http://www.PB100PREFIX.nl

THE QNEWS WORK BENCH - the nuts and volts report Measure Twice cut Once.

A CHANGE IN THE SPECTRUM OF DATA NETWORKS

After its 15 years on the market, the now ubiquitous 'Wi-Fi' computer network standards are found in mobile phones, remote control toys, medical and industrial controls and just about anywhere else you can think of. Wi-Fi uses 2.4Ghz and 5Ghz RF spectrum to deliver between 1Mbit/s and 150Mbit/s, with more recent devices employing MIMO -- 'Multiple In, Multiple Out' antenna arrays -- to provide concurrent data transfers in more than one direction, as a strategy to increase overall network throughput to areas serviced by individual devices.

The new Wi-Fi draft standard -- 802.11ac -- is set to double the MIMO streams from 4 to 8, and employ 80Mhz and 160Mhz bandwidths to ramp up speeds to 866Mbit/s.

Research at the University of Edinburgh is investigating light based data networking. Dubbed 'Li-Fi', as in 'Light Fidelity', they're using modulated LEDs and photosensors and have already reached datarates of 130Mbit/s.

Professor Harald Haas calls the system 'D-Light' and has started an incubator project to produce and market a retrofit kit to bring speeds up to 50Mbit/s to your home or work.

As with Wi-Fi, this light based data system uses OFDM (orthogonal frequency division multiplexing) and speeds of 1Gbit/s and up are being discussed. In contrast to an RF solution, directed, filtered or perpendicular light channels are just a few of the ways to restrict access and interference between adjacent network devices, and that will further increase the potential network throughput in congested areas.

Harald Haas' TED conference presentation entitled "Wireless data from every light bulb" can been viewed at TED.com

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh ‘and always if the news room is to read your item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Episode 25: Popular Communications Magazine Hits 30

-

Episode 26: Taking Ham Radio to the Public

Popular Communications magazine (part of the CQ family) had it's 30th anniversary

as of the September issue. We had a nice talk with editor Richard Fisher KI6SN

about that, shortwave listening, and their new Monitoring Station Certificate.

Why is it important to do ham radio publicity, and how do you do it? Ed Tyler N4EDT

is an ARRL Public Information Coordinator, the top PR guy in the Alabama Section,

and he has some interesting and unique ideas about how we should talk to the

people out there... and how you can do it when it falls to you.

Our thanks to the guys here at QRZ.COM for providing this channel to announce

our programs, and a place for viewers (or not) to comment on them.

Watch these episodes at our web site, www.HamRadioNow.tv.

NASA's TechEdSat Launches from International Space Station:

Posted: 04 Oct 2012 05:12 PM PDT
http://www.eham.net/articles/29093

WASHINGTON, Oct. 4, 2012 -- NASA engineers, student interns and amateur radio enthusiasts around the world are listening for signals from a small, cube-shaped satellite launched into orbit from the International Space Station Thursday. The satellite, dubbed "TechEdSat," was released at 11:44 a.m. EDT from the new Japanese Small Satellite Orbital Deployer aboard the space station. TechEdSat measures about 4 inches (10 centimeters) on a side and carries a ham radio transmitter. It was developed by a group of student interns from San Jose State University (SJSU) in California with mentoring and support from staff at NASA's Ames Research Center in Moffett Field, Calif. TechEdSat arrived at the space station aboard the Japanese H-II Transfer Vehicle July 21 and the station's Expedition 33 crew processed it for launch."TechEdSat will evaluate plug-and-play technologies, like avionics designed by commercial providers, and will allow a group of very talented aerospace engineering students from San Jose State University to experience a spaceflight project from formulation through decommission of a small spacecraft," said Ames Director S. Pete Worden.

Madison County Ham Radio Operators to Simulate Emergency Saturday:

Posted: 04 Oct 2012 05:11 PM PDT
http://www.eham.net/articles/29092

HUNTSVILLE, Alabama - Ham radio operators will simulate an emergency Saturday to test communication preparedness for widespread events such as the April 27, 2011, tornado outbreak. Amateur Radio Emergency Services will begin the regional simulated emergency test sometime after 8 a.m. Saturday. A scenario will be announced at an unspecified time over the air, prefaced with the alert: "Exercise, exercise, exercise." Local ham operators will establish a communications network that works with those of Madison County Emergency Management Agency, the National Weather Service, the Red Cross and other local agencies.

//
Radio Group Offers Broadcast Experience to Students:

Posted: 04 Oct 2012 05:09 PM PDT
http://www.eham.net/articles/29091

In the age of cellular communication and the Internet, ham radio may seem like an antiquated means of communication. However, the practice still is alive and well, and the Oklahoma Student Amateur Radio Club is part of it. The group encourages students to participate in the amateur radio community by providing access to the National Weather Center's ham radio equipment, which is of a much high caliber than the cheaper hand-held or mobile devices, said Connor Keef, meterology sophomore and the club's vice president. Ham radio and amateur radio are used interchangeably to describe the licensed use of a radio frequency that is set aside for purposes ranging from recreation to emergency communication, according to the National Association of Amateur Radio's website. Traditionally, meteorology majors have filled the club because of the club's association with the School of Meteorology, Keef said. However, he and club president Megan McClellan said they are hoping to expand to a broader group of students. "It doesn't just necessarily need to be meteorology majors or engineering majors in the club," McClellan said. "What we really want to work for is having a diverse club. We can have anyone from education majors to aeronautical engineers."

4th Annual - 4x4 Ham Special Event from Titan Missile Museum in Green Valley, Arizona

October 20, 2012 9am-5pm MST

Look for us calling CQ around 14.244Mhz and 7.244Mhz although we may move around due to band conditions. We've had good success on 10m/15m in previous years as well.

Operating from the 80 foot tall discone antenna 15 miles south of Tucson, Arizona.

The Titan Missile Museum is the only publicly accessible Titan II missile site in the nation. There are tours of the underground missile site where visitors can see the 3-ton blast doors, the 8-foot thick silo walls, and an actual Titan II missile in the launch duct. During the tour of the launch control center, they also experience a simulated launch and more!

Discone antennas are a no gain broadband band antenna. The SWR (standing wave ratio) is typically 2:1 over the full range of 6 MHz to 30 MHz. It was built by Collins Radio Company and operational from July 1963 until the site was deactivated in 1982.

For more information on the 4x4 Ham group, please visit our web site at 4x4ham.com. (four x four ham .com)

SARL NEWS - SUNDAY 07 October 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio over Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that it must be announced that the key of Frans Jonker, ZS6ANI, became silent on 23 August 2012.

Our sincerest condolences to his relatives and friends.

(PAUSE)

IN THE NEWS TODAY:

PETER LAKE, ZL2AZ, APPOINTED CHAIRMAN OF IARU REGION 3

NEW MINISTER FOR DEPARTMENT OF SCIENCE AND TECHNOLOGY

RADIO AMATEURS MUST CONTRIBUTE TO SA'S KNOWLEDGE ECONOMY

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

PETER LAKE, ZL2AZ, APPOINTED CHAIRMAN OF IARU REGION 3

The Directors in IARU Region 3 have voted to appoint Peter Lake, ZL2AZ, of Wellington, New Zealand, as the Chairman of IARU Region 3. He replaces Michael Owen, VK3KI, who passed away unexpectedly last month. Owen, who was also President of the Wireless Institute of Australia, had served as Region 3 Chairman since 2006. "I am extremely grateful to my fellow Directors for their support in this difficult time, and for the procedural work by IARU Region 3 Secretary Ken Yamamoto, JA1CJP, to formalize an appointment," Lake said in a statement. "I will do my best to carry through all the work that we have in progress, much of it due to items and ideas put in place by Michael. It is my privilege to have

the opportunity to serve you, the Member Societies and fellow amateurs in Region 3."

NEW MINISTER FOR DEPARTMENT OF SCIENCE AND TECHNOLOGY

Derek Hanekom has been appointed as the new minister of Science and Technology following the appointment of Naledi Pandor as Minister of Home Affairs. He has a tough act to follow as Naledi Pandor has excelled in the Portfolio securing 75% of the Square Kilometre Array (SKA) for South Africa. She put science and technology on the high road in South Africa and passionately promoted the development of a knowledge economy for the country. She was a passionate speaker at many science and technology related event. Undoubtedly she will be missed in the corridors of DST. Derek Hanekom as deputy Minister of Science and Technology was behind the scenes involved in several projects and more recently hosted several SKA briefing events.

We wish both ministers well in their portfolios.

CHANGES ON SARL COUNCIL

Council has co-opted Gideon Jannasch, ZS4GJA, on Council. Gideon has taken over the RAE Manager portfolio. In other changes, the VHF/UHF Bandplanning Manager portfolio has been moved from Riaan Greeff, ZS4PR, to Frik Wolff, ZS6FZ. Riaan retains the Treasurer portfolio. Council has made the changes to manage the workload better.

NEW EMAIL ADDRESS FOR RAE MATTERS

A new RAE mailbox has been set-up to speed up the information flow. In future RAE queries should be sent to rae@sarl.org.za. Candidates should carefully read the correspondence addressed to them as it contains vitally important information. Candidates who still have outstanding documents should send these in as soon as possible to rae@sarl.org.za.

RTA CD and SDR KITS

A small number of RTA CD's and SDR 80 m experimental kits are available to persons who have not attended the RTA. Details can be found at www.sarl.org.za, click on RTA in the left hand column on the home page.

A package containing the kit and CD is available at R150 plus R30 packaging and postage. The CD only is available at R100 plus R20 packaging and postage. These are the costs if you are a member of the SARL. Non-Members pay an additional premium. Only orders on the order form and pre-paid by bank draft can be accepted. Check the RTA webpage for details of stock before ordering.

RADIO AMATEURS MUST CONTRIBUTE TO SA'S KNOWLEDGE ECONOMY

In his keynote address at the four RTA's, SARL President said that Radio Amateurs must contribute to the country's effort to build an knowledge economy. He said that Research and Development (R&D) promotes the growth of knowledge-intensive activity. There is a clear connection

between R&D intensity and competitiveness. One of the goals for South Africa is to enhance the country's knowledge-generation capacity in order to produce world-class research and turn some advanced findings into innovative products and processes.

"I believe we can and must make a contribution. Amateur radio is blessed with a large slice of the radio spectrum much larger than what many believe the amateur radio service should have but balanced against this is that radio amateurs have a history of pioneering new developments and we need to continue with our passion to experiment and develop.

Exposure to amateur radio has turned many young people to taking up careers in the technology industry. Many have excelled and made major contributions. I am reminded of Jack Kirby who received the Nobel Prize in 2000 for his development of the integrated circuit. Another Nobel Laureate, who developed his career from an interest in amateur radio, is Joe Taylor, K1JT. He received the Nobel prize jointly with Russell Hulse for Physics in 1993 for the discovery of a new type of pulsar, a discovery that has opened up new possibilities for the study of gravitation.

"You may now argue but how can I contribute?" Rassie said. " We are not Joe Taylor! Yes but Joe Taylor was not what Joe Taylor is today. It was his interest in new things, new ideas that made him what he is today. Radio Amateurs experiment a lot but they have one major problem, they do not share it by giving talks at club meetings, by writing articles for Radio ZS or other professional publications."

"He outlined various interesting projects in which radio amateurs can make a major contribution." You can down load the full text of his presentation on www.sarl.org.za, select RTA in the left hand column.

VOLUNTEERS FOR NEWS TEAM

The SARL News Team is experiencing a severe shortage of bulletin compilers. This news item is a request for volunteers to offer their services to keep the bulletin system going. The bulletin compiler's work is to receive news items sent to him/her from the website, compile them into a bulletin and translate the bulletin into Afrikaans. (The translation is by far the most time consuming task of the bulletin compiler.) After the compilations and translation the bulletin is sent to the News Editor by e-mail.

Bulletin compilers will be SARL members, bilingual, with some rudimentary computer and editing skills and will have an e-mail address. They take responsibilty for the bulletins for two months out of every year.

If you might have the necessary skills and be willing to try your hand at this, please send your name and contact details to Fritz, ZS6SF, with email address secretary@sarl.org.za before Monday 15 October. Without enough volunteers, it will not be possible to keep the

Afrikaans bulletin going.

CLUB NEWS

The East Rand Radio club's AGM was held on Saturday 29th of September 2012. A new chairman and committee was elected. The are:

1. Chairman - Marc d'Hotman de Villiers, ZS6MDH 2. Vice Chairman - Ben Fourie, ZS6BEN 3. Secretary - Elize Findt, ZS6JDY 4. Treasurer - Chris Gryffenberg, ZS6COG 5. Repeater Custodians - Hampie Findt, ZS6HJ,F & Chris Gryffenberg, ZS6COG 6. Flea market - Francois Jacobs, ZS6COI, & Judy Pretorius, ZS6JDY 7. QSL Manager - Francois Reyneke, ZS6FDX 8. News Letter - Elize Findt, ZS6ECF 9. Awards Manager - Chris Gryffenberg, ZS6COG 10. News Bulletins - Elize Findt, ZS6ECF 11. Webmaster - Glynn Chamberlain, ZS6GLN 12. Club Caretaker - Glynn Chamberlain, ZS6GLN 13. RAE Coordinator = Elize Findt, ZS6ECF 14. Special events & Projects - Brian Mckenzie, ZS6BNM, & Margolet Mckenzie, ZS6MRG 15. Club 675 - Judy Pretorius, ZS6JDY; Glynn Chamberlain, ZS6GLN, & Elize Findt, ZS6ECF 16. HF Relays & Net - Francois Reyneke, ZS6FDX

We congratulate the new committee members on their new positions and wish them all the best for the year to come.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. Earth facing Sunspots 1 579 and 1 582 are massive but non of them are actively flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 50.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the change of season.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

9 October - Heritage Day Sprint logs to be in to riaanzs4pr@gmail.com and a copy to fwolff@global.co.za. 15 October - Names of volunteers for the SARL news team to be in to secretary@sarl.org.za. 20 October -Jamboree-on-the-air and CQ Hou Koers

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by by Fritz Sutherland ZS6SF, and edited George Honiball, ZS6NE.

Thank you for listening, 73. /EX

Lighthouse Weekend Being Held Through Sunday:

Posted: 05 Oct 2012 05:09 PM PDT
http://www.eham.net/articles/29098

Across the United States and in many foreign countries, amateur radio clubs (commonly known as HAMs) hold weekend events transmitting from lighthouses. The Lighthouse Weekend, going on through Sunday, is a first for Alabama. After participating in a HAM radio contest on the USS Alabama, Huntsville Amateur Radio Club member Warren Alford was inspired to organize a similar event for the lighthouses of Mobile Bay. "We want to increase awareness of the rich history and help our partners, the Alabama Lighthouse Association and the Alabama Historical Commission, raise funds for continued preservation of each lighthouse," said Alford. Two Huntsville clubs will operate stations at Middle Bay, Sand Island, and Mobile Point at Fort Morgan beginning at 6 p.m. today through 6 p.m. Sunday. HAMs from across the world can "call in" and talk to the volunteers manning each station.

//
95-Year-Old Runs a Tight Ship in Queen Mary Amateur Radio Room:

Posted: 05 Oct 2012 05:07 PM PDT
http://www.eham.net/articles/29097

Nate Brightman is in charge of the amateur radio station on the Queen Mary. Brightman, who turns 95 on Tuesday, was the inspiration for putting a radio room on the iconic ship. These days he keeps the radio room staffed with volunteers, two in the morning, two in the afternoon shifts - a task he's been doing for more than 33 years. The radio room was officially opened April 29, 1979, a festive affair of 500 guests entertained by a quartet, recalled Lynne Horn, Brightman's daughter. Brightman is a native of Cleveland, but when he was 27 he decided to enjoy the warm weather of Southern California - after digging his car out from a snow mound - and moved to Long Beach in 1944.

//
Space Station Deploys Five CubeSats:

Posted: 05 Oct 2012 12:23 PM PDT
http://www.eham.net/articles/29096

Five research CubeSats - all with Amateur Radio communication systems - were successfully deployed from the International Space

Station beginning around 1430 UTC today. The satellites were launched from the Kibo station module using a specially equipped robotic arm.

//
FCC Seeks to Change Licensing Rules, Allow Additional Emission Types:

Posted: 05 Oct 2012 12:21 PM PDT
http://www.eham.net/articles/29095

On October 2, the FCC released a Notice of Proposed Rulemaking (NPRM) in WT Docket No. 12-121 that seeks to change the Amateur Radio licensing rules, especially as they concern former licensees. Acting upon an April 2011 Petition for Rulemaking filed by the Anchorage VEC to give permanent credit to radio amateurs for examination elements they have successfully passed, the FCC proposes to revise Section 97.505 to require that Volunteer Examiners (VEs) give examination credit to an applicant who can demonstrate that he or she formerly held a particular class of license. In addition, the Commission seeks to shorten the grace period during which an expired amateur license may be renewed and to reduce the number of VEs needed to administer an amateur license examination.

//
Propagation Forecast Bulletin #40 de K7RA:

Posted: 05 Oct 2012 12:21 PM PDT
http://www.eham.net/articles/29094

A coronal mass ejection (CME) hit Earth on September 30, triggering a jump in geomagnetic indices. The planetary A index on October 1 was 31, and the K index went as high as 7, making aurora visible across the northern tier of the United States. Strange, but the northern latitude college A index was 23 (near Fairbanks, Alaska), about the same as the mid-latitude index, which was 21, in Fredericksburg, Virginia. During a geomagnetic disturbance it is common to see indices go much higher in the far-northern latitudes.

Radio systems real heroes of new series "The Last Resort" - Examiner.com

Posted: 02 Oct 2012 06:21 PM PDT
http://news.google.com/news/url?sa=t&fd=R&usg=AFQjCNHS_RR-79e_fbGmbhq3f8sIUokHWw&url=http://www.examiner.com/article/radio-systems-real-heroes-of-new-series-the-last-resort

Radio systems real heroes of new series "The Last Resort"
Examiner.com
Ham radio was a bit in the doldrums. We were experimenting with radioteletype and some media burst, but there were still diehard AM

aficionados, though there Amateurs out there advancing the “radio arts” with huge (20 to 30 long UHF antennas) who were ...

Source record: 1869

We just got news in the mail to day that ARRL affiliated West Gulf Division's Tri-County Amateur Radio Club WC5C from Azle Texas operating as W5B won first place low power category in the W/VE QSO Party contest in Oct 2011 while being the first ever to qualify Bolivar Peninsula under the US Islands awards program. The next contest is Oct 20-21, 2012.

http://usislands.org/results2011.html

http://usislands.org/contest_rules.html

Drive, walk, paddle or motorboat to any qualified island and work the world!

If you even operate from home and just work remote island stations and turn in your log, you have a great chance of winning some paper!

Short wave listeners can even win paper.

We hope to work you this year.

David KB5YLG

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Web Page, K1XN & GoList, NC1L, NJ1Q & W1AW, K2DM, KA3UNQ, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, KH6BZF, N6PSE, AC7DX, K8AV, K8GI, K8YSE, W8GEX & 60m News, W9ILY, N0HJZ, N0VD, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, HS0ZIB/G6JFY, I1HYW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OH6XX, ON4ATW, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SM3CVM, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and VE3ZZ for the following DX information.

**** IMPORTANT NOTICE FROM EDITOR: Everything is now back online. The server (hamnet.org) that hosts the OPDX mailing list, as well as all the E-mail received for the bulletins which failed on September 20th, came back online on October 1st. I would like to thank Dave, WB8APD, Sysop of the Hamnet.org, once again for getting things going again. We should be back to normal next week. Thanks for all your understanding..... 73 de Tedd KB8NW.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th-September, through Sunday, 7th-October there were 221 countries active. Countries available: 3A, 3B8, 3D2, 3D2/c, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FS, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU,

XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7,
ZD8, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or
more likely a "BUSTED CALLSIGN". As always, you never know - "Work
First Worry Later" (WFWL).

3A, MONACO. Operators Max/ON5UR and Marc/ON8AK will be active as 3A/homecall
from Monaco between November 9-17th. Activity will be on 80-10 meters,
SSB only and with one station (possibly two) on the air. QSL via M0URX.
They hope to have a Web page up soon.

3D2, FIJI. Ricardo, PY2PT, one of the operators from the upcoming T30PY
and T30SIX DXpedition to Tarawa Island (OC-017), Western Kiribati, is
planning to be active as 3D2PT before and after the T30PY/T30SIX DXpedition
from the following Fiji Islands:
OC-016 - Viti Levu Island (WLOTA L0055); October 13-15th and again
between 25-27th
OC-121 - Tavarua Island; October 27th-November 3rd

Ricardo states, "The operation from Fiji, if possible, will be done in
my free time because the main focus is on the preparation for the T30PY
& T30SIX DXpedition (October 16-25th)." QSL via PY2PT.

3D2/C, CONWAY REEF. A press release sent out October 4th states: "The
3D2C team has just arrived in Suva from our return voyage from Conway
Reef. We are very pleased to have made 71,693 contacts from Conway Reef.
We expect to have QSL cards in the mail in late November. We will upload
to LoTW within six months. We are very grateful to all of our equipment
sponsors, including ICOM and ACOM. We appreciate all of the financial
support from INDEXA, NCDXF and all club and individual sponsors. We have
now placed much of our equipment into storage, and we hope to activate
other rare South Pacific entities next year. We are updating our website
with our statistics and OQRS information.
Best Regards, The World-Wide DX Team"
The 3D2C 71693 QSOs breakdown are as follows: 39829/CW, 30608/SSB,
1054/RTTY, 10/SSTV and 192/PSK31. Continent breakdown: 33%/AF, 25.21%/AS,
37.25%/EU, 33.33%/NA, 2.73%/OC and 1.15%/SA. QSL 3D2C via YT1AD, direct
(w/SAE or SASE + 1 USD for normal postage, 2 USDs for Airmail), by the
Bureau or use the OQRS on the Web page. For more details and updates,
visit the 3D2C Web page at: http://www.yt1ad.info/3d2c/index.html

4S, SIR LANKA. Peter, DC0KK, will once again be active as 4S7KKG from
Sri Lanka (AS-003, WLOTA 0762) between November 9th and March 9th, 2013.
Activity will be mainly on CW and the Digital modes. QSL via DC0KK, by
the Bureau (preferred) or direct (see QRZ.com). LoTW on request. All
QSLs for all QSOs will be sent via the QSL Bureau.

5D7, MOROCCO. Operators Abdo/CN8VO, Jos/PD0JOS (CN2OS) and Francois/ON4LO
(CN2LO) will be active as 5D7AT from Agadir between October 8-21st.
Activity will be on 80-10 meters SSB. QSL via ON4LO, direct or by the
Bureau. Look for more details to be published on QRZ.com.

5U, NIGER. Operators Christian/TL0A (5U5U), Paul/F6EXV (5U6E) and Jan/DJ8NK (5U8NK) are now active from Niamey until October 15th. Activity will be on 160-6 meters using CW, SSB and Digital. Suggested frequencies are:
CW - 1826.5, 3524, 7024, 10104, 14024, 18084, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18150, 21290, 24950 and 28490 kHz
Digi - 7050, 10138, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50104/CW and 50150/SSB

QSL via their home callsigns, direct or by the Bureau (except 5U5U, direct only). The callsigns 5U6E and 5U8NK will be available on LoTW shortly after the operation, and on ClubLog's OQRS for both direct and Bureau QSLs. For more details, see: http://www.premiumorange.com/5u-2012

5X, UGANDA (2013). A press release sent out by the members of the F6KOP team states [edited], "After many DXpeditions in the past (5V7C, 5H1C, XT2C, J5C, TK7C, TS7C, TM7CC, IS0R, TJ9PF) and the successful PJ4C in 2012, the F6KOP team is happy to announce their next one in Uganda for February 2013. More than 20 ops, 6 stations for 12 days in this beautiful Africa country." Details from their Web page <http://www.5x2013.com> state that the operation will take place between February 6-18th, from a location some 20 Km from Entebbe airport. They mention that "they have found the perfect place for hamradio, a large hotel with more than 6000m² for our antennas with a direct access on the beach of the Victoria lake." Activity will be on 160-6 meters using CW, SSB, RTTY and PSK. Suggested frequencies are:
CW - 1826.5, 3524, 7024, 10104, 14024, 18074, 21024, 24892 and 28024 kHz
RX AS/OC 1821.5 and RX EU/NA 1834.5
SSB - 1850, 3785, 7120/7075, 14145, 18140, 21295, 24960 and 28480 kHz
RTTY - 1842, 3585, 7038, 10142, 14087, 18102, 21082, 24918 and 28082 kHz
PSK - 3570, 7035, 10142, 18100, 21072, 24920 and 28122 kHz
6m - 50104/CW and 50145/SSB

The team will use K3's and FT450 with ACOM 1010 into SpiderBeams, verticals and 4 Square antennas. Current operators mentioned are Franck/F4AJQ (Team Leader), Seb/F5UFX (Team Leader, WebMaster), Alain/F6ENO (Team Leader), Bob/N6OX, Dave/K4SV, Michel/FM5CD, G²rard/F2JD, Uwe/DL8OBF, Francois/ON4LO, Flo/F5CWU, Jean Jacques/F5NKX, Norbert/DJ7JC, Eric/ON7RN, Michel/F5EOT, John/F5VHQ, Jean Paul/F8BJI, Gerard/F2VX, Hans/DL1YFF, Valery/RG8K/UT7CR, Patrick/F2DX, Mike/UA9KGH and Jean-Marc/F8IXZ. Yann, F1NGP, will be their QSL Manager (100% OK Direct, ClobLog's OQRS, Bureau and LoTW). For more details and updates, see: http://www.5x2013.com

6V, SENEGAL. Vladimir, RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou between October 22nd and November 3rd. No word on whether he will participate in the CQWW DX SSB Contest. QSL via RK4FF.

6W, SENEGAL. Francis, F6BLP, will once again be active as 6W7SK from Saly Portudal, 80 kms south of Dakar on the coast, between January 5-18th, 2013. Activity will be holiday style using the same station as last time (IC-7000 into G5RV antenna) operating mainly CW. QSL via F6BLP, direct or by the Bureau. Logs will be uploaded to LoTW and eQSL. For more details, logs and pictures of his last operation, visit:

http://www.f6blp.org/index.php?langue&#65533;&contenu&#65533;me.php

8Q, MALDIVES. Jim, G3VDB, is intending to once again be active as 8Q7EJ from Vilamendhoo Island Resort (AS-013) between October 29th and November 11th. Activity will be holiday style mainly on 20 meters using CW, SSB, PSK31 and RTTY. QSL via his home callsign. The 2009/2010/2011 8Q7EJ logs are available on the Clublog Web page at: http://www.clublog.org/logsearch/8Q7EJ

9M2, WEST MALAYSIA. By the time you read this, Shou, JA1XXI, will be active as 9M2/JA1XXI from Port Dickson, Negeri Sembilan, Malaysia (Malacca Strait) until October 15th. Activity will be holiday style on 20/15/10/6 meters using CW and SSB. Suggested frequencies are 14220, 21220, 28500 and 50110 kHz. QSL via his home callsign, by the Bureau for JA and direct only for stations outside of Japan (SAE+1 IRC or 2 green stamps).

9U, BURUNDI. An international team of operators from ON, PA and GM will be on the air from Burundi during the second half of February 2013. In total, they have 10 operators and four stations and airing the requested callsign 9U4U (not confirmed yet). A Web site will be online soon with details and information about their plans. This Expedition is organized by the "Belgian Rockall Team".

AH0, MARIANA ISLANDS. Kazuo, JH8PHT, is once again active as AH0KT from Saipan on Northern Mariana Island (OC-086) until October 9th. Activity will be on 80-6 meters. Look for him to also try 10 meters FM and AM. QSL via direct to his home callsign. Logs will be uploaded to LoTW. PLEASE do not QSL to Saipan.

AH0/KH0, MARIANA ISLANDS. Operators Kit/JA1NVF, Kowata/JF7ELG, Miho/JJ2VLY and Yutaka/JQ2GYU will be active as NH0J from Tinian Island (USI NI003S, WLOTA 3108), Northern Mariana Islands (OC-086), between October 18-22nd. Activity will be on 80-6 meters using CW, SSB and possibly some RTTY/PSK. The operators may also use their own U.S. callsigns, such as AH0J (QSL via JA1NVF), WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY), and WS2Y/KH0 (QSL via JQ2GYU). QSL NH0J via JJ2VLY, direct or by the Bureau.

C5, THE GAMBIA. Members of the Radio Syd Contest Group will be active as C5A from Banjul during the CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry. Operators mentioned are Lada/OK1DIX, Jiri/OK1DO, Petr/OK1FFU, Karel/OK1JKT, Vlada/OK1NY, Jiri/OK1RI, Vasek/OK1VVT, Joe/OM5AW and Norbert/OM6NM. QSL via OM2FY, direct or by the Bureau. For more details and updates, see: http://www.om0c.com

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports on the following:
* On September 24th, Bill, NC1L, states, "Congratulations to the team which helped to reintroduce Amateur Radio to Kosovo, and welcome back to the airwaves to the returning Hams. As of this time Z60K, and/or any other Z6 station, will not count for any entity for DXCC awards purposes as they do not qualify under the DXCC rules. Any future change in Kosovo's DXCC status will be announced by ARRL."

* The following operation is approved for DXCC credit:
J51FD - Guinea-Bissau; 2010 Operation
"If you have had this operation rejected in a recent application, please send an e-mail to the ARRL DXCC Desk," Moore said. "Please note that due to heavy e-mail volume, you may not receive a reply. Once updated, results will appear in Logbook of The World (LoTW) accounts, as well as online in the daily listings."

E51, SOUTH COOK ISLANDS. Frank, HB9BXU, and a group of other Swiss hams will be active as E51C, E51ABS, E51BZD and E51CHX, from Aitutaki Island (OC-083) between November 12-30th. Activity will be holiday style on 80-10 meters including the 30/17/12 meter bands, between 1900-1200z, using CW, SSB and PSK31. Suggested frequencies are:
CW - 3505, 7020, 10104, 14024, 18080, 21024, 24894 and 28024 kHz
SSB - 3799, 7070, 14190, 18145, 21290, 24950 and 28490 kHz
PSK31 - 3580, 7035, 10139, 14070, 18100, 21070, 24920 and 28120 kHz

They state that there will be no internet access and they will not be able to provide online logs during their operation. QSL via HB9BXU.

ED9, CEUTA AND MELILLA. Operators Con DF4SA, Jorge/EA7HZ, Julio EA7JB, Quillo EA7LS, Chris/EA7RU, Jorge/EA9LZ and Zoli/HA1AG will be active as ED9Z from Ceuta during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 or Mutil-Single entry. The group will be using all Spiderbeam antennas and a 40m 3 element full size beam. QSL via EA9LZ.

FM/TO9, MARTINIQUE. Robert, S53R (ex-ST2AR), will be active as TO9R from FM5BH's QTH on Martinique Island (NA-107) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. Outside the contest, Robert will be signing FM/S53R. QSL via S53R, direct or via LoTW.

H4, SOLOMON ISLANDS. Bernhard, DL2GAC, will once again be active as H44MS on a DX vacation to Honiara, Guadalcanal (WLOTA 0086), Solomon Islands (OC-047), between October 17th and December 10th. Activity will be on 80-6 meters SSB only. QSL via his home callsign, by the Bureau or direct.

H4, SOLOMON ISLANDS. Operators Phil/G3SWH and Jim/G3RTE will be active from Honiara, Guadalcanal (WLOTA 0086), in the Solomon Islands between February 18-28th, 2013. The Solomon Islands are located in CQ zone 28, ITU zone 51. Guadalcanal counts as OC-047 for IOTA purposes. The "most wanted" data provided by Clublog currently shows the Solomon Islands at #81 in Europe and #77 in North America. Their activity will be on CW only on all bands 80-10 meters. There will be no 160, 60, 6 meters or EME activity. Propagation permitting, they plan to have two stations on the air for as many hours every day as is possible. Their main objective is to work as many European, North American and ROTW stations on as many different bands as possible and plan to make at least 15,000 QSOs. QSL via G3SWH, either via the OQRS facility on Phil's Web site http://www.g3swh.org.uk (recommended), direct with SAE and adequate return postage or via the traditional Bureau route. There is more information available at <www.g3swh.org.uk/h44kw.html> which will be updated from time to time.

H40 & H44, TEMOTU AND SOLOMON ISLANDS. Sigi, DL7DF, will once again lead a group of operators on a 2013 DXpedition which is being called a "Two Entities DXpedition - Solomon 2013". Sigi states on his Web page that they have chosen two destinations. The first destination will be the Guadalcandal (OC-047), Solomon Islands (H44), between March 8-25th, 2013. During the time between March 12-23rd, part of the group will be active from Nendo (OC-100), Temotu Island (H40). Activity will be on 160-6 meters using CW and SSB. They to have several stations on the air. One station on each destination will be exclusively dedicated to RTTY, PSK31 and SSTV. Their station equipment on each destination consists of 4 transceivers (3 x K2, 1 x FT857D), 3 power amplifiers, a lowband vertical for 160/80m, a deltaloop for 40, a deltaloop for 30, a Spiderbeam for 20/17/15/12/10, a 5 element Yagi for 6m, some Beverage antennas as well as some laptop computers. Operators mentioned are Manfred/DK1BT, Georg/DK7LX, Wolf/DL4WK, Reiner/DL7KL, Sigi/DL7DF, Juergen/DL7UFN, Frank/DL7UFR, Jan/SP3CYY and Leszek/SP3DOI. Pilot station is Bernd, DF3CB. QSL route is via DL7DF, direct or by the Bureau.

IOTA NEWS.....
AF-053. Christian, J28NC, who has been in Djibouti since July, announced that he will team-up with Jean-Francois, J28UC, to activate the coral reef Islands Moucha or Maskali sometime in the near future.

AF-083. Alfredo, IK7JWY, is organizing a second DXpedition to Djerba Island (WLOTA 1394), Tunisia, between April 27th and May 4th, 2013. The group hopes to use the callsign TS8IT. Activity will be on all bands and modes. Current operators are Alfredo/IK7JWX (team leader), Antonello/IK2DUW (QSL manager), YL Rosy/IW2NLC, Ampelio/IS0AGY, Roberto/IK2PGM, Leopoldo/I8LWL, YL Titti/IK8GQY, Carlo/IK6CAC (CW), Elvira/IV3FSG, Dario/IT9SSI + YL. If interested to join, contact Alfredo at: ik7jwx2003[at]yahoo.it

AS-060. Members of the Korean Contest Club (KCC) will be active as D9K from Pigum Island, South Korea, between October 26-29th. Activity will be on 80-10 meters and include participation in the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via DS4NYE. Logs will be on ClubLog. Operators mentioned are Han/DS2GOO, Yongsup/DS3GLW, Joon-Woo/DS3MLG, Rew/DS4NYE, Rocky/HL1VAU and Kijun/HL3AMO.

AS-075. Andrea, IK7YTT, will be active as XX9TTT from Coloane Island, Guangdong Province, between October 26-29th. Activity will include the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (15m) entry. There will be activity before and after the contest, and Andrea will be on other bands. Suggested frequencies are 21285 and 14185 kHz. QSL via IZ8CCW, direct or by the Bureau. For more info and updates, visit: http://www.mdxc.org/xx9ttt

NA-031. Jim, KA3UNQ, will be active from numerous lighthouses in the Rhode Island State Island group between December 6-9th. Details

and QSL information are posted on QRZ.com.

NA-034. Jacek, SP5APW, will be active as W4/SP5APW from Clearwater Island between October 15-18th. Activity will be holiday style for only a few hours a day using K3 (probably battery powered) and a Buddipole antenna. Operations will be mainly on 20/15/10 meters SSB. QSL via his home callsign, direct or by the Bureau or LoTW. For more details and updates, see: http://na-034.blogspot.com

NA-054. Rick, K6VVA, will be active as C6AVA from Berry Islands (WLOTA 1903) between December 7-11th. Activity will be on 40/30/20/17 meters using mainly CW with some SSB. Rick may or may not operate in the ARRL 10m Contest (December 8-9th) depending on propagation at the time. QSL only via N6AWD, direct or by the Bureau. For more information and updates, visit: http://www.k6vva.com/iota/na054

NA-112. Wayne, K9YNF, will be active as K9YNF/4 from Bogue Banks, NC, between October 21-26th. Suggested frequencies are:
SSB - 14260 and 18128 kHz
PSK31 - 14070.15 and 7035 kHz
QSL via K9YNF.

NA-138. A few days before his NA-034 operation (see above), Jacek, SP5APW, will possibly be active as W4/SP5APW from Amelia Island (WLOTA 3048)for one or two days between October 12-14th. QSL via his home callsign, direct or by the Bureau or LoTW. For more details and updates, see: http://na-034.blogspot.com

IOTA OP (THAILAND). Eddy, ON4AFU, will once again be in Thailand to activate the following IOTAs. His schedule is as follows:
October 7-24th - Callsign HS0ZJF/8; from Koh Samui (AS-101)
October 26th-November 4th - HS0ZJF/9; from Koh Butang (AS-129)
Activity will be on 40-10 meters using CW only with 100 watts into a wire antenna. QSL via ON4AFU, direct or by the Bureau.

ISWL CALLSIGNS (For October). The following ISWL club callsigns will be used throughout the month of October:
GX4BJC/A - Operated from Walton on the Naze, in Essex, by Herbie, G6XOU. (/A WAB Square •M22 - England & IOTA •U-005). Herbie will also operate as GX4BJC/P at times.

MX1SWL/A - Operated from Hartford, in Cambridgeshire, by Tom, G3RPV. (/A WAB Square •L27 - England & IOTA •U-005).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

KG4, GUANTANAMO Bay. Look for the following operators to be active from
Guantanamo Bay (NA-015) during the month of October:
October 13-27th - Ed/KN4KL (KG4KL); activity on SSTV, RTTY, SSB, PSK
and possibly CW.
October 11-27th - Bill/W4WV (KG4WV); activity on SSB, PSK, RTTY and
possibly CW.
While there, operators will be joined by the GTMO Boy Scout Troop in
the "Jamboree on the Air" (JOTA, October 20-21st). QSL via their home
callsigns.

KH8, AMERICAN SAMOA. Dom, M1TKA, is now active as KH8/M1TKA from American
Samoa until October 11th. Activity will be on 20/17/15/12/10 meters, from
the south side of KH8, with the possibility of LF bands if he can relocate
to the north side after October 7th. QSL via his home callsign and LoTW.
For updates, see: http://m1kta-qrp.blogspot.co.uk/2012/10/qrv-in-kh8.html

KH8, AMERICAN SAMOA (Update To OPDX.1075/Possibly Moved To 2013). Bill,
N6MW, and possibly 1-2 other operators (TBA) are/will/expected to be active
as KH8/N6MW from a hotel in Tutuila between November 8-19th. However,
the DXpedition's Web page states, "This DXped is still in the planning
stages, possibly will be moved to March 2013." Stay tuned! For more
details and updates, visit: http://n6mw.jimdo.com

NP4, PUERTO RICO. Jeff, N5TJ, will be active as as NP4Z from San Juan
(NA-099, USI PR006S, WLOTA 2802) during the CQWW DX SSB Contest as a
Single-Op/High-Power entry. QSL direct to N4AO (QRZ.com)

OJ0, MARKET REEF. Operators Tomi/OG9X, Simo/OH2HAN and Juha/OH6XX will
activate Market Reef (EU-053, ARLHS MAR-001, WLOTA 0542) between October
25-29th. Both OG9X and OH6XX will participate in CQWW DX SSB Contest
(October 27-28th) using the OJ0B and OJ0X callsigns in a the Single-Op/
Single-Band (80m) and Single-Op/Single-Band (15m) categories, respectively,
while OH2HAN will activate other bands on RTTY mode signing OJ0MI. QSL
OJ0B and OJ0X via OH2BH and LoTW, and QSL OJ0MI via OH2HAN.

PJ4, BONAIRE (Update). Operators Marco/PE2MC, Bert/PE2KY and Peter/PJ4NX
will be active as PJ4X from Bonaire (SA-006, WLOTA LH-1279) between

November 9-16th. QSL via PE2MC. Watch for more details and updates at:
http://www.pe2mc.nl/bonaire-here-we-come-pj4pe2mc

PJ4, BONAIRE. Look for PJ4D will be once again be active between November 18th and December 1st. Activity will be on all bands and modes. Operators include Kelly/N0VD, Scott/W4PA and possibly others. PJ4D was last activated during the 10.10.10 "New DXCC" event and logged nearly 36,000 QSOs. They hope to be able to give those who still need a QSO with Bonaire (SA-006, WLOTA LH-1279) a new one. Also, they expect to be active during the CQWW DX CW Contest (November 24-25th) in one form or another. More information will be posted at <www.n0vd.com>. QSL all contacts with PJ4D via W3HNK.

SI9, SWEDEN (Special Event). Special event station SI9AM from the King
Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in
the world outside Thailand, will be active between October 13-14th, and
in the Scandinavian Activity SSB Contest (SAC). Operators mentioned are
Markus/SA3BPG, Joel/SA3BRX, Jan-Eric/SM3CER, Lars/SM3EAE, Bj&#65533;rn/SM3UQO
and G&#65533;ran/SM5SIC. SA3BPG and SA3BRX are young and newly licensed radio
amateurs and will now for the first time try contesting. They will
operate three stations, one of the currently most productive band and
one of the second best band. The third station will be a multiplier
station. Outside of the contest, activity will be on 160-10 meters.
Suggested frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau (E-mail Bureau request are OK via
sm3cvm (at) ssa.se. For more information, visit QRZ.com or the SI9AM Web
page at: http://www.si9am.se

SPECIAL OPDX BULLETIN WENT OUT THIS WEEK. If you missed OPDX.1080.2, which
contained press releases/updates on:
* ARS GIVEWAY TO PROMOTE YOUTH IN AMATEUR RADIO (Press Release)
* CQ NEWS (Press Release) - Randy Thompson, K5ZD, Named Director
of CQ World Wide DX Contest
* CY0, SABLE ISLAND (Press Release/Update). The new dates are October
22-31st.
* LIVE BROADCAST (from MFJ's 40th Anniversary Celebration)
* ZL9, CAMPBELL ISLAND (Update/Press Release). They are "making great
progress during the planning and preparation phases.

Go to the following URL to see OPDX.1080.2:
http://hamnet.org/pipermail/opdx/2012/000409.html

T8, PALAU. Kiichi, JF1LUT, is now active as T88IK from Arakabesan Island,
Koror (OC-009) until October 10th. Activity will be on 17-6 meters SSB.
QSL via his home callsign, direct or by the Bureau.

T8, PALAU. Nob, JH1EAQ, will be active during the CQWW SSB Contest as
T88EB as a Single Op/All Band entry. QSL via JH1EAQ, Bureau or direct
to: Nob Watanabe, 6-11-2 Azuma-chou, Iruma-City SAITAMA, JAPAN 358-0002.
Nob states that this is his first time on the air in 10 years (he was
active back then as T88EA).

TF, ICELAND. Siggi, TF3CW, from Seltjarnarnes (EU-021, WLOTA 2975), has announced that he will be active in the CQWW DX SSB Contest (October 27-28th) as Single-Op/Single-Band (20m) entry. QSL via LX1NO.

TO2, MAYOTTE. Serge, F6AML, is active as TO2M from Mayotte until October 19th. Activity will be on 80-10 meters using CW and SSB. QSL via F6AML, direct or by the Bureau (E-mail request are fine; see QRZ.com for details).

TO7, MAYOTTE. Hartwig, DL7BC, will once again be active from Mayotte (AF027, WLOTA LH 0376) between March 25th and April 12th, 2013. He is hoping to have his callsign TO7BC re-issued again. Activity will be from Bruno's, DH1BL/FH4VOS, QTH. Operations will be on 80-10 meters plus participation in CQWW WPX SSB Contest (March 30-31st). He also plans to be on RTTY and PSK. QSL via his home callsign, direct or by the Bureau. For more details, visit it his Web site at:
http://www.qslnet.de/member/dl7bc/en_TO7BC.htm

TT8, CHAD. Members of the "Italian DXpedition Team" are now active as TT8TT from N'Djamena until October 16th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1072. QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A log search and an OQRS are all available on their Web page at: http://www.i2ysb.com
Official forum is at: http://bit.ly/NVQaav

TX5, FRENCH POLYNESIA (Update/IOTA Op!). Didier, F6BCW, is now active as TX5EG from Huahine Island (OC-067) until October 15th. He will activate other various French Polynesian Islands between now and November 8th. Activity will be holiday style, CW only, and using 100 watts into dipoles strung-up between coconut trees on the following islands:
October 6-15th - Huahine Island (OC-067); 40-10 meters
October 15-19th - Raiatea Island (OC-067); 30/20/17 meters
October 19-22nd - Tahaa Island (OC-067); 40/30/20/17 meters
October 22-26th - Maupiti Island (OC-067); 30/20/17 meters
October 22nd(?)-November 8th - Huahine Island (OC-067); 40-10 meters
QSL via his home callsign, direct or by the Bureau.

TX5, NEW CALEDONIA (Special Event). Christian, KH6/F5IDM, is expected to be active as TX5FS during the Pacific Science Festival ("F�te de la Science") which is held on Lifou Island (OC-033) and runs until October 13th. Activity will be limited to his spare time. No QSNs have been reported as of press time. QSL via F5IDM, by the KH6 Bureau or direct.
Details about the festival can be found at:
http://www.symbiose-nc.com/fds/index.php

V3, BELIZE. Rich, N0HJZ, will once again be active as V31MW from Placencia between October 21-30th. Activity will be on all bands especially 30/17/12 meters on CW during his stay except 160 meters. He will also operate as V31MW during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/ All-Band/High-Power entry. QSL via N0HJZ, LoTW or direct with SASE.

V6, MICRONESIA. Operators Shoij/JA7HMZ (V63DX) and Masahiko/JA7EPO (V63EPO) will be active from Pohnpei Island (OC-010) between November 23-28th.

Activity will be on all bands and modes. QSL via their home callsigns.
Shoij will also be in the CQWW DX CW Contest (November 24-25th) as V6B
and as a Single-Op/All-Band entry. QSL via JA7HMZ, direct or LoTW.

VC2, CANADA. Operators Noel/VE2BR and Gregg/VE3ZZ will once again partici-
pate in the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry
using the special callsign VC2B. QTH will be Mercier, Quebec (CQ Zone 5,
Grid Loc FN35ch). QSL to VE2BR, direct or by the Bureau.

VP2M, MONTSERRAT. Operators Dave/G3NKC, Martin/G4XUM, Stewart/GM4AFF
and George/K2DM will be active as VP2MKC, VP2MXU, VP2MAF, and VP2MDG,
respectively, between October 24-30th. The team will be active as VP2MDG
during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry.
QSL via K2DM, direct only or LoTW. QSL contacts with VP2MKC, VP2MXU and
VP2MAF are via GM4FDM.

VP5, TURKS AND CAICOS ISLANDS. Operators Frank/WA2VYA, Tony/K4QE and
Jack/N2VW will be active from VP5JM's 'Hamlet' on Providenciales Island
(NA-002) between October 23-30th. The group will be there to operate in
the CQWW DX SSB Contest (October 27-28th) as VP5T and as a Multi-Multi
entry in CQ Zone 8. QSL ONLY to N2VW, direct or by the Bureau. See QRZ.com
for more details. Logs will be upload to LoTW shortly after their operation.
Operators will be active as VP5/homecall on the island between October
23-30th, so activity before and after the contest will be on CW and on
the 30/17/12 meter bands. QSL per the operators' instructions and per
QRZ.com.

VU3/P, ANTARCTICA (Bharati Base). Gianni, I1HYW, informs OPDX: "Bhagwati
Prasad is still active as VU3BPZ/P from the new Indian Base 'Bharati'
(WAP IND-04) in Antarctica, until the end of December, then he will be
onboard the 'M/V Ivan Papanin' on the way to India via Cape Town. A stop
is preview at Maitri Station (WAP IND-03) where he hopes to operate again
as VU3BPZ and when sailing the call used will be VU3BPZ/MM as done on the
way on. He is still waiting the reply for his request of a special callsign
through the Indian Ministry, and perhaps the answer will come around mid-
October. QSLs have not been printed yet and will not be available before
the end of November, so no hurry in QSLing; information to the chasers
will be given as soon as we know if the special call will be issued or not.
QSL only direct via I1HYW (QRZ.com)." More information is available on
the WAP Web site at: http://www.waponline.it
LAST MINUTE UPDATE: Gianni, I1HYW, reports that the Bharati Base's sunrise
is at 2341z and sunset at 1347z. Local time down there is UTC +5 HRS.
There are about 46 days left for Bhagwati, VU3BPZ/P, to be there before
he leaves onboard the "M/V Ivan Papanin". If you did not work the Bharati
Station yet, the best times and frequencies are:
10m - 28495 kHz between 1100-1215z
17m - 18145 kHz between 1015-1100z
20m - 14180 kHz +/- between 1400-1500z and again between 1700-1800z
For North Americans, VU3BPZ/P will be on 14242 kHz between 0200-0300z.
If you don't hear him, call him (VU3BPZ/P), he may be just listening at
the above times and bands given.

XP, GREENLAND. Henning, OZ1BII/OU2I, will once again be active as XP2I from club station XP1AB in Kangerlussuaq between November 16-19th. Activity will be on CW in the LZ DX Contest (November 17-18th) in ITU Zone 5. Also, look for activity on the 160/80 meters during the night between November 18-19th. QSL via his home callsign.

XX9, MACAO. Operators Francisco/EA7FTR (XX9TFR), Eugene/EA5HPX (XX9TPX), Jose/EB5BBM (XX9TBM) and David/EB7DX (XX9TEX) will be active from Pousada de Coloane Hotel, Coloane Island (AS-075) between October 18-29th. Activity will be on 160-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY, with at least 2 stations on at the same time on different bands and modes. Suggested frequencies are:
CW - 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893 and 28023 kHz
SSB - 1825, 3780, 7065/7160, 14145, 18145, 21295 and 28495 kHz
RTTY - 7035, 10140, 18100, 21080, 24921 and 28080 kHz
6m - 50103/CW and SSB operations NOT PERMITTED
12m - SSB operations NOT PERMITTED

There will be an emphasis on working NA and EU. QSLs for all callsigns are via EA7FTR, direct. All QSOs will be confirmed via LoTW. For more details and updates, see: http://adxg.org/macau/index.php

XZ, MYANMAR (Update). Simon, HS0ZIB/G6JFY, who was active as XZ1K, is now "no longer living in Kawthaung". According to his Web site (which is "now redundant" as he calls it), Simon states, "I hope to obtain a new licence for operation from my new QTH in the capital city of Yangon". Simon informs OPDX that he plans to "live and work in Yangon on a long-term basis now." He also mentioned that he is "in contact with the telecoms Regulator who is currently updating all the outdated telecoms and radio-comms laws in Myanmar. However, right now he is very busy with the issue of new mobile telephone network licences, so I am sure that any progress in the ham radio laws will be slow. To try to improve my relationship with the government departments, I am trying to get a new job actually in the new capital city of Nay Pyi Taw, where all the government offices are located..."

ZF, CAYMAN ISLANDS. Operators John/K6AM, Bob/K5WA, George/K5PI and David/N6AN will be signing ZF1A from Grand Cayman Island (NA-016, WLOTA LH-1042) during the CQWW DX CW Contest (November 24-25th) as a Multi-Single entry. QSL via K6AM, direct, by the Bureau or LoTW.

JOTA cluster (still) available

Posted: 06 Oct 2012 02:43 PM PDT
http://forums.qrz.com/showthread.php?363968-JOTA-cluster-(still)-available&goto=newpost

In the weekend of 19/20 October, many JOTA stations will be on air. To
assist JOTA stations in finding each other, there is a special JOTA cluster
available. Either via Telnet port 7300 (for use with programs like DXLink)
at pi4raz.nl or via a web interface (can post also through web interface).
The cluster has been continuously online for 3 years now and the number of
JOTA users is still growing. So, if you're assisting scouts this year,
don't forget to keep an eye on the cluster!

http://forums.qrz.com/showthread.php?363987-Update-HRD-newsletter&goto=newpost

HRD Starts weekly newsletter to paid customers and beta tester comments on 6.0

Tampa, FL October 6. 2012

HRD Software, LLC announced today that their paid subscribers will now be getting a weekly newsletter with updates on the company and version 6.0.

Erin Butler, KJ4MFO, head of HRD marketing said, ☐I☐m glad we finally are able to update the userbase weekly. It took a few weeks to get the thousands of paid users email addresses into our new mailer, but once that was done, and all the hiccups fixed, we now can send the newsletter out every Friday to the paid userbase☐

Erin spent many hours building and debugging the server, as well as creating and maintaining the newsletter and website. She is getting many compliments from the hams on how simple and uncluttered the information in the newsletter is.

The newsletter can be seen the weekend after by all users at http://www.hrdsoftwarellc.com/newsletter/news.html .

Each week, Erin will have the ☐featured feature☐ of HRD 6.0. The first feature featured was QSX in the cluster and the current featured feature is the SuperSweeper in RTTY mode. (Shown here)

DM780-Screenshot-2012-09-28-222241.jpg

The beta team continues to test the new version of Ham Radio Deluxe. New beta tester, WD5EAE, Stephen Genusa, said, ☐I've gone through the logbook, setup callsign lookups and played with some of the basic functionality and I'm already blown away by the scores of improvements and new functionality. But I just realized, I haven't even opened DM780. Plus, there's more customization stuff I haven't even touched. What has been done is amazing!☐

Version 6.0 will have a free full featured 30 day demo mode. This way, hams will be able to try the 6.0 products new features.

The retail price for version 6.0 is $79.95, but you can pre order and save $10. To purchase and download the product go to http://www.ham-radio-deluxe.com.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 7th October 2012

Condolences

For those who may have missed the Radio News on Sunday last we regret to inform you of the death last weekend of Mary McCague the mother of S&#65533;amus EI8BP the President of the Society. The funeral took place in Clones on Monday last. To S&#65533;amus, to his sisters Mary and Sheila, to his brother Eugene and to the wider family we extend our sincerest sympathy. May she rest in peace.

DXCC List

The updated list of EI call signs in the ARRL DXCC List - which can be seen at www.irts.ie/dxcc - shows that Declan EI6FR, who tops the 'Honor Roll' of EI call signs, has been busy increasing his DXCC credits on most of the HF bands. Jim EI9GLB, a relatively recent entrant to the DXCC list, has increased by 50 the number of entities confirmed, while Michal EI3KG has entered the DXCC list for the first time. Michal was a member of the EJ0PL team which operated from the Saltee Islands for this year's IOTA contest and is a keen CW operator.

Marconi Clifden 2012 Event

The Marconi Heritage weekend takes place over the weekend of October 12th to 14th at Clifden. More information is available on facebook.com/clifden2012.

Limerick Radio Club

The next meeting of Limerick Radio Club will be on Wednesday 10th October in the Limerick Institute of Technology at 1930. Following on from a very active Summer period of events, the next number of meetings will concentrate on upcoming events including a possible IOTA dxpedition, theory classes and practical sessions. Keep an eye on www.limerickradioclub.ie for updates.

South Dublin Radio Club

On Tuesday 9th October at the South Dublin Radio Club Declan EI6FR will present a slideshow on his IOTA DXpedition to St. Kilda in May of this year.

On Tuesday 30th of October Chris G0FDZ will be giving a talk on the UK VHF beacon GB3VHF http://www.gb3vhf.co.uk

The club is open from 8pm every Tuesday and all visitors are more than welcome.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held October 17th, October 31st and on November 5th, the start of the classes. All are welcome to enrol. More information from www.ei7dar.com or secretary at ei7dar dot com.

DX News

OH2YY and OH1TV are QRV until 12 October from Christmas Island. They are using the callsign VK9XM. They plan to be active on all bands 40 - 10m on SSB and CW. QSLs go via OH2YY.

Noel WB0VGI will be operating as 5H3NP from Tanzania until mid-December. He will use dipoles on the HF bands. QSL to his home call.

Cicero PY7ZY will be in Fiji from 11 - 15 October and will operate as 3D2ZY. With him will be Fred PY2XB who will sign 3D2XB. They are part of the Western Kiribati DXpedition team which will sign T30PY from 16 - 25 October.

A special event station to commemorate the centennial of the 1912 London International Radiotelegraphic Convention is on the air till the end of the month. The convention resulted in the earliest allotment of call letters to identify countries. The special event station which is located in the Netherlands is using the callsign PB100PREFIX. The QSL Manager is PB0P.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

HAM RADIO IN SPACE: 200 MICRO HAM BIRDS TO BE LAUNCHED IN ONE MISSION

Two hundred tiny ham radio satellites will be going into space in the
not to distant future. The project is called KickSat and we have more
in this report.

--

KickSat is an amateur radio CubeSat technology mission designed to
demonstrate the deployment and operation of prototype Sprite or tiny
ChipSats developed at Cornell University. The KickSat spaceframe is a
CubeSat being built to carry and deploy 200 Sprites that will provide
an avionics bus that will provide power, communications, command and
data handling functions. It will be mated with a 2 unit deployer that
has been developed to house the Sprites.

Approximately 200 Sprites will be stacked atop a spring-loaded pusher
and secured by a nichrome burn wire system. Once on-orbit, the wire
burns away the Sprites will spring out into space.

As to the Sprites, these are tiny spacecraft that includes power,
sensor, and communication systems. Its built on a printed circuit
board measuring 3.5 by 3.5 cm with a thickness of 2.5 mm and a mass of
about 5 grams. The Sprite is intended as a general purpose sensor
platform for micro-electro-mechanical or other chip-scale sensors with
the ability to downlink data to ground stations from Low Earth Orbit.

After deployment, telemetry and sensor measurements from the individual
Sprites will be received through Cornell's ground station in Ithaca,
New York, as well as several other amateur radio ground stations around
the world. The Sprites are expected to re-enter the atmosphere and

burn up within a few days or weeks depending on atmospheric conditions. Their best case maximum orbital lifetime is estimated at 6 weeks.

The development team is currently investigating uses for the KickSat spaceframe after the Sprite deployment and is seeking collaborators who could make use of its capabilities as part of another extended mission.

For the Amateur Radio Newsline, Im Bill Pasternak, WA6ITF, in the Studio in Los Angeles.

--

ChipSats like these Sprites represent a new technology that will both open space access to hobbyists and students and enable new types of science missions. A significant portion of KickSat has been financed by over 300 individual sponsors through a funding website. More is on-line at www.spacecraftresearch.com/KickSat. (KickSat)

**

WORLDBEAT: RAC WINS 5 YEAR EXTENSION FOR HAM RADIO FROM ONTARIO DISTRACTED DRIVING LAW

Some good news for hams living north of the United States and Canadaian border. Radio Amateurs of Canada says that it has received written confirmation from Minister Bob Chiarelli of the Ontario Provincial Government regarding a five year extension of exemption for radio amateurs to the Ontario province distracted driving law.

In his letter, Minister Chiarelli explains that the current exemptions for both Amateur Radio and Two Way Commercial Radios will be extended until January 1st, 2018. He also expresses his hope that in that time commercial hands free alternatives will be found for two way radios.

While Radio Amateurs of Canada says that it finds victory in the five year extension, it also says that a permanent solution is desired. As such it will continue to pursue a permanent exemption for amateur radio operators in Ontario provance.

Similar exemptions already exist in many other provincial jurisdictions in Canada. This, thanks in part to the efforts of local amateurs and Radio Amateurs of Canada's national strategy to address distracted driving legislation. (RAC, VE4WO)

**

THE BPL FIGHT: EUROPEAN PARLIAMENT MEMBERS QUESTION INTERFERENCE FROM PROPOSED OPLT STANDARD

Ham radio operators in the UK have some new allies in their fight against a proposed pan-European Power Line Technology or PLT standard and the interference it could cause to broadcast as well as shortwave radio reception. This as questions are raised by two legislators it in the European Parliament about it. Amateur Radio Newsline's Jim

Meachen, ZL2BHF, reports:

--

Syed Kamall is a Member of the European Parliament or MEP representing the city of London in the UK. He says that he has been contacted by several of his constituents who are concerned about a proposed standard for power line transmission devices. According to MEP Kamall, these constituents believe that if this standard is approved, the level of interference to all broadcast radio reception would increase to a level making it impossible to listen to a radio.

Those concerned explained to him that in 2011 a power line telecommunications electromagnetic compatibility standard was proposed by the European Committee for Electrotechnical Standardization. Kamall's constituents allege that the proposed standard was rejected by a majority of the National Standards Committees while many suggested improvements to the proposed standard. Some comments reaching him questioned the very high radio pollution levels that would be permitted from these devices, while other suggestions were aimed at improving the test methodology.

MEP Kamall goes on to note that while a revised version of the PLT standard is about to be circulated, his constituents believe it to be identical to the previously rejected standard, and that it rejects the suggestions from the National Standards Committees. Also that his constituents claim that representatives of PLT equipment manufacturers dominate the Working Group that wrote the proposed standard and are lobbying National Standards Committees to support that standard. This is because it would provide a legal basis for high PLT emission levels.

MEP Kamall is joined in his concern by Sir Graham Watson who is the Member of the European Parliament for South West England and Gibraltar. MEP Watson notes that his constituents also tell him that even though the Commission's Electromechanical Committee advisor has been notified that the proposed PLT standard does not meet the essential requirements of the EMC Directive, that the European Committee for Electrotechnical Standardization has ignored this advice. Also that it will continue to push the proposed PLT standard to be voted by the National Standards Committees. He then notes that concerns have been expressed that the possible new PLT standard may not be compliant with European Commission law.

Both legislators want to know if the Commission shares the concerns of their respective constituents over the proposed PLT Electromagnetic Compatibility standard. MEP Syed Kamall is even more direct. He asks that if the European Committee for Electrotechnical Standardization approves the proposed standard, is the Commission able to block it, and will it do so until it is deemed to meet the requirements of the EMC Directive?

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, down-under in Nelson, New Zealand.

--

In his questions to the European Parliament Sir Graham Watson asks if the Commission confident that the new standard will satisfactorily comply with the European Union rules as set out in the EMC Directive? He also wants to know what dialogues have Commission officials held with European Committee for Electrotechnical Standardization to ensure compliance. Meantime the UK ham radio community awaits replies to both of these inquiries. PLT in the Europe is very similar to what we call in-home access BPL here in the United States. (Southgate, UKQRM, others)

WORLDBEAT: ACMA ISSUES SPECIAL TRIBUTE TO MICHAEL OWEN, VK3KI - S.K.

The Australian Communications and Media Authority has issued a special tribute to Wireless Institute of Australia President and IARU Region 3 Chairman, Michael Owen VK3KI, who died unexpectedly Saturday, September 22nd.

According to the news release, the Australian Communications and Media Authority was saddened to hear of the death of Michael Owen. He was responsible for significant reform of the Wireless Institute of Australia, was well known across the A-C-M-A and had worked closely with many staff on a range of issues, including several meetings and discussions in recent weeks.

The release ends by stating that the Australian Communications and Media Authority extends its condolences to the amateur community that Michael so tirelessly and effectively represented, as well as to his friends and family. (ACMA)

RESCUE RADIO: NTIA ASKS FOR COMMENT ON CREATION OF FIRSTNET

The National Telecommunications and Information Administration, better known by the acronym NTIA has issued a notice of inquiry. This, seeking comment on how it should set up a nationwide, interoperable public safety broadband network that it calls FirstNet. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

By way of background, this past February Congress enacted The Middle Class Tax Relief and Job Creation Act of 2012. One of its provisions was to create a nationwide interoperable broadband network that will help police, firefighters, emergency medical service professionals and other public safety officials to keep in contact with one another during extreme emergency or disaster situations.

The law's governing framework for the deployment and operation of this network, which is to be based on a single, national network architecture, is the new "First Responder Network Authority" or FirstNet. This is an independent authority within NTIA.

FirstNet will hold the spectrum license for the network. It will also be charged with taking all actions necessary to build, deploy, and operate the network. This, in consultation with Federal, State, tribal and local public safety entities, and other key stakeholders.

The NTIA has given the public until November 1st to comment on the conceptual architecture of such a network as outlined at the first FirstNet board of directors meeting that was held on September 25th. It also is seeking input on a business plan and on developing applications for public safety users.

Comments to the NTIA on this proposed first responder system can be e-mailed to firstnetnoi (at) ntia (dot) doc (dot) gov.

For the Amateur Radio Newsline I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More about the proposed FirstNet system is on line at www.ntia.doc.gov/category/public-safety. (NTIA, B&C)

COMMUNICATIONS HAPPENINGS: NAB PUTS OUT CALL FOR NAB 2013 PAPERS

The 2013 National Association of Broadcasters convention is accepting technical paper or session proposals until October 19th. This for presentation at its gathering slated for next April 6th to the 11th at the Las Vegas Convention Center in Las Vegas, Nevada.

Submissions must relate to the creation and distribution of media and filmed entertainment. Conferences scheduled so far include Broadcast Engineering, Broadcast Management, Cloud Computing, Creative Master Series, Disruptive Media and Military and a Government Summit.

If you have a presentation that you feel might qualify, take your web browser to tinyurl.com/nab-presentations-2013 and read the page titled Speaking Opportunities. (NAB)

**

HAM HAPPENINGS: AA7BQ ANNOUNCES SERVER UPGRADES AT QRZ.COM

Some improvements at QRZ.com. Fred Lloyd, AA7BQ, reports that he has added an additional server to the QRZ system and moved a few things around to improve performance for all users. Among the changes are that all servers have been upgraded to the latest Ubuntu Linux Edition 12.04. Also, various functions have been interchanged between the various cloud servers that host QRZ.com at Amazon Web Services.

AA7BQ says that so far the performance looks really great on all parts of the system. He notes that the callsign server, which was routinely at 90% busy now loafs along at around 50%.

You can read about all the changes made by taking your web browser to tinyurl.com/qrz-improved-service. (QRZ.com)

**

HAM HAPPENINGS: ARRL INTERNATIONAL HUMANITARIAN AWARD NOMINATIONS SOUGHT

Nominations are open for the 2012 ARRL International Humanitarian Award. The award is presented to an amateur or group of amateurs who demonstrate devotion to human welfare, peace and international understanding through amateur radio. Full details on the nomination process can be found at www.arrl.org/international-humanitarian-award. (ARRL)

NAMES IN THE NEWS: SUNITA WILLIAMS KD5PLB IS NEW COMMANDER OF THE ISS

Turning to names in the news. NASA astronaut Sunita Williams, KD5PLB, who holds the record for the longest spaceflight by a woman, is the new Commander of the International Space Station. Williams took over the leadership role on Saturday September 15th becoming only the second female commander in the orbiting lab's 14-year history.

Sunita Williams is a captain in the U.S. Navy and flying on her second long-duration space mission. She first launched into space in 2007 and spent 195 consecutive day's on-orbit and setting a record for the longest single spaceflight by a female astronaut.

Williams launched to the station in July. She will command its Expedition 33 crew before returning to Earth in November. (NASA)

**

NAMES IN THE NEWS: K5ZD APPOINTED DIRECTOR OF CQ WORLD WIDE DX CONTEST

CQ Contest Hall of Fame member and WPX Contest Director Randy Thompson, K5ZD, has been named Director of the CQ World Wide DX Contest, effective immediately. Thompson succeeds Bob Cox, K3EST, who retired in September after 35 years at the helm of the world's most popular amateur radio contest.

Thompson, 53, has been a ham since age 13. He is an accomplished contester, having multiple wins in the CQ World Wide DX Contest and the

CQ WPX Contest, among others. He has also competed in four World Radiosport Team Championships. In addition, Randy is a past editor of the "National Contest Journal" and a co-founder of the eHam.net website. He is a longtime member of the Yankee Clipper Contest Club and an instructor at K3LR's Contest University.

Thompson has been Director of the CQ WPX Contest since 2008 and his appointment to the directorship of the CQ World Wide DX Contest creates a vacancy for director of the CQ WPX Contests. Anyone interested in taking on the challenge of leading a major contest should contact Thompson by e-mail to k5zd (at) cqwpx (dot) com. (CQ)

HAM HAPPENINGS: LA GRANGE GA. 6 METER NET CELEBRATES 1ST BIRTHDAY

A word of congratulations to the LaGrange, Georgia, 6 meter Buzzard Net that celebrated its first anniversary session on Monday, October 1st. According to Bob Yates, W4GCB, this is an informal net, created one year ago with the goal of promoting activity on 6 meters in the LaGrange area.

LaGrange, Georgia, is located 60 miles southwest of Atlanta near the southern boundary between Grid Squares EM72 and EM73. The net control is Ed Ekkebus, KE4EE, with assistance from Rob Momon, N4VPI. The net meets every Monday evening on 50.155 Mhz at 00:30 UTC.

W4GCB says that during its first 12 months of operation the net has garnered close to 1,500 check in's, with a handful coming from E-skip contacts. (W4GCBL)

**

HAM HAPPENINGS: HAPPY 50TH BIRTHDAY TO THE HUNTSVILLE ARC

And congratulations also to the Huntsville Alabama Amateur Radio Club on its 50th Anniversary.

The first Huntsville Amateur Radio Club was organized on October 6, 1947, with Bill Neal, W4FZD, as the first President. The constitution was approved March 22, 1948. There were twenty-two members of this initial organization but due to a lack of interest, the club was disbanded in the spring of 1949.

The second Huntsville Amateur Radio Club also known as HARC was organized April 18, 1952, at the WFUN Studio. John Garrison, W4FOG, elected as the first President.

The constitution and by-laws were adopted June 20, 1952. 16 members were on the first club roster and the club participated in its first Field Day event on June 21 and 22, 1952. HARC became affiliated with the American Radio Relay League on September 26, 1952, and remains so to this day.

The first club call, K4DTV, was obtained in July of 1954. The club's current callsign K4BFT, in honor of Hammond Carpenter, K4BFT was voted in by the club members on April 3, 1964. More about the history of the Huntsville group is on-line at harc.net. (HARC)

WORLDBEAT: FATHER AND SON AWARDED DOCTORATES IN ENGINEERING

It is not often that a father and son obtain doctorates in engineering during the same week. But it has happened and the latest involves two hams in South Africa. Amateur Radio Newsline's Hewather Butera-Howell, KB3TZD, reports:

--

Dr. Gary Immelman. ZS6YI, and his son Dr. Quintin Immelman, ZS6IY, both acquired doctorates in engineering during the same week, but from different universities. Gary Immelman obtained a Doctorite is Technologiae Engineering and Technology from the Vaal University of Technology. Quintin acquired his Ph.D. in Mechanical-Nuclear Engineering from South Africas North West University. The two graduation ceremonies were not originally planned to fall within the same time frame, so chance made it at remarkable week to remember. It should be noted that last year at this time ZS6YI was recovering from gunshot wounds that he suffered as a result of a brutal attack at his home on July 25 of 2011. Late word is that hes almost fully back to good health but still has pain in his right arm and abdomen. That

said, the incident has not slowed him down in any way. For the Amateur Radio Newsline, Im Heather Butera-Howell, KB3TZD, near Berwick Pennsylvania.

--

Our congratulations to both ZS6YI and ZS6IY and their achievements. (SARL)

**

WORLDBEAT: SOUTH AFRICA REVITALIZES HAMNET DOMAIN

South Africa's Hamnet website was reactivated on October 1st. Hamnet is a voluntary group of radio amateurs who, like ARES in the United States, volunteer their communication skills to assist others during and after disasters.

Their Hamnet domain has been dormant for many years. Now thanks to the efforts of Dawie Conradie, ZR6DHC, an initial site has been put together and will grow with time.

The revitalized Hamnet website is described as filling the gap between the South African Radio League website and the well established Hamnet Facebook page.

All links have been incorporated in the website, including some that are international. Its located in cyberspace at www.hamnet.co.za, (SARL)

HAM RADIO IN SPACE: UKCUBE TO LAUNCH IN MARCH 2013

Turning to ham radio space related news, word that UKube-1, the United Kingdom Space Agency's first CubeSat mission, has booked its journey into space on board a Russian Soyuz-2 rocket. The launch from Kazakhstan is expected to take place sometime in March of 2013. The tiny satellite carries an amateur radio 435 to 145 MHz linear transponder built by members of AMSAT-UK. (AMSAT UK)

**

RADIO NEAR SPACE: HIGHEST AND FASTEST EVER SKY DIVE ATTEMPT OCTOBER 8

A high altitude sky-diver plans to leap from nearly 23 miles above the Earth on October 8th. This, in a high sped plunge that, if successful, will be the world's highest ever skydive. Amateur Radio Newsline's Jim Damron, N8TMW, has the details:

--

If all goes according to plan, a helium-filled balloon will lift off from Roswell, New Mexico on that date carrying Felix Baumgartner to an altitude of 120,000 feet in a custom built capsule that will keep him

in radio contact with the personnel at his mission control center on the ground. Once at altitude, Baumgartner will step out of the capsule and jump back toward Earth in his attempt to break a skydiving record that has stood for 52 years.

The current record for world's highest skydive stands at 102,800 feet. It was set in 1960 by U.S. Air Force Captain Joe Kittinger, who serves as an adviser for Baumgartner's mission. If Baumgartner succeeds, he will break not only that mark but also the sound barrier, becoming the first skydiver ever to fall at supersonic speeds. During a July 25th jump, Baumgartner's top freefall speed was 540 mph which is about as fast as a commercial airliner flies.

According to Baumgartner's launch team, this is more than a simple attempt at setting a world's record. If successful it will prove the viability of the next generation of space suits that can be worn by astronauts and cosmonauts working in the near space environment.

For the Amateur Radio Newsline, I'm Jim Damron, N8TMW, reporting.

--

A video of July 25th practice jump is on-line at tinyurl.com/high-jump-one. The mission's own website is at www.redbullstratos.com. (Published news reports)

**

RADIO IN SPACE: ISS SPACE DEBRIS AVOIDANCE MANUVER CALLED OFF

Plans to move the International Space Station to a slightly different orbit were called off on Thursday, September 27th. This after controllers determined that two pieces of orbital debris would not pose a collision risk.

According to NASA, Mission controllers had been monitoring debris from an old Russian Cosmos satellite and a fragment from an Indian rocket. Some scientists had said there was a chance that the debris could come close enough to require an adjustment in the station's orbit.

But NASA said additional tracking of the debris resulted in a high degree of confidence that neither object would pose any possibility of a collision with the ISS. As a result, Mission Control in Houston canceled the debris avoidance maneuver with concurrence of Russian flight controllers.

Space debris moves at a high orbital velocity rate and has the ability to cause damage to various operational on-orbit birds including the ISS. As such, flight engineers and spacecraft controllers try to give such space junk a wide berth whenever something might come close.

DX

In DX, OD5RW is on the air from Lebanon operating on 80 meters through 70 centimeters using CW, SSB, RTTY, SSTV and other digital modes. He also has D-Star capability on VHF and UHF. QSL via K8NA.

F6EXV and DJ8NK will be active from Niger through October 15th as 5U6E and 5U8NK respectively. Operation will be on the High Frequency bands though modes have not been announced. QSL 5U6E via F6EXV and 5U8NK via DJ8NK.

F6AML will be active from Mayotte Island through October 19th as T-Oh-2-M. He will be operational on 80 through 10 meter CW and SSB. QSL via home call.

N6XT and N7CQQ currently active portable KH8 from American Samoa. They are reported to be operational on all of the High Frequency bands using various modes. QSL via home calls

DJ7RJ will be on the air from Reunion Island signing stroke FR until October 21st. He plans to be active on all bands 10 to 160 meters using CW and SSB. QSL as directed on the air.

LZ1CNN has received his Afghan callsign and plans to be active as T6LG until next February. He'll be on all bands, CW and SSB. QSL via L-Zed-1-Zed-F and all QSO's will be uploaded to Logbook of The World.

Lastly, and down the DX road a bit word that K2TTT will be operational as C6ATT from New Providence Island between June 8th to the 15th, 2013. Activity will be on 40 through 10 meters. QSL via K2TTT.

**

THAT FINAL ITEM: JOTA 2012 - OCTOBER 20-21

And finally this week, the biggest event of the scouting season involving ham radio is drawing near. Amateur Radio Newsline's Mark Abramovich, NT3V, is here with the details:

--

It's the largest Scouting event in the world. Last year, it drew more than 750,000 Scouts in 150 countries to the ham radio frequencies manned by 6,000 amateur radio operators.

It's the 55th annual Jamboree on the Air which which runs the weekend of Oct. 20-21. Jim Wilson, K5ND, national Jamboree on the Air organizer for the United States as well as chairman of the national Radio Scouting committee, says it's a chance for amateur radio to introduce young men and women to the adventure and fun of the hobby...

"It's not a contest, it's a conversation," Wilson says. "And, there's no prizes handed out for the number of contacts that you make. Instead, it's about talking with Scouts, and, ideally, Scouts talking with other Scouts - either across town, across the state, across the nation, or across the world."

Wilson says in the United States, many Scout councils will be conducting camporees on JOTA weekend and amateurs will set up stations and put the Cub Scouts, Boy Scouts and Venturers on the air.

He says the neatest thrill for operators taking part in the event is facilitating a Scout working a DX contact, and ideally talking with a Scout overseas...

"The real excitement is seeing a Scout's eyes light up as they realize that they're communicating over such a long distance and how all this gear comes into play," says Wilson.

Wilson says he's already spoken with a few JOTA station organizers who are planning something special for the Scouts....

"They like to have the Scouts build their own antenna, test the antenna to see what the Standing Wave Ratio is and all that sort of stuff and then put it on the air and make a contact," Wilson says. "So, it's a simple dipole, a very easy way for them to do hands on and then watch as the result of their work makes a contact. It can be a very exciting experience for that Scout."

Wilson says there will be lots of activity on the air that weekend, including a scheduled contact from the BSA's Scouting museum in Texas with the International Space Station.

But he cautions amateurs need to make sure they brush up on those third-party agreements to ensure everyone stays legal.

Wilson says there's another very important reason to roll out the welcome mat for the Scouts... "Cub Scouts and Boy Scouts and Venturers that will be participating in Jamboree on the Air are the same people that are going to be writing the regulations for your antennas at your neighborhood level, at the city level, at the state level, at the federal level," Wilson says. "And now is a good time to reach out to them to say amateur radio has real value, it's making a difference in the world. This is the time to reach them.

"And JOTA is a great way to do that not only to grow the ranks of amateur radio, but to just introduce kids who may never participate in amateur radio so that they understand that it's magic, it's fun, and it contributes to our communities in a very positive way."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More information on JOTA 2012 is on-line at www.scouting.org/jota.aspx. The scouts say that they hope to make contact with you on the air.

(NT3V)

GB2RS NEWS

Sunday 7th October 2012

The news headlines:

RSGB Convention lectures

Response to Ofcom's consultation on the future use of VHF spectrum

CubeSats deployed

The RSGB Convention takes place at Horwood House near Milton Keynes next weekend, 12 to 14 October. The final programme is on the website at www.rsgb.org/rsgbconvention/. We are pleased to announce that Patrick, ON4HIL will be speaking both Saturday and Sunday on the recent DXpedition to Rockall and Carlo, ON4BR will be speaking on Sunday about the TN2T DXpedition. Howard Long, G6LVB will introduce the AMSAT FUNcube Dongle Pro+: a DC-to-Daylight Software-Defined Radio on Saturday and Dr Colin Forsyth will look at The Sun and The Sky and How Space Weather Affects Radio Signals on Sunday 14th. Finally, visitors also have the chance to hear Gregg Marco, W6IZT speak about the award winning HK0NA DXpedition on both Saturday and Sunday. The RSGB is grateful to all the presenters who take the time to speak at the Convention - there should be something for all interests. Day tickets for the RSGB Convention are still available at the door. Unfortunately, due to illness, the voluntary examiners for the US exams will be unable to attend this year. Normal service is expected to be available in 2013. The continued success of the RSGB Convention is such that we continue to grow year after year and 2012 looks like being the best yet.

The RSGB, jointly with the BATC and AMSAT-UK, has submitted a response to Ofcom's consultation on the future use of VHF spectrum formally used by the Home Office, 143 to 156MHz. The unique nature of this spectrum, and that it surrounds our existing 2m band, suggested a creative response would be needed in order to be competitive with the likely responses from Business Radio (PMR). Details are on the Committees section of the RSGB website under Spectrum Forum.

Radio amateurs around the world have been listening for signals from the four new amateur radio CubeSats that were deployed from the International Space Station on Thursday, 4 October. They could have a life-time of 4 or 5 months before they burn-up in the Earth's atmosphere. FITSat-1 has a CW beacon on 437.250MHz, 1200 bps AX.25 packet radio on 437.445MHz and a high-speed data transmitter on

5840.0MHz. F-1 has the callsign is XV1VN and the communications subsystem is built around two Yaesu VX-3R amateur radio handheld transceivers. One will transmit 1200 bps packet radio every 30 seconds on 145.980MHz while in darkness. The other will operate only in sunlight sending a 20 second FM transmission of a CW tone on 437.485MHz followed by a 60 second gap. TechEdSat carries a 1200 bps packet radio transmitter on 437.465MHz. WE-WISH transmits CW and 1200 bps packet radio on 437.505MHz. Due to the effects of Doppler shift the 70cm downlink frequencies will vary by +/- 10kHz during an 8 minute pass. Further information on these satellites can be found on the AMSAT-UK website.

The Mid Cornwall Beacon and Repeater Group are pleased to report that the GB3NC repeater has been successfully repaired and is now back in service. The re-alignment of the filters has also allowed the two metre beacon, GB3MCB, to be brought back into service. Reports via www.beaconspot.eu would be appreciated.

As of 1 October, Swedish radio amateurs are allowed to operate on 1810 to 1850kHz with a 1kW maximum power and 1930 to 2000kHz with a 10W maximum. The section of the band between 1850 and 1930kHz is unavailable. Sadly, they also lost their access to 2.3GHz, although 2.4GHz is unaffected.

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast. Between 7 and 13 October, the North American QRP CW Club is celebrating their 8th anniversary. There will be 10 special event stations on the air that week, one from each USA call area from N1A to N0A. Special QSL cards and certificates for anyone who works one or more stations are available. Details at http://naqcc.info/.

And now for the details of rallies and events for the coming week

The BATC Convention takes place this weekend at the Everest Community Academy, Basingstoke. The event includes BATC Biannual General Meeting today, Sunday 7th. More details on the website www.batc.org.uk.

The Autumn Militaria & Electronics & Radio Amateur Hangar Sale takes place today, Sunday 7 October, at Hack Green Secret Nuclear Bunker, Nantwich, Cheshire, CW5 8AL. Door open at 10am and there will be civil, military and vintage radio equipment plus vehicle spares and more. Contact Rod Siebert on 01270 623 353.

Also today, 7 October, the Blackwood and District ARS Rally will be held in Coleg Gwent, Risca Road, Cross Keys NP11 7ZA. Doors open at 10am and admission is £2. There will be trade stands, special interest groups and a Bring & Buy. More from Dave, GW4HBK on 01495 228 516.

The Hornsea Amateur Radio Club Rally will be held on 14 October at the Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ. Doors open at 10.30am and there will be trade stands, a Bring & Buy and special

interest groups. Details from Rick, M0CZR, by e-mail at, R106221@aol.com.

Now for the news of special events

Bishop Auckland Radio Amateurs Club will be active with the Scouts at Moor House, Durham from Friday 12 October to Sunday 14 October on 2m and HF using GB2CMH. The following weekend, 20 and 21 October, the club will host the Scouts JOTA weekend from the clubhouse with the callsign GB1FDS.

Members of the Guernsey Amateur Radio Society and Guernsey RAYNET group will be setting up a station and participating in the 2012 Jamboree On The Air on the weekend of 20 and 21 October. It has been many years since the Guernsey Scouts took part in this event and interest in this special event is high. The station will be using the callsign GB2JTA and will operate throughout the weekend on HF and VHF bands as conditions permit.

GB50WVR will be on the air from the Worth Valley Railway, West Yorkshire, over the weekend 12 to 14 October during the 50th anniversary autumn steam gala. Eight steam locomotives will be running over the weekend including two visiting ones. Direct QSLs to Pam, 2E1HQY, QTHR or via the RSGB bureau. More information is on qrz.com

And now the DX news compiled from 425 DX News and other sources

A three-man team will operate from Niger in West Africa until 15 October. They will use the calls 5U5U, 5U6E and 5U8NK and operation will be on all bands from 6 to 160m.

A new one for the IOTA chasers will be on the air until 11 October. This will be 7Z7AB operating from Al- Dhahrah Island. The IOTA reference will be AS-190 and QSL info is via 7Z1CQ.

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast. Arne, OH2NNE will be active as 5H2DK from Moshi, Tanzania until 17 October. He may also be on the air using a portable setup from different locations between 18 and 27 October. He will operate SSB only on 10 to 80m. QSL via his home callsign.

Sam, F6AML will be active as TO2M from Mayotte, which is IOTA reference AF-027, until 19 October. He will operate CW and SSB on the 10 to 80m bands. QSL via his home callsign, direct or bureau.

Now the contest news

The 21/28MHz Contest takes place for twelve hours today, Sunday 7th, starting at 0700UTC. There are Open, Restricted and QRP categories for UK stations; the same again for non-UK stations, plus you can enter CW-only, SSB-only or mixed modes. The exchange is signal report, serial number and locator.

The Worked All Britain HF Contest finishes at 1200UTC today, the 7th, using 20, 15 and 10m. UK stations send a signal report, serial number and WAB area, while non-UK stations send report, serial number and DXCC country. UK to UK QSOs do not count for points in this event. Full details of the rules and also log sheets can be obtained from the WAB website at www.worked-all-britain.co.uk.

The IARU 432MHz-248GHz Contest runs until 1400UTC today, the 7th. The exchange is signal report, serial number and locator. In theory you could submit a log direct to IARU for this event but, in practice, UK stations that enter one of the RSGB events allow their logs to be forwarded by the Contest Committee.

On 9 October, the 432MHz UK Activity Contest takes place from 1900 to2130UTC. Using all modes on the band the exchange is signal report, serial number and locator.

The following day, 10 October, the 80m Club Sprint takes place from 1900 to 2000UTC. Using CW the exchange is serial number and name.

Next weekend, 13 October, the EU Sprint takes place from 1600 to 2000UTC. Using CW only on the 3.5 to 14MHz bands the exchange is both callsigns, serial number and name.

Finally, over the weekend 13 and 14 October, the Oceania DX CW Contest takes place from 0800 to 0800UTC. On the 1.8 to 28MHz bands, the exchange is signal report and serial number.

And now the solar factual data for the period from Friday the 28th of September to Thursday the 4th of October, compiled by Neil Clarke G0CAS on Friday the 5th of October.

Solar activity started at low levels but, on the 30th, as several sunspot groups were rotating out of view, one produced the only M class solar flare of the period. This was an impulsive type solar flare and no earthward coronal mass ejection was associated with the event. Activity declined to very low levels on the 3rd and the 4th. Solar flux levels declined from 138 units on the 28th to 110 by the 4th. The average was 126 units. The 90 day solar flux average on the 4th was 123 units, that's one unit down on last week. X-ray flux levels initially increased to peak at B7.6 units on the 1st but as the active regions departed the solar disc levels declined sharply to B1.8 by the end of the period. The average was B4.5 units. Geomagnetic activity started at quiet levels but around noon on the 30th a coronal mass ejection arrived that departed the Sun late on the 27th. The disturbance lasted for about 24 hours and the Ap index on the 1st was 36 units. Aurora was report on 50 and 144MHz during the evening of the 30th. The quietest days were the 28th and the 4th with an Ap of 3 units. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a slow 260 kilometres per second during the morning of the 30th to 460 by early the next day. Particle densities

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast. were low except for a few hours

around midnight on the 30th and into the 1st when they increased to 20 particles per cubic centimetre. Bz varied between minus 1 and plus 3 nanoTeslas on the quietest day and between minus 20 and plus 10 nanoTeslas during the disturbance. And finally the solar forecast for the coming week. This Week the quieter side of the Sun should be rotating into view. Solar activity is expected to be at low levels on most days. Solar flux levels should start around 100 units with levels increasing slightly towards next weekend. Geomagnetic activity should be mostly quiet but a weak disturbance could take place around midweek. MUFs during daylight hours at equal latitudes should around 27MHz for the south and 24MHz for the north. Darkness hour lows should be about 10MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of around 25MHz. The optimum working frequency with a 90 per cent success rate will be about 20MHz. the best time to try this path will be between 1500 and 1900 hours UTC.

And that's all for this week from the propagation team.

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. On Sunday 7 October Lincoln Short-Wave Club is taking part in the WAB HF Phone Contest today from the shack until noon. The 432MHz UK AC is on Tuesday at the shack from 8pm, where on Wednesday G6COL is on the air whilst there's a video night at the BSA Club. The simplex club net on 145.375MHz is on Thursday from 8pm, and next Saturday sees the surgery in the shack from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

Wythall Radio Club is holding a club net on 145.225MHz today and next Sunday. On Monday the 8th, the Advanced course continues, and on Tuesday there's a committee meeting. Friday sees a social evening in the shack. Details from Chris, G0EYO, on 07710 412 819.

On Monday 8 October Friskney and East Lincolnshire Communications Club there is a VHF SSB club net on 144.165 USB, vertical polarization, then on Wednesday there's a M3+M6 club net on the GB3FR repeater. Finally on Friday there is a Club net on the GB3FR repeater. Contact the FELCC Information Line on 07554 362 020 for more details.

On Monday 8 October South Birmingham Radio Society is sorting out rally stock, then on Thursday there are Training classes with Dave Murphy. It's Shack and aerial work on Friday and on Saturday 13th the club is visiting the RSGB Convention. Contact Don, on 01214 581 603.

On Tuesday 9 October Central Radio Amateur Circle continues the Intermediate Course via Skype from 7 to 9pm, on Thursday there's a Night On The Air and on Saturday 13th they are visiting the RSGB Convention. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Wednesday 10 October Midland Amateur Radio Society is holding a committee meeting and training classes and on Sunday 14th there is a visit to the RSGB Convention. Details from Norman, G8BHE, on 07808 078 003.

Now we return to the traditional listing in date order.

On Monday 8 October Gloucester Amateur Radio & Electronics Society will be operating from the shack. Contact Anne, 2E1GKY, on 01452 548 478, daytime please.

On Tuesday 9 October Derby & District Amateur Radio Society is having a natter night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 9 October Eagle Radio Group has a talk on Protective Multiple Earthing by Charles Wilkie, G0CBM. Details from John, M6JMS, on 01754 873 926.

On Tuesday 9 October Loughborough & District Amateur Radio Club is on the air using 2m from home. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 10 October South Notts Amateur Radio Club has 10 minute talks. Details from Robin G4NDM, on 0115 9372942.

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast. On Wednesday 10 October Telford & District Amateur Radio Society is having an evening of ten minute tech topics. Contact Mike, G3JKX, on 01952 299 677 for more information.

On Thursday 11 October Salop Amateur Radio Society is holding a shack night on air. Details on the club website at www.salop-ars.org.uk.

On Thursday 11 October South Kesteven Amateur Radio Society Club is holding a net on 145.525MHz starting at 8pm. Contact Nigel, M0CVO, on 01476 402 550 for all the details.

On Thursday 11 October Tamworth Amateur Radio Society is having a talk by Darren Bisbey on Ham Radio Deluxe Linking to HF. More information from Darren, by e-mail to secretary@tars.es

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week.

On Sunday 7 October Hornsea Amateur Radio Club is taking part in the 21/28MHz Contest, then on Wednesday it's the 80m Club Sprint CW Contest and Rally preparation. On Saturday 13th, the club is activating the Skipsea Observer Corps Bunker for CASHOTA and on Sunday it's the HARC rally in Hornsea. Contact Gordon MacNaught, G3WOV, on 01377 240 573 for details.

On Monday 8 October Angel of the North Amateur Radio Club is on the air and the Advanced Licence Course ready for the exam next Sunday, the 14th. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Wednesday 10 October Denby Dale Radio Club has a night on the air starting at 7.30pm on +/- 145.575MHz. On Friday the Club is taking part in a three day event, Grim Up North, running GB2WYS from Bradley Wood scout camp. Details from Richard, M0RBG, on 07976 220 126.

Now we return to the traditional listing in date order.

On Sunday 7 October Tynemouth Amateur Radio Club is taking part in the 21/28MHz RSGB contest as G5N. Contact Bob, M6KLO, by email to mail@g0nwm.com for more information.

On Monday 8 October Sheffield Amateur Radio Club is having a talk on Morse Code and how to learn it and become proficient by G3PHO. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 8 October Workington and District Radio and IT Group Club is having a social evening. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday 9 October Morecambe Bay Amateur Radio Society is celebrating the member of the year. Contact Sheila, on 07867 516 836 for more details.

On Wednesday 10 October South Lancashire Amateur Radio Club is having a talk by Steve Gilbert, G3OAG on valves. Visitors are welcome. There will be a door charge of £1 and the draw will be taken after the talk. Details from Allan Green, 2E0RAG, 0753 397 0841.

On Thursday 11 October South Manchester Radio and Computer Club is having a talk on "Pic up a Penguin" by Ged, G8RSI. Details from Ron, G3SVW, on 01619 693 999.

On Friday 12 October East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 9 October Livingston & District Amateur Radio Society has an operating evening. Details from Norman, GM1CNH, on 07740 946 192.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week.

On Sunday 7 October Worthing & District Amateur Radio Club has the monthly breakfast meeting at The Goring Caf&#65533; at 9am, then on Wednesday there is a discussion evening and participation in the 80m CW Sprint contest. Contact John, G8FMJ, on 01273 593 232 for all the details.

On Monday 8 October Farnborough & District Radio Society is holding a Top Band net on 1.995Mhz at 8pm and has a talk on Wednesday on PCB's The Easy Way by Neville, G4SPD. On Friday 12th there will be a net on 144.675MHz starting at 8pm. All are welcome to join in. More information from Neville, G3SPD on 01252 404816

On Tuesday 9 October Chelmsford Amateur Radio Society is having a 2m net on GB3DA starting at 8:30pm. Wednesday is a committee meeting at Danbury Village Hall. Contact Martyn, G1EFL, on 01245 469 008 for more information.

On Thursday 11 October Reading & District Amateur Radio Club is having part 2 of the talk on High Power Transmitters by Tony Crake, G0OVA, then on Saturday 13th there will be a Foundation Course. Details from Pete, G8FRC, on 01189 695 697.

Now we return to the traditional listing in date order.

On Sunday 7 October Banbury Amateur Radio Society is operating a Special Event Station for Banbury Canal Day. Details from John, G8OZH on 07774 525818.

On Monday 8 October Braintree & District Amateur Radio Society is holding a club net on 2m. For more information contact John, M5AJB, on 01787 460 947.

On Monday 8 October East Kent Radio Society is holding its AGM and a Construction Contest. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 8 October West Kent Amateur Radio Society is looking at road regulations for amateurs with the meeting being led by Dave, G4OTV. Details from Keith, G4JED, via email to westkentars@googlemail.com.

On Tuesday 9 October Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 9 October Harwell Amateur Radio Society is holding a talk by Tony Crake, G0OVA on 40 years of technical things in the BBC. Details from Malcolm, G8NRP, on 01235 524 844.

On Tuesday 9 October South Essex Amateur Radio Society Club is putting the station on the air. More information from Dave, G4UVJ on 01268 697 978.

Copyright &#65533; RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast. On Wednesday 10 October Norfolk

Amateur Radio Club is holding a talk and discussion on the mystery antenna, a design by John C Basilotti, W5GI. The meeting will be led by Jim Bacon, G3YLA and Steve Nichols, G0KYA. The club is also embarking on its most ambitious training schedule ever with Foundation, Intermediate and Advanced course all before Christmas. There is only 1 place left on the Intermediate course, but plenty of space on both the Foundation and Advanced. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 10 October Southgate Amateur Radio Club is having a planning meeting for 2013. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Thursday 11 October Edgware & District Radio Society is holding a round table discussion about books available from the RSGB and Practical Wireless. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 11 October Havering & District Amateur Radio Club is holding a junk sale with Ollie, G3TPJ as the auctioneer. More information from John, M0UKD, on 07890 222 111.

On Thursday 11 October Shefford & District Amateur Radio Society has no meeting this week. Details from John Burnett, M6JBU, on 07860 804 793.

On Thursday 11 October Verulam Amateur Radio Club is holding a social with repeater group GB3VH at 7.30pm in the Rose and Crown Pub, Sandridge. Contact Ralph, G1BSZ, on 01923 265 572.

On Friday 12 October Cambridge & District Amateur Radio Club is Getting to know the Raspberry Pi with Quentin Stafford-Fraser. Contact Ron, G3KBR, on 01223 501 712 for more information.

On Friday 12 October Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday 12 October Wimbledon & District Amateur Radio Society is on the air. Contact Andrew Maish, G4ADM, on 02083 353 434 for details.

On Saturday 13 October Itchen Valley Amateur Radio Club is holding a Members Forum. Details from Liz, M0ACL, on 02380 254 599.

On Saturday 13 October Newbury & District Amateur Radio Society is putting on a special event station at Thatcham Arts & Leisure Show. Contact Rob, G4LMW, on 01635 862 737 for all the information.

Copyright © RSGB 2012. Not for public release before Monday 8 October 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week.

On Monday 8 October Exeter Amateur Radio Society is having a talk on crystal sets, valves and vintage radios, on Tuesday there is a 2m net

on 145.57 MHz at 7.45pm and on Thursday 11th there's a 4m net on 70.425MHz at 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday 8 October Weston Super Mare Radio Society is holding a Morse class and natter night, then on Sunday 14th October the club is taking part in the Kite festival on Berrow Beach. Details from Paul, G3SDH, on 01761 221 206.

Now we return to the traditional listing in date order.

On Tuesday 9 October Plymouth RC is having a talk by Chris Parker, M0ZCP on Advanced Repeater and Echo Link use followed by a natter night and the club radios will be on the air. Details from Rob James, 2E0ONO, via email to Robert- james@virginmedia.com.

On Wednesday 10 October Thornbury & South Gloucestershire Amateur Radio Club is holding a rally and haunted house event planning evening. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 11 October South Bristol Amateur Radio Club is looking at the calendar for 2013. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 11 October Swindon & District Amateur Radio Club is holding an activity night. Contact Den, M0ACM, on 07810 317 750 for more information.

On Friday 12 October Poole Radio Society is having a talk by Charles Riley and the Intermediate course continues. More information from Bill Coombes, G4ERV, by e-mail to secretary@g4prs.org.uk

On Friday 12 October Torbay Amateur Radio Society is having a natter night as well as an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Thursday 11 October Aberystwyth & District Amateur Radio Society is holding its AGM. Details from Ray, GW7AGG, on 01970 611 853.

#
Highlights of Solar and Geomagnetic Activity
01 - 07 October 2012

Solar activity was low. The largest flares of the week, both C4s,
were attributed to Region 1575 (N08, L=181, class/area=Eko/320 on 22
Sep) at 01/0147Z and again at 01/1313Z as it rotated beyond the west
limb. The remainder of the week was characterized by x-ray flares in
the mid-to-upper B class and low C class range. An exceptionally
long duration B7 flare (7hr 29min) from Region 1584 (S23, L=70,
class/area=Dso/40 on 01 Oct) peaked at 05/0730Z and was associated
with an earth-directed CME. The CME was observed in SOHO/LASCO C3
imagery at 05/0730Z and had an estimated speed of approximately 590
km/s. It was expected to reach earth late on 08 October. Another CME
was observed later in the week when a 30 degree long filament,
centered near S65W15, erupted on 07 October. SDO imagery first
observed movement along the filament channel at approximately
06/2000Z with ejecta visible off the SW limb at about 07/0700Z.
LASCO C2 imagery observed a partial-halo CME lifting off the SW limb
first visible at 07/0812Z. Subsequent WSA-Enlil model output
indicated a possible weak, earth-directed component of this CME.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels throughout the week.

Geomagnetic field activity began the week at severe storm levels
after an earth-directed CME from 27 September arrived late on 30
September. Severe storm levels were observed for the 01/00-03Z
synoptic period, decreasing in the subsequent periods to major storm
levels for 01/03-06Z, and then active levels for the 01/06-09Z
period. The remainder of the week saw quiet geomagnetic conditions
with the exception of the first synoptic period on 03 October which
was unsettled.

Forecast of Solar and Geomagnetic Activity
08 October - 03 November 2012
```

Solar activity is expected to be at generally low levels with a chance for an M-class event, particularly during 12-26 October when Old Region 1583 (N12, L=187, class/area=Dso/90) returns.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels on 11-13 October as a result of a coronal hole high speed stream. Flux for the remainder of the forecast period is expected to be at background levels.

Geomagnetic field activity is expected to begin at quiet to unsettled levels, increasing to active to minor storm levels late on 08 October with the arrival of the earth-directed CME from 05 October. Minor storm levels are expected to continue through 09 October. Then geomagentic field activity is expected to decrease to unsettled to active levels for 10-11 October under the influence of a coronal hole high speed stream. Quiet conditions return on 12-14 October before subsequent coronal hole high speed streams bring unsettled to active conditions on 15-17 October.

AMSAT NEWS SERVICE

ANS-281

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

BID: $ANS-281.01

Register Today for the 2012 AMSAT Space Symposium in Orlando

This is a reminder that the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th at the Holiday Inn Hotel at Orlando-International Airport. See the AMSAT Web Store to complete your on-line registration.

Symposium Registration including Proceedings:

Starting September 24, 2012: $ 50.00At the Door: $ 55.00

Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page. The Symposium Schedule web page has been updated with links to find more information about the planned activities.

[ANS thanks the 2012 Symposium Committee for the above information]

2012 AMSAT Symposium Schedule

To help you plan your trip to Orlando the 2012 Symposium Committee has posted a high-level schedule of the weekend's events.

Thursday 25 October 2012

AMSAT Board of Directors Meeting 8am - 9pm

Friday 26 October 2012

AMSAT Board of Directors Meeting 8am - NoonTrips to SkyCraft 9am - NoonAMSAT Symposium 1pm - 5pm

Saturday 27 October 2012

Symposium 8am - 3pmAMSAT General Meeting 3:30pmAMSAT Banquet 6:30pm - 10pmThe featured speaker for the AMSAT 2012 Saturday Evening Banquet will be Dr. Samuel T. Durrance, NASA Astronaut/Payload Specialist and Professor of Physics and Space Sciences at the Florida Institute of Technology.

Sunday 28 October 2012

7:30am AMSAT Area Coordinator's BreakfastLocal trip to Orlando Science Museum

Monday 29 October 2012

Special trip to Kennedy Space Center 8am-6pmThe trip will include a round trip bus from the hotel and entrance to the Space Center. The cost will be about $100. This is a wonderful experience for those that haven't been and for those that have been multiple times. We need to get an idea of how many will participate to select the correct bus. Contact Martha at the AMSAT Office if interested.

Watch the AMSAT Symposium Web Pages for the latest information.

[ANS thanks the 2012 Symposium Committee for the above information]

Five CubeSats Deployed From ISS Now on-Orbit - Signals Received

Five cubesats launched on July 21 and loaded aboard the ISS were integrated with the J-SSOD small satellite deployer on the the Japanese Experiment Module, also known as Kibo. They were deployed with the Kibo robotic arm on October 4, 2012. The orbit for these CubeSats will be very close to the orbit of the ISS.

NanoRack posted a photo of the deployment at: pic.twitter.com/wZAX5qZL (Click on the image to view the full-sized photograph)SpaceRef posted an article and several more photographs on-line at: http://spaceref.com/news/viewsr.html?pid=42238

First Deployment by Astronaut Akihiko Hoshide

WE-WISH - Telemetry downlink on 437.505 MHzRAIKO - non-amateur radio Ku-band beacon

Second Deployment by JAXA GS

TechEdSat - Telemetry downlink on 437.465 MHz.NanoRack/F-1 - 145.980 MHz: main channel, 1.0W RF output, FM, AFSK 1200bps, one telemetry packet every 30 seconds, operates in the dark by default (but can be commanded later to operate in sunlight) 437.485 MHz: backup channel, 0.2W RF output, FM, PWM CW beacon, each beacon transmission lasts about 20 seconds then 60 seconds delay, only operates in sunlightFITSAT-1 CW Beacon 437.250 MHz, FM Data 437.445 MHz, High speed data 5840.00 MHz

FITSAT-1 Heard With Strong Signals

Signal reports from PY5LF, OH3UW, DK3WN, VU3TYG, G6LVB (using a FUNcube Dongle Pro+ and 7" wire antenna), GW1FKY, F5YG, JE9PEL, JN1GKZ, ST2NH, and others via the amsat-bb list.

FITSAT-1 transmits its beacon frequency 437.250 MHz. This is the same frequency as the PRISM satellite of Tokyo Univ. FITSAT CW will transmit, "HI DE NIWAKA JAPAN" with its telemetry data. To receive a FITSAT-1 QSL card please send your signal report and your postal address to: fitsat1@hotmail.co.jp and also cc to tanaka@fit.ac.jp.

A photo of the QSL card is shown at: http://www.fit.ac.jp/~tanaka/fitsat.shtml This web page will also be updated with information about the status of the LED experiment.

HB9FFH has made a telemetry decoder for FITSAT-1, available at:

http://carpcomm.com/satellite/fitsat1

FITSAT students have also developed a similar program for windows:

http://turing.cs.fit.ac.jp/~fitsat/C..._Analyzer1.zip

TechEdSat Heard With Weak Signals

Signal reports received from PY5LF, DK3WN, and JE9PEL indicate that TechEdSat was received with weak signals on its 437.465 MHz downlink. Mark Allard, KD6CWM, President of the NASA-Ames Research Center Amateur Radio Club reports their OSCAR/ARISS satellite station, NA6MF, will be supporting

TechEdSat as one of the monitoring stations for the TechEdSat Amateur Radio beacon.

TechEdSat transmits a custom beacon packet. Details can be found at: http://www.techedsat.com/. Packets acquired from TechEdSat can also be submitted to the website for decoding by the TechEdSat team. Use the 'Packet Submission' link found at the top of the web page.

WE WISH SSTV Picture Received

PY4ZBZ and JE1CVL received the SSTV picture on 437.505 MHz. JE9PEL provided a translation of the image that is a sentence of "JQ1ZIJ MEISEI ARC 2012". A photo of the received picture is at: http://www.ne.jp/asahi/hamradio/je9pel/21005wis.png A photo of the SSTV picture received by PY4ZBZ is posted at: http://www.qsl.net/py4zbz/satelite.htm#ww

Viet Nam F-1 Not Heard

Viet Nam's F-1 satellite was scheduled to begin telemetry transmissions 30 minutes after deployment by sending a beacon alternating on its main and backup channels. At press time no signal reports have been received from this satellite.

More information and guide to download F-1 telemetry decoder can be found at http://fspace.edu.vn/?page_id=27. Decoded data can be submitted via the telemetry decoder or by sending directly to the ground station: thuvt@fpt.edu.vn. Audio recordings are highly appreciated.

[ANS thanks the CubeSat Teams; Vu Trong Thu, XV9AA; Mark Allard, KD6CWM; and Takushi Tanaka, JA6AVG for the above information]

AO-27 Reported Down

AO-27 user reports this week reported that the satellite was not operational. The end-of-transmit cycle AFSK packet telemetry beacon was reported to become stuck on a single tone. No downlink signal was received from AO-27 on later passes.

The latest AO-27 news is posted on its webpage: http://www.ao27.org/AO27/index.shtml

In summary, as of October 6 control operators had recovered AO-27 to running on the primary Bootloader and were able to turn on the transmitter for a short time. They continue working on uploading the software.

Mode V/U (J) FM Voice Repeater Frequencies

Uplink: 145.8500 MHz FMDownlink 436.7950 MHz FM

[ANS thanks James, N3UCC and Michael, N3UC for the above information]

PACIFICON 2012 Will Feature ARISS Contact and Satellite Demo Station

An Amateur Radio on the International Space Station (ARISS) contact has been planned with youth participants at PACIFICON 2012, Santa Clara, CA on 13 October. The event is scheduled to begin at approximately 18:57 UTC or 11:57 PDT. The contact will be a telebridge between NA1SS (the ISS) and IK1SLD (in Italy). The contact should be audible over Europe and the Mediterranean. Interested parties are invited to listen in on the 145.80 MHz downlink. The contact is expected to be conducted in English.

PACIFICON 2012, a premiere wireless event, will be held October 12, 13, and 14, 2012 and will host the 2012 American Radio Relay League (ARRL) National Convention and Exposition.

Over 2,500 amateur radio enthusiasts are expected to attend. The 2012 PACIFICON Youth program includes a "Youth Lounge" and forums throughout the convention weekend; the Youth program is positioned in the middle of the exhibit hall and provides STEM educational activities which include hands on radio operation, electronics kit building orbital mathematics, CubeSat satellite design, and popular radio transmitter T-Hunts.

A scheduled ARISS radio contact and a presentation by NASA astronaut, Dr. Lee M. Morin KF5DDB, will highlight the Youth Lounge activities. Free admission is provided to Girl Scouts, Boy Scouts, Camp Fire Girls, Brownie, Cub Scouts, Explorer Scouts, 4-H members, and to all youth 17 and under. The Youth Forum will include young Amateur radio enthusiasts Andrea Hartlege KG4IUM, former ARRL South Eastern Division Vice Director and Katie Stensrud K7KTI, a young Amateur from Nevada, and many amateur radio educational resources from the ARRL & AMSAT.

PACIFICON 2012 will include numerous amateur radio operations including the convention FCC Special Event Station W6P; the ARRL's W1AW/6; additional stations will be operated remotely from the convention site as well as one portable satellite earth station and one fully automated satellite earth demonstration station. PACIFICON 2012 will offer over 120 educational forums and programs, including a forum hosted by AMSAT on Amateur Satellite Communications, approximately sixteen indoor on-the-air exhibits, and eight outdoor on-the-air exhibits will be hosted.

For more information, please review the PACIFICON 2012 web site at: http://www.pacificon.org/ or, contact Joe Spier, Associate Director for Education, AMSAT-NA, at k6wao@amsat.org

[ANS thanks Joe Spier, K6WAO and Mark Hammond, N8MH for the above information]

ARISS Successful School Contacts

Turkey

Izmir SEV Primary School, located in Turkey, had an Amateur Radio on the International Space Station (ARISS) contact on October 5 via telebridge station K6DUE in Greenbelt, Maryland.

The school participates in the Partner School Science Program, which is a program under Global Friendship Through Space Education, a California-based

non-profit organization that promotes friendship among young people from different countries and cultures through the study of space-related science and technology. Students communicate about space-related projects via e-mail, collaborate on research on NASA's distance-learning Web site, and videoconference between NASA and partner schools. First Lego League Robotic Teams and Destination Imagination Teams have been a part of school activities annually since 2005. Invitations to attend this event were extended to several VIPs including the minister of transportation, the president of the board of education, the director of education, the mayor of Izmir and the governor of Izmir.

Maryland

An Amateur Radio on the International Space Station (ARISS) contact was held between students at the Waxter Young Women's Academy in Laurel, Maryland and Akihiko Hoshide, KE5DNI aboard the ISS on September 24. Telebridge station LU8YY in Argentina handled the radio connection. The girls were able to have all 13 of their questions answered with enough time left to thank Hoshide for participating. Phone lines throughout the center were made available so that other students could listen in as well. The ARISS contact was part of a comprehensive education plan used to interest students in Science, Technology, Engineering and Math (STEM).

Nova Scotia

On September 26, Sacred Heart School of Halifax in Nova Scotia, Canada participated in an Amateur Radio on the International Space Station (ARISS) contact with on-orbit astronaut Sunita Williams, KD5PLB. Telebridge station LU8YY in Argentina connected with Williams, but the international phone line, which was to connect Argentina to Halifax, went down and could not be brought up until after the ISS had passed overhead. Williams agreed to try the contact again on the next pass. Ninety minutes later, the audience of 250 got what they had been waiting for - a successful contact! The students got in 17 questions, and one student was wished a Happy Birthday by the ISS commander.

Video of LaFayette Middle School ISS contact

When Jody Carter was 8 years old, his father tried unsuccessfully to contact the space shuttle via ham radio. Thirty years later, the second time was the charm. The Times Free Press reports that just after 11 a.m. Friday, Sept. 21, Carter, who's now a math and science teacher at LaFayette Middle School, radioed Sunita "Suni" Williams KD5PLB, commander of the International Space Station. Read the full story and watch the video at: http://tinyurl.com/Lafayette-ISS

[ANS thanks Carol Jackson, KB3LKI for the above information]

US Naval Academy PSAT Features PSK-31 and APRS Transponders

The US Naval Academy in Annapolis, Maryland is developing a new student satellite, ParkinsonSAT, or PSAT which is a two way APRS communications transponder for relaying remote telemetry, sensor and user data from remote

environmental experiments or other data sources back to experimenters via a global network of internet linked volunteer ground stations. The data transponder also includes all telemetry, command and control for a complete cubesat.

PSAT is a 1.5 unit cubesat so that two PSATs can be launched from the same P-Pod launcher. The design uses four deployable solar arrays which are stowed down the sides. Half of the 1.5 unit PSAT is available for auxiliary payloads or experiments.

PSAT will fly a PSK-31 transponder with a 10 meter uplink and a 2M FM downlink. PSK-31 will allow up to 30 simultaneous users.

Bob Bruninga, WB4APR noted, "PSK-31 is the ideal AMSAT FM transponder for a cubesat. With an FM downlink, anyone can receive it with an HT and a laptop with PSK-31 software. And anyone with a 10m PSK-31 uplink can transmit to it. And since the downlink is FM, everyone tuned in SEES THE SAME WATERFALL and sees EXACTLY where they are in the downlink. A small uplink doppler adjustment can keep each station locked to his chosen channel in the passband. Everyone can talk to everyone if they want, or go one-on-one too."

The SSB uplink and UHF FM downlink transponder fits on a smaller than 3"x3" circuit board being developed by Mirek Kasal at Brno University. Launch of PSAT is planned in 2015. The 3"x3" transponder may also be adaptable for other missions.

[ANS thanks Bob Bruninga, WB4APR for the above information]

Cuba Satellite Group Launches Satellite Net in Havana

Raydel Abreu Espinet, CM2ESP reported this week that the Cuban Satellite Group named Grupo de Radioaficionados para Operaciones Satelitales (GROS) has started a VHF FM Net devoted entirely to the Amateur Radio Satellites on 145.550 MHz. CM2ESP is the Net Control Station. The net will be on the air every Friday from 19:00 to 20:00 local time in Havana.

The net is in range for the Havana Province (capital of Cuba), with coverage also to the surrounding provinces of Mayabeque and Artemisa. The net is divided in three sections: News; A Technical Topic; and Question and Answer Session.

The Cuban Satellite Group named Grupo de Radioaficionados para Operaciones Satelitales (GROS) will continue promoting and creating new activities to increase the presence of Cuban Amateur Radio Stations on the satellites and the activation of new grids. Several demonstrations and workshops are currently being scheduled.

[ANS thanks GROS Coordinator Raydel Abreu Espinet, CM2ESP for the above information]

FUNcube Dongle Filtered Preamp Available at AMSAT-UK On-line Store

David Bowman, G0MRF, a member of the AMSAT-UK FUNcube team, has designed and manufactured a 2m Filtered Preamp for use with the FUNcube dongle or

any 2m receiver. This is now available for purchase through the AMSAT-UK web shop.

Two versions of the preamp are available. The first is a kit form including all the components required to build the preamp yourself. The second is a prebuilt version. The stock on the prebuilt version is very limited. Both kit and prebuilt versions are on sale for £47 plus postage and packing.

More information is available on the AMSAT-UK web site. Look under the "Projects" section at to read the construction notes as well as the measurement report carried out on the preamp. The preamps appear under the "Hardware" category in the catalogue in the AMSAT-UK web shop.

A video demonstration of the FUNcube Dongle Pro+ LF/MF/HF/VHF/UHF Software Defined Radio is posted on the AMSAT-UK web.

[ANS thanks Ciaran Morgan, M0XTD of AMSAT-UK for the above information]

Satellite Shorts From All Over

AMSAT Director Contests and Awards, Bruce Paige, KK5DO says a correction needs to be made to the AMSAT Field Day Results he sent last week. The line: 7 WC9C 4E 15 should be corrected to: 7 WC5C 4F
15 An article, photos, and the results will be published in an upcoming edition of the AMSAT Journal.The traditional e-mail format of the AMSAT News Service Bulletins is being expanded so that news of Amateur Radio in Space is more accessible on mobile devices:

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind that the light from the sun, arriving now is 30,000 years old. The energy in the sunlight we see today started out in the core of the Sun 30,000 years ago. It spent most of this time passing through the dense atoms that make the core and just 8 minutes to reach us once it had left the Sun.

HUNTSVILLE Ala. (WAAY) - John Lewis is an amateur radio operator. He's been doing it for 50 years. It may not sound like much, but in a natural disastor it's a skill that saves lives. "Its strictly a hobby but its one of those situations where the hobby, once a disaster hits, is no longer a hobby. Its reality," Lewis said. Lewis and hundreds of other communication operators in Alabama participated in a simulated emergency test Saturday. "Were actually doing this in a real format. Well have a lot of radio amateur operators we call them 'Hams' and then a lot of our served agencies, whether its crisis services, the American Red Cross, some of the churches, all these different places that rely on us as communications go down. We want to see if we can pass traffic as communications," Huntsville EMA operator Tim Holland said.

Amateur Radio Operators Ready to Serve:

Posted: 07 Oct 2012 05:41 PM PDT
http://www.eham.net/articles/29108

KANSAS CITY, Mo. - Imagine this: a massive earthquake hits near Kansas City, and hundreds of thousands take refuge in the metro. Those folks would need places to sleep, food to survive and care from medical providers, and to make things worse, the power is out too. Amateur radio operators in the area spent part of Saturday practicing that scenario. "When all else fails, we're here." That's the motto of amateur radio operators. "We're prepared and we always provide communications in emergencies and when everything else fails the amateurs are up and running." Jim Bair said. He's an amateur radio operator with Jackson County ARES. On Saturday, more than 150 amateur radio operators across the metro met at the Red Cross and community centers, hospitals and churches for an eight county communications exercise. The scenario? A New Madrid earthquake of 7-plus on the Richter scale hits, sending thousands to the metro area looking for refuge.

Anacapa School to Host Live Q and A with International Space Station:

Posted: 06 Oct 2012 05:34 PM PDT
http://www.eham.net/articles/29102

Students and faculty of Anacapa School are preparing for a rare event that will allow them to make contact with an astronaut aboard the International Space Station via amateur radio as part of the independent school's annual Synthesis Unit. Anacapa has the opportunity to participate in the Amateur Radio on the International Space Station program, a cooperative venture between NASA and other international space agencies that coordinates scheduled radio contacts between astronauts aboard the ISS and schools. The 10-minute live forum will bounce between Anacapa students and astronauts as the space station's orbit passes over Southern California. NASA is expected to confirm a final date for Anacapa School's ISS contact sometime in the 2013 spring semester.

//
Samuel Morse: The Man Who (Almost) Never Succeeded:

Posted: 06 Oct 2012 05:34 PM PDT
http://www.eham.net/articles/29101

It's been a long time since I did a photography history article. I generally prefer the early days of photography. People just were--I don't know, more--back then. There was more lying, more backstabbing, more drama, and more originality. You name it; they did more of it. In my various readings, which I do far too much of, I learned a bit about Samuel Morse and became fascinated. This guy had more careers than I have. (Hey, some of those careers I wanted to leave. Don't be tacky.) At various times he was a preacher, a painter, a professor, an inventor, a photographer, and a politician. But when I looked a little deeper, I found he wasn't a Renaissance-type Polymath as I had assumed. Morse was an argumentative, whining man who failed at one career after another, fought with and sued (or was sued by) virtually every associate he ever had, and played the poor-pitiful-me victim card at every turn. He succeeded at almost everything he did for a while, then failed miserably and left to do something else. He is recognized as the inventor of the telegraph, which he really wasn't, and the originator of Morse code, which he probably was. On one of his many career side-trips he also had a large role in bringing photography to the U. S. It is largely because of Morse that American photography took a leading role in the mid-1800s. That wasn't really his

intention, though. He spent far more time and energy telling everyone he had done it than he actually spent in doing it.

Japan Mini-Satellite to Flash Code from Space:

Posted: 06 Oct 2012 05:34 PM PDT
http://www.eham.net/articles/29100

A palm-sized Japanese satellite in orbit around Earth will flash a Morse code message that will be visible around the world from next month, the mission commander said Friday. Researchers hope the satellite, measuring 10 centimetres (four inches) cubed and launched from the International Space Station on Friday, will become the first orbiter to transmit an LED message across the night sky. The message was originally intended to be seen just in Japan, but people around the world have asked for the satellite to communicate when it overflies them, said Takushi Tanaka, professor at The Fukuoka Institute of Technology. The message it will send is "Hi this is Niwaka Japan". Niwaka is the satellite's nickname and reflects a play on words in the local dialect of southwestern Japan.

RAC Bulletin 2012-059E - Mike Myers, VA3MPM
2012-10-06

On August 28, 2012 , incorrect information about the status of a Volunteer Examiner was passed to Radio Amateurs of Canada and then further disseminated by means of a bulletin. As a result, an incorrect impression was provided to the amateur radio community of the qualification of the examiner concerned, Mr. Mike Myers, VA3MPM.

We apologize to Mr. Myers for any problems that we may have caused him and which detract from the work he and others continue to accomplish on behalf of the amateur radio community. Our volunteer examiners are an important part in administering Industry Canada's certification exams without personal gain.

Radio Amateurs of Canada has taken appropriate steps to ensure that similar information of interest to Canada's amateur radio community that it might receive in the future from any source is verified before publication.

RAC Bulletin 2012-060E - NARED database
2012-10-09

Work has begun on the development of a new database for ARES/EmmCom personnel. Particular attention is being placed on confidentially, in response to concerns of amateurs across the country.

In order, to ascertain the volume which we will be required to accommodate, we are requesting that Section Managers (SM's) request their Emergency Co-ordinators (EC's) to provide a list of their ARES members . The only information required is a name and call sign. This information will not be placed on a database. In addition, we would like each group to provide an estimate of the net growth their organization anticipates annually.

I am requesting that responses be sent toracnared@gmail.com <mailto:racnared@gmail.com>by November 15, 2012. Any questions can also be forwarded to the same address.

Amateur Radio Operators Practice Earthquake Drills:

Posted: 08 Oct 2012 05:18 PM PDT
http://www.eham.net/articles/29118

KANSAS CITY, MO (KCTV) - A natural disaster could deplete communication capabilities, and that's why more than 150 amateur radio operators are learning what to do in case that ever happens in Kansas City. Officials at the American Red Cross headquarters in Kansas City spent Saturday preparing for a large earthquake scenario. They estimate that if a magnitude 7 earthquake hit Missouri, up to a quarter million people would flock to Kansas City for refuge. The extra people and the damage from an earthquake that strong would no doubt take a big chunk of communication away, which is where amateur ham radio operators come in. The Red Cross would rely on the radio operators for communication between shelters and hospitals.

//
Amateur Radio Operator Clashes with Code Enforcement:

Posted: 08 Oct 2012 05:18 PM PDT
http://www.eham.net/articles/29117

KENNESAW - Lifelong amateur radio enthusiast Ritner Nesbitt, a grandfather of 10 who lives down the road from Dominion Christian Schools in west Cobb, has attracted the unwelcome attention of the county's code enforcement department. Nesbitt said he moved to his home, which is located on a wooded slope across the street from Burnt Hickory Farms subdivision, 20 years ago precisely because it was an excellent spot to pursue his passion for amateur radio, also known as ham radio, a non-commercial radio communication service. He erected three radio towers on the slope behind his home in the 1990s: two that crank up to 35 feet and one that is 70 feet in height. Two years ago, he built a fourth 140 foot radio tower which he estimates cost him "easily" $30,000 to $40,000. In March, the county received a complaint about the tower and issued Nesbitt a notice of violation. Nesbitt responded to this notice by arguing that ham radio operators are licensed by the Federal Communications Commission and therefore are exempt from local ordinances. But just to be safe, he applied for a special land permit for the 140 foot tower, which the county's Planning Commission denied on Tuesday in a 5-0 vote. The matter now heads to the Board of Commissioners on Oct. 16.

****************************************
The ARRL Contest Update

Published by the American Radio Relay League
****************************************

October 10, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- A Baker's Half-Dozen Sprints

- Battleground States - AZ, PA, IA, NY, IL QSO Parties
- K5ZD Named CQ WW Director
- New CW Trainer by Alex VE3NEA
- One H of a Frame
- August NAQP SSB Prelims Are Out
- Differences for the Discerning
- Amazing NASA Sensors
- Between You and Me

NEW HF OPERATORS - THINGS TO DO

Wow - LOTS of things to do on HF in October. This month is one of the
busiest contest months - why? Because early fall conditions on HF are
generally quite good compared to summer and winter. No matter what your
tastes - phone, code, or digital - there are multiple contests going on
for the next couple of weeks, followed the Big Fall Four: CQ WW SSB,
ARRL Sweepstakes (CW then Phone), and CQ WW CW.

BULLETINS

The 5-day log submittal deadline for all CQ Contests was announced
after the 2012 CQ WW RTTY Contest Rules were published in the July 2012
issue of CQ magazine. Those published rules gave 15 October 2012 as the
log deadline. Accordingly, logs will not be considered late for this
event until after 15 October. (Thanks, CQ WW RTTY Director, Ed W0YK)

Take some time out of your days for students and scouts getting a taste
of radio. The ARRL School Club Roundup
<http://www.arrl.org/school-club-roundup-scr>(Oct 15-19) and the annual
Jamboree On the Air
<http://www.arrl.org/news/scouts-and-scouters-take-to-the-airwaves-for-the-55th-jamboree-o
n-the-air>
(Oct 20-21) are coming up - make a few QSOs and meet some future hams!
```

BUSTED QSOS

Egregious errors were avoided in the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

October 13-14

- School Club Roundup (Oct 15-19)
- North American RTTY Sprint
- 10-10 Sprint (Oct 10)
- NAQCC Monthly QRP Sprint--CW (Oct 10)
- CWops Monthly Mini-CWT Test (Oct 10)
- Great Pumpkin Sprint--Digital
- Makrothen RTTY Contest
- Oceania DX CW Contest
- Scandinavian Activity Contest--Phone
- QRP ARCI Fall QSO Party--CW
- Arizona Centennial QSO Party
- EU Autumn Sprint--CW
- Pennsylvania QSO Party
- FISTS Fall Sprint--CW
- SKCC Weekend Sprintathon--CW

Oct 20-21

- Arucaria VHF Contest
- JARTS WW RTTY Contest
- 10-10 Fall CW QSO Party
- Scandinavian YLRA Contest
- Iowa QSO Party
- New York QSO Party
- Worked All Germany
- Stew Perry Warmup Contest--CW
- W/VE Islands QSO Party
- Telephone Pioneer QSO Party
- Spooky Feld-Hell Sprint
- Asia-Pacific Sprint--CW
- Illinois QSO Party
- Run For the Bacon--CW (Oct 22)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

With the CQ Worldwide SSB contest looming (Oct 27-28), CQ Magazine <http://www.cq-amateur-radio.com> publisher Dick Ross, K2MGA wasted no time, naming Randy Thompson, K5ZD as the new Director of the CQ World Wide DX Contests <http://cqww.com> (RTTY, SSB, and CW), succeeding Bob Cox, K3EST who stepped down after 35 years. Your editor is greatly pleased to see such a wise choice - thank you, Randy! Since 2008, he has been Director of the CQ WPX Contest program, making many necessary updates to that contest program's log checking and administration. As other top contesters know, Randy is an excellent operator and member of

the CQ Contest Hall of Fame, holding a number of records and representing the United States four times in the World Radiosport Team Championship. Randy is also a co-chair of WRTC-2014 <http://www.wrtc2014.org> - a busy guy! In the CQ press release, Randy is quoted, "The CQ WW is the biggest event on the contest calendar (and) I am honored to be involved and follow in the giant footsteps of K3EST. With the great conditions we are seeing on the bands, this year should be the biggest CQ WW ever! The first order of business is to have the team ready for the new 5-day log deadline and faster results reporting." His appointment to the directorship of the CQ WW creates a vacancy for Director of the CQ WPX Contests. Anyone interested in taking on the challenge of leading a major contest should contact Randy at k5zd@cqwpx.com.

The World Wide Radio Operators Foundation <http://wwrof.org> (WWROF) is sponsoring a free webinar <https://www2.gotomeeting.com/register/415191514> on Oct 21 at 1900 Z; "CQ WW Update 2012", hosted by - who else? - but its new Director, K5ZD. The webinar will provide an update on the status of the contest including new rules for 2012, log entry tips, fair play, and various other topics of interest. Questions will be taken following the presentation. (Thanks, Ken K4ZW)

The Young Amateur Contest Ham Team <http://yachthams.webstarts.com/about.html> featured in the latest Youth@HamRadio.Fun <http://www.arrl.org/news/youth-hamradio-fun-the-young-amateurs-contest-ham-team> column by Sterling, N0SSC looks like fun for new hams. The group has nearly 80 members from around the world and more than 20 mentors assisting them. They have a weekly Echolink net so everyone can participate and membership is free, so encourage your young contester to get on-board!

Bob K0RC has posted an updated CQWW RTTY Log Analyzer <http://tinyurl.com/7xjxypc> for download. The new version will import up to 3,000 QSOs. If your log is larger, send Bob an email to request a High Capacity version.

More software tools! - Jim W7EJ/CN2R has added new features and updated his Log QSO <http://logqso.com/> contest log analyzer web application. All CQ WW contest results from 1991 through 2011 can be viewed - the logs are the public logs posted by the CQ WW committee. There are several videos that describe how to use the tool - for example, you can compare the scores of up to three different stations on an hour-by-hour basis (as well as other time scales). This is a web-based application and runs on the most common Internet browsers. (Thanks, Steve N2IC)

The EU Sprint committee reports problems getting the web site updated with recent results but wants to confirm that the Autumn EU Sprint <http://www.eu-sprint.com/> contests will take place as usual, starting with the phone contest this coming Saturday. The committee (G4BUO and RW3FO) are looking for another European contester to help manage and

promote the contest - please contact G4BUO <dave@g4buo.com> directly.

CQ WW RTTY Contest <http://www.cqwpxrtty.com/> Director, Ed W0YK notes that, "It is apparent that many people do not read the robot email reply they receive. At the bottom of that email, the robot lists the format errors in the log. If you don't understand what the robot is telling you, then simply compare that specific QSO line with the format specified on the Logs webpage. The problem should be obvious." Be sure to configure your logging software to output your information in the right order as shown on the contest's "Logs" web page. (There is a known problem with MixW omitting the QTH field from the output Cabrillo file - see the Logs webpage for a workaround.) Ed reminds everyone that "you can easily edit your Cabrillo file with a text editor. Since is it common to add, change or move the same parameter field in every QSO line, a column editor is invaluable. I recommend the freeware Crimson Editor."

It's a bird, it's a plane, it's FITSAT-1
<http://www.engadget.com/2012/10/05/FITSAT-1-launched-from-ISS/?utm_medium=referral&utm_source=pulsenews>
- what's it saying up there? One of the recently launched CubeSats from Japan is covered in high-power LEDs and will be blinking out the message "HI THIS IS NIWAKA JAPAN" in Morse code as it orbits the Earth. No word was available at press time on whether the message changes to "HERE I COME NIWAKA JAPAN" as it de-orbits. (Thanks, Ken K6LA and Paul WB2ABD)

The popular AO-27 <http://www.ao27.org/AO27/index.shtml> FM satellite is currently off-line. The end-of-transmit cycle AFSK packet telemetry beacon was reported to have become stuck on a single tone. The control team now has the satellite running in a maintenance mode and is trying to determine what happened. The latest AO-27 news is posted on its webpage. (Thanks, AMSAT <http://amsat.org/> Bulletin ANS-281)

Bernie W3UR asks that anyone who is doing a contest expedition and wants to announce it to please send the details to The Daily DX <http://www.dailydx.com/>. Please include dates, the contest name, operator(s), bands, modes, and QSL instructions along with any other details. It should also be noted that Bill NG3K also runs an online website for contest operation announcements <http://ng3k.com/Contest/> for some of the larger contests.

Web Site of the Week - The creator of CW Skimmer, Alex VE3NEA, has come out with a new and interesting freeware CW practice tool. Pileup Runner <http://www.dxatlas.com/PileupRunner> is a simulator of DX pileups. Currently at the beta-testing stage, it is intended for the DXpedition operators and those who are curious how the pileup looks and sounds at the DX side. Compared to his popular contest simulator, Morse Runner, Pileup Runner has an extra dimension: frequency. In this program just working the callers is not enough. To be successful, you also have to tune your receiver through the pileup in a smart way. (Thanks, Ed AI6O and Dennis N6KI)

WORD TO THE WISE

90 minutes - this is the length of a typical human sleep cycle from the first loss of consciousness, through rapid-eye-movement (REM) deep sleep, and back to shallow sleep. Timing your contest naps to last for about 90 minutes avoids the grogginess of being awakened mid-cycle. This eham.net article <http://www.contesting.com/articles/37> by K5ZD goes in to some detail about how to manage those all-important mid-contest Zs - and we're not talking about South Africa!

==> SIGHTS AND SOUNDS

Here's something that is both a sight AND a sound - Tonno ES5TV has finally completed his 5-year project of building a double H-frame 15 meter antenna array <http://pontu.eenet.ee/es5tv/>. The antenna system has 8 pairs of 5-element Optibeam OB5-15 monoband Yagis, separated by 12 meters horizontally and 14 meters vertically, with the highest at 64 meters above the ground. Are there any bigger 15 meter arrays out there? Tonno is now trying 15 meter EME (no kidding!) but will have to wait when the MUF is low enough for the ionosphere to pass 21 MHz signals.

The photo at right is of five CubeSats launched on July 21st from the ISS by the J-SSOD small satellite deployer on the Japanese Experiment Module, also known as Kibo. It looks like Kibo has rolled some lucky numbers! SpaceRef has posted an article <http://spaceref.com/news/viewsr.html?pid=42238> online including several more photographs. CubeSats often use Amateur Radio telemetry links - check with the satellite teams if your reception reports might be useful! (From AMSAT <http://amsat.org/> Bulletin ANS-281)

Here is just the thing for the living room wall - an FCC map of ground conductivity
<http://www.fcc.gov/encyclopedia/m3-map-effective-ground-conductivity-united-states-wall-sized-map-am-broadcast-stations>
around the United States. A guaranteed conversation starter!

Although it is true that while in space, no one can hear you scream (from the movie Alien), you can translate the various fields and phenomena into tones as the Sounds of Earthsong
<http://www.redorbit.com/news/video/space_2/1112704024/sciencecasts-the-sound-of-earthsong-2/>
does for the radio emissions coming from Earth. I wonder what it sounds like after a big DX contest starts at 0000 UTC? (Thanks, Gary N0GL)

Those readers who have been around technical endeavors for "a while" will enjoy this online slide show presenting the slide rule collection
<http://www.edn.com/design/analog/4396854/Slideshow--Slide-rules-and-charts---a-personal-collection?cid=EDNToday>
of Mort Hans from EDN magazine. There are a few electronic-themed gadgets in there for you to find! Any problem that can be broken down or transformed into a series of additions and subtractions can be made into a slide rule as these widely varied "linear calculators"

illustrate.

==> RESULTS AND RECORDS

The preliminary August NAQP SSB results <http://www.ncjweb.com/naqpssbprelim.php> are now posted on the NCJ website. Questions about the results or the North American QSO Party SSB contest can be directed to that contest's manager, Bill AC0W <ssbnaqpmgr@ncjweb.com>.

Certificates for the 2011 ARRL Phone Sweepstakes went out the door today and the 2011 Sweepstakes plaques are being processed later this week. (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Outgoing CQ WPX Director <director@cqwpx.com> K5ZD announces that Log Check Reports for all entrants to the 2012 WPX CW Contest are now available. An email with a link to the Log Check Report has been sent to everyone who submitted a log. The emails include a private link to the report file. If you submitted a log and did not receive an email, you might want to check your junk mail folder. You may also request your report directly. A deeper level of log checking than ever before was performed this year. There were 22,107 QSOs with unique callsigns among the 2,835,110 QSOs. 83.8% of those unique QSOs were determined to be incorrect. The median score reduction was 9.4%. WPX is usually a little higher than other contests since many busted calls create prefix multipliers. The official results will appear in the March 2013 issue of CQ Magazine <http://www.cq-amateur-radio.com/> and on the CQ WPX Contest <http://www.cqwpx.com/> website.

The DX results of the 2012 ARI International DX Contest <http://www.ari.it/images/stories/ContestHF/ARIDX-2012-DX-RESULTS.pdf> are now available as a PDF file on the ARI <http://www.ari.it/> contest website. (Thanks, ARI HF Contest Manager, Bob I2WIJ)

Results for the 16th annual Stew Perry Topband Distance Challenge <http://www.kkn.net/stew/> are now posted as well as those for the "Summer Stew". Look for a "fun story" in the results this year and don't forget about the upcoming opportunity to "warm up your stew" on October 20-21. (Thanks, Tree N6TR)

New Jersey QRP Club Skeeter Hunt Results <http://www.qsl.net/w2lj/> for 2012 are now online along with all of the soapbox comments. (Thanks, Larry W2LJ)

Dink N7WA is busily compiling the Soapbox comments <http://www.eskimo.com/%7Emwdink/3830/> from this season's contest scores submitted via the 3830 website. He's starting out with the CQ WW RTTY and Texas QSO Parties - don't miss 'em!

OPERATING TIP

When you configure your logging software, pay particular attention to your category - any connection to the Internet for spotting information

requires you to enter as Assisted or Unlimited. Don't be embarrassed by mistakenly entering the wrong category! Recognizing that most casual participants do enter in the Assisted and Unlimited categories, the popular N1MM contest logging software <http://n1mm.hamdocs.com/tiki-index.php> now uses Single-Op Assisted as its default category.

==> TECHNICAL TOPICS AND INFORMATION

Here is a very interesting article <http://pvrc.org/Newsletters/oct12.pdf> by Dave AB7E about minimum discernable signal differences. He has also generated audio files with different levels, combinations of CW tones, and sending speeds that can be downloaded and played back for you to test your own listening ability.

How high is that tower? Here are two methods. K1TO's looks down and N2NL/KH2's looks up:

Looking down on a sunny day:

Measure the shadow of the tower, D1. Stick a straight rod or tube with a height H2 into the ground. Find the length of its shadow, D2. Tower height, H1 = (H2/D2) * D1. The longer H2 is, the more accurate the method will be.

The Boy Scout method, looking up:

Back away from the tower with your arm held straight out until you can stick up your thumb and place its tip at the top and base at the bottom. Turn your thumb sideways so that the base is still at the bottom and the tip is on the ground. From the spot on the ground just covered by the tip of your thumb, measure to the tower base to find the tower height.

For complete directions about transient protection with good explanations, Jim W6RMK recommends Ronald Standler's book Transient Protection of Electronic Circuits from Dover Publishing. The book includes both theory and cookbook "what do you do in situation X" instructions. As Jim points out, doing the "right thing" is no more difficult than the "wrong thing" (and he has lots of examples of poor design from a transient damage standpoint). Dover Publishing has reprinted lots of old technical books that still contain much valuable information at a much lower cost than a brand-new text.

The October 2012 issue of "Cheesebits <http://www.packratvhf.com/news.htm>", the Packrat VHF Society's newsletter, has a nice article on 6 meter propagation by Chris W3CMF. It features several interesting maps of contacts from the popular DX Maps <http://www.dxmaps.com/spots/map.php> website run by ON4KST. The article illustrates some surprising September auroral propagation as well as Trans-Equatorial Propagation (TEP) that is quite rare here in North America.

The Koolau Amateur Radio Club's Field Day team needed an antenna tuner design aimed at high-impedance, end-fed half-wave vertical dipoles. After some study, they came up with this L network design <http://www.karc.net/OperatingEvents/FieldDay/TunerBOM.html> and a detailed set of building instructions including a detailed bill of materials and parts sources.

Brad AA1IP shows us where tube design lives on in QRP homebrewer Kazuhiro JA1OZL's inspired website collection of tube circuits <http://www.intio.or.jp/jf10zl/>. There is everything from audio amplifiers, to linear amplifiers, to complete radio receivers and transmitters. He also includes some solid-state designs along with the "hollow state". By the way, Brad just managed to span the Atlantic with a QRPP radio modeled on the 10 mW Vanguard satellite beacon from 1958, using an original PNP transistor from that era! (Thanks, Brad AA1IP)

Here's thought-provoking article with parallels to radiosport - "A Study of the Performance of Wireless Sensor Networks Operating with Smart Antennas" by Skiani, Mitillineos, and Thomopoulos in IEEE Antennas and Propagtation Magazine <http://www.ieeeaps.org/magazine.html%20>, June 2012. If you replace "wireless sensor networks" with "radio contest stations" and "smart antennas" with "directional antennas" the discussion reminds me very much of how we use directional antennas to minimize interference and maximize rate. The cognitive radio folks might want to listen to the ham bands during the current contest season!

This Electronic Design article on A/D converters <http://electronicdesign.com/article/analog-and-mixed-signal/relate-adc-topologies-performance-applications-74420> is a very good overview of available types, how they work, and for what applications they are the most suited. With so much of radio depending on these ICs, it's important to understand their basic operation.

Technical Web Site of the Week - Nothing NASA measures is done "up close" as shown by this EDN collection that describes many of NASA's amazing sensors <http://www.edn.com/design/sensors/4397296/Slideshow--NASA-s-incredible-unsung-sensors?cid=EDNToday>. There is certainly more to NASA spinoffs than "Tang" and the ball-point pen! Remote sensing is important for the ham and non-ham alike.

==> CONVERSATION

Between You and Me

The definition of ethics is sometimes stated as "what you do when you think no one is watching." Given that most of what contesters do is done in our shacks with the door closed, ethics is mighty important to radiosport. I can think of no other sporting event in which all of the competitors do their work in private (or as private teams) then submit the results as a written log of activity for adjudication. This effectively doubles down on the ethical requirements for each and every

contester.

That's also why it is so maddening when a few people - by all accounts a very small fraction of us - toss ethics aside in pursuit of a certificate or plaque or just their call sign printed in a magazine or web article. That's also why the selection of K5ZD is such a good choice for CQ WW Contest Director. Randy's contesting history, his CQ Hall of Fame selection, his world records, his tenure as CQ WPX Director, his continuous leadership in the area of contest ethics - all make it clear that ethics in radiosport will be at the top of his CQ WW agenda.

Not to say that ethics did not have a place at the table in prior years - not at all! Under K3EST, major advances in log checking and adjudication - completely invisible to most contesters - were implemented and applied. The game was changed forever as higher and higher fractions of the claimed QSOs were submitted to rigorous cross-checking. No more could someone sloppily run through a pileup or "work the callbook" and expect to get away with it. Order-of-finish has never been of higher quality and as I said in the previous issue, we owe K3EST a debt of gratitude for taking numerous arrows on our behalf.

Not to say, either, that the Contest Police will suddenly be dispatched to ride forth from their barracks, knocking on those closed shack doors in the middle of the night, armed with power meters and web cams, taking loads of color glossy 8x10 photographs with circles and arrows for the judges. No, contesting will probably take place much as it has for the past fifty years...except...

Except in the shacks of some of the more obnoxious cheaters who think they may be fooling the contest sponsors. They aren't. It won't take a great deal more enforcement to help the folks having a hard time staying on the right side of the ethics fence make good decisions and for the bad eggs to find another outlet for their competitive energies. Shorter log deadlines are just one of the ways to improve contest results quality. The continuous development of better and more intelligent software tools is another.

Contest committees and sponsors have more ways of inspecting logs, too. Given the ubiquity of cheap storage and bandwidth, why, anybody - not just a log-checker - can soon expect to be able to listen to any contact at any time during a past contest. What now has to be inferred with a certain degree of uncertainty will then be directly observable. Won't that be interesting? Yes, by golly, it will!

This is a perfect example of how contesting furthers the advancement of the radio and communications arts, isn't it? Contesting is also unique in sport that competitors are also partners in each other's success. To score, we have to give each other points. I have to hand off the baton to you so that you can hand it back off to me. I like that aspect of contesting and I like the renewed emphasis on contesting ethics, the story of what happens between you and me.

73, Ward N0AX

==> CONTESTS

10 Oct through 23 Oct 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

School Club Roundup--Phone,CW,Digital, from Oct 15, 1300Z to Oct 19, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, class and S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup-scr>

North American RTTY Sprint--Digital, from Oct 14, 0000Z to Oct 14, 0400Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, QTH, name. Logs due: 7 days. Rules <http://www.ncjweb.com/>

10-10 Sprint--Phone,CW,Digital, from Oct 10, 0001Z to Oct 10, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Oct 25. Rules <http://www.ten-ten.org/>

NAQCC Monthly QRP Sprint--CW, from Oct 10, 0030Z to Oct 10, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Oct 10, 1300Z - See website, multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

Great Pumpkin Sprint--Digital, from Oct 13, 8 PM to Oct 13, 2 AM. Bands (MHz): 1.8. Exchange: RST and S/P/C. Logs due: 2 weeks. Rules <http://www.podxs070.com/>

Makrothen RTTY Contest--Digital, from Oct 13, 0000Z to Oct 14, 1600Z. Multiple operating periods. Bands (MHz): 3.5-28. Exchange: 4-character grid square. Logs due: Nov 15. Rules <http://home.arcor.de/waldemar.kebsch>

Oceania DX CW Contest--CW, from Oct 13, 0800Z to Oct 14, 0800Z. Bands (MHz): 1.8-28. Exchange: RST and serial. Logs due: Nov 12. Rules <http://www.oceaniadxcontest.com/>

Scandinavian Activity Contest--Phone, from Oct 13, 1200Z to Oct 14, 1200Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: 2 weeks. Rules <http://www.sactest.net/>

QRP ARCI Fall QSO Party--CW, from Oct 13, 1200Z to Oct 14, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T), S/P/C, QRP ARCI number or pwr. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

Arizona Centennial QSO Party--Phone,CW,Digital, from Oct 13, 1600Z - see website, multiple operating periods. Bands (MHz): 3.5-28, 50, 144, Frequencies (MHz): CW-1.812, 3.548, 7.048, 14.048, 21.048, 28.048, 50.048; SSB-1.848, 3.848, 7.189, 14.248, 21.348, 28.448, 50.148, 146.48. Exchange: Name and S/P/C or Year and AZ county. Logs due: Oct 31. Rules <http://www.azqsoparty.org/>

EU Autumn Sprint--CW, from Oct 13, 1600Z to Oct 13, 2000Z. Bands (MHz): 3.5-14. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

Pennsylvania QSO Party--Phone,CW,Digital, from Oct 13, 1600Z - see website. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW--40 kHz above band edge and 1.810; SSB--1.850, 3.825, 7.200, 14.280, 21.380, 28.480. Exchange: Serial and ARRL/RAC section. Logs due: Nov 14. Rules <http://www.nittany-arc.net/>

FISTS Fall Sprint--CW, from Oct 13, 1700Z to Oct 13, 2100Z. Bands (MHz): 3.5-28. Exchange: RST, S/P/C, name, FISTS number or pwr. Logs due: 30 days. Rules <http://www.fists.org/>

SKCC Weekend Sprintathon--CW, from Oct 14, 0000Z to Oct 14, 2359Z. Monthly on the second Saturday local time. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, SKCC nr or "none". Logs due: 5 days. Rules <http://www.skccgroup.com/>

JARTS WW RTTY Contest--Digital, from Oct 20, 0000Z to Oct 21, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and age (YL may send '00'). Logs due: Nov 22. Rules <http://www.jarts.jp/>

10-10 Fall CW QSO Party--CW, from Oct 20, 0001Z to Oct 21, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Nov 5. Rules <http://www.ten-ten.org/>

Scandinavian YLRA Contest--Phone,CW,Digital, from Oct 20, 1000Z to Oct 21, 1000Z. Bands (MHz): 3.5-28. Frequencies (MHz): See website. Exchange: RS(T) and "88" (YLs) or "73" (OMs). Logs due: Nov 30. Rules <http://www.sylra.is/>

Iowa QSO Party--Phone,CW,Digital, from Oct 20, 1400Z to Oct 20, 2300Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T) and IA county, state/prov, or "DX". Logs due: Nov 20. Rules <http://www.wa0dx.org/>

New York QSO Party--Phone,CW,Digital, from Oct 20, 1400Z to Oct 21, 0200Z. Bands (MHz): 1.8-28, 50+, Frequencies (MHz): CW--1.820, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.825, 7.200, 14.290, 21.350, 28.400. Exchange: RS(T), NY county, state/prov, or "DX". Logs due: 14 days. Rules <http://www.nyqp.org/>

Worked All Germany--Phone,CW, from Oct 20, 1500Z to Oct 21, 1459Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial or DOK code. Logs due: 2 weeks. Rules <http://www.darc.de/referate/dx/contest/wag>

Stew Perry Warmup Contest--CW, from Oct 20, 1500Z to Oct 21, 1500Z. Bands (MHz): 1.8. Exchange: 4-char grid square. Logs due: 30 days.

Rules <http://www.kkn.net/stew>

W/VE Islands QSO Party--Phone,CW,Digital, from Oct 20, 1600Z to Oct 21, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or island designator. Logs due: Nov 30. Rules <http://www.usislands.org/>

Telephone Pioneer QSO Party--Phone,CW,Digital, from Oct 20, 1900Z - see website, multiple operating periods. Bands (MHz): 1.8-28, 50-432. Exchange: Year of membership and chapter. Logs due: Dec 10. Rules <http://www.tpqso.com/>

Spooky Feld-Hell Sprint--Digital, from Oct 20, 2000Z to Oct 20, 2200Z. Bands (MHz): 3.5-7,21-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 2 weeks. Rules <http://www.feldhellclub.org/>

Asia-Pacific Sprint--CW, from Oct 21, 0000Z to Oct 21, 0200Z. Bands (MHz): 14-21. Exchange: RST and serial. Logs due: 7 days. Rules <http://jsfc.org/apsprint/aprule.txt>

Illinois QSO Party--Phone,CW, from Oct 21, 1700Z to Oct 22, 0100Z. Bands (MHz): 1.8-28, 50,144. Exchange: RS(T) and IL county or S/P/C. Logs due: Nov 17. Rules <http://www.w9awe.org/ILQP.html>

Run For the Bacon--CW, from Oct 22, 0200Z to Oct 22, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

School Club Roundup--Phone,CW,Digital, from Oct 15, 1300Z to Oct 19, 2359Z. Bands (MHz): 1.8-28, 50+. Exchange: RST, class and S/P/C. Logs due: 30 days. Rules <http://www.arrl.org/school-club-roundup-scr>

Arizona Centennial QSO Party--Phone,CW,Digital, from Oct 13, 1600Z - see website, multiple operating periods. Bands (MHz): 3.5-28, 50, 144, Frequencies (MHz): CW-1.812, 3.548, 7.048, 14.048, 21.048, 28.048, 50.048; SSB-1.848, 3.848, 7.189, 14.248, 21.348, 28.448, 50.148, 146.48. Exchange: Name and S/P/C or Year and AZ county. Logs due: Oct 31. Rules <http://www.azqsoparty.org/>

Pennsylvania QSO Party--Phone,CW,Digital, from Oct 13, 1600Z - see website. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW--40 kHz above band edge and 1.810; SSB--1.850, 3.825, 7.200, 14.280, 21.380, 28.480. Exchange: Serial and ARRL/RAC section. Logs due: Nov 14. Rules <http://www.nittany-arc.net/>

SKCC Weekend Sprintathon--CW, from Oct 14, 0000Z to Oct 14, 2359Z. Monthly on the second Saturday local time. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, SKCC nr or "none". Logs due: 5 days. Rules <http://www.skccgroup.com/>

Arucaria VHF Contest--Phone,CW, from Oct 20, 0000Z to Oct 21, 1600Z. Bands (MHz): 50,144. Exchange: RS(T) and 4-char grid square. Logs due: 10 days. Rules <http://www.avhfc.com/>

Iowa QSO Party--Phone,CW,Digital, from Oct 20, 1400Z to Oct 20, 2300Z. Bands (MHz): 1.8-28, 50+. Exchange: RS(T) and IA county, state/prov, or "DX". Logs due: Nov 20. Rules <http://www.wa0dx.org/>

New York QSO Party--Phone,CW,Digital, from Oct 20, 1400Z to Oct 21, 0200Z. Bands (MHz): 1.8-28, 50+, Frequencies (MHz): CW--1.820, 3.550, 7.050, 14.050, 21.050, 28.050; Phone--1.870, 3.825, 7.200, 14.290, 21.350, 28.400. Exchange: RS(T), NY county, state/prov, or "DX". WIANEWS WEEK COMMENCING OCTOBER 14 2012.

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE

OF AUSTRALIA FOR WEEK COMMENCING OCT 14 2012.

WIA

President Phil Wait VK2ASD vk2asd@wia.org.au

Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

(sourced to wia front page news)

New WIA President and Vice-President Appointed

The WIA Board of Directors held an emergency meeting last week following
the sudden and unexpected passing of WIA President Michael Owen VK3KI. Phil
Wait VK2ASD (pictured right) was formally appointed WIA President and Chris
Platt VK5CP was appointed Vice-President.

Both Phil and Chris have strong interests in progressing amateur radio and also have a wide variety of other experience and interests outside amateur radio circles.

Phil Wait has been a radio amateur since 1967 and a Director of the WIA since its restructuring in 2003. Phil owned VitalCall Medical Alarm Systems for many years, and more recently FirstCall Medical Alarms, and is also involved in sailing and constructing valve (yes- valve!) audio equipment. Phil is probably best known in amateur radio circles for the WIA's advocacy role in relation to Broadband Power Line Interference (BPL).

Chris Platt is a lawyer with over 20 years experience in industrial relations in the agricultural and resource sectors and currently works for BHP Billiton supporting the Olympic Dam resource. Chris' has experience in international labour relations having represented Australia at a number on International Labour Organisation meetings. Chris has an interest HF DXng, Contesting and High Altitude Balloons with AREG.

The vacancy created on the WIA Board can either be filled by appointment, or left vacant until the next AGM in May 2013

Ballarat Amateur Radio Hamvention - 2012.

The Ballarat Amateur Radio Group will hold its annual Hamvention on Sunday the 21st of October 2012 in the usual venue provided by the Ballarat Greyhound Racing Club in Rubicon St, Redan.

Doors open for traders at 8am and general access is at 10am.

Those that have attended in the past will know that this is a good day out in a really roomy, indoors venue with historically around 60 to 70 tables of new and preloved amateur radio gear, test gear and general bits and pieces on sale.

They work very hard to make the event a place where both first timers and regulars are welcomed, be they traders, browsers or buyers and each and everyone is given every assistance to ensure that they have a great day out.

Entry for everyone, including traders is $6 per head and tables are available for $10 per 1.6 metre section.

Ballarat would really encourage people to use the opportunity to turn over some of that gear that has been sitting in the shack for a little too long and those bit and pieces that you have been struggling to find a use for, give another amateur a chance to put it to use and make yourself a few dollars in the process.

If you don't think you could support a full table then the Ballarat Club has a table where they are more than happy to sell the goods for you for a small commission.

Historically they have had a really strong representation of commercial traders and dealers and are pleased to continue this tradition into 2012.

No amateur gathering is ever complete without a bit a food, a place for a coffee and a good catch up with friends, there is a well catered food area designated and it is provided with a goodly amount of seating with generous sized tables.

If you love building equipment then how about a bit of show and tell, there is a special section for home brew projects with sections for novices, skilled and very skilled with generous prizes for each category, amateurs just love seeing other amateurs projects and admiring their ingenuity.

If you attend every year they look forward to seeing you again, if you haven't been to Ballarat for a while then please consider paying a visit, it's a truly beautiful town with lots to do for families and they would really be delighted to see you at the Hamvention.

If you need more information then please visit the BARG web site
www.barg.org.au

or you can contact via Roger VK3ADE on 03 5330 3081
or Ian VK3AXH on 03 5341 3012.

For bookings contact hamvention2012@barg.org.au

AHARS NEWS BULLETIN

The weekend of October 6th and 7th the Adelaide Hills Amateur Radio society conducted a foundation licence course. Thanks to Barry, Sasi and Paul.

6 candidates attended and all were successful. The oldest of who is 94. Now is that a record for the oldest new foundation licencee? We look forward to hearing Len on the air when he gets his callsign. Dont forget the Club Hamfest on Sunday November 4th at the Goodwood Community Centre.

Across Australia from VK1WIA you're tuned to the WIA National News Service. In Adelaide it can be heard on VK5RAD repeater on 147Mhz at 9am. I'm David VK5KC.
[AUDIO PROVIDED 0:50]

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL,

Amateur Radio Newsline, NZART, AR Victoria and the WW sources of the WIA.

Amateur Radio Newsline Producer Bill Pasternak recently hospitalized.

News this week that Bill Pasternak, WA6ITF was taken ill and was unable to complete the distribution duties of the latest edition of ARNewsline. But,

'The show must go on', and one of the team stepped in to get it out in a timely fashion.

Bill is frequently heard on the VK1WIA News broadcast and we'd like to extend thanks for his ongoing efforts in bringing together his news organization on a weekly basis. He co-founded ARNewsline in 1976 and has written long-lived columns in 73 Magazine and World Radio Magazine.

While Bill's in our thoughts, it seemed like a great opportunity to get to know a little more about a well known amateur radio personality, and character.

You can find an 80-minute interview with the Guilford Amateur Radio Society on their Youtube channel, via www.W4GG.org, and his bio, along with all the staff bios can be found at www.ARNewsline.org

http://www.arnewsline.org/staffbios/bill-pasternak-wa6itf.html
Guilford Amateur Society youtube channel interview 80minute http://www.w4gg.org/
http://www.southgatearc.org/news/may2012/bill_pasternak_wa6itf_interview.htm

Band Changes for Sweden

As of 1st October, Swedish radio amateurs are allowed to operate on 1,810 to 1,850kHz with 1kW maximum power and 1,930 to 2,000kHz with 10W maximum. The section of the band between 1,850 and 1,930kHz is unavailable.

Sadly, they also lost their access to 2.3GHz, although 2.4GHz is unaffected. [RSGB]

WEIRD AND WONDERFUL

Scientists say warp drive may be more feasible than thought

Clara Moskowitz, Assistant managing editor of Space.com writes:
"A warp drive to achieve faster-than-light travel - a concept popularized in television's "Star Trek" - may not be as unrealistic as once thought, scientists say.

A warp drive would manipulate space-time itself to move a starship, taking advantage of a loophole in the laws of physics that prevent anything from moving faster than light. A concept for a real-life warp drive was suggested in 1994 by Mexican physicist Miguel Alcubierre, however subsequent calculations found that such a device would require prohibitive amounts of energy.

Now physicists say that adjustments can be made to the proposed warp drive that would enable it to run on significantly less energy, potentially bringing the idea back from the realm of science fiction into science.

"There is hope," Harold "Sonny" White of NASA's Johnson Space Center said, at the '100-Year Starship Symposium', a meeting to discuss the challenges of interstellar spaceflight."

Read the full article, including an explanation of how it could be achieved at MSNBC http://www.msnbc.msn.com/id/49064028/

WIRELESS WEATHER

ARRL SOLAR UPDATE

Tad Cook, K7RA, reports: A coronal mass ejection (CME) hit the Earth
on September 30, causing a jump in geomagnetic indices. The planetary A
index on October 1 was 31, while the K index went as high as 7, making
aurora visible across the northern tier of the United States. The
far-northern latitude college A index was 23 (near Fairbanks, Alaska),
about the same as the mid-latitude index -- which was 21 -- in
Fredericksburg, Virginia. It is common during a geomagnetic disturbance
to see indices go much higher toward the poles than anywhere else. The
average daily sunspot numbers declined 8.3 points to 73, while the
average daily solar flux was off exactly 1 point to 128.7. The latest
prediction from NOAA/USAF has solar flux on October 4-7 at 110, 105 on
October 8, 100 on October 9-11, 115 on October 12-13, 120 on October
14, and then rising to a peak of 150 on October 20. The same forecast
has solar flux rebounding to 150 on November 16 after reaching a
minimum of 110 on November 4-5. The predicted planetary A index is 5 on
October 4-14, then 8, 12 and 10 on October 15-17, 5 on October 18-25,
10 on October 26, and then reaching a peak of 15 on October 29.

Look for more on the ARRL website on Friday, September 28. For more
information concerning radio propagation, visit the ARRL Technical
Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

A BATTERY OF TESTS on batteries!

"Batteries come packaged in bright blister packs emblazoned with vague
guarantees such as "more pictures" and "five times longer lasting." During
his internship ... this summer, [Thomas] decided to put those statements
to the test. He tested thirty brands of batteries��on a homebrew rig to find the
batteries with the most power and the most bang for your buck.

The hardware [Thomas] used [was] an STM32 microcontroller to perform two
different tests: a high drain and a low drain condition. For the high drain,
1000 mA were sucked out of the batteries until the voltage reached 0.8 V. For
the low drain, 200 mA were used. Data including milliwatt-hours, milliamp-
hours, joules, voltage, current, power, and effective load resistance were
all logged for both conditions for all 30 batteries."

You can find his results and methodology at www.batteryshowdown.com
Thanks to hackaday.com for this article
(http://hackaday.com/2012/09/14/testing-30-brands-of-batteries/)

AA7BQ ANNOUNCES SERVER UPGRADES AT QRZ.COM

Some improvements at QRZ.com. Fred Lloyd, AA7BQ, reports that he has added an additional server to the QRZ system and moved a few things around to improve performance for all users. Among the changes are that all servers have been upgraded to the latest Ubuntu Linux Edition 12.04. Also, various functions have been interchanged between the various cloud servers that host QRZ.com at Amazon Web Services.

AA7BQ says that so far the performance looks really great on all parts of the system. He notes that the callsign server, which was routinely at 90% busy now loafs along at around 50%.

You can read about all the changes made by taking your web browser to tinyurl.com/qrz-improved-service. (QRZ.com)

WW SPECIAL INTEREST GROUPS --- RAILWAYS ON THE AIR (ROTA)

PERHAPS AN OPENING FOR SOME LOCAL ACTIVITY?

This weekend sees the fifth annual Railways on the Air event - a celebration, not a contest.

Bishop Auckland RAC organise the weekend so that radio amateurs have a good time and promote amateur radio while helping to celebrate the unique position railways hold in our national heritage.

Approximately 30 groups and individuals have registered for the event by approaching a preserved railway, asking if they are celebrating the birth of passenger railways in the country and whether they would like to have an amateur radio station as part of their event to promote awareness of their railway. The list of participating groups can be seen on the web site http://rota.barac.org.uk.

This year both the participating groups and any amateur who contacts 5 or more ROTA special event stations over the weekend will receive a personalised poster recognising their efforts. These can be obtained after the event by submitting logs in pdf format as detailed on the website.

Aussies at the ARDF World Championships

A team consisting, Kristian Ruuska, Bruce Paterson VK3TJN, Ewen Templeton, VK3OW and his wife Jenelle attended the recent 16th Amateur Radio Direction Finding World championships in Serbia.

For those that are not familiar with ARDF it is a cross between bush orienteering and amateur foxhunting.

ARDF events were held on the usual 80 and 2 metre bands, on separate days. There was also a sprint event and a foxoring event, both on 80 metres.

The events were held close to the mountain resort of Kopaonik, where the team stayed. The altitude of 1700 meters and the steepness of the hills in the area took its toll and the team's results were mixed. Jenelle went along as the team "coach" but was persuaded to enter the foxoring event, using equipment borrowed from the British team. Her result, 5th in her age group, was the best achieved by the Australian team!

QRP CW Club is eight years old

Over the past week, the North American QRP CW Club has celebreated their 8th anniversary.

With 10 special event stations on the air, one from each USA call area from N1A to N0A, many thousand contacts had been made by the halfway point.

All contacts are eligible for Commemorative QSL cards and certificates for anyone who works one or more stations. Details about the subscription free club membership and claiming your certificates at http://naqcc.info/.

WW SPECIAL INTEREST GROUPS --- ILLW

A Scottish icon for sale

The Turnberry Lighthouse, which started the International Lighthouse and Lightship Weekend in 1998, is up for sale and most likely it will be extinguished.

The international event evolved from the Scottish Northern Lighthouses Award Weekend first held in 1993.

The Ayr Amateur Radio Group GM Zero AYR, sponsor of the International Lighthouse and Lightship Weekend, now a premier fun event held in August, activates the Turnberry Lighthouse as GB2LT.

The 130-year old structure is to be sold by the Northern Lighthouse Board and experts believe it will become holiday accommodation in line with similar lighthouses.

It has helped ships navigate up to 24 nautical miles away. However when it was due to be refurbished in 2015, it will be sold as a cost saving measure.

Nearly 80 registrations have been received so far for the International Lighthouse and Lightship Weekend on August the 17th and 18th, 2013, with all information plus an online registration form on the website ILLW.NET

EMR Calculator now on WIA website

Doug McArthur, VK3UM, a well-known Earth/Moon experimenter, has generously allowed the WIA to place his popular EMR assessment calculator on our website. The Calculator allows assessment of safe zones in the HF, VHF, UHF and Microwave amateur bands for a variety of antenna situations, and covers number of EMR Standards including the Australian Standard for EMR. The latest version of the Calculator can be downloaded at the wia.org.au website.

You can visit Doug VK3UM's website by clicking the following Link

JOTA/JOTI

The 54th + 1 Jamboree On The Air will take place on 20 and 21 October 2012 ann in VK7 NTARC's effort is at the Carnacoo camp site at Paper Beach, as part of a Northern Districts camp.

JOTA/JOTI coordinator Peter VK7KPC, advises that he is planning to get to Carnacoo on the afternoon of Friday 19 October to do preliminary setup for a JOTA station.

Peter advises that the final site won't be known until organisers have a better idea of the number of Scouts attending.

Peter is planning to use the VK7RAB to VK7RAF link to contact JOTA station being run South of Hobart and he is hopeful to have 2 HF stations active, plus IRLP on 2 metres and UHF to link South and maybe to North West coast stations.

North West Tasmanian Amateur TV Group (NWT-ATVG) have planning well under way and the Club will again be providing resources and operators over 2 days at the Paton Park Camp at Ulverstone.

Operators offering their assistance at this time with communications and control are Neil VK7NX, Ross VK7WP, Paul VK7HPD, Jim VK7JH, Graham VK7NGA, and Tony VK7AX.

Operating frequencies as per the official JOTA frequencies published again this week, best read at wia.org.au and read the text edition of this wireless news.

SOUTH AFRICA REVITALIZES HAMNET DOMAIN

South Africa's Hamnet website was reactivated on October 1st. Hamnet is a voluntary group of radio amateurs who, like ARES in the United States, volunteer their communication skills to assist others during and after disasters.

Their Hamnet domain has been dormant for many years. Now thanks to the efforts of Dawie Conradie, ZR6DHC, an initial site has been put together and will grow with time.

The revitalized Hamnet website is described as filling the gap between the South African Radio League website and the well established Hamnet Facebook page.

All links have been incorporated in the website, including some that are international. Its located in cyberspace at www.hamnet.co.za,
(SARL)

Submitting news items

If you would like to submit news items for inclusion in the

VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on

wia.org.au

Remember the sooner you submit material the more the likelihood of it being

broadcast in the very next edition of WIA National News. Each item will only

be broadcast once, if you want a couple of mentions, please submit different

slants to keep your event 'fresh 'and always if the news room is to read your

item write in the 3rd person.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to

the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may

lodge a quick reply to let us know you read it, who knows, you might

even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize

their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to

active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia

and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit

material and do not necessarily reflect those of the rebroadcasters,

nor the National WIA, but are broadcast in the spirit in which they were

submitted.

Material may be reproduced in whole or in part, in any form, a credit to

WIANews wouldn't go astray...

Compiled by VK3GR@wia.org.au on behalf of the National WIA.

(e-mail: dj1yfk@darc.de)

3D2, Fiji:
Cicero, PY7ZY, will be QRV as 3D2ZY from October 11 - 15 from Viti Levu/Fiji (OC-016, WLOTA 0055) on the HF bands. QSL via home call.

5X, Uganda:
Nick, G3RWF will, starting October 15th, be on the bands as 5X1NH for two months from Fort Portal in Western Uganda (WW Loc. KJ50co) in CW only. He's still looking for advice for a 160m antenna. He has some 12m masts and can reach a maximum of 15m. There are no trees, neither space for beverage antennas. (nick (at) henwood.demon.co.uk). Nick wants to take part in the CQWW DX CW Contest (November 24/25) and the ARRL 10M Contest (December 8/9). QSL via home call, only direct.

CN, Morocco:
Abdou, CN8VO, Jos (PD0JOS) CN2OS and Francois (ON4LO) CN2LO plan to be QRV until October 21 on the occasion of the "Concert for Tolerance" in Agadir with the special call sign 5D7AT. Activities will take place on 80 - 10m. QSL via ON4LO.

CE, Chile:
Robert, SQ1DWR, will work as CE3/SQ1DWR between October 10 and 22 on 40 - 10m in CW. QSL via home call.

CY0 Sable Island (Update):
The DXpedition by Murray, WA4DAN, and Ron, AA4VK, to CY0, announced in DXNL1801 was postponed to October 22 - 31. They will not take part in CQ WWDX SSBbut try to give as many people as possible the chance to work a new DXCC. Theirfocus will be on 10/12/15m.
http://www.cy0dxpedition.com

EA, Spain:
Until October 15, a special event station will be QRV for the

annual diploma of the "Asociacion Cultural de Radioficionados de la Guadia Civil". http://www.acragc.org

FK, New Caledonia:
Christian, KH6/F5IDM, plans to be QRV until October 13 during the "Fete de la Science" as TX5FS from Lifou Island (OC-033). QSL via F5IDM (KH6 bureau). http://www.symbiose-nc.com/fds/index.php

FO, French Polynesia (Update):
For the activities announced in DXNL 1799, Didier, F6BCW acquired the special call sign TX5EG.

J7, Dominica:
Volker, DL8WEM, will be on the west coast of Dominica (NA-101) in Salisbury from October 14 to November 7 as J79WE. He's using a K3 (100W) and dipoles for 40m - 10m bzw, mostly working in CW. A participation in the WAG contest is planned. QSL via home call.

KH8, American Samoa:
Dom, M1KTA will be QRV until October 11 as KH8/M1KTA from Pago (OC-045) on 10 to 20m in SSB, slow CW and RTTY/PSK31. QSL via home call, LoTW.

KP2, US Virgin Islands:
Ray, NM2O, will be QRV until October 16 as KP2M and KP2/NM2O. He plans to take part in the SAC phone and the Oceania DX CW contests. QSL KP2M via AI4U, KP2/NM2O via home call.

OA, Peru:
Peter, DF7NX, is active from near Puerto Maldonado (Amazonas area) as OA7/DF7NX. He's using a small station with only 50W and a G5RV, only in CW. After this activity he's going back to Bolivia and plans to start on October 19 as CP8/DF7NX. QSLs via home call.

SM, Sweden:
Markus, SA3BPG, Joel, SA3BRX, Jan-Eric, SM3CER, Lars, SM3EAE, Bjoern, SM3UQO and Goeran, SM5SIC, will operate as SI9AM on October 13/14 from the "King Chulalongkorn Memorial" in Raganda in the Scandinavian Activity SSB Contest (SAC). SA3BPG and SA3BRX are newcomers working their first contest. Outside the contest they are QRV on all HF bands. Main frequencies: CW: 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz SSB: 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz FM: 145.550 MHz and Repeater RV49 - 145.612 MHz QSL via SM3CVM, bureau cards can be requested by email. (sm3cvm (at) ssa.se). http://www.si9am.se

T30, Western Kiribati:Leo, PP1CZ, Orlando, PT2OP, Fabio, PY2AAZ, Rick, PY2PT, Alex, PY2WAS, Fred, PY2XB, Miguel, PY3MM, Fernando, PY4BZ, Jim, PY7XC and Xavier, PY7ZY, plan to be QRV on HF as T30PY and on 6m (EME in WSJT-JT65A) as T30SIX between October 16 and 25. They will have three stations on the air. Preferred frequencies: CW: 833.5, 3524, 7024, 10124, 14024, 18084, 21024, 24894 and 28024 kHz SSB: 3798, 7085, 14190, 18145, 21295, 24945 and 28495 kHz RTTY:

3580, 7038, 14080, 18102, 21080, 24920 and 28080 kHz 6m: 50102/CW and beacon, 50110-50120/SSB, 50.198/EME. Donations to support the operation are accepted by Paypal. QSL via PY2PT (OQRS). http://www.mdxc.org/t30py/

VU, Antarctica:
Bhagwati, VU3BPZ, is QRV till the end of the year as VU3BPZ/3 from the Indian antarctic station Bharati (WAP IND-04). On his way back to India, via Cape Town he will be QRV from the "MS Ivan Papanin" and show up on the bands as VU3BPZ/MM. A short stop at the "Maitri Station" (WAP IND-03) is planned as well. For mid October he expects to receive a spacial callsign for his activities. Preferred frequencies: 10m: 28495 kHz, 1100-1215z 17m: 18145 kHz, 1015-1100z 20m: 14180 kHz +/- 1400-1500z and 1700-1800z
For stations from NA he's on 14242 kHz around 0200-0300z.
QSL via I1HYW, only direct.

DXCC:
J51IFD cards of the 2010 DXpedition to Guinea Bissau are accepted for the DXCC.

CQ WW DX Contest:
Randy Thompson, K5ZD, member of the "CQ Contest Hall of Fame" and WPX Contest Director was appointed the successor of Bob Cox, K3EST, who was the director of the CQWW Contests for more than 35 years.

Youth HF Station giveaway!
In order to promote DXing and radiosporting, Randy, N0TG, and Jeff, N1SNB, of "Amateur Radio Supplies" are giving away a complete HF station to a young radio amateur. More information on their website:
http://www.amateurradiosupplies.com/youth-s/222.htm

IARU News:
The directors of the IARU Region 3 appointed Peter Lake, ZL2AZ, as the new Chairman of IARU Region 3. He's the successor of Michael Owen, VK3KI, who passed away last month.

NWRW 2012
The "National Wildlife Refuge Week" combines ham radio with the joy of experiencing the nature. Between October 14 and 20 several special event stations will be on the air from wildlife refuges. More info: http://www.nwrweek-radio.info

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USERS of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USERS who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

New WIA President and Vice-President Appointed:

Posted: 09 Oct 2012 05:04 PM PDT
http://www.eham.net/articles/29120

The WIA Board of Directors held an emergency meeting last week following the sudden and unexpected passing of WIA President Michael Owen VK3KI. Phil Wait VK2ASD (pictured right) was formally appointed WIA President and Chris Platt VK5CP was appointed Vice-President. Both Phil and Chris have strong interests in progressing amateur radio and also have a wide variety of other experience and interests outside amateur radio circles. Phil Wait has been a radio amateur since 1967 and a Director of the WIA since its restructuring in 2003. Phil owned VitalCall Medical Alarm Systems for many years, and more recently FirstCall Medical Alarms, and is also involved in sailing and constructing valve (yes- valve!) audio equipment. Phil is probably best known in amateur radio circles for the WIA's advocacy role in relation to Broadband Power Line Interference (BPL).

//
Mike Herr, WA6ARA Hits the Amateur Airwaves:

Posted: 09 Oct 2012 05:04 PM PDT
http://www.eham.net/articles/29119

RIDGECREST -- Surrounded by radios of all sizes and ages, Mike Herr listens, monitors and chats with other people communicating over a wide area. Occasionally radio blips and chatter picks up across the airwaves. For Herr, 57, it's all part of a normal day when he's working on his radios, especially since he's been doing it for 42 years, since he was 15 years old. "I became a ham operator because of my father, as he was a ham operator at the time," Herr said. Amateur radio operators (or ham operators as a term of affection) operate radios as a means of communication on radio frequencies separate from commercial and citizen bandwidths with consent from the Federal Communication Commission.

ARRL Recognizes: MFJ's Martin F. Jue, K5FLU, Honored at ARRL Day in the Park

Martin F. Jue, K5FLU (left) of MFJ Enterprises accepts the ARRL Special Achievement Award from ARRL Chief Operating Officer Harold Kramer, WJ1B (right). ARRL Mississippi Section Manager Malcolm Keown, W5XX, holds the award.

To celebrate 40 years in the Amateur Radio business, MFJ Enterprises hosted ARRL Day in the Park in Starkville, Mississippi, October 5-6. Martin F. Jue, K5FLU, started MFJ in October 1972 in a Starkville hotel room with one product: a CW filter kit that sold for less than $10. Today, MFJ consists of six different ham radio companies that manufacture more than 2000 products. ARRL Chief Operating Officer Harold Kramer, WJ1B, and ARRL Mississippi Section Manager Malcolm Keown, W5XX, represented the League at MFJ's ARRL Day in the Park. The two-day event brought 500 people to Starkville and featured tours of the MFJ facilities (including the factory and metal shop), tailgating, forums, demonstrations and lunch. Kramer presented Jue with the ARRL Special Achievement Award, honoring Jue and MFJ for their four decades of service, as well as the company's innovative products, which have contributed to the enjoyment and effectiveness of Amateur Radio all around the world. Tom Medlin, W5KUB, was at the event and produced a video of the speeches and presentations, which can be viewed here.

==> + FCC NEWS: FCC SEEKS TO CHANGE AMATEUR RADIO LICENSING RULES

On October 2, the FCC released a Notice of Proposed Rulemaking in WT
Docket No. 12-121 that seeks to change the Amateur Radio licensing
rules, especially as they concern former licensees. Acting upon an
April 2011 Petition for Rulemaking filed by the Anchorage VEC to give
permanent credit to radio amateurs for examination elements they have
successfully passed, the FCC proposes to revise Section 97.505 to
require that Volunteer Examiners (VEs) give examination credit to an
applicant who can demonstrate that he or she formerly held a particular
class of license. In addition, the Commission seeks to shorten the
grace period during which an expired amateur license may be renewed and
to reduce the number of VEs needed to administer an amateur license
examination. Read more here
```

<http://www.arrl.org/news/fcc-seeks-to-change-amateur-radio-licensing-rules-allow-additional-emission-types>.

==> + FCC NEWS: FCC AGREES WITH ARRL ON EMISSION DESIGNATORS, TDMA

Part of WT Docket No. 12-121 (see above) included a response to a March 2011 Petition for Rulemaking filed by the ARRL. Through the Notice of Proposed Rulemaking, the FCC is seeking to amend the Amateur Service rules to allow amateur stations to transmit additional emission types in order to permit Time Division Multiple Access (TDMA) in the Amateur Service; however, it denied the League's request for a blanket waiver pending the resolution of the rulemaking proceeding. The FCC pointed out that one of the purposes of the Amateur Service is to contribute to the advancement of the radio art: "Allowing amateur stations to use communication technologies that are used in other radio services, such as TDMA technologies, allows Amateur Service licensees to experiment with and improve these technologies and, therefore, is consistent with the basis and purpose of the Amateur Service. For this reason, we agree with the ARRL that the current rules allowing the use of multiple time-slot TDMA repeaters, but not permitting amateur stations to transmit single-slot TDMA emissions, may be unnecessarily impeding Amateur Radio operators in advancing the radio art." Read more here <http://www.arrl.org/news/fcc-seeks-to-change-amateur-radio-licensing-rules-allow-additional-emission-types>.

==> + ON THE AIR: SCOUTS AND SCOUTERS TAKE TO THE AIRWAVES FOR THE 55TH JAMBOREE ON THE AIR

Each year, more than 500,000 Scouts in more than 100 countries take to the airwaves on the third full weekend in October -- and this year on October 20-21, it will be no different. The Jamboree on the Air (JOTA) is an annual Scouting and Amateur Radio event sponsored by the World Scout Bureau of the World Organization of the Scout Movement where Boy Scouts, Girl Scouts and Girl Guides from all over the world speak to each other via Amateur Radio. Since 1958 -- when the first Jamboree on the Air was held -- millions of Scouts have met through this event. Many contacts made during JOTA have resulted in pen pal relationships and links between Scout troops that have lasted many years. Read more here <http://www.arrl.org/news/scouts-and-scouters-take-to-the-airwaves-for-the-55th-jamboree-on-the-air>.

==> THE ARRL OFFERS FIVE NEW BOOKS FOR FALL

The ARRL has just released five new books that you are going to want to have in your shack. This fall, two favorites have been re-released and are chock-full of new information: hardcover and softcover editions of The ARRL Handbook for Radio Communications (90th edition), The ARRL Operating Manual (10th edition). In addition, the ARRL is proud to offer three new titles: The Amateur Radio Public Service Handbook, The Care and Feeding of Transmission Lines by QST Technical Editor Joel

Hallas, W1ZR, and Antenna Modeling for Beginners by H. Ward Silver, N0AX. Read more here <http://www.arrl.org/news/the-arrl-offers-five-new-books-for-fall>.

==> + IARU NEWS: IARU REGION 2 EXECUTIVE COMMITTEE MEETS IN CURACAO

The IARU Region 2 Executive Committee met in Curacao September 29-30. Led by Region 2 President Reinaldo Leandro, YV5AM, the meeting was attended by Region 2 Officers and Area Directors; Area B Director and ARRL International Affairs Vice President Jay Bellows, K0QB, represented the United States. IARU Secretary Rod Stafford, W6ROD, represented the IARU and IARU Region 1 President Hans Blondeel Timmerman, PB2T, represented IARU Region 1. Read more here <http://www.arrl.org/news/iaru-region-2-executive-committee-meets-in-curacao> .

==> + ARRL INVITES NOMINATIONS FOR 2012 INTERNATIONAL HUMANITARIAN AWARD

Nominations are open for the 2012 ARRL International Humanitarian Award. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual prize to recognize those radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster. As one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need. Read more here <http://www.arrl.org/news/arrl-invites-nominations-for-2012-international-humanitarian-award>.

==> + AT THE WORKBENCH: ATTENTION KIT BUILDERS -- THE ARRL WANTS TO HEAR FROM YOU!

The ARRL wants to hear from kit builders about simple, useful, educational and exciting kits. These kits should have a high probability for success and would serve as stepping stones for more advanced projects. We are looking all sorts of kits, but RF detector kits that work in the 380 MHz-2.5 GHz range are of special interest. The kits should also have a "Wow, I built this and it works!" factor. If you know of such a kit, please let us know by filling out a simple form here <http://www.arrl.org/technology> by October 31.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: There was another decline in sunspot activity this week, although activity may be making a slow recovery based on recent activity over the past few days and projected solar flux values. The average daily sunspot numbers dropped from 73 to 51.7, a difference of 21.3 points. But the past two days saw sunspot numbers

(63 and 71) higher than the average -- and climbing. The average of daily solar flux was off 23.8 points to 104.9, and like the sunspot figures, the past two days saw solar flux values (106.2 and 112) higher than the average for the week. The predicted solar flux from the Wednesday, October 10 NOAA/USAF forecast is 115 on October 11-13, 120 on October 14-15, 115 on October 16-18, then 145, 150 and 145 on October 19-21, 140 on October 22-23, and 135 on October 24-27. We then see solar flux dip below 100 on November 4-8 and peak at 150 again on November 16. The predicted planetary A index for October 11-17 is 10, 5, 5, 12, 12, 10 and 8, and then 5 on October 18-November 3, and then rising to 18, 20, 12 and back down to 8 on November 4-7. We saw the most geomagnetic activity on October 8-9 showed the most, with the planetary A index at 35 and 42, the mid-latitude A index at 21 and 32 and the high latitude college A index at 66 and 54; this activity was triggered by a coronal mass ejection on October 8. The predicted rise in planetary A index to 12 on October 14-15 is due to a solar wind spewing from a coronal hole, which should rotate into a geo-effective position during that time. Look for more on the ARRL website on Friday, October 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL RECOGNIZES: MFJ'S MARTIN F. JUE, K5FLU, HONORED AT ARRL DAY IN THE PARK

To celebrate 40 years in the Amateur Radio business, MFJ Enterprises <http://www.mfjenterprises.com/> hosted ARRL Day in the Park <http://www.mfjenterprises.com/dayinpark.php> in Starkville, Mississippi, October 5-6. Martin F. Jue, K5FLU, started MFJ in October 1972 in a Starkville hotel room with one product: a CW filter kit that sold for less than $10. Today, MFJ consists of six different ham radio companies that manufacture more than 2000 products. ARRL Chief Operating Officer Harold Kramer, WJ1B, and ARRL Mississippi Section Manager Malcolm Keown, W5XX, represented the League at MFJ's ARRL Day in the Park. The two-day event brought 500 people to Starkville and featured tours of the MFJ facilities (including the factory and metal shop), tailgating, forums, demonstrations and lunch. Kramer presented Jue with the ARRL Special Achievement Award, honoring Jue and MFJ for their four decades of service, as well as the company's innovative products, which have contributed to the enjoyment and effectiveness of Amateur Radio all around the world. Tom Medlin, W5KUB, was at the event and produced a video of the speeches and presentations, which can be viewed here <http://www.ustream.tv/recorded/25962423>.

==> ARRL HQ SEEKS APPLICANTS FOR QST TECHNICAL EDITOR

The League is currently looking to fill the position of QST Technical Editor at ARRL Headquarters in Newington. Connecticut residency or the ability to relocate to Connecticut is required. The QST Technical Editor will provide leadership to the technical Amateur Radio community by developing and promulgating a vision of the state of the Amateur

Radio art through the pages of QST.

Qualifications:

- Broad knowledge of and experience with Amateur Radio and electronics.
- Broad knowledge of and experience with the design and construction of Amateur Radio equipment, antennas and accessories.
- Broad knowledge of and experience with Amateur Radio software.
- A bachelor or graduate college degree, preferably in a technical field. Exceptional related work history can be substituted for a degree.
- A minimum of three years of writing or editing experience.
- Demonstrated ability to work effectively and productively with a variety of people.
- Proficiency with Microsoft Office, especially Word and Excel.
- An Amateur Extra class license.

Click here <http://www.arrl.org/employment-opportunities> for more information and an application. To apply, please send your cover letter and resume via e-mail <mlevesque@arrl.org?subject=Technical20Position>, or complete the application, print it out and mail it with your resume and cover letter to Monique Levesque, ARRL, 225 Main St, Newington, CT 06111. You can also fax your application, cover letter and resume to 860-594-0298. Please include your salary history and salary requirements. The ARRL is an equal opportunity employer.

==> THIS WEEK IN RADIOSPORT

This week:

- October 12 -- NCCC Sprint
- October 13 -- EU Autumn Sprint (CW); FISTS Fall Sprint
- October 13-14 -- Arizona QSO Party; Pennsylvania QSO Party; Makrothen RTTY Contest; Oceania DX Contest (CW); QRP ARCI Fall QSO Party; Scandinavian Activity Contest (SSB)
- October 14 -- North American Sprint (RTTY); SKCC Weekend Sprintathon

Next week:

- October 15-19 -- ARRL School Club Roundup <http://www.arrl.org/school-club-roundup>
- October 19 -- NCCC Sprint, MCG Autumn Sprint
- October 20 -- Iowa QSO Party; Feld Hell Sprint
- October 20-21 -- New York QSO Party; 10-10 International Fall Contest (CW); Stew Perry Topband Challenge; JARTS WW RTTY Contest; Worked All Germany Contest; Araucaria VHF Contest; 10-10 International Fall Contest (CW); W/VE Islands QSO Party
- October 21 -- Asia-Pacific Fall Sprint (CW); UBA ON Contest (2 meters)
- October 21-22 -- Illinois QSO Party
- October 22 -- Run for the Bacon QRP Contest
- October 24 -- SKCC Sprint
- October 24-25 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Amateur Radio Newsline(tm) Report 1835 - October 12 2012

Amateur Radio Newsline report number 1835 with a release date of October 12 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC released a Notice of Proposed Rulemaking aimed at changing the Amateur Radio licensing rules and lots more; the R-S-G-B replies to UK telecommunications regulator Ofcom on the future of 143 to 156 MHz; hams in Sweden effectively loose access to the 2300 MHz band and a ham radio operators success in gaining approval for a 65 foot tower leaves neighbors very unhappy. Find out the details are on Amateur Radio Newsline(tm) report number 1835 coming your way right now.

RESTRUCTURING: FCC PROPOSES MULTIPLE CHANGES INN THE PART 97 AMATEUR SERVICE RULES

The FCC has put forth a series of suggested Part 97 rules changes which when taken as a whole literally redefine many aspects of the United States Amateur Radio Service. Amateur Radio Newsline's Mark Abramowicz, NT3V, takes a look at what the regulatory agency sees in ham radio's future:

--

It's not a done deal by any stretch, but the FCC has put a few proposals out there for public comment and it's interested in hearing from you.

The Notice of Proposed Rule Making or NPRM can be divided into a few basic categories - exam credit for expired licenses and grace periods for expired licenses, a change in the number of volunteer examiners needed for a valid testing session, and emissions and experimentation by amateurs.

Rich Moseson, W2VU, is editor of CQ Magazine, and Amateur Radio Newsline called upon him for his take on the proposals.

Let's begin with one that could have the biggest impact, the proposal to give examination credits for anyone who held a license that expired, thereby eliminating the need for re-testing for someone who has an expired license.

Moseson says he wholeheartedly endorses the idea of being able to recover a license a ham once held. He says right now, the current FCC rules are scattered on this....

"If you held a particular type of license at a particular time then there's no limit on being able to get it back without re-testing," Moseson explains. "But if you held a higher class license or a lower class license or the same license at a different time and it's expired and beyond the grace period, then you can't get it back without re-testing.

"So, the current rules make no sense."

Moseson says he's uncertain how many hams are out there who let their licenses lapse years ago, but he suggests the FCC recognizes they should be allowed to get back in without putting an undue burden on them.

Controversial? Maybe, for some. But Moseson says he believes it's a win-win for the hobby...

"I don't think that we've been greatly damaged from having the ability to re-gain licenses once held without additional testing on the license classes that are permitted," Moseson says. "And, I don't think there will be any great hazard to the hobby. In fact, I think there will be benefit to the hobby of letting people whose licenses have expired return if their interest has returned as well."

If that doesn't quite sit well with you, Moseson suggests considering this:

"There's really very little difference between this and what goes on if you maintain your license," Moseson says. "There are no activity requirements. So, as long as you renew your license every 10 years now, you can be licensed continually without taking a test even if you haven't been on the air in 30 years.

"And, if you want to come back on the air - as long as you've maintained your license - then you just turn on the radio. Well, if you've let your license lapse, there's really not much difference. "So, if you've passed the test for a license, if you've held that license before, and you want to get back into ham radio, let's welcome you back with open arms and not make you have to take your test again when other people don't have to take that test again."

Now, on to the proposal to have only two volunteer examiners at a testing session.

Moseson says he feels a little uncomfortable with that idea, although the FCC suggests it will open up more exam opportunities and make it easier for people to get a ham license....

"I think that a minimum of three people is important at first glance," Moseson says. "I would be open to looking at the comments from other people. But from my personal experience, I think it's good to have a

minimum of three people because it just reduces the possibility of any kind of shenanigans to a much lower level.

"And, that was the reason for putting in the three-examiner requirement to begin with and I think that's still valid."

There's also the idea of remote testing sessions - that is using the technology for VEs to observe an exam session. The FCC's rationale is colleges and businesses use teleconferencing and maybe it's time to explore that option. Moseson says timing might be right...

"Yes, the technology needs to be acknowledged," Moseson say. "I don't think we should necessarily just jump right into it. I would suggest a pilot program first to see how well it works out and then take it from there."

Moseson says he's encouraged by the proposal looking at the modes for amateur radio transmissions. He says there are too many restrictions and limitations on hams which can stifle rather than encourage experimentation.

He says the FCC is wise to look at the issue, especially considering the area of TDMA or Time Division Multiple Access technology for amateur radio.

"I think that the more that we can do with them as hams, in addition to what the commercial world is doing, the better off we'll all be because that competition is a fact of life," Moseson says. "You know, you look at our microwave bands which are really where a lot of the future is going to be - 2.4 Ghz, 5.8 Ghz - these bands are already shared.

"And if we can make better use of that sharing so that we can do what we want to do without bothering the other people and without having them bother us then that's great we can all get by very well."

Moseson says he still hasn't had a chance to go through the entire NPRM. He intends to study it and encourages hams to take the initiative and digest it before commenting...

"Well, I would encourage people to download the NPRM from the FCC website and read the whole thing, particularly before sending in comments to the FCC on it," Moseson says. "I've seen too many people in other situations send in comments on an NPRM based on a summary and they haven't read the whole thing and they come off looking uninformed."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V in Philadelphia.

WT Docket No. 12-121 is expected to draw a lot of discussion in ham radio circles and we will have more on it in upcoming Amateur Radio Newsline reports. (FCC)

**

RESTRUCTURING: RSGB, BATC AND AMSAT-UK REPLY TO OFCOM ON HF SPECTRUM

Meantime, across the Atlantic, the Radio Society of Great Britain in concert with the British Amateur Radio Club and AMSAT-UK, has submitted a response to telecommunications regulastor Ofcom's Consultation or Notice of Inquiry on the future use of VHF spectrum from 143 to 156 MHz. This being the bandspace that was formally used by the British Home Office.

According to the R-S-G-B, the unique nature of this spectrum, and the fact that it surrounds the existing 2 meter amateur radio band, suggested a creative response. One the R-S-G-B stated that would need to be competitive with the likely responses from Business Radio users. No details of the actual text of the response are known as we go to air.

(RSGB)

**

RESTRUCTURING: SWEDEN HAM COMMUNITY LOOSES 2300 MHZ BAND

Swedish radio amateurs have basically lost the 2300 MHz band although they have gained some spectrum at 1.8 MHz.

The Swedish Amateur Radio Society, the S-S-A, reports the loss of the 2300 MHz band with effect from October 1st. And while 2400 to 2450 MHz is still allocated for amateur radio operation the power there is limited to just 100 milliwatts at the antenna.

However there is good news down lower in frequency. Sweden used to have "Top Band" allocations of 1810 to 1850 kHz at max 1 kW and 1930 to 2000 kHz with a maximum of 10 Watts out. As of October 1st this changed to 1810 to 1850 kHz at 1 kW and 1850 to 2000 kHz with a maximum of 10 watts. Power output is measured at the antenna.

HAM RADIO IN SPACE: FOUR CUBESATS DEPLOYED FROM ISS

Radio amateurs around the world have been listening for signals from the four new amateur radio CubeSats that were deployed from the International Space Station on Thursday, October 4th.

FITSat-1 has a CW beacon on 437.250MHz, 1200 bps AX.25 packet radio on 437.445MHz and a high-speed data transmitter on 5840.0MHz.

F-1 has the callsign is XV1VN and the communications subsystem is built around two Yaesu VX-3R amateur radio handheld transceivers. One will transmit 1200 bps packet radio every 30 seconds on 145.980MHz while in darkness. The other will operate only in sunlight sending a 20 second FM transmission of a CW tone on 437.485MHz followed by a 60 second gap.

TechEdSat carries a 1200 bps packet radio transmitter on 437.465MHz.

WE-WISH transmits CW and 1200 bps packet radio on 437.505MHz. Due to the effects of Doppler shift the 70cm downlink frequencies will vary by +/- 10 kHz during an 8 minute pass.

Each could have a life-time of 4 or 5 months before they burn-up on reentry into the Earth's atmosphere.

ENFORCEMENT: FCC REFUSES TO RECONSIDER $10000 NAL

The operator of an unlicensed radio station in Florida will have to pay a $10,000 fine. This after the FCC turns down his petition for reconsideration where he failed to prove he could not afford to pay. We have more in this report:

--

The FCC has refused to reconsider a $10,000 fine issued to Neal Davis of Fort Lauderdale, Florida. In its September 28th release the regulatory agency stated that Davis appeal of the forfeiture order did not meet the criteria set out by the agency in regard to providing proof that such a fine would prove to be a financial hardship.

In his Petition, Davis did not deny that he operated an unlicensed radio station and therefore violated Section 301 of the Communications Act. Rather, he urged the cancellation of the forfeiture based on an inability to pay claim. Specifically he asserted that he is currently unemployed and has no income but Davis did not provide any financial or other form of documentation to corroborate his asserted financial status.

In the absence of any supporting financial or other reliable documentation, the FCC says it has no basis by which to evaluate Davis's inability to pay claim and are constrained by the limited record before it. As such the FCC has denied the Petition and affirmed the Forfeiture Order.

--

Davis was given the customary 30 days to pay the fine. If he fails to do so the matter could be turned over to the Department of Justice for further action. (FCC)

**

ENFORCEMENT: WIRELESS CAMERA IN PALM TREE INTERFERES WITH FAA RADAR

The FCC has issued a Notice of Violation to the Redondo Beach Marina in Redondo Beach, California. This, for operating an unlicensed wireless video surveillance camera that was found to be causing interference to an FAA Radar system.

After receiving a complaint from the Federal Aviation Administration concerning interference to their 1240 to 1300 MHz band radar in San Pedro, California the Los Angeles FCC Office dispatched agents to investigate the matter. The agents used direction finding to locate a radio signal on 1282 MHz emanating from a wireless camera mounted on a Palm tree in the parking lot of Redondo Beach Marina. When AC power to the camera was disconnected, the interference ceased.

Based on this finding, a cease and desist notice was issued telling the Marina that use of the wireless camera must stop immediately. And in its September 20th letter to the Redondo Beach Marina it was warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws and could subject the operator of this illegal operation to severe penalties. HELPING YOUTH: AMATEUR RADIO SUPPLIES ANNOUNCES YOUTH GIVEAWAY

Amateur Radio Supplies of Haverhill, Massachusetts, has announced a new biannual giveaway. This to promote youth in amateur radio DXing and contesting.

Beginning January 1st of 2013, the company says that it will give a complete high frequency station to the selected applicant. The gear to be presented will include Alinco DX-SR8T/E 160 through 6 meter all mode transceiver with a 30 amp power supply, an L-D-G antenna tuner, a choice of an all band G5RV or HyGain DX-77A Vertical plus just about all the accessories to put it all on the air.

Applicants from any country under the age of 21 are invited to provide brief answers to the following three questions. These are how often are you able to operate on the HF bands? Where do you typically operate from and how do you intend to use the equipment provided in the give-away.

Send your answers along with your name, callsign, and license class using the form at www.amateurradiosupplies.com/youth-s/222.htm. Nominations will also be accepted.

For more information please e-mail Randy Rowe at randy (at) amateurradiosupplies (dot) com. Amateur Radio Supplies is a new company that provides a full line of gear, including antennas, transceivers, coax, antenna wires and countless station accessories.

(Michelle Garrett - Project Manager - Amateur Radio Supplies)

SWL NEWS: MORE TV WATCHERS OPTING OR FREE OVER THE AIR PROGRMMING

As cable bills rise and the United States economy remains weak, more Americans are watching television using good old fashioned antennas.

According to the research firm GfK Media, nearly 18 percent of all US households with television sets are watching broadcasts delivered for free over the air. This is up from 15 percent of homes last year according to research the firm. Translated into numbers, that means 20.7 million homes, or roughly 54 million consumers, now get channels over the air instead of paying a monthly cable or satellite bill.

According to the study, 6 percent of TV households, or 6.9 million homes, canceled their cable service at some point in the past and now rely on free broadcasts. GfK's report also found that 16 percent of households downgraded TV service in the business year through March, while only 11 percent of TV households said they had increased service.

The report also found that people using Web-connected TV increased to 34 million households, or 29 percent. That's almost double the previous year's 16 percent. More is on-line at tinyurl.com/9z4ffj5

SWL NEWS: CANADIAN AM STATIONS LEAVING THE AIR

More AM stations are leaving the medium wave AM broadcast band in Canada than are coming on the air, This is according to the trade publication Radio World that says since 2009, some sixteen Canadian AM broadcasters have gone off the air as several have moved to the FM band and companies closed the least profitable stations.

But in this case more seems better from a profit standpoint. According to the research firm Statistics Canada, the moves have allowed AM operating revenues to grow by 1.1% in 2011, to 311 million Canadian dollars.

A quick search of the Canadian Radio-Television and Telecommunications Commission site shows 727 commercial licensed radio stations, not broken down by service. That compares to 4,754 commercial licensed AM and 6,568 FM broadcast entities in the United States according to FCC figures for the most recent quarter. (RW)

CHANGING OF THE GUARD: SID T. MAY ET3SID/AB3OZ/G4CTQ, SK

The changing of the guard in ham radio continues with word of the passing of Sid T. May, who held the callsigns ET3SID, AB3OZ and G4CTQ. May was the chairman of the Ethiopian Amateur Radio Society and credited with setting up the first amateur radio club of Ethiopia in 1993. He had also been teaching amateur radio courses to Ethiopian students for more than 15 years and was also a volunteer examiner who administered both U-K and United States amateur exams in Ethiopia. (Southgate)

**

INTRUDER REPORT: CHINESE OTH RADAR GAIN HRASSING 40 METERS

The IARU Monitoring System newsletter reports that Radio Hargeisa is operating on 7.120 MHz and that Chinese surveillance radar in the amateur radio 40 meter band is now stronger than ever before

According to the report, the pesky Chinese Over the Horizon Radar had left the 40 meter band for few weeks. But now its reported back with a very strong burst system. One that is at least 10 kHz wide and has an almost S9 signal, world-wide. IARU Regions 1 and 3 are reported to be severely affected by it.

More about both of these situations is on-line at tinyurl.com/china-radar-again. (IRUMS)

**

EMERGING TECHNOLOGY: DISSOLVABLE BIO-MED ELECTRONICS

Ultra-thin electronics that dissolve inside the body have been devised by scientists in the US and could be used for a range of medical roles.

According to research published in the journal Science the components are made of silicon and magnesium oxide and placed in a protective layer of silk. Once their job has been completed these devices can simply melt away with the speed of melting is controlled by silk.

The technology has already been used to heat a wound to keep it free from infection by bacteria. More is on-line at tinyurl.com/melting-electronics. (BBC)

**

WORLDBEAT: UK AUTO MANUFACTURERS NOT SUPPORTING DIGITAL RADIO BROADCASTING

The United Kingdom's government mandated switchover date for digital radio may need to be extended several years. This following a new survey of car manufacturers that reveals at least half are steering clear of the new entertainment technology.

As part of its Digital Britain vision, the UK Department for Culture, Media and Sport named 2015 as the deadline for turning off its ageing but very popular analogue radio network, in favor of one based on digital standards. The move would mean the majority of today's in-car tuners as well as home radio sets would cease to function overnight.

But new findings from Auto Express Magazine suggest the switchover could now be delayed until 2017 or later. This after a survey of 24 mainstream car manufacturers by the publication has revealed that 50 percent do not offer any digital radio units for their model range, even as an optional extra. Also, almost 60 per cent of new vehicles registered this in the U.K. this year came with no option for the installation of a digital radio receiver. (Auto Express, Southgate)

**

WORDBEAT: BELEGIUM HAMS ASSIST IN NEW FREE WIFI SYSTM

The Belgian national society the U-B-A reports on the involvement of radio amateurs in getting free WiFi in the city of Geraardsbergen. The UBA says that O6RY and ON3FDS worked with the city officials to bring about the new WiFi service and in the process generated some valuable public relations for the amateur radio in that nation. More about this story is on-line at tinyurl.com/ham-radio-wifi (Southgate)

HAM RADIO IN SPACE: EQUISAT HAM-SAT TO CARRY OPTICAL BEAON

Students at the Brown University are developing an amateur radio satellite called EQUiSat that will carry an interesting optical beacon. The bird will use a Xenon Flash Tube that should be visible to the unaided eye of observers on Earth. A radio beacon is planned to operate in the 435 to 438 MHz range. Launch is hoped for in the 2015 time frame into an orbit of about 300 kilometers. That should give the satellite a life-time of a couple of months.

(EQUiSat, Southgate)

**

HAM RADIO IN SPACE: BUAA-SAT PLANNED FOTR 2014 LAUNCH

BUAA-SAT is a micro-satellite project developed by the students of Beijing University carries an amateur radio 435 and 145 MHz FM voice transponder. Plans call for it to be launched into a 600 by 800 kilometer Sun Synchronous Orbit in late 2014. Its primary missions are to study the application of components used in the onboard electronic system, to demonstrate the coil-able mast deployment mechanism and to carry out imaging using three CMOS cameras. DX

In DX, word that ON4AFU will be on the air from Ko Butang Island October 26th to November 4th as HS0ZJF stroke 9. He will be active on High Frequency bands on CW only. QSL via ON4AFU

7L4DXT and K1GI will be operational from Sint Maarten Island from November 18th to the 24th as PJ7XK and PJ7I respectively. They will be active on 160 through 10 meters on CW, SSB and some Digital modes. QSL PJ7XK via 7L4DXT and PJ7I via JG2BRI

KI5SF reports that he will be operational portable KH6 from about 0100 UTC October 26th to 10:00 UTC October 27th. Listen out for him on 160 through 6 meters except for 60 meters on SSB and CW. QSL to KI5SF.

A group of operators from Switzerland will be active from Aitutaki Island in the Cook Island chain from November 12th to the 30th using the call signs E51C, E51ABS, E51BZD and E51CHX. Listen out for them on 80 through 10 meters using CW, SSB, and PSK. QSL this operation via HB9BXU

JA7HMZ and JA7EPO will be active from Pohnpei Island from November 23rd to the 28 as V63DX and V63EPO. They also plan to operate in CQ World Wide DX CW Contest on November 24th and 25th as V6A. QSL V63DX via JA7HMZ, V63EOP via JA7EPO and V6A via JA7HMZ.

JH1EAQ will be active from Palau in CQ World Wide DX SSB Contest On October 27th and 28th as T88EB. QSL via home call only.

Lastly, looking to the future comes word that G3SWH and G3RTE will be active from Guadalcanal Island in the Solomon Islands from February 18th to the 28th of 2013. The callsign to be used will be H44KW operating on 80 through 10 meters using CW only. QSL via G3SWH direct or via the bureau.

**

THAT FINAL ITEM: BIG ANTENNA WIN DOWN-UNDER ANGERS NEIGHNORS

And finally this week, a New Zealand ham has won a major tower and antenna victory but his neighbors are far from happy with the city council's decision. This, even before the antenna system is erected. Amateur Radio Newsline's Jim Meachen, Zed-L-2-B-H-F, reports from down-under:

--

Pyes Pa, New Zealand residents concerned about the proposed installation of a 20 meter high radio antenna are disappointed that the Tauranga City Council won't fight a legal battle on their behalf.

Residents of Veda Glen have petitioned the city council to appeal an Environment Court decision which allows amateur radio enthusiasts to erect radio masts up to 20 meters or 65 feet high. They say a radio antenna proposed by a neighbor would be an eyesore, create wind noise and devalue their properties.

While Councilors seemed to sympathize with the residents' plight they also said that based on their legal advice, an appeal to the High Court would be pointless. The council had previously tried to restrict private radio masts to a maximum height of 9 meters or about 30 feet. However an appeal to the Environment Court by the Tauranga Emergency Communications Group and the New Zealand Association of Radio Transmitters saw the maximum height raised to the 20 meter maximum.

Council senior policy planner Campbell Larking told councilors approximately $100,000 New Zealand dollars had been spent fighting the case in the Environment Court, and he estimated an appeal to the High Court would cost another $50,000. Also that a High Court ruling would not be binding and the matter would simply be sent back to the same

Environment Court judge to re-consider.

A resolution proposed by Councilor Murray Guy, which sought to launch an investigation into Environment Court and City Plan processes in order to enhance community consultation did not find enough support and failed.

The bottom line is that the unnamed ham can put up his 65 foot high mast along with the antenna that will sit on top of it. It's unknown when that installation will be completed.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

Outside the chambers, the residents said a legal challenge was outside their reach and they were disappointed the council had backed away from fighting the case on their behalf. (bayofplentytimes.co.nz)

Los Angeles Area 2012 Jamboree-on-the-Air

Posted: 11 Oct 2012 03:17 PM PDT
http://forums.qrz.com/showthread.php?364494-Los-Angeles-Area-2012-Jamboree-on-the-Air&goto=newpost

Posted 10-11-2012

The South Bay Amateur Radio Club, W6SBA and the Palos Verdes Amateur Radio Club, K6PV will assist the Los Angeles Boy Scouts of America Council with Jamboree-on-the-Air (JOTA). Would you invite all the Daily DX users to give our youth the chance to see and feel Amateur Radio.

Thanks and Aloha

Ray Grace, WA6OWM

On Saturday, October 20th., the Los Angeles Area Council, Boy Scouts of America will be on the air during the annual JOTA event. The following stations will be active, K6B, Battleship USS Iowa, San Pedro, Ca. and W6B, Firestone Scout Camp, Brea, Ca.

Our operating will be from 10am to 4pm local Pacific time on 20m and 40m around the published JOTA frequencies. (1700 to 2300 UTC)

We will be looking to make contacts with other scout groups and or any other hams willing to chat with some of the scouts as they filter through the station.

Thank you,

73

iHAB-8 Launcah Announcement

Posted: 11 Oct 2012 02:20 PM PDT
http://forums.qrz.com/showthread.php?364487-iHAB-8-Launcah-Announcement&goto=newpost

The iHAB Team is excited to announce the next launch of the iHAB Project! iHAB-8 is scheduled to launch October 14, 2012 at 16:00Z (11AM CDT). The iHAB Team as well as other High Altitude Balloon fans have had a challenging year trying to

launch balloons due to the global helium shortage. You can read more about the shortage here HERE. We were fortunate to obtain enough helium to complete one launch in 2012, and iHAB-8 is that launch!

The iHAB Team is excited to fly another "FUN" payload. Including a new "micro" 20 Meter QRP CW beacon designed and built by Dave Cripe - NM0S, Hi-Def Video, and time-lapse photography. The CW beacon controller is a new version (not yet available for purchase) of the EZKeyer from 4SQRP. The EZKeyer v2 has expanded memories, AND beacon mode! Please spot signal reports on QRP Spots - http://www.qrpspots.com/

The other exciting mission to this launch, and the reason we are calling is "X" Marks the Spot is because we are going about this launch a bit backwards to what we have done thus far. For an added twist of difficulty, we have preselected our desired LANDING location, and will be calculating out LAUNCH location based on continued calculated predictions right up until we launch. We have chosen the Ottumwa Industrial Airport - KOTM as our "X". This will challenge our Propulsion Team to hit their mark!

Visit http://www.ihabproject.com/iHAB-8/ for updated Flight News, and Launch Information.

=== The launch of iHAB-8 will be webcast LIVE starting at/around 10:30AM CDT, so please plan to visit Mission Control. ===

Of course, MFJ lets you repair their junk for free. Look at how much
money they save by having their customers do the work. I have bought 3
items from them, and they all needed to be fixed. Mighty Fine Junk.

LOG4OM Logging Program release

Posted: 11 Oct 2012 05:51 AM PDT
http://forums.qrz.com/showthread.php?364434-LOG4OM-Logging-Program-release&goto=newpost

A new release of the free LOG4OM logging software will be available for
download on Sunday 14th October to coincide with the LOG4OM presentation at
the RSGB Convention.

This release has many added features particularly aimed at the DX community
and the casual ham.

The new release version 1.11 and the updated user manual will be available
from the LOG4OM web site http://www.pisto.it/wordpress/log4om-en/ at about
12.00 Hrs GMT

Bring your memory stick (A 1gb stick will do because the program is only
17mb) to the RSGB Convention and I will load it with the latest version of
LOG4OM and of course there is no charge for this free software.

The LOG4OM logging program can be also run from a memory stick or SD card
for complete portability, so no need to take that heavy laptop on your
travels just plug into the nearest PC, contact G4POP for details.

LightSquared Won't Give Up !

Posted: 10 Oct 2012 09:27 PM PDT
http://forums.qrz.com/showthread.php?364417-LightSquared-Won-t-Give-Up-!&goto=newpost

Apparently the FCC ruling will not stop these folks.

LightSquared, the wireless broadband company whose plans took a blow when
the FCC decided to not allow it access to spectrum adjacent to the
frequencies used for the Global Positioning System, is at it again with a
new proposal.

LightSquared came up with its own proposal on Friday, which involves
sharing 5MHz of spectrum with the federal government in a band partially
used for weather balloons. It also involves abandoning its most
controversial piece of spectrum, the one just below the GPS signals. But
LightSquared still wants to build on the lower 10MHz of its spectrum, even

though the FCC has already rejected it as unsuitable because millions of existing GPS devices can't filter out neighboring signals. To compensate, LightSquared would lower the power levels in this portion of spectrum to 52dBm per sector EIRP, down from the previously planned power level of 62dBm, which was found to interfere with GPS.

Article from PCWorld:

http://www.pcworld.com/article/2010843/lightsquared-asks-to-share-weatherballoon-spectrum-for-its-lte-network.html

TARS is Always Prepared for Emergencies Situations:

Posted: 11 Oct 2012 05:01 PM PDT
http://www.eham.net/articles/29139

September was National Preparedness Month, the time for reminding the public about preparing for unexpected emergencies. During this time, amateur radio operators participated in activities and projects to demonstrate the part that they play in helping the community when disaster strikes. The Tipton County Radio Society is always prepared to handle emergency communications for the community. TARS participated at the Covington Heritage Festival on Sept. 22. The booth theme this year was "When Disaster Strikes: Who You Gonna Call?" They operated under a mock disaster situation without utilities and demonstrated radio communications and solar oven cooking. Amateur radio -- commonly referred to as ham radio -- helps people communicate with one another by voice, computer and code over vast distances. Most people are unaware of the service that these quiet heroes provide during emergencies. During a disaster, it's possible that normal forms of communication with the outside world may be interrupted. Land-line telephone facilities may become unusable because physical wires or poles are down. Cell phone facilities may be unusable because cell towers are down, cell sites are destroyed or just because too many people are trying to use the system. Even emergency operating centers may be out of commission if their buildings or antennas have been damaged. Communications are a vital part of responding to and recovering from any type of disaster. When other communications failed after Hurricane Katrina, the Joplin tornado and the San Francisco earthquake, ham radio operators helped first responders to coordinate rescue efforts. Amateur radio relies on technology first used more than a century ago. Unlike cell phones or satellite communications, ham radio relies on a specific radio unit's antenna to broadcast to other nearby units on a given frequency. This makes them useful during disasters, even when the cellphone towers are out. As a result of this capability, Amateur radio practitioners are often called upon to provide communications assistance in times of local and national emergency.

//
Shakeout Earthquake Drill Set for Oct. 18:

Posted: 11 Oct 2012 05:01 PM PDT
http://www.eham.net/articles/29138

The Disaster Preparedness Task Force and the Amateur Radio Club will participate with over 8 million California residents in the Great California Shakeout Earthquake drill at 10:18 a.m. on Oct. 18. All levels of schools and universities, hospitals and care facilities, large and small businesses plus First Responders will be practicing their disaster plans. PCM's Senior Management will practice the Village Disaster Plan with a tabletop exercise. Disaster Task Force Building Captains and Good Neighbors should activate at 10:18 a.m. by checking on their neighbors, completing injury and damage reports that will provide Report Center Coordinators and Amateur Radio Operators with pertinent information for First Responders when they arrive. Volunteer medical personnel, clerks and golf cart couriers should report to assigned destinations. Report Centers are located at Clubhouses 1, 3, 4, 5 and 6; the Small Golf Course Building; Gate 14 Captains take reports to 4008 Rec Room; and Gate 11 Golf Cart Couriers will pick up or Captains take to Gate 11 Gate House.

BRS Media Voices Concern Over EBUs Use of ICANN Trademark:

Posted: 11 Oct 2012 05:01 PM PDT
http://www.eham.net/articles/29137

BRS Media, a diverse and growing media e-commerce firm that helps traditional and interactive media companies build and brand on the power of the Internet, sent a letter to ICANNs new CEO Mr. Fadi Chehadé voicing concern over the European Broadcast Union (EBU) usage of ICANN trademark. The EBU and its sister union International Amateur Radio Union (IARU), in association with The American Radio Relay League (ARRL), are using ICANNs trademark logo on its website and blog, with regards to endorsements and information regarding EBUs application for .RADIO. The use of this trademark logo in endorsement blogs and EBUs website may confuse the Radio Industry into inferring ICANN's mark of approval for the EBUs .RADIO Application.The New Top-Level Domain program has taken years to develop rights protection mechanisms to protect IP (Intellectual Property) of organizations worldwide. A copy of the letter is available at: http://www.brsmedia.fm/ICANN_CEO_EBU.pdf (.pdf)

FCC Seeks to Change Amateur Radio Licensing Rules:

Posted: 11 Oct 2012 12:41 PM PDT
http://www.eham.net/articles/29132

On October 2, the FCC released a Notice of Proposed Rulemaking in WT Docket No. 12-121 that seeks to change the Amateur Radio licensing rules, especially as they concern former licensees. Acting upon an April 2011 Petition for Rulemaking filed by the Anchorage VEC to give permanent credit to radio amateurs for examination elements they have successfully passed, the FCC proposes to revise Section 97.505 to require that Volunteer Examiners (VEs) give examination credit to an applicant who can demonstrate that he or she formerly held a particular class of license.

//
FCC Agrees with ARRL on Emission Designators, TDMA:

Posted: 11 Oct 2012 12:41 PM PDT
http://www.eham.net/articles/29131

Part of WT Docket No. 12-121 (see above) included a response to a March 2011 Petition for Rulemaking filed by the ARRL. Through the Notice of Proposed Rulemaking, the FCC is seeking to amend the Amateur Service rules to allow amateur stations to transmit additional emission types in order to permit Time Division Multiple Access (TDMA) in the Amateur Service; however, it denied the League's request for a blanket waiver pending the resolution of the rulemaking proceeding.

//
Scouts and Scouters Take to the Airwaves for the 55th Jamboree on the Air:

SARL NEWS - SUNDAY 14 October 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

IS YOUR CLUB AFFILIATED TO THE SARL?

MEMBERSHIP RENEWALS

FOUR CUBESATS DEPLOYED FROM ISS

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

IS YOUR CLUB AFFILIATED TO THE SARL?

Recently the SARL invited clubs to affiliate with the South Africa Radio League free of charge. The following clubs have:

Highway Amateur Radio Club - ZS5HAM, Boland Amateurradioklub - ZS1BAK, Midlands Amateur Radio Club - ZS5PMB, Cape Town Amateur Radio Centre - ZS1CT, Border Radio Club - ZS2BRC, Bloemfontein Amateurradioklub - ZS4BFN, Durban Amateur Radio Club - ZS5D, East Rand Amateur Radio Club - ZS6ERB, Kempton Park Amateur Radio Technical Society - ZS6KTS, Pretoria Amateur Radio Club - ZS6PTA, Rustenburg Amateur Radio Club - ZS6RTB.

Affiliation to the SARL offers clubs the privilege of setting up an examination centre, inclusion of news of their activities and events in SARL News and on the SARL website as well as a link from the Club Talk page and access to audio clips form use in club on the air activities.

To visit an affiliated club website visit www.sarl.org.za and click on Club Talk and follow the link.

To join the eleven clubs already affiliated, send an email to secretary@sarl.org.za and an affiliation form will be sent to you.

MEMBERSHIP RENEWALS

The Honorary Treasurer reports that the membership renewals are currently being processed. Once this is finished, the database of members will be rolled over to 2012/2013. The cut-off date has been set for 30 October 2012. To keep your years of well-earned uninterrupted membership status, contact the office to make the arrangement. A useful option for members and new members wishing to join the SARL, but not able to make a once off payment, is to arrange down payment of membership fees in terms of two, four or six payments between June and February of the next year in order to be eligible to vote at the AGM in April. This arrangement must be made with the office in order to indicate your choice on your record otherwise you may not be a member by the time of the AGM. Join the SARL and protect your hobby against the continuous risk of losing our frequency bandwidth. Full details are on www.sarl.org.za and send your confirmations to admin@sarl.org.za.

FOUR CUBESATS DEPLOYED FROM ISS

Radio amateurs around the world have been listening for signals from the four new amateur radio CubeSats that were deployed from the International Space Station on Thursday 4 October.

FITSat-1 has a CW beacon on 437,250 MHz, 1 200 bps, AX.25 packet radio on 437,445 MHz and a high-speed data transmitter on 5 840,0 MHz.

F-1 has the call sign is XV1VN and the communications subsystem is built around two Yaesu VX-3R amateur radio handheld transceivers. One will transmit 1 200 bps packet radio every 30 seconds on 145,980 MHz while in darkness. The other will operate only in sunlight sending a 20 second FM transmission of a CW tone on 437,485 MHz followed by a 60 second gap.

TechEdSat carries a 1 200 bps packet radio transmitter on 437,465 MHz.

WE-WISH transmits CW and 1 200 bps packet radio on 437,505 MHz. Due to the effects of Doppler shift the downlink frequencies will vary by +/- 10 kHz during an 8 minute pass.

Each could have a life-time of 4 or 5 months before they burn-up on re-entry into the Earth's atmosphere.

AMATEUR RADIO TODAY CHANGES FREQUENCIES ON 28 OCTOBER

>From Sunday 28 October Amateur Radio Today will be transmitted on new frequencies.

Sundays 10:00 CAT on 7 205 kHz and 17 760 kHz; Mondays 18:30 CAT on 4 895 kHz.

Reception reports are invited. We are particularly interested in reports of the 4 895 kHz transmission on Mondays at 18:30 UTC as the

frequency is close to the proposed new amateur allocation near 5 MHz. Reception reports from all areas in South Africa would be useful in our bid to ICASA for frequencies pilot studies. Send rapports to artoday@sarl.org.za.

OCTOBER 2012 RAE

In total 169 candidates have enrolled to write the October 2012 RAE. The SARL would like to wish all candidates good luck on Thursday evening while they write the examination.

The normal turnaround time for releasing results after the examination is three weeks and we would request that you exercise patience while the papers are marked and the results collated.

CQ HOU KOERS AND JOTA OPERATION SCOUTS AND VOORTREKKERS

ICASA has agreed, on request from the SARL, that unlicensed youth participating in JOTA and CQ Hou Koers may operate amateur radio stations under the supervision of licensed radio amateurs without the need to register as an educational station.

These two events are ideal opportunities to demonstrate amateur radio to the youth by giving them hands-on operating experience. Show them how to call CQ, and handle a QSO on their own while being guided by a licensed amateur.

This blanket permission will only be valid during the two days, 20 and 21 October 2012. At any other time amateurs must register as an educational station if they are planning to do on the air training and to allow non-amateurs to operate during special events.

The SARL thanks ICASA for their support in making CQ Hou Koers and JOTA a memorable experience for our young people.

NEW BOOKS AND A QRP CW KIT FROM SAARDT

The South African Amateur Radio Development Trust has two new books available: ARRL's Low Power Communication and Short Antennas for 160 Metre Radio. A small number of 40 Metre CW QRP kits are also available as well as the ARRL Antenna Book and a small number of the 2012 ARRL Hard cover handbook. Get more details from www.amateurradio.org.za.

RTA 2013

Preparations for the 2013 Radio Technology in Action Symposium are already in progress. Do you have a subject that you would like to see on the programme? Send an email to rta@sarl.org.za with your suggestions.

VOLUNTEERS FOR NEWS TEAM

The SARL News Team still needs volunteers for compiling and translating the SARL bulletins. Bulletin compilers will be SARL members, bilingual, with some rudimentary computer and editing skills and will have an

e-mail address.

If you might have the necessary skills and be willing to try your hand at this, please send your name and contact details to Fritz, ZS6SF, with email address secretary@sarl.org.za immediately. Without enough volunteers, it will not be possible to keep the Afrikaans bulletin going.

COMPETITION NEWS

The ZS6JVT Youth Sprint took place on 2 September. The judges provided additional time for any late logs. Two logs were received and there were one control log from ZS6JVT itself.

The are as follows: 1st Mitchell Mynhart, ZS6YH 2nd ZS4SRK, Sasol Radio Amateur Club.

Many thanks to the two stations who took the trouble to send in logs as well as the stations dished out points to them.

In view of the poor support the committee has decided to cancel the competition for next year.

CLUB NEWS

The AGM of the Magalies Amateur Radio Club took place on 29 September at which the following members were elected to its committee:

Thys Maree, ZS6MJM Chairman Brian Jacobs, ZS6YZ Vice Chairman Anette Jacobs, ZR6D Secretary Louis Mitchell, ZS6LWM Treasurer Sam van Zyl,ZS6JZ Technical Hannes Enslin, ZS6JDE Digital Marco Nel, ZS6MJ Teenspanning Gordon Forbes, ZS6FI Social Johann du Plessis, ZS6PSS Bulletin Coordinator Johann du Plessis, ZS6PSS Youth Coordinator Pieter Human, ZS6PA Competition Manager Chris Smit, ZS6FCS Public Relations

At the AGM of the Bloemfontein Radio Amateur Club, held on Saturday 29 September, the motion to change the name to the Bloemfontein Amateur Radio Club was approved. The following members were elected to serve on the new committee:

Chairman: Warren Riley, ZS4W Vice Chairman: Brendon Muller, ZS4BM Secretary: Jenni Riley, ZS4J Treasurer: Frans Marais, ZS4FM Members: Andre van Rensburg, ZS4APA, and Dennis Green, ZS4BS.

HF PROPAGATION CONDITIONS

Hans van de Groenendaal, ZS6AKV, reports that the space weather outlook for the next few days is unsettled. A major C-class flare has been detected. The background X-ray flux is at the upper B-class levels. Geomagnetic conditions are unsettled. Local HF frequencies are unstable but expected to be close to the monthly average predicted values.

A solar wind stream flowing from a geo-effective coronal hole is expected to reach earth today or tomorrow. The magnetic configuration of region 1 585 is growing in complexity and has further potential for

flare activity. The current sunspot number is 63.

15 Meters should be providing good DX conditions during mid morning and afternoon with 20 metres looking good later in the day. There will be some 10 metre openings. Give a call on 10 metres and you may be surprised. Share your DX experience this week-end by sending an email to artoday@sarl.org.za.

For up-to-date space weather information visit www.spaceweather.co.za

DIARY OF EVENTS

20 October -Jamboree-on-the-air and CQ Hou Koers.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, with translations by Fritz Sutherland, ZS6SF, and compiled George Honiball, ZS6NE.

Thank you for listening, 73. /EX

Amateur Radio Newsline☐ Report 1835 ☐ October 12 2012

Amateur Radio Newsline report number 1835 with a release date of October 12 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC released a Notice of Proposed Rulemaking aimed at changing the Amateur Radio licensing rules and lots more; the R-S-G-B replies to UK telecommunications regulator Ofcom on the future of 143 to 156 MHz; hams in Sweden effectively loose access to the 2300 MHz band and a ham radio operators success in gaining approval for a 65 foot tower leaves neighbors very unhappy. Find out the details are on Amateur Radio Newsline☐ report number 1835 coming your way right now.

RESTRUCTURING: FCC PROPOSES MULTIPLE CHANGES INN THE PART 97 AMATEUR SERVICE RULES

The FCC has put forth a series of suggested Part 97 rules changes which when taken as a whole literally redefine many aspects of the United States Amateur Radio Service. Amateur Radio Newsline☐s Mark Abramowicz, NT3V, takes a look at what the regulatory agency sees in ham radio☐s future:

--

It's not a done deal by any stretch, but the FCC has put a few proposals out there for public comment and it's interested in hearing from you.

The Notice of Proposed Rule Making or NPRM can be divided into a few basic categories - exam credit for expired licenses and grace periods for expired licenses, a change in the number of volunteer examiners needed for a valid testing session, and emissions and experimentation by amateurs.

Rich Moseson, W2VU, is editor of CQ Magazine, and Amateur Radio Newsline called upon him for his take on the proposals.

Let's begin with one that could have the biggest impact, the proposal to give examination credits for anyone who held a license that expired, thereby eliminating the need for re-testing for someone who has an expired license.

Moseson says he wholeheartedly endorses the idea of being able to recover a license a ham once held. He says right now, the current FCC rules are scattered on this....

"If you held a particular type of license at a particular time then there's no limit on being able to get it back without re-testing," Moseson explains. "But if you held a higher class license or a lower class license or the same license at a different time and it's expired and beyond the grace period, then you can't get it back without re-testing.

"So, the current rules make no sense."

Moseson says he's uncertain how many hams are out there who let their licenses lapse years ago, but he suggests the FCC recognizes they should be allowed to get back in without putting an undue burden on them.

Controversial? Maybe, for some. But Moseson says he believes it's a win-win for the hobby...

"I don't think that we've been greatly damaged from having the ability to re-gain licenses once held without additional testing on the license classes that are permitted," Moseson says. "And, I don't think there will be any great hazard to the hobby. In fact, I think there will be benefit to the hobby of letting people whose licenses have expired return if their interest has returned as well."

If that doesn't quite sit well with you, Moseson suggests considering this:

"There's really very little difference between this and what goes on if you maintain your license," Moseson says. "There are no activity requirements. So, as long as you renew your license every 10 years now, you can be licensed continually without taking a test even if you haven't been on the air in 30 years.

"And, if you want to come back on the air - as long as you've maintained your license - then you just turn on the radio. Well, if you've let your license lapse, there's really not much difference.

"So, if you've passed the test for a license, if you've held that license before, and you want to get back into ham radio, let's welcome you back with open arms and not make you have to take your test again when other people don't have to take that test again."

Now, on to the proposal to have only two volunteer examiners at a testing session.

Moseson says he feels a little uncomfortable with that idea, although the FCC suggests it will open up more exam opportunities and make it easier for people to get a ham license....

"I think that a minimum of three people is important at first glance," Moseson says. "I would be open to looking at the comments from other people. But from my personal experience, I think it's good to have a minimum of three people because it just reduces the possibility of any kind of shenanigans to a much lower level.

"And, that was the reason for putting in the three-examiner requirement to begin with and I think that's still valid."

There's also the idea of remote testing sessions - that is using the technology for VEs to observe an exam session. The FCC's rationale is colleges and businesses use teleconferencing and maybe it's time to explore that option. Moseson says timing might be right...

"Yes, the technology needs to be acknowledged," Moseson say. "I don't think we should necessarily just jump right into it. I would suggest a pilot program first to see how well it works out and then take it from there."

Moseson says he's encouraged by the proposal looking at the modes for amateur radio transmissions. He says there are too many restrictions and limitations on hams which can stifle rather than encourage experimentation.

He says the FCC is wise to look at the issue, especially considering the area of TDMA or Time Division Multiple Access technology for amateur radio.

"I think that the more that we can do with them as hams, in addition to what the commercial world is doing, the better off we'll all be because that competition is a fact of life," Moseson says. "You know, you look at our microwave bands which are really where a lot of the future is going to be - 2.4 Ghz, 5.8 Ghz - these bands are already shared.

"And if we can make better use of that sharing so that we can do what we want to do without bothering the other people and without having them bother us then that's great we can all get by very well."

Moseson says he still hasn't had a chance to go through the entire NPRM. He intends to study it and encourages hams to take the initiative and digest it before commenting...

"Well, I would encourage people to download the NPRM from the FCC website and read the whole thing, particularly before sending in comments to the FCC on it," Moseson says. "I've seen too many people in other situations send in comments on an NPRM based on a summary and they haven't read the whole thing and they come off looking uninformed."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V in Philadelphia.

--

WT Docket No. 12-121 is expected to draw a lot of discussion in ham radio circles and we will have more on it in upcoming Amateur Radio Newsline reports. (FCC)

**

RESTRUCTURING: RSGB, BATC AND AMSAT-UK REPLY TO OFCOM ON HF SPECTRUM

Meantime, across the Atlantic, the Radio Society of Great Britain in concert with the British Amateur Television Club and AMSAT-UK, has submitted a response to telecommunications regulastor Ofcom□s Consultation or Notice of Inquiry on the future use of VHF spectrum from 143 to 156 MHz. This being the bandspace that was formally used by the British Home Office.

According to the RSGB, the unique nature of this spectrum, and the fact that it surrounds the existing 2 meter amateur radio band, suggested a creative response. One the R-S-G-B stated that would need to be competitive with the likely responses from Business Radio users. No details of the actual text of the response are known as we go to air.

(RSGB)

**

RESTRUCTURING: SWEDEN HAM COMMUNITY LOOSES 2300 MHZ BAND

Swedish radio amateurs have basically lost the 2300 MHz band although they have gained some spectrum at 1.8 MHz.

The Swedish Amateur Radio Society, the S-S-A, reports the loss of the 2300 MHz band with effect from October 1st. And while 2400 to 2450 MHz is still allocated for amateur radio operation the power there is limited to just 100 milliwatts at the antenna.

However there is good news down lower in frequency. Sweden used to have "Top Band" allocations of 1810 to 1850 kHz at max 1 kW and 1930 to 2000 kHz with a maximum of 10 Watts out. As of October 1st this changed to 1810 to 1850 kHz at 1 kW and 1850 to 2000 kHz with a maximum of 10 watts. Power output is measured at the antenna.

HAM RADIO IN SPACE: FOUR CUBESATS DEPLOYED FROM ISS

Radio amateurs around the world have been listening for signals from the four new amateur radio CubeSats that were deployed from the International Space Station on Thursday, October 4th.

FITSat-1 has a CW beacon on 437.250MHz, 1200 bps AX.25 packet radio on 437.445MHz and a high-speed data transmitter on 5840.0MHz.

F-1 has the callsign is XV1VN and the communications subsystem is built around two Yaesu VX-3R amateur radio handheld transceivers. One will transmit 1200 bps packet radio every 30 seconds on 145.980MHz while in darkness. The other will operate only in sunlight sending a 20 second FM transmission of a CW tone on 437.485MHz followed by a 60 second gap.

TechEdSat carries a 1200 bps packet radio transmitter on 437.465MHz.

WE-WISH transmits CW and 1200 bps packet radio on 437.505MHz. Due to the effects of Doppler shift the 70cm downlink frequencies will vary by +/- 10 kHz during an 8 minute pass.

Each could have a life-time of 4 or 5 months before they burn-up on reentry into the Earth□s atmosphere.

ENFORCEMENT: FCC REFUSES TO RECONSIDER $10000 NAL

The operator of an unlicensed radio station in Florida will have to pay a $10,000 fine. This after the FCC turns down his petition for reconsideration where he failed to prove he could not afford to pay. We have more in this report:

--

The FCC has refused to reconsider a $10,000 fine issued to Neal Davis of Fort Lauderdale, Florida. In its September 28th release the regulatory agency stated that Davis appeal of the forfeiture order did not meet the criteria set out by the agency in regard to providing proof that such a fine would prove to be a financial hardship.

In his Petition, Davis did not deny that he operated an unlicensed radio station and therefore violated Section 301 of the Communications Act. Rather, he urged the cancellation of the forfeiture based on an inability to pay claim. Specifically he asserted that he is currently unemployed and has no income but Davis did not provide any financial or other form of documentation to corroborate his asserted financial status.

In the absence of any supporting financial or other reliable documentation, the FCC says it has no basis by which to evaluate Davis□s inability to pay claim and are constrained by the limited record before it. As such the FCC has denied the Petition and affirmed the Forfeiture Order.

--

Davis was given the customary 30 days to pay the fine. If he fails to do so the matter could be turned over to the Department of Justice for further action. (FCC)

ENFORCEMENT: WIRELESS CAMERA IN PALM TREE INTERFERES WITH FAA RADAR

The FCC has issued a Notice of Violation to the Redondo Beach Marina in Redondo Beach, California. This, for operating an unlicensed wireless video surveillance camera that was found to be causing interference to an FAA Radar system.

After receiving a complaint from the Federal Aviation Administration concerning interference to their 1240 to 1300 MHz band radar in San Pedro, California the Los Angeles FCC Office dispatched agents to investigate the matter. The agents used direction finding to locate a radio signal on 1282 MHz emanating from a wireless camera mounted on a Palm tree in the parking lot of Redondo Beach Marina. When AC power to the camera was disconnected, the interference ceased.

Based on this finding, a cease and desist notice was issued telling the Marina that use of the wireless camera must stop immediately. And in its September 20th letter to the Redondo Beach Marina it was warned that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws and could subject the operator of this illegal operation to severe penalties. HELPING YOUTH: AMATEUR RADIO SUPPLIES ANNOUNCES YOUTH GIVEAWAY

Amateur Radio Supplies of Haverhill, Massachusetts, has announced a new biannual giveaway. This to promote youth in amateur radio DXing and contesting.

Beginning January 1st of 2013, the company says that it will give a complete high frequency station to the selected applicant. The gear to be presented will include Alinco DX-SR8T/E 160 through 6 meter all mode transceiver with a 30 amp power supply, an L-D-G antenna tuner, a choice of an all band G5RV or HyGain DX-77A Vertical plus just about all the accessories to put it all on the air.

Applicants from any country under the age of 21 are invited to provide brief answers to the following three questions. These are how often are you able to operate on the HF bands? Where do you typically operate from and how do you intend to use the equipment provided in the give-away.

Send your answers along with your name, callsign, and license class using the form at www.amateurradiosupplies.com/youth-s/222.htm. Nominations will also be accepted.

For more information please e-mail Randy Rowe at randy (at) amateurradiosupplies (dot) com. Amateur Radio Supplies is a new company that provides a full line of gear, including antennas, transceivers, coax, antenna wires and countless station accessories.

SWL NEWS: MORE TV WATCHERS OPTING OR FREE OVER THE AIR PROGRMMING

As cable bills rise and the United States economy remains weak, more Americans are watching television using good old fashioned antennas.

According to the research firm GfK Media, nearly 18 percent of all US households with television sets are watching broadcasts delivered for free over the air. This is up from 15 percent of homes last year according to research the firm. Translated into numbers, that means 20.7 million homes, or roughly 54 million consumers, now get channels over the air instead of paying a monthly cable or satellite bill.

According to the study, 6 percent of TV households, or 6.9 million homes, canceled their cable service at some point in the past and now rely on free broadcasts. GfK□s report also found that 16 percent of households downgraded TV service in the business year through March, while only 11 percent of TV households said they had increased service.

The report also found that people using Web-connected TV increased to 34 million households, or 29 percent. That□s almost double the previous year□s 16 percent. More is on-line at tinyurl.com/9z4ffj5

SWL NEWS: CANADIAN AM STATIONS LEAVING THE AIR

More AM stations are leaving the medium wave AM broadcast band in Canada than are coming on the air, This is according to the trade publication Radio World that says since 2009, some sixteen Canadian AM broadcasters have gone off the air as several have moved to the FM band and companies closed the least profitable stations.

But in this case more seems better from a profit standpoint. According to the research firm Statistics Canada, the moves have allowed AM operating revenues to grow by 1.1% in 2011, to 311 million Canadian dollars.

A quick search of the Canadian Radio-Television and Telecommunications Commission site shows 727 commercial licensed radio stations, not broken down by service. That compares to 4,754 commercial licensed AM and 6,568 FM broadcast entities in the United States according to FCC figures for the most recent quarter. (RW)

INTRUDER REPORT: CHINESE OTH RADAR GAIN HRASSING 40 METERS

The IARU Monitoring System newsletter reports that Radio Hargeisa is operating on 7.120 MHz and that Chinese surveillance radar in the amateur radio 40 meter band is now stronger than ever before

According to the report, the pesky Chinese Over the Horizon Radar had left the 40 meter band for few weeks. But now its reported back with a very strong burst system. One that is at least 10 kHz wide and has an almost S9 signal, world-wide. IARU Regions 1 and 3 are reported to be severely affected by it.

More about both of these situations is on-line at tinyurl.com/china-radar-again. (IRUMS)

**

EMERGING TECHNOLOGY: DISSOLVABLE BIO-MED ELECTRONICS

Ultra-thin electronics that dissolve inside the body have been devised by scientists in the US and could be used for a range of medical roles.

According to research published in the journal Science the components are made of silicon and magnesium oxide and placed in a protective layer of

silk. Once their job has been completed these devices can simply melt away with the speed of melting is controlled by silk.

The technology has already been used to heat a wound to keep it free from infection by bacteria. More is on-line at tinyurl.com/melting-electronics. (BBC)

**

WORLDBEAT: UK AUTO MANUFACTURERS NOT SUPPORTING DIGITAL RADIO BROADCASTING

The United Kingdom□s government mandated switchover date for digital radio may need to be extended several years. This following a new survey of car manufacturers that reveals at least half are steering clear of the new entertainment technology.

As part of its Digital Britain vision, the UK Department for Culture, Media and Sport named 2015 as the deadline for turning off its ageing but very popular analogue radio network, in favor of one based on digital standards. The move would mean the majority of today□s in-car tuners as well as home radio sets would cease to function overnight.

But new findings from Auto Express Magazine suggest the switchover could now be delayed until 2017 or later. This after a survey of 24 mainstream car manufacturers by the publication has revealed that 50 percent do not offer any digital radio units for their model range, even as an optional extra. Also, almost 60 per cent of new vehicles registered this in the U.K. this year came with no option for the installation of a digital radio receiver. (Auto Express, Southgate)

**

WORDBEAT: BELEGIUM HAMS ASSIST IN NEW FREE WIFI SYSTM

The Belgian national society the U-B-A reports on the involvement of radio amateurs in getting free WiFi in the city of Geraardsbergen. The UBA says that O6RY and ON3FDS worked with the city officials to bring about the new WiFi service and in the process generated some valuable public relations for the amateur radio in that nation. More about this story is on-line at tinyurl.com/ham-radio-wifi

HAM RADIO IN SPACE: EQUISAT HAM-SAT TO CARRY OPTICAL BEAON

Students at the BrownUniversity are developing an amateur radio satellite called EQUiSat that will carry an interesting optical beacon. The bird will use a Xenon Flash Tube that should be visible to the unaided eye of observers on Earth. A radio beacon is planned to operate in the 435 to 438 MHz range. Launch is hoped for in the 2015 time frame into an orbit of about 300 kilometers. That should give the satellite a life-time of a

couple of months.

(EQUiSat, Southgate)

**

HAM RADIO IN SPACE: BUAA-SAT PLANNED FOTR 2014 LAUNCH

BUAA-SAT is a micro-satellite project developed by the students of BeijingUniversity carries an amateur radio 435 and 145 MHz FM voice transponder. Plans call for it to be launched into a 600 by 800 kilometer Sun Synchronous Orbit in late 2014. Its primary missions are to study the application of components used in the onboard electronic system, to demonstrate the coil-able mast deployment mechanism and to carry out imaging using three CMOS cameras. DX

In DX, word that ON4AFU will be on the air from Ko Butang Island October 26th to November 4th as HS0ZJF stroke 9. He will be active on High Frequency bands on CW only. QSL via ON4AFU

7L4DXT and K1GI will be operational from SintMaartenIsland from November 18th to the 24th as PJ7XK and PJ7I respectively. They will be active on 160 through 10 meters on CW, SSB and some Digital modes. QSL PJ7XK via 7L4DXT and PJ7I via JG2BRI

KI5SF reports that he will be operational portable KH6 from about 0100 UTC October 26th to 10:00 UTC October 27th. Listen out for him on 160 through 6 meters except for 60 meters on SSB and CW. QSL to KI5SF.

A group of operators from Switzerland will be active from Aitutaki Island in the Cook Island chain from November 12th to the 30th using the call signs E51C, E51ABS, E51BZD and E51CHX. Listen out for them on 80 through 10 meters using CW, SSB, and PSK. QSL this operation via HB9BXU

JA7HMZ and JA7EPO will be active from PohnpeiIsland from November 23rd to the 28 as V63DX and V63EPO. They also plan to operate in CQ World Wide DX CW Contest on November 24th and 25th as V6A. QSL V63DX via JA7HMZ, V63EOP via JA7EPO and V6A via JA7HMZ.

JH1EAQ will be active from Palau in CQ World Wide DX SSB Contest On October 27th and 28th as T88EB. QSL via home call only.

Lastly, looking to the future comes word that G3SWH and G3RTE will be active from GuadalcanalIsland in the Solomon Islands from February 18th to the 28th of 2013. The callsign to be used will be H44KW operating on 80 through 10 meters using CW only. QSL via G3SWH direct or via the bureau.

**

THAT FINAL ITEM: BIG ANTENNA WIN DOWN-UNDER ANGERS NEIGHNORS

And finally this week, a New Zealand ham has won a major tower and antenna victory but his neighbors are far from happy with the city council□s decision. This, even before the antenna system is erected. Amateur Radio Newsline□s Jim Meachen, Zed-L-2-B-H-F, reports from down-under:

--

PyesPa, New Zealand residents concerned about the proposed installation of a 20 meter high radio antenna are disappointed that the Tauranga City Council won't fight a legal battle on their behalf.

Residents of Veda Glen have petitioned the city council to appeal an Environment Court decision which allows amateur radio enthusiasts to erect radio masts up to 20 meters or 65 feet high. They say a radio antenna proposed by a neighbor would be an eyesore, create wind noise and devalue their properties.

While Councilors seemed to sympathize with the residents' plight they also said that based on their legal advice, an appeal to the High Court would be pointless. The council had previously tried to restrict private radio masts to a maximum height of 9 meters or about 30 feet. However an appeal to the Environment Court by the Tauranga Emergency Communications Group and the New Zealand Association of Radio Transmitters saw the maximum height raised to the 20 meter maximum.

Council senior policy planner Campbell Larking told councilors approximately $100,000 New Zealand dollars had been spent fighting the case in the Environment Court, and he estimated an appeal to the High Court would cost another $50,000. Also that a High Court ruling would not be binding and the matter would simply be sent back to the same Environment Court judge to re-consider.

A resolution proposed by Councilor Murray Guy, which sought to launch an investigation into Environment Court and City Plan processes in order to enhance community consultation did not find enough support and failed.

The bottom line is that the unnamed ham can put up his 65 foot high mast along with the antenna that will sit on top of it. It□s unknown when that installation will be completed.

For the Amateur Radio Newsline, I□m Jim Meachen, ZL2BHF, in Nelson, New Zealand.

--

Outside the chambers, the residents said a legal challenge was outside their reach and they were disappointed the council had backed away from fighting the case on their behalf. (bayofplentytimes.co.nz)

Jamboree on The Air 2012.

Posted: 13 Oct 2012 09:35 AM PDT
http://forums.qrz.com/showthread.php?364663-Jamboree-on-The-Air-2012&goto=newpost

GB2JAM is the JOTA station of the Wirral & District Amateur Radio Club and run annually on behalf of a number of Scout Groups in Birkenhead and Wirral area.

The Callsign was applied for in 1979 and been used every year since by the Wirral & District ARC. The photo is of our Irby Cricket Club HQ with the Tower to the left of the pavilion and the mast of dipoles to the right. An extensive outfield with no domestic property for some distance assures us of a low noise floor and the opportunity to erect some full size antennas.

Whereas in the past we have been at our ICC Club HQ this year we are at The Scout Headquaters at McAllester Field.

You can read our activity reports on our Club website:- www.wadarc.com by clicking on GB2JAM on the left hand side menu.

QSL Cards always appreciated either direct or by the buro.

http://forums.qrz.com/showthread.php?364602-U-of-A-Amateur-Radio-Club-Special-Event-Station-this-week-end&goto=newpost

This year marks the 50th anniversary of the founding of the University of Alabama Amateur Radio Club (W4UAL), and to celebrate, the UARC will have a special event station on the air this weekend. The UARC Ham Homecoming Celebration will be operating all day Saturday from outside on The University of Alabama Quadrangle from 7:15 AM to dusk and then again Sunday morning from the club station at Paty Hall. Operating frequencies targeted will be 28.400, 21.300, 3.885, and 7.205, with operation on CW as requested. We□re planning on some AM operation down on 3.885 on Saturday morning and late afternoon. There will be a commemorative QSL available, and details are available on page 91 of the October QST. QSL to the club station W4UAL. We are hosting several of the original 1962 charter members down in Tuscaloosa, and we welcome former members and alumni to come join

us in the fun, either in person or on the air. Please pass the word on to all your ham friends and Alabama alumni, and we□d appreciate any spots while we□re on the air. For more details, email Mike Fanning, K4GU at mfanning@hiwaay.net. Hope to CU on the air this weekend!

iHAB-8 Launch Announcement

Posted: 11 Oct 2012 02:20 PM PDT
http://forums.qrz.com/showthread.php?364487-iHAB-8-Launch-Announcement&goto=newpost

The iHAB Team is excited to announce the next launch of the iHAB
Project! iHAB-8 is scheduled to launch October 14, 2012
at 16:00Z (11AM CDT). The iHAB Team as well as other
High Altitude Balloon fans have had a challenging year trying to
launch balloons due to the global helium shortage. You can read
more about the shortage here HERE. We were fortunate to obtain
enough helium to complete one launch in 2012, and iHAB-8 is that
launch!

The iHAB Team is excited to fly another "FUN" payload. Including
a new "micro" 20 Meter QRP CW beacon designed and built by Dave Cripe
- NM0S, Hi-Def Video, and time-lapse photography. The CW beacon
controller is a new version (not yet available for purchase) of the
EZKeyer from 4SQRP. The EZKeyer v2 has expanded memories, AND beacon
mode! Please spot signal reports on QRP Spots -
http://www.qrpspots.com/

The other exciting mission to this launch, and the reason we are
calling is "X" Marks the Spot is because we are going about this
launch a bit backwards to what we have done thus far. For an added
twist of difficulty, we have preselected our desired LANDING
location, and will be calculating out LAUNCH location based on
continued calculated predictions right up until we launch. We have
chosen the Ottumwa Industrial Airport - KOTM as our "X". This will
challenge our Propulsion Team to hit their mark!

Visit http://www.ihabproject.com/iHAB-8/ for updated Flight
News, and Launch Information.

=== The launch of iHAB-8 will be webcast LIVE starting
at/around 10:30AM CDT, so please plan to visit Mission Control.

HamRadioNow: Balloon Man & Rocket Man

Posted: 12 Oct 2012 05:20 PM PDT
http://forums.qrz.com/showthread.php?364605-HamRadioNow-Balloon-Man-amp-Rocket-Man&goto=newpost

HAMRADIONOW.tv

Episode 27: Balloon Man & Rocket Man

Bill Brown WB8ELK sends balloons carrying ham radio to the edge of space.

David Stephenson KJ8OKJ sent rockets deep into space (not by himself...

with a little outfit called NASA). They each have a story you'll likely
find interesting,

and they're both here in Episode 27.

Watch these episodes at our web site, www.HamRadioNow.tv.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-October, through Sunday, 14th-October there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5U, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9X, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

1S/S1, PRINCIPALITY OF SEALAND (Once Claimed To Be A DXCC Entity). Do you remember this one? A former UK anti-aircraft tower/fort (called Roughs

Tower) located in the North Sea was occupied by a retired army major Roy Bates and his family in 1967. Major Bates declared the fort an independent sovereign state from the UK and renamed it Sealand on September 2, 1967. Bates established Sealand as a nation in 1975. Sealand had its own constitution, flag, National Anthem, stamps, passports and currency. There were even a few DXpeditions to Sealand - 1SLA1 (2000 by a Dutch group) and S1A (1982 by a German group). However, it has been reported that Major Bates passed away on October 9th, at the age of 91 in a care home in Leigh-on-Sea, Essex, after a long battle with Alzheimer's. His wife Joan is now expected to take over the rule of Sealand. Here are some interesting URLs to read about the history and view pictures of the Principality of Sealand:

http://www.dailymail.co.uk/news/article-2216596/Retired-army-major-occupied-fortress-North-Sea-declared-sovereign-principality-Sealand-dies-aged-91.html

3B9, RODRIGUES ISLAND. Just a reminder that a team of operators from Switerland known as the "Radio 7 Team" will be active as 3B9SP from Rodrigues Island (AF-017) between October 16-23rd. Their goal is to set up three amateur radio stations that can be run together on different Amateur Radio bands. Mostly one on CW, one on SSB and the third running special modes like RTTY and PSK31. They hope to use small 400 watt solid state amplifiers for the CW and SSB stations. Activity will be on 160-6 meters using two 3 element Spiderbeams (20/17/15/12/10m), verticals for 40/30/20m, a Butternut HF2V for 160/80/40m and a Slim Jim for 6 meters. QSL via HB9ACA direct or use the OQRS on ClubLog. The logs will be uploaded to LotW within 6 months after the DX Operation. For more details and updates, see: http://hb9fr.ch/3b9sp

5H, TANZANIA (Update). Noel, WB0VGI, informs OPDX this week that he is now operational in Iringa, Tanzania. He states, "I haven't established a schedule yet but will try to get on in the afternoons (1500-2000z) on 15 and 20 meters." He states that he will update us with more when he figures out what bands are best from there. He will be there until December 17th. Operations will be on CW, SSB and PSK. QSL via his home callsign.

5X, UGANDA (Postponed!). Nick, G3RWF, who was expected to be active this week as 5X1NH from Uganda for two months, has announced that his trip is now postponed. No reason given.

8P, BARBADOS. Dave, WJ2O, will be active as 8P9DF from Surfsong resort in St. Philip between November 21-28th. Activity will be on all HF bands using mainly CW and an entry in the CQWW DX CW Contest (November 24-25th). Outside of the contest, he will be on 30/17/12 meters. QSL via WJ2O. For more details and updates, see: http://www.wj2o.com

8Q, MALDIVES. Claudio, HB9OAU, will once again be active from the Maldives as 8Q7AU, but from Maayafushi Island (AS-013), North Male Atoll, between November 26th and December 11th. Activity will be holiday style on 80-10 meters SSB only using a 7-band vertical. QSL via his home callsign, direct or by the Bureau. Look for updates and photos from his last trip at: http://www.hb9oau.ch

9H, MALTA. Operators Brad/K7ZSD (9H3ZD), Carl/WS7L (9H3WM) and Tim/NL8F (9H3TJ) will be active as 9H9X during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. The operators will use their individual callsigns before and after the contest. They will arrive in Malta on October 18th, and make a short trip to Sicily via Brads Yacht, but will be back for the contest. Operators will be staying at the Euroclub Hotel in Qawra, Malta. They will have an A3 beam, S9 43 ft. vertical and some other wire antennas. Radios will be an Icom 756 Pro II and a Elecraft K3 with two 400 watt amps. They will be on the the third floor of the hotel with access to the roof 24/7 where the antennas will be. Tim, NL8F, will leave shortly after the contest and head back home because of business, but the other guys will have a bit more time to be on the air. QSL 9H9X via LoTW. QSL the other callsigns via the operator's instructions.

9J & Z2, ZAMBIA AND ZIMBABWE. Gerard (Gert), ZS6AYU, will be active as 9J2GF from near Livingstone, Zambia, between October 19-22nd, and also as Z21GF from Victoria Falls between October 22-25th. Activity will be holiday style on 40-10 meters using CW only. He informs OPDX that he will use a FT857D into a Cushcraft R7000 vertical running 100 watts (in 9J) and 400 watts (in Z2). QSL via ZS6AYU, direct or by the Bureau.

C6, BAHAMAS. Brian, N3IQ (ND3F), will once again be active as C6AQQ from Nassau (FL16 - Junkanoo Beach), Providence Island (NA-001) between October 25-31st. Activity will be mostly on the lower bands, but he will also be in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/Low-Power or QRP entry. He states, "Different location than usual with more modest antennas." QSL via N3IQ, direct preferred or LoTW, by the Bureau (long wait) and eQSL.

C6, BAHAMAS. Operators Bob/N4BP (C6AKQ), Tim/N4UM (C6ARU) and Mike/K4RUM (C6AUM) will be active from Freeport, Lucaya, Bahamas (NA-080, WLOTA 0527), between November 20th and December 11th. Activity will include the CQWW DX CW Contest (November 24-25th), the ARRL 160m Contest (November 30th-December 2nd) and the ARRL 10m Contest (December 8-9th). Outside of the contests, Tim/C6ARU (N4UM) will be doing all the digital, mainly PSK31 and Olivia, but will probably also do some RTTY and other digital modes. Mike/C6AUM (K4RUM) and Bob/C6AKQ (N4BP) will probably do all CW. Bob informs OPDX that "We don't have any band plan, but will cover them all from 160-6 meters including the WARC bands." QSL via the operator's home callsign.

CARIBBEAN TOUR. David, K3LP, will activate the following Caribbean Islands during the later half of December. Specifics of his activities are not known at this time, but it will be holiday style. His tentative schedule is as follows:
December 18-22nd - Callsign K3LP/KP4; San Juan, Puerto Rico

December 23rd - Callsign K3LP/KP2; St. Croix, U.S. Virgin Islands
December 24th - Callsign K3LP/V4; Basseterre, St. Kitts
December 25th - Callsign K3LP/J73; Roseau, Dominica
December 26th - Callsign K3LP/J3; St. George's, Grenada
December 28th - Callsign K3LP/KP2; Charlotte Amalie, St. Thomas,
U.S. Virgin Islands
December 29-31st - Callsign K3LP/KP4; San Juan, Puerto Rico

Look for possible updates and more details at: http://www.k3lp.com

CY0, SABLE ISLAND (Update/Press Release). The following was sent out on
October 8th [edited]: "Final preparations for the upcoming Sable Island
DXpedition are being completed. Canadian authorities have approved the
revised dates of October 22-31st. In order to minimize potential impact
to the migratory bird population on Sable Island, we have settled on
vertical dipole antennas made by 'GAP Antennas'. GAP has already shipped
five, pre-drilled, ready-to-go, mono-band vertical antennas for 10, 12,
15, 17, and 20 meters. These antennas should arrive in Halifax this week.
In addition, we are shipping back-up radio transceivers to Halifax on
Monday, October 8th. Extra freeze-dried meals are being shipped, as well,
in the event that our departure from Sable is delayed by weather conditions.
Now that Sable Island has become a national park, it is unclear what
limitations, if any, will be placed on future requests for group operations.
Even though, we are just a two-person team, we will do our best to provide
a new country or new band-country to those in need of CY0. As previously
advertised, our focus will be on 10m, 12m, and 15m, where the greatest
demand for Sable Island exists. For the latest updates, visit:
http://www.CY0dxpedition.com
73 de Murray/WA4DAN and Ron/AA4VK"

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting
their videos on YouTube and other Web services, we decided to list them
(possibly) each week. For this week's listings:
2012 - 3D2C Conway Reef (Video by AH6HY - mostly bird life on the island):

2006 - TF4RRC Flatey Island (EU-168), Iceland [Russian]:
http://www.youtube.com/watch?v=LL6B5hPAs

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.

EA8, CANARY ISLANDS. Sindre, LA6OP, will be active as EA8/LA6OP from Tenerife (AF-004, S-012 for the Spanish Islands Award, WLOTA LH-1276) between October 25th and November 8th. Activity will be holiday style on the bands between 20-10 meters using CW and SSB. QSL vis his home callsign.

EA9, CEUTA & MELILLA. Mek, SP7VC, will be active as EA9/SP7VC from Ceuta between October 22-28th. Activity will be holiday style (he will also be fishing) on 160-10 meters using SSB and also an entry in the CQWW DX SSB Contest (October 27-28th). Equipment consists of: IC-746, HEX beam by SP7IDX techology, R-7000 vertical, Inverted L for 160/80m and a K9AY beverage antenna for receiving. QSL via his home callsign direct or LoTW. For updates, visit his home page at: http://www.sp7vc.pl

EF8, CANARY ISLANDS. Mauri, EA8CMX/OHBYS, will be active as EF8S during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (160m)/Low-Power entry. He states that he will trying a 3-element wire-Yagis and Beverages. QSL via OH2BYS.

EI, IRELAND. Olivier, ON4EI, will once again be active as EI8GQB and EI1A between October 21-30th. He plans to operate from his caravan using green energy. Olivier will activate EI1A callsign during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/2-Radio (SO2R) entry. You can follow his activity and antenna experimentation on <http://www.qrz.com/db/EI8GQB> where you will find a live information banner with on air frequencies and information. QSL ONLY via ON4EI by the Bureau.

EY, TAJIKISTAN. Nodir, EY8MM, from Dushanbe, announced once again that he will be active during the CQWW DX SSB Contest (October 27-28th) and the CQWW DX CW Contest (November 24-25th) as a Single-Op/Single-Band (10m) entry. QSL K1BV via direct, by the Bureau or LoTW. Check out his home page at: http://www.ey8mm.com

FY, FRENCH GUIANA. Didier, FY5FY, will be active as FY5KE during the CQWWide DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (15m)/Low-Power entry. QSL via FY1FL, by the Bureau or direct.

IT'S TIME FOR AZORES NINE ISLANDS HUNT LOTTERY DRAW. Excerpts from an October 12th press release state [edited]: "A lottery draw for two free travel packages to the Azores will take place at DARC Headquarters in Kassel, Germany, at 1100 UTC on October 15, 2012, and the winners will be announced immediately hereafter at: http://www.visitazores.com\a9ihunt ... No one at 1200 UTC on September 29th expected that more than 9000 hams from all continents would dedicate all their efforts to make the project a success..... A total of 1542 amateurs contacted five or more

of the nine islands, resulting in 11,404 lottery tickets for first round. Additionally, the twenty-five (25) amateurs who contacted all nine islands fastest will participate in a second lottery. These twenty-five represent 12 different countries and include three stations from USA..... Totally 551 stations contacted all islands and they will be honored with a personalized special Award of Merit. Full-color QSL cards featuring each island will be released through the QSL bureau network while direct requests can be mailed to Jose Melo, CU2CE."

IOTA NEWS.....
AS-012. Operators Take/JA6CNH and Yasuro/JF6XQJ will be active from Genkai Island (Shima) between October 19-21st. Any changes to their plans will be made on October 18th.

OC-151. Leo, YC9MLL, who has been live on Flores Island for 8 years, informs OPDX that he operates on SSB mostly, but will operate on CW if requested. He is usually on Saturdays and Sundays, but states that he is on vacation now and hams can arrange for IOTA QSO anytime via E-mail (see QRZ.com). Leo can operate on 40/20/15/10 meters using CW, SSB, PSK31, RTTY and SSTV. He has a homebrew radio with 50-100w into a dipole and delta loop antenna. QSL via his home callsign.

JD1, OGASAWARA. Makoto, JI5RPT, will once again be active as JD1BLY from Chichijima Island (AS-031), Ogasawara, between December 10-13th. Activity will be on 40-10 meters, including the satellites, using CW, SSB and the Digital modes. QSL via his home callsign JI5RPT. His log search will be available on his Web site at: http://www.ji5rpt.com/jd1
He will also use Twitter to inform his real-time activities at: http://twitter.com/jd1bly

KG6, GUAM (OC-026). Joel, KG6DX, will be active as KG6DX in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m)/High-Power entry. QSL via KG6DX, CBA or QRZ.com address. Also LoTW.

KH8, AMERICAN SAMOA (Update/Operator Needed). Operators Bill/N6MW and Jim/N6TQ will be active as KH8/N6MW from a hotel in Tutuila between March 19-28th. Their focus will be on "Maximum number of different stations contacted; CW, some SSB and RTTY if/when things slow down; EU when possible on higher bands; and Significant 160m effort." Their location on the island will be well south of the Pago Pago harbor area to avoid as much mountain low angle cut off as possible. The DXpedition's Web page states, "One more operator position open." For more details and updates, visit: http://n6mw.jimdo.com

NEW OFFICERS FOR 2013. Members of the Eastern Iowa DX Association (EIDXA) elected the founding officers for 2013:
Craig Fastenow, K0CF - President
Jerry Rappel, WW0E - Vice President
Rich Haendel, W3ACO - Secretary/Treasurer

NH8, SWAINS ISLAND (Press Release). The following was posted on the NH8S Web page <www.nh8s.org> on October 9th [edited]: "Craig and I would like to thank everyone who worked us from Swains. We made 105,500 qso's which made a lot of hams happy. This is not a record, but something we and the team are very proud of. We had a great time but are glad to be back home with our families.
This was truly a remarkable trip in many ways. We are very proud of our team as they performed remarkably well under unbearable heat. As you may know by now, it was 125° F on the beach in the sun. To put up antennas in the loose sand and heat was quite a challenge. During the duration of the trip, the crew walked many miles to get to the operating stations four times a day. Then they worked the endless pileups, which can be stressful. Never did they complain about the job before them, making qso's in those hot tents. Every crew member experienced some type of heat reaction at one time or another. Some members endured other injuries as well, and two were hospitalized, so we had our challenges. Everyone is home and fine now..
To Swains owners, the Jennings family, you and your group were an enormous help to us. The Island support team of thirteen native men and women worked tirelessly to see that our needs were met. We couldn't ask for better hosts. Including the off-island support crew; it took a total of 43 people to make this all happen.
QSL cards are ready to be printed and should be distributed in a few months. If you need a card right away, please go to our OQRS link for your QSL card.
We want to thank all of our equipment sponsors; your equipment worked flawlessly. And to the foundations, clubs and individuals who helped fund this trip, we are most appreciative of your generosity. These trips to remote places are so expensive that it would not be possible without your support.
It was a great honor for Craig and me to lead such an extraordinary team of highly experienced operators. This was not the easiest trip any of us have been on, and you guys are the greatest.
Craig/K9CT and Joe/W8GEX Co-Leaders"

NP3, PUERTO RICO. Jaime, WP3A, will be active as NP3X from the Coamo Contest club station during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m) entry.

ON, BELGIUM. Berkin, TA3J, will be active as ON/TA3J from various locations between December 7-11th. Activity will be on 160-2 meters using SSB and FM. QSL via his home callsign.

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

T30, WESTERN KIRIBATI. Just a reminder that a Brazilian team will be active as T30PY (HF) and T30SIX (6m, EME on WSJT-JT65A) from Tarawa Island (OC-017) this week between October 16-25th. Activity will be on 160-6 meters using CW, SSB, RTTY EME. Suggested frequencies are listed in OPDX.1059. They will have three stations on the air. QSL via PY2PT, direct, by the Bureau ("Estimation to reply: at last, 3 years."), or by their OQRS on the Web page. For more details, see: http://www.mdxc.org/t30py

TO2, FRENCH GUIANA. Rich, N6KT (ex-HC8N), will be active as TO2A from French Guiana between October 20-30th. Activity (hopefully) will be on all bands. He will also be in the CQWW DX SSB Contest (October 27-28th). QSL via KU9C.

TT8, CHAD. You only have a few more days to work the "Italian DXpedition Team" as TT8TT from N'Djamena until October 16th. According to their Web page, as of 0818z, October 14th, TT8TT has made 63322 QSOs with 18710 unique callsigns (32866/CW, 27555/SSB and 2901/RTTY). QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A log search and an OQRS are all available on their Web page at: http://www.i2ysb.com
Official forum is at: http://bit.ly/NVQaav

TX5, CLIPPERTON ISLAND (Update). The 2013 Cordell Expedition to Clipperton Island will use the callsign TX5K. The DXpedition team will leave San Diego on the vessel "Shogun" on February 19th, and land on Clipperton February 27th. They will be on the air between February 28th and March 10th. The current list of operators are Bob/KK6EK (Organizer, Expedition Leader), Christian/DL1MGB (Co-organizer), Carlos/NP4IW (Logistics), Gerhard/DJ5IW, Robert/SP5XVY, Dietmar/DL3DXX, Andreas/DL5CW, Yann/F1NGP, Mathias/DJ2HD, Heye/DJ9RR, Terry/AB5K, Ed/KE3D, Rick/KF4ZZ, Mike/WA6O, Luis/XE1L, Igor/US0VA, Tom/DL5LYM, Tom/VE3CX, Ken/OZ1IKY, Jef/DD2CW, Dave/WJ2O, Giovanni/I5JHW and one other space open. Louis-Philippe Loncke will be there for documentation. There are four honorary team members: Chod Harris/VP2ML (SK - DXpedition Dedication), Yasuo "Zorro" Miyazawa/ JH1AJT (Honorary DXpedition Leader), Conrad Limbaugh (Expedition Dedication) and Dan Gotshall (Honorary Expedition Leader). The "Technology Development" team members are: Bob/N2OO is the QSL Manager, Peter/W6OP and Dean/N7XG are Software Development, Rich/KY6R (Social Media), Alan/AD6E (Satellite Communications), Dean/N6BV (Radio Propagation Modeling) and Felipe (Internet Data). Regional Coordinators are: Marcus/DL9RCF (Germany), Stan/KH6CG (Hawaii), Col/MM0NDX (Scotland), Cesar/PY2YP (Brazil), Andre/V51B (Namibia), Tommy/VK2IR (Australia) and XE2HWJ (Mexico). There will be four members on the Scientific Program team. For more details, visit the Clipperton Island Web page at: http://www.cordell.org/CI/index.html

UK, UZBEKISTAN. Takhir, UA1ZEY, will be active as UK/UA1ZEY from Samarkand between October 14th and November 1st. Activity will be active on HF bands. QSL via his home callsign direct.

V8, BRUNEI DARUSSALAM (V84SMD Press Release #5). The following was sent out on October 8th [edited]: "DX friends of all over the World , we are now very near the kick off of our new adventure, this time in V8 land. All is going perfectly, and we are happy to report that the DXpedition packaging is ready and all equipments tested. Our international team of 23 operators of 9 Countries, lead by Antonio/IZ8CCW and Gabriele/I2VGW under the flag of Mediterraneo DX Club, is excited about this operation that will be on the air from two different shacks. The first one just on the beach of Pantai Seri Kenangan in Tutong and the second one from a close hotel. The team will be running seven stations from 6 to 160 including 6 meters. We'll be on CW, SSB and RTTY around the clock from November 11-23rd, and our aim is to take care of increasing number of QSOs also outside EU, and also to use as many modes possible where the country is most wanted. As we know so far, CW and RTTY modes are more needed all around the world from Brunei Darussalam. We remind you that V8 is also an IOTA reference (OC-88). For further info and to discover how to support us, please see our Web site at <http://www.mdxc.org/v84smd>. Any donations will be very very useful. So thanks in advance! Here is also our set-up:
RTX - 4X ICOM IC-7000, 1X ELECRAFT K2, 1 x YAESU FT-950 and 1x ICOM 7200
ANTENNAS FARM - 1X Vertical antenna for 80m, 2X 5 Bands Spiderbeam, 1X UJX-Vertical for 40-10m, 4 Square for 40m, 2X Vertical
in phase for 30m, 1X 2 element mono 20m, 1x 3 element
mono 15m, 1X Inverted L for 160m, 1x 6 elemnet mono band
50Mhz model 50LFA6XL by Eantenna and 1x WARC Bands Rigid
Dipole by EAntenna WARC121730
AMPLIFIRES - 2X Acom 1011, 1X Tokyo 600w, 1x Ameritron 500w and 1x New PA by Italian new factory brand"

The DXpedition official Web site at: http://www.mdxc.org/v84smd

VC2, CANADA (Zone 2). Igor, VE3ZF, will be active as VC2X from Zone 2 during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/ High-Power entry. Igor will be operating from the small French-speaking fishing village of Riviere-Au-Tonnerre, Northern Quebec. Before the contest, he will use the VE3ZF/2 callsign. Igor informs OPDX, "I will use a YAESU FTDX5000D, Kenwood TL922a, phasing verticals on low bands and Spider beam on 14-21-28." QSL all callsigns via VE3ZF.

VP5/VQ5, TURKS AND CAICOS ISLANDS. Operators Bill/KX4WW, Noll/W9RN and Doug/W4OX and Jim/K9PPY will be active as VQ5X during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via W4OX or LoTW. The team will be on the island between October 20-30th. Outside of the contest, they will use VP5/homecall and be active on all bands 160-10 meters using CW, SSB and RTTY. There is a possibility they may be on 6 meters as well, but this will depend on how long it takes to finish doing some tower maintenance which will determine if they will have enough time to put together the 6m antenna and haul it up one of the towers.

VQ92, CHAGOS ISLANDS. Jim, VQ9JC/ND9M, on Diego Garcia until mid-November, informs OPDX that he will be using another special prefix callsign, VQ92JC

(nine two), between October 20th and November 4th. He states, "I'll be QRV in the 1200-1600z time frame as much as possible during that calendar window. This is the sixth consecutive year that I've been issued a unique prefix. The only drawback is that I'm still operating Field Day style from a recreational park. My station currently is a FT-857 at 100 watts to a dipole at a height of 10 meters. I'll be on during the upcoming CQ WW SSB contest. I've made a lot of calls and CQs on SSB, both in and outside of contests, over the last several months, but very few ops have answered me. No doubt it's largely because prop condx aren't very good and because of my station limitations, so I don't know how good my SSB effort in the WW will be. I'm scheduled to return to the States just after that." QSL via ND9M.

YS, EL SALVADOR. Operators Mario/YS1GMV, Mario/YS1MAE and members of the Club de Radio Aficionados de El Salvador (CRAS) will be active as YS1YS during the CQWW DX SSB Contest (October 27-28th) as a Multi-Single entry. QSL via YS1GMV.

Z8, SOUTH SUDAN. Diya, Z81D, has been very active the past week on 40/20/15/12/10 meters SSB at various time. Sometimes via a list operation. Suggest to watch or search QSNs on the DXCluster. QSL via OM3JW.

ZD8, ASCENSION ISLAND. Marko, N5ZO, will once again be active as ZD8O from Ascension Island (AF-003) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band entry. QSL via OH0XX. Marko will be active between October 18-30th "as time allows from setting up field day operation."

ZF2, CAYMAN ISLANDS. Pete, K8PGJ, will be active as ZF2PG on Grand Cayman (NA-016) during the week of January 12-20th. Activity (when not diving) will occur on 20 to 15 meters SSB during the morning and early afternoon on weekdays. He will be operating in the NAQP Contest on 20 and 40 meters. QSL via his home callsign or LoTW.

ZL7, CHATHAM ISLANDS. Jim, ZL1LC, is currently planning to be active as ZL7LC from Chatham Islands (OC-038) between March 21-27th. Activity will be mainly PSK only. More details will be forthcoming.

ZV7, BRAZIL (Special Event). Look for several Brazilian operators to activate special event station ZV7O between November 17-18th. Activity will take place during the "FLIPORTO 2012" (Festa Liter&#65533;ria Internacional de Pernambuco) <http://www.fliporto.net/fliporto2012/en/fliporto-2012>. The special ZV7O station will be on the air from the FLIPORTO event doing a public demonstration of amateur radio using different bands and modes. A special award (see QRZ.com) will be issued upon request to the Award Manager for contacts with ZV7O on two different bands or two different modes, at no cost. A colored QSL card will be printed to confirm all contacts made by ZV7O. QSL via PY7JN.

CQ WW DX SSB Contest

One of the bigger SSB contests of the year - the SSB leg of the CQ WW DX Contest - takes place over the weekend of 27th / 28th October. Olivier ON4EI/EI8GQB tells us that he will be participating in this contest from Tipperary using the call sign EI1A. During the contest he will be trying out a new 160 metre inverted-L antenna and hopes to operate for the duration of the contest using only renewable energy. More details of his plans are on the EI8GQB QRZ.COM page.

South Eastern Amateur Radio Group

The 2012 IVETA National Vintage Show takes place on Sunday the 14th October in The Cavan Equestrian Centre in Cavan town. The South Eastern Amateur Radio Group has been invited to attend the event where we shall have a display of vintage amateur radio gear and old type radio's on display. We will also be running a live station from the event with the call EI2WRC/P. Because the day is of a vintage theme we will probably be using CW.

If any stations are active on Sunday and hear the EI2WRC/P please do give us a call and if there is any amateurs in the area and would like to call in and work the station you are very welcome to do so. More information can be got from Mark EI7IS on 087-6302026.

Talk on DXpedition to St. Kilda

At the South Dublin Radio Club QTH, on Tuesday last, Declan EI6FR gave a talk on his participation in the recent DXpedition to the island of St. Kilda, which is EU-059 for IOTA hunters. Declan was one of a group of 6 radio amateurs who spent 5 days on this remote island in the Outer Hebrides during May 2012. The island is now a World Heritage Site and is maintained by the National Trust for Scotland. In order to preserve the island's natural heritage, the radio operation was carefully corralled into one small area, with restrictions on power used and antenna types. Declan's presentation covered the logistical and technical aspects of the island activation as well as the fascinating history of the island, which supported a resident population up to the

1930s.

Sweden Loses 2.3GHz

Swedish radio amateurs have lost the 2300 MHz band although they have gained some spectrum at 1.8 MHz.

The Swedish Amateur Radio Society (SSA) has announced the loss of the 2300 MHz band with effect from October 1. 2400-2450 MHz is still allocated for amateur radio operation but the power there is limited to just 100 milliwatts at the antenna.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held October 17th, October 31st and on November 5th, the start of the classes. All are welcome to enrol. More information from www.ei7dar.com or secretary at ei7dar dot com.

DX News

A multi-national team will operate from 6 different islands in Papua New Guinea between 19 October and 14 November. Look for callsign P29VCX from IOTA OC-103, OC-135, OC-025 and OC-240. They will use P29NI from OC-099 and P29VPB from OC-069.

The Sable Island DXpedition has been rescheduled for 22 - 31 October. Callsigns will be WA4DAN/CY0 and AA4VK/CY0. The operators will focus on 15, 12 and 10m.

Nick G3RWF will be back in Uganda for 2 months starting 15 October. He will reactivate his 5X1NH call and operate CW only. QSLs go via his home call.

Prefix hunters will be interested to hear of the callsign 5D7AT which is QRV from Agadir, Morocco until 21 October. It can be found on all bands 80 - 10m in SSB. QSL Manager is ON4LO.

A group of Spanish operators will be active from Macao from 18 - 29 October. Calls to listen for are XX9TFR, XX9TPX, XX9TBM and XX9TEX. They will focus on North America and Europe. QSL Manager is EA7FTR.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Event Planned for Radio Amateurs:

Posted: 13 Oct 2012 09:51 PM PDT
http://www.eham.net/articles/29145

MAYSVILLE -- Amateur radio operators talk with each other over the airwaves often but don't always see each other in person. An event planned for this weekend will bring radio amateurs, also known as hams, together for fun and fellowship and a chance to connect in person. Maysville Hamfest 2012 will be held Sunday beginning at 8 a.m. at Rotary Park Community Center two blocks north of the intersection of highways N.C. 58 and U.S. 17. The event is free and open to all hams or anyone interested in amateur radio.

2016. [RAC-Bulletin] [EMCOMM] - WOCN31 CWHX 150141 TROPICAL STORM RAFAEL

Newsgroup: rec.radio.amateur.misc
Date: 2012-10-15 01:57:49 UTC
From: rac-bulletins@eton.ca
Message-ID: <507B6D77.4000700@rac.ca>

WOCN31 CWHX 150141
TROPICAL CYCLONE INFORMATION STATEMENT ISSUED BY THE CANADIAN
HURRICANE CENTRE OF ENVIRONMENT CANADA AT 10:41 PM ADT SUNDAY
14 OCTOBER 2012.

TROPICAL CYCLONE INFORMATION STATEMENT FOR:
=NEW= NEWFOUNDLAND.

FOR TROPICAL STORM RAFAEL.

THE NEXT STATEMENT WILL BE ISSUED BY 3:00 AM ADT.

TROPICAL STORM RAFAEL EXPECTED TO TRACK TOWARD EASTERN ATLANTIC
CANADA.

==DISCUSSION==
WE ARE MONITORING THE DEVELOPMENT OF TROPICAL STORM RAFAEL NORTH OF
PUERTO RICO. THE STORM IS FORECAST TO TRACK TOWARD THE
NORTH-NORTHWEST THEN TURN NORTH-NORTHEASTWARD ON TUESDAY PASSING NEAR
BERMUDA. BEYOND TUESDAY THE TRACK AND INTENSITY WILL BE DETERMINED
BY THE SPEED AND STRUCTURE OF AN EASTWARD-MOVING TROUGH OF LOW
PRESSURE. COMPUTER MODEL SCENARIOS AT THIS POINT EXPRESS A RANGE OF
TRACKS FROM JUST EAST OF CAPE BRETON TO WELL OFFSHORE SOUTHEAST OF
NEWFOUNDLAND. THE MIDDLE OF THE RANGE IS FOR A TRACK CLOSE TO THE
AVALON PENINSULA. A TRACK ON THE WESTERN SIDE OF THAT RANGE WOULD
REPRESENT AN EARLIER ARRIVAL (EARLY WEDNESDAY) WHILE A FARTHER-EAST
TRACKING WITH THE STORM WELL OFFSHORE WOULD PRIMARILY AFFECT THE
MARINE DISTRICT OVERNIGHT WEDNESDAY INTO THURSDAY.

REGARDLESS OF TRACK, RAFAEL WILL MOST LIKELY BE UNDERGOING TRANSITION
TO A POST-TROPICAL STORM WITH HIGH WINDS AND HEAVY RAINFALL AS IT
MERGES WITH THE TROUGH AND ASSOCIATED FRONT. HOWEVER, IT IS TOO
EARLY TO PREDICT THE SPECIFIC AREAS THAT MAY BE AFFECTED.
ADDITIONALLY, PERIODS OF RAIN AND SOME WIND WILL BE OCCURRING ACROSS
ATLANTIC CANADA ON MONDAY AND TUESDAY FROM A NON-TROPICAL LOW
PRESSURE ASSOCIATED WITH THE TROUGH THAT WILL BE AFFECTING THE
EVOLUTION OF RAFAEL.

THE CANADIAN HURRICANE CENTRE WILL LIKELY BEGIN OFFICIAL 6-HOURLY
BULLETINS MONDAY MORNING WITH MORE DETAILS.

VISIT WEATHEROFFICE.GC.CA/HURRICANE (ALL IN LOWER CASE) FOR THE
LATEST HURRICANE TRACK INFORMATION MAP.

END/..

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

GB2RS NEWS

Sunday 14 October 2012

The news headlines:

Nominations sought for prestigious award

Amateur files patent for software defined radio

RSGB-Ofcom meeting minutes now available online

Nominations are being invited by the German national radio society, DARC, for the prestigious Horkheimer Prize. The prize consists of an etched glass trophy and a monetary prize for non-personal use. The money is to be spent for the promotion of amateur radio however the recipient chooses. The prize can be awarded to one or more persons or institutions. Any member of an amateur radio society in the IARU is eligible, and self proposals are permitted. Proposals must be submitted to DARC by 28 March 2013, and the prize itself will be awarded at the opening of next year's Friedrichshafen rally.

Tao Wang, KB3KSR, has filed a patent in the USA that covers a general purpose software defined radio platform. The patent describes a pocket-size computing device that combines a graphical user interface, touch screen LCD display and a high performance software defined radio package. The US patent, number 8,279,587, can be searched for and read online.

Representatives of the RSGB met with Ofcom on Wednesday 10 October and minutes of the meeting have been posted on the RSGB website. Although the meeting was described as routine, it covered a range of subjects including a special callsign prefix for the RSGB Centenary year and how RAYNET could be better integrated into local emergency planning. A link to the RSGB-Ofcom Forum meeting minutes can be found in the News section of the RSGB website at www.rsgb.org/news/rsgbofcomforum.

Next weekend sees the 55th Jamboree on the Air, the annual event in which Scouts and Guides all over the world speak to each other by means of amateur radio contacts. Scouting experiences are exchanged and ideas are shared, via the radio waves. Many special event stations are being run in association with JOTA and some will be mentioned later in this broadcast.

The QSL sub-manager for the G4T series of callsigns has moved. Steve Redway, G4TRA is now at Hill House, Grange Lane, Rodbourne, Malmesbury

SN16 0ES.

And now for the details of rallies and events for the coming week

Today, the Hornsea Amateur Radio Club rally takes place at Floral Hall, 7 The Esplanade, Hornsea, East Yorks HU18 1NQ. Opening at 10am, there are trade stands, a Bring and Buy, RSGB book stall and many other attractions. Details are online at www.hornseaarc.co.uk.

Next Saturday, the G QRP Club mini convention is at Rishorth School, Rishworth Sowerby Bridge, West Yorkshire HX6 4QA. Details are online at www.gqrp.com/rishworth.htm.

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast. Also next Saturday, the Carrickfergus Amateur Radio Group radio rally takes place at Downshire Community School, Carrickfergus, BT38 7DA. Opening at 12:30, entry is £3 and there will be trade stands, a Bring and Buy, RSGB book stall, Morse tests and many other attractions. Details from Tim, MI0TBL, by email to carg@hotmail.co.uk.

Next Sunday sees the Galashiels and District ARS radio rally at The Volunteer Hall, St Johns Street, Galashiels, Scottish Borders TD1 3JX. Entry is £2.50 and the opening time is 11.30, or 11.15 for those with special needs. Details from Jim, GM7LUN on 01896 850 245.

Also next Sunday, the Ripon and District Amateur Radio Society rally and surplus equipment sale takes place from 10.30 at The Hugh Ripley Hall, Ripon, North Yorkshire HG4 2TP. Admission is £2. Details are available online at www.ripon.org.uk/content/radars-rally-2012.

Now for the news of special events

The town of Knokke was liberated by the Canadian Army in 1944. To commemorate the Canadian Liberation March, ON44CLM will be QRV from 16 October until 15 November. More information is online at www.on44clm.be

Bishop Auckland Radio Amateurs Club will be taking part in the JOTA weekend on 20-21 October from their clubhouse at Stanley Village Hall, Crook, with the call sign GB1FDS.

Burnley & District Amateur Radio Club will be operating GB2SBC for JOTA on HF, VHF and UHF from Bowley International Scout Camp and Activity Centre, Great Harwood.

The Norman Lockyer Observatory Radio Group will be operating GB2NLO on 20-21 October from Sidmouth, Devon, both on its own account and as part of JOTA in association with Tipton St John Scout Group.

There will be many other JOTA special event stations on the air next weekend. A longer list can be found on page 89 of the October edition of RadCom.

And now the DX news compiled from 425 DX News and other sources

Nick, G3RWF, returns to Uganda as 5X1NH from 16 October. Operations will be mostly on a spare time basis, but will include the CQ WW CW DX Contest and the ARRL 10 Meter Contest. QSL via his home call.

Members of Workington Amateur Radio Club are mounting a DXpedition to EU-010, South Uist, in the Outer Hebrides. Operation will be from 20-27 October, using the call MS0WRC. Operators Steve, G0MTD, Paul, M1PAF, Mark, M0WCR and Glyn, M0XUH will be active on SSB across the HF bands.

Noel, 5H3NP is operational from Iringa, Tanzania. He is using an FT-897D and ATU into a G5RV. He works mostly on 15 and 20m from about 1500z to 2000z.

As party of its Egypt 2012 special event from 18-22 October in Cairo, the Egyptian Radio Amateur Society for Development will be cooperating with the Arab Scout Region to run special event station SU55J to celebrate the 55th JOTA. For more information email ERASD Secretary, Said Kamel, SU1SK, via su1sk@amsat.org.

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast. Now the contest news

The RSGB 1.3GHz UKAC takes place from 1900-2130 on Tuesday. Operating on all modes in the 23cm band, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 5th to Thursday the 11th of October, compiled by Neil Clarke G0CAS on Friday the 12th of October.

Several sunspot groups rotated into view during the period and, in doing so, produced a number of M class solar flares on the 8th, 9th and the 10th. Associated with some of these solar flares were coronal mass ejections, but none were heading our way. Numerous C class solar flares took place from the 7th. Solar flux levels declined at first to 98 units on the 7th but increased to 117 units by the 11th with the appearance of the sunspot regions. The average was 106 units. The 90 day solar flux average on the 11th was 118 units, that's five units down on last week. X-ray flux levels increased from B1.7 units on the 6th to B5 by the 11th, the average was B3.3 units. Geomagnetic activity started at quiet levels, with an Ap index of 4 units on the 5th, but by the morning of 8th activity increased and lasted till the afternoon of the 9th. The Ap index on the 8th and the 9th was 40 and 50 units respectively. The disturbance was the combination of a coronal mass ejection that departed the Sun on the 5th and a coronal hole. The average was Ap 17 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 290 kilometres per second on the 6th to 560 by early on the 10th. Particle densities increased to 45 particles per cubic centimetre on the 8th, otherwise densities were low. Bz varied between minus 5 and plus 4 nanoTeslas on the quiet days and between minus 16 and plus 12 nanoTeslas on the 8th and 9th. During the geomagnetic disturbance HF propagation was considerably degraded, particularly on the east-west paths, but substantially recovered by the

11th. There were many reports of auroral propagation on 50 and 144MHz but relatively few UK operators appear to have benefited.

And finally the solar forecast for the coming week. This week the more active side of the Sun is looking our way. Solar activity could be at moderate levels on some days. There is a slight chance that activity could increase to high with an X class solar flare taking place. Solar flux levels should increase and could be as high as 130 units. Geomagnetic activity should be quiet today but a slight increase could take place for the next couple of days due to a recurring coronal hole. Also, an Earth directed coronal mass ejection could also increase activity, particularly later in the week. MUFs during daylight hours at equal latitudes are expected to be about 29MHz for the south and 26MHz for the north. Darkness hour lows should be around 9MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate of about 30MHz. The optimum working frequency with a 90 per cent success rate will be around 24MHz. The best time to try this path will be between 0800and 1200 UTC.

And that's all for this week from the propagation team.

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Monday the Advanced course continues, and on Tuesday there's a talk on the perfect mobile rig from Atlas Radio Inc by Mark Hill, G4FPH. The shack social is on Friday and the Advanced course continues on Saturday. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications Club is running a club net on Monday from 7pm on 144.165MHz USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR and on Friday there is a club net on GB3FR. Contact the FELCC Information Line on 07554 362 020.

Gloucester Amateur Radio & Electronics Society is having a construction and workshop evening on Monday. Next Saturday sees the start of the weekend Jota event with the Wooton-Under-Edge Scouts. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

Lincoln Short-Wave Club is holding a committee meeting on Monday. On Tuesday there's the 1.3GHz UKAC, then on Wednesday there's the formal

Hamfest debrief at the BSA Club. The Thursday club net is on 145.375MHz from 2000 and there's the Saturday surgery in the shack from 09.00. For more information contact Pam Rose, G4STO, on 01427 788 356.

South Birmingham Radio Society is holding a committee meeting on Monday and has training classes with Dave Murphy, G8OWL on Thursday. Friday sees shack and aerial work. Contact Don, on 01214 581 603.

South Notts Amateur Radio Club is on the air and having a natter night on Wednesday. Next Saturday sees the start of the Foundation weekend and exam. Contact Robin, G4NDM, on 01159 372 942.

Now we return to the traditional listing in date order. On Monday Aldridge & Barr Beacon Amateur Radio Club is having CW tuition and a general discussion. Contact Albert, G0KFS, on 01922 614 169.

On Monday Welland Valley Amateur Radio Society is having a construction evening 2m 70cm Slim Jim Antennas. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday Central Radio Amateur Circle continues its Intermediate course via Skype. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

On Tuesday Derby & District Amateur Radio Society is having a video night. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday Loughborough & District Amateur Radio Club is having a talk by Patrick McCracken on community radio station The Eye. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday Midland Amateur Radio Society is holding its AGM and presenting awards. Details from Norman, G8BHE, on 07808 078 003.

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast. On Wednesday South Kesteven Amateur Radio Society is having a talk and presentation by Steve, M5ZZZ, on the new RSGB proposals. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday Telford & District Amateur Radio Society is considering members' winter project proposals. Contact Mike, G3JKX, on 01952 299 677.

On Thursday Salop Amateur Radio Society is holding its pre-AGM discussion. Details on the club website at www.salop- ars.org.uk.

On Friday Melton Mowbray Amateur Radio Society is having a talk on Leicestershire Fire Brigade search and rescue dogs by Chris Pritchard. For more information contact Geoff, G3STG, on 01664 480 733.

On Saturday Central Radio Amateur Circle is having a plug and play event at Barr Beacon, Walsall. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Angel of the North Amateur Radio Club is holding an Advanced exam today at 10.30. On Monday there's a talk on virtual environments on your PC and in the data centre by Steve Townsley. Contact Nancy Bone, G7UUR, on 01914 770 036.

Hornsea Amateur Radio Club is running its rally at Floral Hall, Hornsea today, and there's a washup meeting on Wednesday. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Sheffield Amateur Radio Club has its annual presentation evening on Monday. On Saturday they start their weekend event for Jamboree on the Air at 35th St Oswalds Scouts, Archer Lane. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Denby Dale Radio Club is holding its AGM on Wednesday. Saturday sees the start of the JOTA weekend at Bradley Wood scout camp. Details from Richard, M0RBG, on 07976 220 126.

Now we return to the traditional listing in date order. On Monday Bolton Wireless Club is having a show & tell evening. For details, send an email to boltonwireless@gmail.com.

On Tuesday Morecambe Bay Amateur Radio Society is taking the Aldis challenge. Contact Sheila, on 07867 516 836.

On Thursday South Manchester Radio and Computer Club is having a talk on amateur radio astronomy by Jim, G3NFB. Details from Ron, G3SVW, on 01619 693 999.

On Friday East Cleveland Amateur Radio Club is having a radio components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast. On Tuesday Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday Ayr Amateur Radio Group Computer is having a group discussion on the way forward for software logging. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Wednesday Lothians Radio Society is having a surplus equipment sale at St Fillan's Church Hall. Contact Alan J. Masson, GM3PSP, on 0131 623 4580.

On Friday Cockenzie & Port Seton Amateur Radio Club is having a DVD night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA First, advance notice that Chelmsford Amateur Radio Society will commence an Advanced revision evening course on Thursday, 25 October at the Danbury Village Hall. This short revision course is aimed at those who have already studied at home or elsewhere. The exam will be held on Wednesday, 5 December. Contact Clive, G1EUC on 01245 224 577.

Now for clubs that have several events this week. Farnborough & District Radio Society is running a Top Band net on 1.995MHz on Monday from 8pm. On Wednesday there is a CW net on 3.570MHz from 8pm. Friday sees a 2m net on 144.675MHz from 8pm. Details from Neville, G3SPD, on 01252 404 816.

Norfolk Amateur Radio Club is holding a committee meeting on Monday. On Tuesday there's a talk on Spratly by Nigel Cawthorne, G3TXF. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday Vange Amateur Radio Society is having a talk. Contact Steve, G0KVZ, on 01268 552 606.

On Friday Mid-Sussex Amateur Radio Society is holding its AGM. Contact Rob, 2E0RJA, on 01444 232 129.

On Friday Wey Valley Amateur Radio Group is holding the Hernia Cup inter-club quiz. Details on the web at www.weyvalleyarg.org.uk.

On Saturday Hastings Electronics and Radio Club is holding its autumn auction of used & surplus equipment at Holy Redeemer Church Hall, Upper Church Road from 9am. Details from Gordon, on 01424 431 909.

On Saturday South Essex Amateur Radio Society is taking part in JOTA as GB2CIS from Canvey Heights with 1st Canvey Sea Scouts. Contact Dave, G4UVJ, on 01268 697 978.

Next Sunday Chesham & DARS is taking part in JOTA as GB0AYL with 1st Aylesbury Scouts. Contact Terry, G0VFW, on 01442 831 491.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Today, Weston Super Mare Radio Society is at the kite festival on Berrow Beach. On Monday there's a talk on amateur TV. Details from Paul, G3SDH, on 01761 221 206.

Exeter Amateur Radio Society is having an HF net on a Monday on 3.675MHz from 19:45. The 2m net is on Tuesday and the 4m net is on Thursday. Contact Nick, 2E0NRJ, on 01363 775 756.

South Bristol Amateur Radio Club is having a talk on cloud computing on Thursday. On Saturday the weekend JOTA event commences. Details from

Andrew Jenner, G7KNA, on 07838 695 471.

Now we return to the traditional listing in date order. On Monday Appledore & District Amateur Radio Club is having a talk on radio astronomy by Dave, 2E0CNB. Contact Brian Jewell, M0BRB, on 01237 473 251.

On Monday Riviera Amateur Radio Club is holding its AGM. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday Thornbury & South Gloucestershire Amateur Radio Club invites members to bring in their shack photos. Contact Tony, G0WMB, on 01454 417 048.

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast. On Wednesday Trowbridge & District Amateur Radio Club is having a natter night and committee meeting. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends.

On Thursday Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844 939.

On Thursday Swindon & District Amateur Radio Club is having a talk. Contact Den, M0ACM, on 07810 317 750.

On Friday Jersey Amateur Radio Society is holding its AGM, followed by the Jersey Amateur Radio Repeater Group GB3GJ AGM. Contact Rob Luscombe, MJ0RZD, on 07797 923 916.

On Friday Poole Radio Society continues its Intermediate course and is having an activity night. Details from Bill Coombes, G4ERV, by email to secretary@g4prs.org.uk.

On Friday Torbay Amateur Radio Society is having a natter night and running an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday Dragon Amateur Radio Club is planning for JOTA. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday Carmarthen Amateur Radio Society is having an open night. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday Wrexham Amateur Radio Society is having a talk on the Titanic messages. Contact Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

Copyright © RSGB 2012. Not for public release before Monday 15 October 2012 except as a GB2RS broadcast.

2021. November 2012 QST - Digital Edition

Newsgroup: rec.radio.amateur.misc
Date: 2012-10-15 14:27:16 UTC
From: ARRL Web site <memberlist@www.arrl.org>
Message-ID: <20121015135635.723F326C9D0@bmail.arrl.org>
Source record: 1788

*November 2012 QST - Digital Edition - *Go Now>
<http://www.nxtbook.com/nxtbooks/arrl/qst_201211/>
Digital QST <http://www.nxtbook.com/nxtbooks/arrl/qst_201211/>

Digital QST

September 2012 QST - Digital Edition
<http://www.nxtbook.com/nxtbooks/arrl/qst_201211/>Dear ARRL Member,

The digital edition of November /QST/ is available now! Go to this link
and start reading: November 2012 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201211/>.

* Build an inexpensive HF power attenuator
* Learn a different way to assemble PL-259 plugs
* See PSK31 "up close"
* Put your remote antenna tuner to work on 160 meters
* Turn back the clock with an easy single-tube transmitter
* See how students "Reach for the Stars" with Amateur Radio
* Bring your vintage receiver and transmitter together with the "Boat
Anchor Buddy"
* ...and much more!

Enjoy Content You Won't Find in the Print Edition...

* Video overviews of the Array Solutions AIMuhf impedance analyzer and
the DZKit HT-7 40-meter AM handheld transceiver.
* A circuit board layout and additional information for WB8DQT's "Boat
Anchor Buddy."

And, look for the announcement on pages 30-31 for new publications every
ham should have including the 90_^th edition /ARRL Handbook/---hot off
the press. Order early and you'll get the hardcover edition for the
softcover price.

Enjoy this issue!

73,

Steve Ford, WB8IMY
Editor

What is a digital edition?
The digital edition of /QST/ is a web-based edition of the journal...a
way to read and interact with the current issue of /QST/ anytime,
anywhere. It simulates the look and feel of our printed version,

complete with page flipping, indexing and easy ways to move around to get to the content you want. You can choose to read it online, or download the entire issue to your laptop. Each issue includes unique, digital-edition-only content such as video, audio features and extra content. Members can also access the digital archive for access to previous issues.

How do I access the digital edition?
Members must have a valid ARRL website login to access this benefit. You can always find a link to the current digital edition and archives at www.arrl.org/qst <http://www.arrl.org/qst>.

To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.

Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.

Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions.
Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

Go Green. Go Digital-Only.
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue.
* Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
08 - 14 October 2012

Solar activity was moderate. Three low level M-class x-ray flares occurred in the first three days of the week. At 08/1117 UTC, an M2 was observed off the east limb. This was followed by two M1 flares from the same vicinity on 09/2331 UTC and 10/0504 UTC. The remainder of the week was characterized by C-class activity, primarily from Region 1589 (N13, L=266, class/area=Dkc/280 on 12 October). This region was first numbered on 09 October as it rotated into view as a Cao/B type group. It grew to its maximum area and produced the largest C-class flare of the week, a C9/1f on 12/0820 UTC, in addition to three other C1 flares. Magnetic complexity increased as the region became an Ekc/BGD on 13 October while it's areal extent began to decrease. By the 14th, the area had diminished to 240 millionths and the region was classified as an Eac/BG. The week ended with five regions on the visible solar disk with 1589 remaining the largest among them. Region 1591 (N07, L=230, class/area Dsi/220 on 14 October) was numbered on the 12th. By the 14th, it had become the most productive, responsible for five of the six C-class events that day, the largest of which was a C3 at 14/2159 UTC. There were no Earth-directed CMEs during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at low levels on 08 October, then reached high levels every day for the remainder of the week.

Geomagnetic field activity reached major storm levels on the 8th and 9th of October with the arrival of an Earth-directed CME that occured on 05 October. An interplanetary shock was observed at the ACE spacecraft at 08/0445 UTC. A sudden impulse of 21 nT at the Boulder magnetometer followed at 08/0515 UTC. By 08/0556 UTC the Kp index had reached active levels. Minor then major storm levels were subsequently observed at 08/0718 UTC and 08/0834 UTC respectively.

The major storm conditions persisted through 08/1200 UTC, after which conditions returned to mostly active levels. Major storms were again observed during the first two synoptic periods on 09 October, followed by a minor storm period and an active period. Late on the 9th, a coronal hole high speed stream became geoeffective bringing geomagnetic activity to minor storm level for the final period of the day. Solar wind speed at the ACE spacecraft rose from about 380 km/s to near 560 km/s during the latter half of the day. The geomagnetic field activity then declined and, with the exception of one active period on the 12th, remained at quiet to unsettled levels. By the 13th, another coronal hole high speed stream became geoeffective. It was preceded by a corotating interaction region and a solar sector boundary change. This led to active conditions by 13/0450 UTC and minor storm conditons by 13/0819 UTC. Minor storm levels persisted until 13/2100 UTC before briefly decreasing to unsettled levels for the final period of the 13th. The 14th began with minor storm conditions, after which activity ranged from quiet to active levels.

Forecast of Solar and Geomagnetic Activity
15 October - 10 November 2012

Solar activity is expected to be at low levels with a slight chance for moderate activity through 21 October when Region 1589 rotates around the west limb. Generally low levels of activity are then expected to persist through 03 November, after which there is a slight chance for moderate activity as old Region 1589 returns.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 13 October through 18 October and again from 05-10 November. Recurrent coronal hole high speed streams are responsible for both periods of high flux.

Geomagnetic field activity is expected to be at quiet levels for the majority of the period. The two exceptions are 15-19 October and 08-10 November when recurrent coronal hole high speed streams are expected to bring active levels with a slight chance for minor storm levels.

AMSAT NEWS SERVICE

ANS-288

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

2012 AMSAT Space Symposium in Orlando Just Weeks Away

This is a reminder that the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th at the Holiday Inn Hotel at Orlando-International Airport.

See the AMSAT Web Store to complete your on-line registration:

http://store.amsat.org/catalog/index.php?cPath=27

Symposium Registration including Proceedings

Starting September 24, 2012: $ 50.00At the Door: $ 55.00

Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page. The Symposium Schedule web page has been updated with links to findmore information about the planned activities.

IMPORTANT message for all those planning to attend the special tour to the Orlando Science Museum during the AMSAT Space Symposium in Orlando, FL on Sunday, Oct. 28, 2012.

For those planning to attend the special Star Wars Exhibit, you must contact Martha at AMSAT, to pay for your ticket in advance. Martha can be reached at 888-322-6728 or 301-589-6062).This must be done no later than Thursday, October 17 to reserve your spot for the tour.

[ANS thanks the 2012 Symposium Committee for the above information]

Symposium Trip to the Orlando Science Center - Sunday, 28 October 2012

Leave the hotel at 9:00am (transportation is provided)Arrive at OSC at 9:45am (non-members parking: $5/vehicle)Special backstage tour at 10:00am (should last 45 min. - our AMSAT liaison will meet us in lobby)From 10:45am until 11:30am - visit the various Center exhibitsThose who pre-paid for the Star Wars Exhibit enter the exhibit as a group at 11:30am (tkts cost $27/person - PRE-PAYMENT IS REQUIRED - SEE NOTE BELOWView Exhibit from 11:30am until 1:00pmLunch at local restaurant from 1:15pm to 2:15pmLeave restaurant at 2:15pmArrive back by 3:00pm

The Star Wars Exhibit is a limited engagement feature and is expected to draw large crowds. In order to guarantee our visit stays on schedule, the Center has arranged for AMSAT to enter the exhibit as a single group at 11:30am.

If you choose to visit this exhibit, you MUST contact Martha at AMSAT, and pay for your ticket in advance. Martha can be reached at 888-322-6728 or 301-589-6062). This must be done no later than Thursday, October 17 to reserve your spot for the tour. Otherwise, you will not be guaranteed a spot in the 11:30 tour with the rest of the

members. Total cost per person will be $27.00. Please note that this fee also covers general admission to OSC and all exhibits, including the IMAX theater. When you arrive the tickets will be with your tour guide.

Those that choose not to attend the Star Wars Exhibit may have the opportunity of attending a feature in the IMAX Theater, providing the show

times coincide with our time schedule during the visit. Admission to the IMAX Theater is covered under your initial admission fee. Admission fee to OSC will be $17.00 for those not attending the Star Wars Exhibit and will be paid at the door.

For those managing afternoon plane departures, transportation back to the hotel will be provided by AMSAT volunteers at 11:30am, but only if needed.

[ANS thanks the 2012 Symposium Committee for the above information]

National Scouting Museum to Celebrate JOTA With ARISS Contact

The weekend of October 20-21, 2012 is Scouting's 55th Jamboree-on-the-Air (JOTA). JOTA is a World Scouting event that bridges Scouts all over the world via amateur radio.

The official hours are from Saturday at 00:00 hours local time to Sunday 24:00. JOTA is not a contest but idea is to contact as many stations as possible during the weekend. So you will hear Scouting stations calling "CQ Jamboree," or answering the calls. All amateur radio operators are invited to participate. An even better idea is to invite Scouts to your station or club to take part in JOTA.

JOTA will be the main event at the National Scouting Museum. Numerous amateur radio stations will be set up throughout the Museum, allowing for both local and global communication by various modes.

There will also be many other fun and educational activities; such as hidden transmitter hunts, electronic project assembly, solar telescopes, demonstrations of satellite communications, and much more throughout the day

The JOTA at the National Scouting Museum, Irving, Texas ARISS contact time has now been confirmed. Contact will begin at 18:30:30Z via telebridge station VK6MJ in Australia. If you cannot join us at the Museum, you are invited to listen in to the contact via the 146.88 Dallas Amateur Radio Club repeater, via the Echolink "AMSAT" conference bridge or on UStream via URL: http://www.ustream.tv/channel/dallasjota.

Lets light up the birds this JOTA weekend with Scout to Scout contacts. Find a club or scouting organization near you that is running a JOTA station and ask them if you can participate. Many of them have never experienced a satellite radio contact and you will hook 'em.

For a list of BSA registered JOTA stations, please check out the growing list at:

http://www.scouting.org/jota/registered_stations.aspx

You can download the full spreadsheet there as well which has contact information for the local organizer who have

registered their events. Outside the US contact your local Scouting agency and find out how you can participate.

JOTA is a great way to get out of the ham shack and demonstrate the thrill of Amateur Radio Satellites to an eager audience.

Interorbital Offers Low Cost Launch to LEO for 40kg of CubeSats

The October, 2012 issue of the on-line SatMagazine published an article discussing Interorbital Systems' preparations to launch their Neptune 5 and Neptune 7 rockets. Interorbital, based in Mojave, California, develops and manufactures low-cost, state-of-the-art orbital launch vehicles and satellites for private, commercial, governmental, academic, arts, and military applications.

They also have available the $8,000 Personal Satellite Kit and Launch Program for universities, private citizens, military, and government entities throughout the world to develop TubeSats. There are details of the TubeSat and CubeSat kits on their web page. See:
http://www.interorbital.com/

Two flights of the Neptune 5 launch system are planned to accommodate the 9 CubeSats and 23 TubeSats. Interorbital's Neptune 7 launch has already booked 10 CubeSats and 10 TubeSats to be delivered to low Earth orbit.

The Neptune 7 capable of lifting approximately 40kg to LEO - or 30 small TubeSats and CubeSats per launch. The first launch is sold out and the second is rapidly closing.

Read all of Interorbital's Article, "A Builder's Guide To Inexpensive Space Access" By Randa Relich Milliron, CEO, Interorbital Systems on page 60 of the October, 2012 SatMagazine which can be downloaded for free at:
http://www.satmagazine.com/2012/SM_Oct2012.pdf

Also in this issue of SatMagazine are articles about the Aeneas CubeSat, Satellite Networks For Education, and the Firefly CubeSat.

AMSAT-UK has links to SatMagazine at: http://www.uk.amsat.org/?p=11009

[ANS thanks AMSAT-UK, SatMagazine, and Interorbital Systems for the above information]

Viet Nam F-1 Satellite Team Requests Hams Continue to Listen

An article published on the AMSAT-UK web reports that the FSpace team of young engineers and students at the FPT University in Viet Nam are requesting Amateur Radio operators continue to listen for their F-1 CubeSat, callsign XV1VN which was deployed from the International Space Station on October 4 but not heard on Earth.

Team Lead, Thu Trong Vu XV9AA provided this update on October 7, "So far the team has received several mixed reports about F-1 status, there is no definite conclusion yet. We will continue to collect information and analyze the situation, this afternoon we will hold a team meeting to discuss different situations that may happen with the little satellite up there. Please continue to help us listening for F-1 on 437.485 in daylight and 145.980 in the dark, thank you!"

F-1 was expected to begin transmitting beacon alternatively on its main and backup channels 30 minutes after deployment.

F-1 frequencies:

145.980 MHz: main channel, 1.0W RF output, FM, AFSK 1200bps, one telemetry packet every 30 seconds, operates in the dark by default (but can be commanded later to operate in sunlight as well)437.485 MHz: backup channel, 0.2W RF output, FM, PWM CW beacon, each beacon transmission lasts about 20 seconds then 60 seconds delay, only operates in sunlight

More information and guide to download F-1 telemetry decoder can be found at http://fspace.edu.vn/?page_id=27. Decoded data can be submitted to us via the telemetry decoder or by sending directly to: thuvt@fpt.edu.vn. Audio recordings are highly appreciated.

Read the full article at: http://www.uk.amsat.org/?p=10480

[ANS thanks AMSAT-UK and the F-1 CubeSat Team for the above information]

RSGB, AMSAT-UK, and BATC Publish Joint Response to British OFCOM

RSGB, AMSAT-UK, and BATC have provided a joint Amateur Radio response to a July, 2012 Ofcom consultation document calling for input regarding, "VHF Spectrum Release in the range 143 MHz to 156 MHz".

The response notes the, "unprecedented opportunity for VHF innovation and growth based on an allocation to amateur radio at 146 - 148 MHz within the UK for digital TV, audio, and other evolving spectrum efficient data applications."

Also included in the response is a call to, "Provide for the increasing use of the existing 144-146 MHz allocation for amateur satellite activities by the CubeSat and similar spacecraft being developed by UK University student teams in collaboration with radio amateurs.

It was noted that spectrum allocation at 146 - 148 MHz would allow for, "Use of equipment harmonised for amateur use in ITU Regions 2 and 3 where 146-148 MHz is already a ITU Primary allocation to the Amateur

service."

The Amateur Radio response also notes this allocation to the Amateur service provides, "Room for highly innovative infrastructure-free narrowband DATV and other new applications that we have not been able to deploy in restricted secondary bands such as 70 MHz or 423 MHz, 1296 MHz.

The full document is available on-line at the RSGB Web:

http://tinyurl.com/Amateur-Joint-Response

[ANS thanks AMSAT-UK, RSGB, and BATC for the above information]

ARISS Status - 9 October 2012

1. Izmir, Turkey School Hosts ARISS Contact

On Friday, October 5, students from Izmir SEV Primary School in Turkey participated in an Amateur Radio on the International Space Station (ARISS) contact with astronaut Sunita Williams, KD5PLB via station K6DUE in Greenbelt, Maryland. Williams answered all 20 questions posed to her during the event which drew an audience of over 800 students and was heard all over Turkey. The contact highlighted a science curriculum which included other NASA activities such as First Lego League Robotic Teams and Destination Imagination Teams.

2. Sunita Williams Chats with Malaysian Students

Sekolah Kebangsaan students in Putrajaya, Malaysia spoke with Sunita Williams, KD5PLB aboard the ISS through an Amateur Radio on the International Space Station (ARISS) contact on Sunday, October 7. The school was invited to participate in the contact by the National Space Agency Satellite Ground Station, 9M2RPN, in conjunction with the "Prime Minister's National Space Challenge Trophy 2012," an annual event since 2007 when the Malaysian astronaut, Dr. Sheikh Muszaphar Shukor, flew to the ISS.

3. ARISS Educator Interviewed

Gladys Muñoz, a teacher at the Marcelino Canino Canino Middle School in Puerto Rico, was interviewed for a blog by Mr. Anthony Salcito, vice president for education Microsoft Worldwide Enterprises. This took place during her stay in Lima, Peru for Microsoft's Latin America Forum for Innovative Education where she presented a summary of some of her school's aerospace education projects. The school participated in its own ARISS contact on September 12, 2012. See:
http://www.youtube.com/watch?v=fte3V...ure=plpp_video

4. Astronaut Training Status

Luca Parmitano, KF5KDP has been scheduled for a preflight session on October 17. He is slated to fly with the Expedition 36 crew in May 2013.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

HamRadioNow: An Interview with Steve Mendelsohn W2ML (SK)

Posted: 14 Oct 2012 06:55 AM PDT
http://forums.qrz.com/showthread.php?364752-HamRadioNow-An-Interview-with-Steve-Mendelsohn-W2ML-(SK)&goto=newpost

Ham Radio Now Logo Biz Card Back.jpg

HAMRADIONOW.tv

Special Edition: Steve Mendelsohn W2ML (SK)

Steve Mendelsohn W2ML, who passed away earlier this year, was an extremely active,

enthusiastic ham. Among other things, he was an ARRL Vice-President and

ran the ham radio communications for the New York Marathon. Professionally he was a

broadcast engineer for CBS and ABC, and did frequency coordination for the NFL.

Last year, Steve was diagnosed with pancreatic cancer. Knowing that Steve had a

short time to live, and a vibrant story to tell, Newsline's Bill Pasternack WA6ITF

interviewed him at the 2011 Pacificon hamfest.

HamRadioNow is honored to present that interview.

If you knew Steve - and many hams did - you may yet learn a few things you didn't know.

If you didn't, then take this rare opportunity to hear the story of a ham's ham.

Watch this special episode at our web site, www.HamRadioNow.tv.

Video Oral History Of The Life And Career Of Steve Mendelsohn, W2ML - SK.

Posted: 13 Oct 2012 11:13 PM PDT
http://forums.qrz.com/showthread.php?364726-Video-Oral-History-Of-The-Life-And-Career-Of-Steve-Mendelsohn-W2ML-SK&goto=newpost

For those of you who were friends or acquaintences of the late Steve Mendelsohn, WA2DHF/W2ML, here is a short video oral history that I just completed with the assistance of Gary Pearce, KN4AQ, of ARVN/HamRadioNow. It was recorded a year ago today at Pacificon 2011 in Santa Clara CA. Steve, who created the communications network for the ING New York City Marathon became a Silent Key on May 23, 2012 from complications to Pancreatic Cancer.

LOG4OM Logging Program release

Posted: 11 Oct 2012 05:51 AM PDT
http://forums.qrz.com/showthread.php?364434-LOG4OM-Logging-Program-release&goto=newpost

A new release of the free LOG4OM logging software will be available for download on Sunday 14th October to coincide with the LOG4OM presentation at the RSGB Convention.

This release has many added features particularly aimed at the DX community and the casual ham.

The new release version 1.11 and the updated user manual will be available from the LOG4OM web site http://www.pisto.it/wordpress/log4om-en/ at about 12.00 Hrs GMT

Bring your memory stick (A 1gb stick will do because the program is only 17mb) to the RSGB Convention and I will load it with the latest version of LOG4OM and of course there is no charge for this free software.

The LOG4OM logging program can be also run from a memory stick or SD card for complete portability, so no need to take that heavy laptop on your travels just plug into the nearest PC, contact G4POP for details.

TARS is Always Prepared for Emergency Situations:

Posted: 14 Oct 2012 05:36 PM PDT
http://www.eham.net/articles/29148

September was National Preparedness Month, the time for reminding the public about preparing for unexpected emergencies. During this time, amateur radio operators participated in activities and projects to demonstrate the part that they play in helping the community when disaster strikes. The Tipton County Radio Society is always prepared to handle emergency communications for the community. TARS participated at the Covington Heritage Festival on Sept. 22. The booth theme this year was "When Disaster Strikes: Who You Gonna Call?" They operated under a mock disaster situation without utilities and demonstrated radio communications and solar oven cooking. Amateur radio -- commonly referred to as ham radio -- helps people communicate with one another by voice, computer and code over vast distances. Most people are unaware of the service that these quiet heroes provide during emergencies. During a disaster, it's possible that normal forms of communication with the outside world may be interrupted. Land-line telephone facilities may become unusable because physical wires or poles are down. Cell phone facilities may be unusable because cell towers are down, cell sites are destroyed or just because too many people are trying to use the system. Even emergency operating centers may be out of commission if their buildings or antennas have been damaged.

//
Doha To Host Amateur Radio Festival:

Posted: 14 Oct 2012 05:36 PM PDT
http://www.eham.net/articles/29147

DOHA: The city will host the Qatar international festival for amateur radio in December. This was decided during a meeting between H E Abdullah bin Hamad Al Attiyah, Chairman of the Administrative Control and Transparency Authority, who is also chairperson of the board of directors of the Qatar Amateur Radio Society (QARS) with vice-chairman of the US Amateur Radio Society yesterday. This festival will include a contest between amateur radios from all over the world. The event dubbed the first of its kind in Middle East will take place in conjunction with the National Day celebrations. About 100 amateur radios from across the globe will be invited to the festival and the competition, besides a host of officials and experts.

RAC Bulletin 2012-061E - Tropical Storm Rafael predicted to effect
Nova Scotia and Newfoundland
2012-10-14

While it is too early to predict specific areas that may be effected,
the Canadian Hurricane Centre will begin 6 hour updates beginning in
the morning. Now north of Puerto Rico, Rafael is tracking on a course
that will see a swath pattern from just east of Cape Breton to well
out to sea in the Grand Banks south of Newfoundland with the centre
over the Avalon Peninsula overnight Wednesday and into Thursday.

During this time operators in the effected area are encouraged to keep
the IARU Centre of Activity (COA) frequencies clear and exercise a
heightened level of awareness while monitoring VHF repeaters in the
event your assistance is required. Your usual cooperation is
anticipated and appreciated.

73,

Doug Mercer CEC VO1DTM/VO1DM
Chief Field Services Officer

���
IARU Emergency Centre of Activity frequencies: 3750 khz, 3985 khz,
7060 khz, 7240 khz, 7275 khz, 14300 khz, 18160 khz, 21360 khz.

QRZ Feature Update - Callsign Prefix Calculator

Posted: 15 Oct 2012 05:42 PM PDT
http://forums.qrz.com/showthread.php?364932-QRZ-Feature-Update-Callsign-Prefix-Calculator&goto=newpost

We're proud to announce a new feature, our Callsign Prefix Calculator

In conjunction with cleaning up our DXCC Entity database, I created a function whereby you can plug in ANY callsign (whether or not we have it on file), and the system will tell you which DXCC country it belongs to.

It's not perfect, but that's because the world's assignment of callsigns follows many odd patterns and some defy description. On the other hand, nearly all common prefixes can be determined.

Check it out as a new addition to our DX Atlas page - near the bottom.

K6H - Special Event Radio Station FOR IMMEDIATE RELEASE

Posted: 15 Oct 2012 09:21 AM PDT
http://forums.qrz.com/showthread.php?364868-K6H-Special-Event-Radio-Station--FOR-IMMEDIATE-RELEASE&goto=newpost

The Southern California based PAPA Repeater System will be holding a ham radio special event!

Under the call sign K6H, Ham Radio Celebrates Hollywood will be held on Sunday, October 28th from 9:00 am to 1:00 pm (1600Z 2000Z) and emanate from the Stage 9 of the CBS Studio Center facility in Studio City, California.

Historic Stage 9 is the home of ABC TVs Last Man Standing, starring Tim Allen. Seinfeld, Spin City, According To Jim, Cane, The Cleaner and The Defenders are among the shows that have been shot on the stage.

Several of the shows licensed operators will be on hand to host the PAPA members and a number of paths will be available to contact the stage including HF, VHF, UHF, DSTAR, Echolink and IRLP.

A schedule of operating times and frequencies will be published on the PAPA website. Take a break from contesting, come over and say hi.

http://www.papasys.com/

To facilitate contacts during the event, operators will BLOG in real-time on the KA0XTT Facebook page (http://www.facebook.com/KA0XTT) and on the @NN6JA on Twitter page.

The set will also be monitoring the BEARS (ABC/Disney) interconnected repeater system, which links W2ABC (in Manhattan), WD4WDW (in Orlando Florida) and KA6AJE (in the Los Angeles area). The system can be reached on Echolink via WD4WDW-R.

We are hoping other organizations will link in to make this a national event.

A special, limited edition QSL card will be issued to all confirmed contacts.

Quote:

Clarification:

Quote:

The DARI / BEARS in Los Angeles is WB6AJE. The interconnect is brought to you by DARI, the Disney Amateur Radio Interconnect, and is jointly administered by BEARS & DEARS.

(e-mail: dl7voa@darc.de)

5X, UGANDA
Nick,G3RWF, who was expected to be active as 5X1NH from Uganda this
week has postponed his trip without any reason given.

6W, SENEGAL
Vladimir,RK4FF, announced to be QRV again as 6V7S from the rental shack
Le Calao from Oct 22 until Nov 3. No information about a participation
in the WWDX SSB Contest (Oct 27/28). QSL via homecall.
See also: http://www.le-calao.com/A/residence_A.htm

9J, ZAMBIA
Gert,ZS6AYU, will be active as 9J2GR working holiday style from the
lodge "Mama Out of Africa" at the Zambezi river near Livingstone.
Activities will be in CW on 40m-10m running 100 watts into a R7000
vertical from Oct 19-22. His next destination will be Zimbabwe.
QSL via homecall.
See also: http://www.safarinow.com/go/MamaOutofAfrica

9M2, WESTERN MALAYSIA
Mirek,VK6DXI, will be QRV as 9M8DX/2 from Kuala Lumpur during his
spare time between Oct 15 and Nov 3. QSL via SP5UAF (B).

CP, BOLIVIA
Peter,DF7NX, has travelled from Peru to Bolivia and wants to show up
on the bands as CP8/DF7NX starting on Oct 19. QSL via homecall.

EA9, CEUTA
Mek,EA9/SP7VC, will be QRV from Ceuta in holiday style from Oct 22-28.
Operation will be on 160m-10m in SSB, including the CQWW SSB Contest as
Single Op/All Band/High Power. Equipment consists of: IC-746, HEX beam
by SP7IDX, R7000 vertical, Inv L for 160m and 80m, K9AY for receiving.
QSL via homecall, unfortunately only direct or LoTW.

EI, IRELAND, EU-115
Olivier,ON4EI, will once again be QRV as EI8GQB and EI1A from Oct 21-30
using 100 % green energy from a wind/solar hybrid system at his Caravan
He will join the WWDX SSB Contest as EI1A in the SO2R category.
More information is available at QRZ.com. QSL via homecall.

FO, FRENCH POLYNESIA
Alains,F4GYP, trip to the South Pacific as FO/F4GYP is scheduled from
Oct 19 until Nov 6 as follows:
Tahiti (OC-046, DIFO FO-002, WLOTA 0885)
Mehetia (OC-046, DIFO FO-009),
Moorea (OC-046, DIFO FO-010, WLOTA 0465)
Raiatea (OC-067, DIFO FO-012, WLOTA 1977) (maybe Oct 27/28)
He will use the special callsign TX4FO from Ilot Motu Nono (OC-046,
Loc BH52ig) near Tahiti. Alain works in SSB on 40m, 20m and maybe 10m.
QSL via homecall.

FY, FRENCH GUYANA
Rich,N6KT (ex HC8N), will activate the special event callsign TO2A from
Kourou from Oct 20-30. He also plans to join the WWDX SSB Contest.
QSL via KU9C.

G, ENGLAND, EU-005
The Bishop Auckland Radio Amateurs Club (G4TTF, FISTS #6471) will be
QRV with some scouts using the special callsign GB1FDS during the
JOTA weekend (Oct 20/21). QSL via bureau or direct to G0GFG.

GU, GUERNSEY, EU-114
Members of the Guernsey Amateur Radio Society and the Bailiwick of
Guernsey RAYNET group plan to activate the special event station GB2JTA
on all bands from Vale on Guernsey (EU-114, WLOTA 0013, Loc IN89rl)
during the 55th Jamboree On The Air. QSL via bureau.

HA, HUNGARY
The HA-IPA-team celebrates the 20th anniversary of the Hungarian IPA
section by activating the special callsign HG20IPA in CW, SSB and
digital modes on 160m-6m until Nov 30. They plan to take part in the
upcoming IPA Radio Club Contest as well. All QSOs also count for the
HA IPARC award. QSL via HA3JB. See also: http://www.ha3jb.com

J3, GRENADA, NA-024
Terry,KS5Z, s planning a one week stay on Grenada with Harry,AC8G, for
the WWDX SSB Contest. They will receive their callsign upon arrival on
the island on Oct 22.

JA, JAPAN
The special event station 8J2ARDF will be activated during the "All
Japan ARDF Athletic Meet" from Oct 20 until Nov 25. QSL via bureau.

The special event station 8J3IPA celebrates the 50th anniversary of the
Japanese IPA section until Dec 31. They are working in CW/SSB/RTTY on
HF and 6m. 8J3IPA will join the IPA Contest as multi/multi.
QSL via bureau.

ON, BELGIUM
The special event station ON44CLM remembers the liberation of Knokke
until Nov 15. QSL via ON3AIM.

P2, PAPUA NEW GUINEA
Axel,DL6KVA, Hans-Peter,HB9BXE, Eddy,K5WQG, Derek,G3KHZ (P29NI), and
Hans,SM6CVX (P29VCX), are planning an IOTA DXpedition:
Oct 20-24 Emirau Island (OC-103) as P29VCX
Oct 27-31 Simberi Island (OC-099) as P29NI
Nov 2-4 Lihir Island (OC-069) Call unknown
The team is flying home on Nov 6 without Hans who plans to activate
two other island groups as well:
Nov 6-9 Buka Island (OC-135) as P29VCX
Nov 9-12 Manu Island (OC-025) as P29VCX
See also: http://p29ni.yolasite.com

P4, ARUBA, SA-036
Helmut,DF7ZS, plans to join the Worked All Germany Contest (WAG) on
Oct 20/21 as P40Z. He will work on 17m and 12m before and after the WAG
QSL via homecall. See also: http://www.df7zs.de

SU, EGYPT
The Egyptian Radio Amateur Society for Development (ERASD) and the
Arab Scout Region will join the JOTA Contest with the special callsign
SU55J from Oct 18-22. They are planning many amatuer radio activities
and an interesting touristic program in Kairo plus a surprise.
QSL fuer SU55J via SM5AQD, unfortunately only direct.
See: http://www.facebook.com/events/522556857770399/?context=create

UK, UZBEKISTAN
Takhir,UK/UA1ZEY, is working on HF from Samarkand until Nov 1.
QSL via homecall, unfortunately only direct.

V3, BELIZE
Rich,N0HJZ, will be QRV as V31MW from Placencia in the Stan Creek
district from Oct 21-30. He will work in CW on the WARC bands before
and after the WWDX SSB Contest (SOABHP).
QSL via homecall, direct preferred, but via bureau is ok as well.

VQ9, CAHGOS ARCHIPELAGO, AF-006
Jim,VQ9JC, will use another special prefix callsign VQ92JC from Oct 20
until Nov 4. He will be QRV as much as possible between 1200-1600 UTC.
This is the 6th consecutive year that he has been issued a unique
prefix. The only drawback is that he is still operating Field Day style
from a recreational park running 100 watt from a FT-857 into a dipole
10m high. He will join the upcoming WWDX SSB Contest. He has made a lot
of calls and CQs over the last several months but only very few ops
have answered him due to the bad conditions. He is scheduled to return
to the US after that. QSL via ND9M.

XV, VIETNAM
Yasu,JL7XBN, is planning a 10m FM DXpedition from Oct 19-22. He will
sign XV29FM from Vung Tau in SSB, PSK, JT65A and RTTY on 20m/15m/10m.

QSLs to JA will be sent automatically, all others have to send their
cards only direct unfortunately including SAE + 1 IRC/2 USD or 2 EUR.
QSLs can be picked up also at the Ham-Fair 2013 in Tokyo.
QSLs via JG1DKJ (SSB), JL7XBN (digital modes).

YN, NICARAGUA
Jeff,N6GQ, will sign YN2AA from Grenada (Loc EK71au) working in all
modes on 160m-6m from Oct 23-29. He may try also 6m EME in JT65.
He plans to join the WWDX SSB Contest as SOAB/HP.
QSL via LoTW or direct via NN3W.

Z2, ZIMBABWE
Gert,ZS6AYU, will be QRV in holiday style signing Z21GF in CW on 40-10m
from the Victoria Falls running 400 watts into a R7000 vertical from
Oct 22-25. QSL via homecall.

ZD8, ASCENSION ISLAND, AF-003
Marko,N5ZO (ZD8O), will stay on Ascension Island from Oct 18-30 and
plans to take part in the WWDX SSB Contest (SOAB). QSL via OH0XX.

JOTA: The Jamboree on the Air is an annual event in which half a million
Scouts and Guides all over the world make contact with each other by
means of amateur radio. The 55th edition will take place on Oct 20/21.
Specific "contest-free frequencies" for 80m/40m/20m/15m/10m have been
agreed with the organizers of the concurrent WAG Contest in order to
avoid interference between the two events.

OP wanted: There is still an operator wanted for a DXpedition to KH8 in
March 2013. See also: http://n6mw.jimdo.com

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Oct 20/21 JARTS WW RTTY CONTEST
Oct 20/21 Worked ALL Germany Contest (WAG)
Oct 21 Asia Pacific Sprint Contest
Oct 21 ON Contest 2m
Oct 27/28 CQWW DX SSB Contest

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-014, CT3, Madeira Archipalego: Peter,CT9/DH4JQ, Marion,CT9/DF4UM,
Marco,CT9/DJ5KW, Karlfried,CT9/DL1EK, and Leo,CT9/DK8VC, will be active
from Santana, Ilha da Madeira (AF-014, DIP MA-001, PIP MD-001, DPRN
FF-101, WFF CTFF-030, WLOTA 0053) between Oct 21 and Nov 2. This will
include a Multi-Op entry in the WWDX SSB Contest using the call CR3L.

QSLs via homecalls. QSL for CR3L via DJ6QT.

AF-024, S7, Inner Islands: Luca,I5IHE (S79LC), Danio,I5OYY (S79YY), and
Simone,IK5RUN (S79UN), are going to hit the airwaves in holiday style
from Praslin Island (WLOTA 2862, ARLHS SEY-006, LOC LI75vp) between
Oct 20 and Nov 4. Activities will take place in CW, SSB and RTTY on
80m-10m. QSLs direct via homecalls. The log will be uploaded to LoTW
within six months. See also: http://www.ik5run.it/s79.html

AS-012, JA6, Amakusa archipelago (incl. Kami, Naga, Shimo...): Take,JA6CNH,
and Yasuro,JF6XQJ, plan to work from Genkai Island from Oct 19-21.

AS-075, XX9, Macau group: Francisco,EA7FTR (XX9TFR), Eugene,EA5HPX (XX9TPX),
Jose,EB5BBM (XX9TBM), and David,EB7DX (XX9TEX), will be QRV from the
Pousada de Coloane Hotel on Coloane Island (LOC OL62SC) from Oct 18-29.
They will work with two stations focusing on stations from NA and EU.
Their preferred frequencies are:
CW: 1823, 3523, 7023, 10103, 14023, 18073, 21023, 24893, 28023 kHz
SSB: 1825, 3780, 7065/7160, 14145, 18145, 21295, 28495 kHz
RTTY: 7035, 10140, 18100, 21080, 24921, 28080 kHz
QSLs for all calls direct via EA7FTR. Log will be uploaded to LoTW.
See also: http://adxg.org/macau

EU-004, EA6, Balearic Islands: Adrian,AA5UK, is going to visit the island of
Ibiza (DIE E-023, MIA MB-003, WLOTA 0958) from Oct 20-31 and plans to
work holiday style as EA6/AA5UK in SSB, PSK31 and RTTY on 80m-10m.
He plans to work much in RTTY since EA6 is very rare in this mode.
Listen for him also in the WWDX SSB. QSL via AA5UK (buro/direct/LoTW).

EU-010, GM/MM, Outer Hebrides: Steve,G0MTD, Paul,M1PAF, Mark,M0WCR, and
Glyn,M0XUH, will be QRV as MS0WRC from South Uist (Outer Hebrides)
only in SSB on the HF bands from Oct 20-27. QSL via G0MTD.
See also: http://www.mx0wrc.org/dxpeditions/south-uist-2012

EU-074, F, Bretagne (Cotes-d'Armor Centre) Region group: Samuel,F5UPO (CW),
Luis,F5THW (PSK), Didier,F5IHZ (RTTY), and Juan,F5IRC (SSB and CW),
will be QRV as TM5BRT from Brehat Island (Loc IN88lu, FFF-1194) from
Oct 19-21. QSL via F5THW (bureau/direct).

NA-002, VP5, Caicos Islands: Frank,WA2VYA, Tony,K4QE, and Jack,N2VW, are
handing out IOTA points from the Turks and Caicos Islands (Loc FL31vs)
from Oct 23-30. They will join the WWDX SSB Contest as VP5T but will
be active also as VP5/homecalls before and after the contest.
QSL for VP5T via N2VW (bureau/direct).
QSL routes for the individual calls can be found on QRZ.com.

NA-021, 8P, Barbados: Peter,W0SA, plans to live on Barbados for some time
and wants to activate his calls 8P9NX and 8P0P on the HF bands
starting from Oct 23. QSLs via W3HNK (d).

NA-063, CY0, Sable Island: Murray,WA4DAN/CY0, and Ron,AA4VK/CY0, are working
from Sable Island (CIsA NS004/WFF CYFF-001/WLOTA 0758) from Oct 22-31.
They are working with low power and simple antennas on all bands with

focus on 10m, 12m and 15m. QSLs via homecalls (d). An OQRS can be found
on their website: http://www.cy0dxpedition.com

NA-103, VP2M, Montserrat: George,K2DM (VP2MDG), Dave,G3NKC (VP2MKC),
Martin,G4XUM (VP2MXU), and Stewart,GM4AFF (VP2MAF), will be QRV from
Gingerbread Hill, St. Peters Parish, Montserrat (WLOTA 1475/Loc FK86vs)
from Oct 23-30. They will sign VP2MDG during the WWDX SSB Contest.
They will be active in all modes on all HF bands before and after the
contest. QSL for VP2MKC and VP2MXU via G3NKC (bureau/direct).
All other QSLs via homecalls (bureau/direct).

NA-112, W4, North Carolina State West (Brunswick to Carteret County) group:
Wayne,K9YNF, is planning his 5th IOTA DXpedition to Bogue Banks
(Emerald Isle, USi NC010S) from Oct 21-26. Listen for Wayne as K9YNF/4
on following frequencies: SSB 14260 and 18128 kHz; PSK31 14070.15 kHz
and 7035 kHz. QSL via K9YNF (bureau/direct).

OC-045, KH8, Tutuila Island: Anci,KH8/JA2ZL, plans to show up from Pago Pago
on Tutuila (USi AS007S/WLOTA 4385) from Oct 23-29. He will be QRV using
his TS-480HX and Hex-Beam in SSB/CW/RTTY on 80m-10m. QSL via JA2ZL.

OC-047, H44, Solomon Islands: Bernhard,DL2GAC, is working again as H44MS
only in SSB on 80m-6m from Guadalcanal (WLOTA 0086, Loc RI00aj) between
Oct 17 and Dec 10. QSL via DL2GAC (bureau/direct).

OC-086, KH0, Northern Mariana Islands: Kit,JA1NVF, Kowata,JF7ELG,
Miho,JJ2VLY, and Yutaka,JQ2GYU, will be QRV as NH0J from Tinian Island
(USi NI003S, WLOTA 3108, Grid Loc QK25) from Oct 18-22. They plan to
work in CW/SSB and maybe also RTTY/PSK on 80m-6m.
They may also use their individual US calls: AH0J (QSL via JA1NVF),
WA2O/KH0 (QSL via JF7ELG), WS2M/KH0 (QSL via JJ2VLY) and
WS2Y/KH0 (QSL via JQ2GYU). QSLs for NH0J via JJ2VLY (bureau/direct).

Another DXpedition to the Mariana Islands is leading Matt,AH0/K0BBC,
and Ron,AH0/N0AT, to Saipan (USi NI002S, WLOTA 1333) from Oct 23-30.
They also plan to join the WWDX SSB. QSLs via homecalls.

OC-151, YB9, Tenggara Timur Islands (incl. Alor and Solor Isl, Flores,
Komodo, Sawu, Sumba, etc.): Leo,YC9MLL, is living on Flores Island for
8 years and operates mostly in SSB, but also in CW if requested. He is
usually on Saturdays and Sundays, but states that he is on vacation now
and you can send him an e-mail (yc9mll@gmail.com) for skeds in CW, SSB,
PSK31, RTTY and SSTV on 40m/20m/15m/10m. He has a homebrew radio with
50-100 watts into a dipole and delta loop antenna. QSL via YC9MLL.

OC-160, VK4, Queensland State (South Coast) North group: Aki,JA1NLX/VK4, is
working from Hamilton Island (Whitsunday Islands archipelago) in CW and
SSB on 40m-10m from Oct 18-23.
QSL via homecall (d/L/B). An OQRS will be available for bureau cards.
See also: http://www.ne.jp/asahi/ja1nlx/ham/VK4_2012.html

NON IOTA: The W/VE-QSO-Party will take place on Oct 20/21 and this contest
is a good chance to work several islands in the US and Canada usually.

DX stations may call as well and hand out some points.
Here is a list of a few announced activities:
W9PVR Coumbe Island (USi WI049)
AB5WB Galveston (USi TX001S)
NM5RC from several islands:
Sand Stone (USi NM023L), Red Rock (USi NM024L),
Comanche (USi NM025L), Puerco (USi NM026L),
Cerrito (USi NM027L)
N3SW/p Holden Beach (USi NC008S)
WA3EOP/p Delmarva Island (USi DE015S)
KB5IQJ/p Goose (USi TX003S)
WC5C Greer Island (USi TX058L) or
Bolivar Peninsula Island (USi TX063S)
Galveston Island (USi TX001S, NA-143),
Pelican Island (USi TX008S, NA-143)
QSL via WC5C (d)
N1QLL Great Wass (USi ME004S)
VE3GJ/p Henley (ON-007)

WFF: DLFF: DQ125HSB and DK0WFF will be QRV from the national park Harz
(DLFF-006) on 2m, 70cm and 23cm on Oct 21. QSLs via bureau.
OZFF: The clubstation OZ8ERA will activate Nakkehovedkilen (OZFF-037)
on Oct 20. As a bonus they will be QRV also from the lighthouses
Nakkehoved-Vest (DEN-027) and Nakkehoved-0stre (DEN-028).

Get on Right Wavelength and Enjoy Thrills of Amateur Radio:

Posted: 15 Oct 2012 05:25 PM PDT
http://www.eham.net/articles/29150

An amateur radio enthusiast is encouraging you to tune in to the joys of the hobby. Despite the huge rise in social media sites, Sammy Baird said there is still a place for communication across the airwaves. He made the call as Carrickfergus Amateur Radio Group (CARG) prepares to hold its annual sale this month. Sammy, from Monkstown, hopes it will provide the right signal for people to take up the pastime. The 67-year-old is treasurer of CARG and a veteran with around 70 radios in his collection. He teaches amateur radio licence courses so people can get involved in the hobby. Amateur radio has changed the world, helped Britain win wars and, as Sammy puts it, "has brought the world to our fingertips". It is one of the world's most popular hobbies with over 50,000 active 'hams' in Britain.

//
Be Nice To The Moon. Stop Writing On It:

Posted: 15 Oct 2012 05:25 PM PDT
http://www.eham.net/articles/29149

All over the world, ham radio operators and Morse code enthusiasts beam dot, dash messages straight at the moon, then wait 2.7 seconds for the signal to bounce back. They call these "E.M.E." transmissions, which stands for "Earth-Moon-Earth" or -- more popularly -- "moonbouncing." I suppose it's fun to smack little beeps against a sleepy rock 239,000 miles away and have those beeps come flying back at you. Plus, it's easy. Moonbouncing With The Morse Resource: Anybody with a good transmitter and an antenna "capable of being rotated in both the azimuth and elevation planes" (ask your hardware store or any ham radio jock to explain) can bounce messages off the moon. You don't even have to know Morse code. There's a shortcut. Just type your message ("Happy Birthday, Munchkins!") onto a screen at The Morse Resource and in less than a minute they translate it into long and short beeps you can hurtle moonward. The moon must be twitching.

==> ARES®/RACES BACK-UP COMMS FOR GOP CONVENTION

Bill Williams, AG4QX, Hillsborough County (Florida) ARES/RACES Operations Manager/Assistant Emergency Coordinator and the Greater Tampa Community Emergency Response Team (CERT) Liaison for the City of Tampa was asked by the Tampa Office of Emergency Management to provide emergency back-up communications for the City during the timeframe of the Republican National Convention, August 24 through September 2, 2012.

This tasking required Amateur Radio at four primary locations: the Tampa EOC, Tampa Fire Station #1, Tampa Fire Station #3 and the Tampa Fire Rescue Training Academy and Police Training Center staging area. Each location had ICOM IC-2820 radios pre-programmed with numerous D-STAR and analog frequencies, all of which were tested and could be used for emergency communications. Two training sessions were conducted prior to the event to familiarize the operators with the radio operation and the Incident Command System-compliant plans for the Convention coverage.

The assignment was treated for the City as a CERT event, and for the County, an ARES/RACES activation. Volunteer radio operators were scheduled for 24/7 coverage at the four locations, plus the Hillsborough EOC was available for any additional activations if required.

Over 1800 volunteer hours were put in to prepare for and support the city and county for the week-long operation. The city operated the Consequence Management EOC, staffed and supported by the RNC, Secret Service, FBI, State Warning Point, Hillsborough County and surrounding counties' Emergency Management representatives. A Joint Incident Command was established and operated nearby.

Even the threat of Hurricane Isaac did not interfere with the operation. Under the county plan, ARES/RACES put out the call for more operators to support Hillsborough County and the Red Cross shelter operations, and the city operation support continued unfazed. The county RACES Officer and ARRL Emergency Coordinator, Keating Floyd, KC4HSI, called on operators from the Tampa Amateur Radio Club to run a Resource Net until the storm threat passed. Hillsborough County experienced heavy rains and flooding but only minor damage was reported.

All facets of the Amateur Radio operation were undeniably successful. The RNC went off with very few problems, and congratulations are due to Williams for a job well done, along with all the CERT and ARES/RACES members who supported him and the Tampa Bay community. -- Budd Johnson, WB4J, Hillsborough County Assistant EC; Tampa Amateur Radio Club Liaison; ARRL West Central Florida Official Emergency Station; wb4j@verizon.net

==> 2012 ARRL SET ACTION NOTES: TESTS IN FULL SWING

The Hardin County (Kentucky) Amateur Radio Emergency Communications group is participating in the annual national ARRL Simulated Emergency Test <http://www.arrl.org/news/get-set-for-the-2012-simulated-emergency-test> this month. Their SET message to your editor: "We currently have a display set up at Home Depot's Safety Day in Elizabethtown. While at Safety Day, this message is being sent from W8WN's mobile station there. It is being transmitted by HF radio to an automated station in another part of the U.S., outside the local simulated disaster area. It then goes via one of five hardened servers located worldwide (for redundancy), and then into the regular Internet, to be delivered via e-mail anywhere that e-mail is available. Thus, if the Internet were down locally or even regionally, by using the Winlink 2000 <http://www.winlink.org/> system, we still have some e-mail capabilities. This is in addition to and separate from our usual local and area VHF operations.

"As an additional test this year, two mixed-mode (voice and digital) exercise nets were conducted at the end of September from a number of agency locations around Hardin county and from mobiles in the field,

exchanging simulated ICS-213
<http://www.scottares.org/images/NewFEMA213.pdf> and Red Cross Damage Assessment ("street sheet") forms. [See K1CE For a Final at the end of this issue for a link to a typical county damage assessment protocol and forms -- ed.]

"The ARES provides most of the SKYWARN severe weather spotters nationwide. If severe weather were in the area, we would normally have trained SKYWARN spotters out and a SKYWARN net in operation with direct communications to the Louisville NWS, while standing ready to provide interagency communications for the local government safety agencies and NGOs. Thanks for your participation and for your interest in our community." -- Shelby Ennis, W8WN - AAR4IJ, Hardin County, Kentucky ARES Emergency Coordinator, w8wn@arrl.net

Southern Florida Section SET: Operation Solar Storm

The ARRL Southern Florida Section SET scenario: Operation Solar Storm. "A once in a lifetime solar storm has impacted Earth. Similar in strength to the solar storm of 1859, also known as the 1859 Solar Superstorm, or the Carrington Event, a large solar flare caused a major coronal mass ejection (CME) to travel directly toward Earth, taking just 18 hours. (Such a journey normally takes three to four days.) This took place just over 24 hours ago. Power companies and communication satellite companies were caught off guard by the speed at which the charged particles reached Earth.

"One of the largest recorded geomagnetic storms occurred as a result of this CME. Aurorae have been seen around the world, even over the Caribbean. People who happened to be awake in the northeastern US could read a newspaper by the aurora's light. Unfortunately, a good percentage of communications satellites have been damaged causing havoc with telephone, cellular, and Internet communications. Even worse, power lines acting as antennas absorbed the geomagnetic energy and hundreds of transformers have been burned out throughout North America. Over 90% of the United States (including all of Florida) and most of the rest of the world have been in a total blackout for over 24 hours. With limited inventory and relatively few factories to make replacement equipment, the blackout is expected to continue for many weeks or months for most areas.

"While most public radio systems are still operating, many are at or near capacity. Significant portions of cellular service have been disrupted and land line telephones will not last longer than a few days as batteries drain and generators run out of fuel. The unprecedented wide-spread blackout will hinder fuel deliveries to replenish generators for many weeks. ARES has been activated by county Emergency Management officials throughout the Southern Florida Section. CERT teams have activated to assist their neighbors. Specal needs shelters are being opened throughout Southern Florida.

"The mission of the Amateur Radio operators is to pass messages to assist government and non-government agencies as their normal communications are either reaching capacity or are not functioning normally. Click on the Sample Messages <http://www.sflset.org/gpage1.html>link for sample messages to pass. For more info, visit www.sflset.org <http://www.sflset.org/>

Arizona SET

Arizona's SET is scheduled for November 3, 2012. Section ARES officials report: "The emphasis has been placed on a more local concentration of communication than some of our previous SETS . . . An attempt will be made to incorporate digital exercises during the SET within each district as well as attempts state wide. There are several digital technical experts that have volunteered to assist those who are digitally challenged with helpful information should it be needed. The DEC of each district will essentially be in charge of coordinating plans in the district and will likely ask for assistance with coordination of adjacent counties, particularly where there are no ECs in place. -- Kirk Seifert, W5KRK, Arizona SEC, w5krk@nwahams.com

==> ARRL PUBLIC SERVICE/EMERGENCY COMMUNICATIONS TRAINING PROGRAM CHANGES

Revised Field Instructor (FI) and Mentor Qualifications/Requirements have been implemented for the ARRL Public Service/Emergency Communications Training Program. Our continuing effort to improve and adjust our training program to adapt to the role we play in public service and emergency communications response with other local and national agencies necessarily results in changes from time to time. Based on feedback from individuals and leaders in our community and changes in FEMA training we are making some changes to strengthen our training program. Effective November 1, 2012 we are updating the qualifications/requirements for those who wish to serve as Field Instructors or Online Mentors for ARRL's Emergency Communications training program. Changes to qualifications include the addition of SKYWARN training and some changes in the list of FEMA training required of instructors and mentors. Updated requirements include listing field classes with the ARRL Continuing Education Program office, and filing student rosters and student evaluations with the CEP office. We are also adding a 3-year term of service to this appointment. You can review the updated qualifications/requirements on the ARRL website at: www.arrl.org/requirements-for-field-instructors <http://www.arrl.org/requirements-for-field-instructors> and www.arrl.org/mentoring-online-courses <http://www.arrl.org/mentoring-online-courses>.

The list of prerequisites for completion of the Public Service and Emergency Communications Management for Radio Amateurs (EC-016) Course has also been updated to reflect changes in the FEMA training program, as well as other appropriate training for field leadership. Review the updated list of prerequisites in the course description at: www.arrl.org/online-course-catalog

<http://www.arrl.org/online-course-catalog>. -- Mike Corey, KI1U, ARRL Emergency Preparedness Manager and Debra Johnson, K1DMJ, ARRL Education Services Manager

==> LETTERS: RECRUITMENT CHALLENGES

I am retired here in mid coast Maine and active in consulting with RACES operations in Knox County. This is the region that stretches inland and along the coast from Camden to Friendship, Maine. The county's comm group is supporting our RACES activities as part of their emergency communications plan. We have a dedicated 2 meter repeater and mobile trailer as the main assets for our activities. Homeland Security has made Maine's EMA well organized with a need for more county participation.

I'm trying to help out as a volunteer focusing on technical matters associated with an upgrade to have the 2 meter simulcast FM repeater system adequate enough to cover the entire county with just hand-helds radios and operators. As a new member I find some challenges for the Penn Bay Amateur Radio Club RACES function and seek suggestions on ways to stimulate getting young members involved. Our club is made up of older long term hams retired in the area. We need young blood to join us so we have enough operators to support emergencies in the state and county.

The membership has attempted to come up with ways to attract interest by offering training for license exams but with poor results. We are all getting older and not gaining new young members. Have you heard of this problem before and do your readers have suggestions for getting interest in this form of public service?

I came here to retire yet ended up working for the State of Maine's Office of Information Technology as a field engineer for their statewide Public Safety Radio System. That was following a thirty year career in my own small business located in Silicon Valley. I employed and trained young college graduate engineers for my systems integration business centered on computer data acquisition and control and ATE. Plus I represented RF/Microwave companies to the vast marketplace for their products. Now I'm tasked with overcoming Maine's shortage of technology geeks who should become interested and active in our RACES group. I'm sure you must know of other regions of the country facing the same problem and have possibly come up with solutions. Any suggestions? -- John Lawrence, W1QS, Waldoboro, Maine; USAF Communications Specialist Course Instructor; Penn Bay Amateur Radio Club RACES; j123law@aol.com

==> 2012 INTERNATIONAL HUMANITARIAN AWARD: NOMINATIONS OPEN

Nominations are open for the 2012 ARRL International Humanitarian Award. This award is conferred upon an amateur or amateurs who demonstrate devotion to human welfare, peace and international understanding through Amateur Radio. The League established the annual

prize to recognize those radio amateurs who have used ham radio to provide extraordinary service to others in times of crisis or disaster. As one of the few telecommunication services that allow people throughout the world from all walks of life to meet and talk with each other, Amateur Radio spreads goodwill across political boundaries. The ARRL International Humanitarian Award recognizes the Amateur Radio Service's unique role in international communication and the assistance amateurs regularly provide to people in need. Read more here <http://www.arrl.org/news/arrl-invites-nominations-for-2012-international-humanitarian-award>.
-- ARRL Letter

==> THE WEATHER CHANNEL TO BEGIN NAMING WINTER STORMS

Beginning this winter, The Weather Channel will begin naming what it calls "noteworthy winter storms." As The Weather Channel explained on its website, "[a] storm with a name is easier to follow, which will mean fewer surprises and more preparation. In addition to providing information about significant winter storms by referring to them by name, the name itself will make communication and information sharing in the constantly expanding world of social media much easier." Unlike the National Hurricane Center -- which has named tropical storms and hurricanes since the 1940s -- the National Weather Service does not name winter storms. Read more here <http://www.arrl.org/news/the-weather-channel-to-begin-naming-winter-storms>.
-- ARRL Letter

==> LETTERS: PERSPECTIVE IN THE POST-KATRINA ERA

Thank you for your work and efforts in publishing the ARES E-Letter. The opening sentence of the September 19, 2012 letter caught my eye. I hope that you will forgive me for being a bit sensitive about this matter but in the last seven years all we hear is how Hurricane Katrina hit New Orleans. I speak with people all over the country for business and Amateur Radio. Few are aware that Katrina did not make landfall in New Orleans. Katrina lingered far longer than usual and in doing so piled water up into the shores, bays, rivers, and bayous of Florida, Alabama, Mississippi, and Louisiana. The massive amounts of rain inland flowed down stream to meet the waters from the Gulf of Mexico. The confluence of the two resulted in water depths that have not been seen in one hundred years or more.

Katrina came ashore at about the mouth of the Pearl River near Pearlington, Mississippi, about 35 miles east of New Orleans while moving due north. As you know, the storm surge, high winds, rain and tornadoes occur mostly in the right front quadrant of the storm. The vast majority of the damage to New Orleans occurred when a levee that protects the Ninth Ward from Lake Pontchartrain, overtopped.

The reason that most Americans only know New Orleans in reference to Katrina is the news media. Perhaps you heard so little about Mississippi because we did what we always do: We quietly picked

ourselves up, helped our neighbors, and did what was necessary to make it possible for others to help us.

Katrina damaged Perdido Key, Florida; Gulf Shores, Alabama; Dauphin Island, Alabama; Bayou La Batre, Alabama; as well as the entire Mississippi Gulf Coast. Most all of the small towns south of New Orleans are extremely low and were wiped out and cut off but you never heard a whisper about them. Please understand that we love our neighbors in Louisiana including New Orleans and we wish for them the best in this decades-long recovery. Most Mississippians simply ask that the focal point of Katrina be where Katrina focused its impact and destruction.

The stories of your fellow Americans doing simple and extraordinary acts in the wake of this unthinkable disaster would make you cry. I wish all of America could know what we know and have seen what we saw. The pride that you hold inside yourself for this country would burst forth in a flood of emotional patriotism. The people of Florida, Alabama, Mississippi, and Louisiana did remarkable things with the help of citizens from EVERY state. We owe you all a debt that cannot be repaid and you gave yourselves a gift of service that you cannot buy, borrow, beg or steal.

I suppose Hurricane Isaac brought back these emotions when the Weather Channel described us as "the land mass between Louisiana and Alabama." The next day they produced a map that labeled Mississippi as Alabama and vice versa. Again, we love our neighbors in Alabama and there are many wonderful aspects of Alabama that we would like to emulate. However, we are happy with our State name and I am sure that Alabama is happy with their name, too.

My purpose for this message was not to hit you over the head for a seemingly inconsequential statement but rather offer a more specific perspective. Please let all know that we thank God for everyone's help and kind thoughts.

I did not know it at the time but the Mississippi Coast Amateur Radio Association (MCARA) club repeater was the ONLY form of communication standing in the wake of Katrina including downed police, fire, and ambulance communications services. The club staffs the Harrison County EOC in Gulfport. My experiences in the aftermath called me to do something, which turned out to be through Amateur Radio and MCARA. It would appear that this turned out to be the largest, longest and most effective real world use of Amateur Radio emergency communications in this country in my lifetime. Let us plan as though it won't be the last but pray that it will. Thank you for all that you do and thank you for your indulgence. -- Chris Deaton, AE5TR, Events Director, Mississippi Coast Amateur Radio Association; ae5tr@bellsouth.net

==> LETTERS: MORE ON SYSTEMS' FALLIBILITY

I have to say I agree wholeheartedly with W6APZ's comments in last month's ARES E-Letter. As you well know from some of my previous e-mails to you, I see the over-emphasis on digital technology and the under-emphasis on direct communications to be a real problem. My basic philosophy is that the minimum number of points of failure is the foundation of effective communication. South Texas and a number of Texas and other nearby sections conducted a drill last May that was almost purely digital. It went better than I expected but still had a number of issues related to the complexity of digital communications. Our planned October 29 Statewide ARES exercise (ARRL South Texas, West Texas, North Texas sections and others) will return to more basic communications and should be a valid training exercise that covers the full spectrum of our capabilities. - James Burrough, N5DTT, Assistant Emergency Coordinator, South Texas ARES District 14 Hospital Liaison; Bellaire, Texas

==> LETTERS: ON ARRL HQ'S LESSONS LEARNED FROM ISAAC

In the last issue, ARRL Emergency Preparedness Manager Mike Corey, KI1U, said "Lessons learned has been a buzz word in disaster response for many years and these lessons are important. However, what matters is lessons applied." I heard this: The FAA defines ``learning'' as ``a change in behavior [as a result of experience]." Sometime it's qualified as a (relatively) "permanent" change. I was surprised to discover that it's even true. See Chapter one in http://fsims.faa.gov/wdocs/other/ps_handbooks/h_h8083-9.htm -- Alan Martin, W1AHM, Westford, Massachusetts

==> FLORIDA'S LAKE COUNTY ARES SUPPORTS BICYCLE FESTIVAL

The Lake County (Florida) Amateur Radio Emergency Service (LACARES) provided radio communications to support a three day bicycle event in Mount Dora, Florida from October 12 through October 14, 2012. This event was the 38th Annual Mount Dora Bicycle Festival sponsored by the Mount Dora Area Chamber of Commerce. Excellent weather and moderate temperatures meant there were no heat exhaustion. No ambulance calls were necessary. This year there were around 600 bicycle riders from all over the United States with the majority coming from Florida. For many of the riders this has become an event they look forward to each year. This is not a competitive race but a series of 14 separate bicycle tours through Florida's Lake County scenic countryside.

The LCARES group had 23 volunteer radio operators helping to keep the riders safe and secure by manning rest areas, providing mobile SAG wagons and mobile patrol vehicles for three days. This year we added a three wheeled motorcycle and a motor scooter to the vehicle list. Both of these were equipped with 2 meter radios and the operators had microphones and headsets attached to their helmets. All vehicles were directed by the net control station N4FLA, which had its mobile command trailer set up in Mount Dora next to the Chamber of Commerce building. Mobile units and radio operators at rest areas were able to communicate with the command center using our repeater on 147.000 MHz. We also used APRS to track several of our mobile radio operators out on the course.

To prove the flexibility of ham radio operators we were able to continue operations despite the breakdown of two of the 2 meter radios within the trailer by moving the net control operator to his personal mobile radio in his car until a replacement radio was made ready to use in the trailer.

A total of 10 riders and their bicycles were transported back to the Mount Dora staging area due to mechanical breakdowns, minor injuries or just plain getting tired out.

Lake County ARES has been providing on course radio communications for the Mount Dora Bicycle Festival for close to twenty years. They use events such as this to train their members to be ready to deploy and setup emergency radio equipment in case of natural disasters such as hurricanes or tornados, which are not unusual in this area. They also get training on how to properly communicate on emergency radio networks. LCARES may be called upon at anytime to help support local first responders in the event of an emergency. For more information about Amateur Radio in Lake County, Florida, check the following web sites: www.n4fla.org <http://www.n4fla.org/> or www.k4fc.org <http://www.k4fc.org/> -- Ted Luebbers, K1AYZ, Tavares, Florida

==> K1CE FOR A FINAL

For a good look at a typical county's damage assessment protocols and forms, including a Red Cross Damage Assessment form, click here <http://www.co.effingham.il.us/ESDA/DAMAGE.pdf> for the "damage assessment/intelligence annex" of Effingham County, Illinois. The reader should come away with a deeper understanding of this aspect of disaster response. ARES operators are often deployed with damage assessment teams.

It was a pleasure to participate in the teleconference of the ARRL Emergency Communications Advisory Committee (ECAC) earlier this month. Chairman Jim Cross, WI3N, Maryland/DC Section Manager runs a good meeting, and garners good participation and input as the committee wrestles with many current and demanding issues facing us as Amateur Radio emergency and disaster response communications planners and operators. The ARES community and greater public service community at large is being well served by this generally under-recognized group of experienced experts from around the country. Here are your ECAC members. Thank them the next time you get a chance at a club meeting or hamfest.

Chairman Jim Cross, WI3N (Atlantic); Brad Pioveson, W9FX (Central); Jim Zahradnicek, KD0S (Dakota); Jim Coleman, AI5B (Delta); John McDonough, WB8RCR (Great Lakes); Jim Mezey, W2KFV (Hudson); Reynolds Davis, K0GND (Midwest); Dave Colter, WA1ZCN (New England); Gordon Grove, WA7LNC (Northwestern); James Latham, AF6AQ (Pacific); Charlie Miller, AE4UX (Roanoke); Jeff Ryan, K0RM (Rocky Mountain); Rick Palm, K1CE

(Southeastern); Grant Hays, WB6OTS (Southwestern); Glen Reid, K5FX (West Gulf), and Doug Mercer, VO1DTM (Radio Amateurs of Canada). The Board liaison is Kent Olsen, KA0LDG, and the ARRL HQ liaison is Emergency Preparedness Manager Mike Corey, KI1U.

See you next month! 73, Rick Palm, K1CE, Daytona Beach, Florida

Kids In South Bay Connect to Astronauts Aboard International Space Station:

Posted: 16 Oct 2012 05:11 PM PDT
http://www.eham.net/articles/29156

SANTA CLARA -- Ben Westlund is only in the third grade, but Saturday he seemed to fully grasp just how amazing it was to be talking to an astronaut in space. Decked out in a full astronaut costume, complete with space gloves and a jetpack backpack, the 8-year-old Santa Cruz boy said konnichiwa -- "hello" -- to the Japanese astronaut aboard the International Space Station and talked to him briefly about outer space. "That was like a rare time in life," Ben said after talking to English-speaking astronaut Akihiko Hoshide. "It was like he was standing right in front of me. Right there!" Ben was one of 14 local school kids that used a ham radio to ask Hoshide questions about space in an unusual opportunity for boys and girls to learn real-life science outside the classroom. The event was made possible after a year of planning by local amateur radio enthusiasts and NASA, which combined to set up an elaborate satellite radio system used to connect the Santa Clara Marriott with outer space. As the space station hovered over Italy for 10 minutes, the astronauts connected to the kids at the hotel via a "telebridge" conference call involving Italian engineers and a moderator in Australia. Some phone signal problems in the minutes leading up to the event kept organizers nervous, but the call to space went off without a hitch.

//
Ham Radio Fall Campout and Training:

Posted: 16 Oct 2012 05:10 PM PDT
http://www.eham.net/articles/29155

On Sept. 21-22, the Sinbad Desert Amateur Radio Club held their Fall Campout at the Wedge Campground. At that campground the members participated in setting up HAM radios with long and/or tall antennas to make contact with other HAM radio operators around the world. The fun of these campouts is all about getting out in nature away from the city noise and traffic. Some of the activities were, find the hidden radio transmitter, making radio contacts, hikes, 4-wheeling and just relaxing in the shade. There was good food, comradeship, swapping of war stories about the radio contacts made, stories of how you have improved your HAM radio shack with new equipment or the latest antenna configuration you have made and tested. These are all part of the fun of the campout.

//
Boy Scouts' Jamboree On-The-Air Begins Friday:

Posted: 16 Oct 2012 05:10 PM PDT
http://www.eham.net/articles/29154

Each year, more than 500,000 scouts in more than 100 countries take to the airways on the third full weekend in October. From Friday through Sunday, more than 300 scouts in the Allegheny-Highland Council, which includes Chautauqua and Cattaraugus counties, will participate in the 55th annual Jamboree On-The-Air at Camp Merz in Mayville. The scouts will be able to experience amateur radio with the help of Chautauqua Amateur Radio Service of Jamestown. The radio club will erect portable antennas and have their equipment ready for service. The camp, billed as The Monster Mash, will also have games and scouting programs. Aaron Miles, liaison between the Boy Scouts and the Chautauqua Amateur Radio Service, said scouts of all ages can participate. Once at the amateur radio station, the communication typically requires speaking into a microphone and then listening via the stations speakers. However other forms of specialized communications will also take place, such as Allstar link ECHO link and digital mode.

//
Radio Club Launching High Altitude Balloon Over Collin County:

Posted: 16 Oct 2012 05:10 PM PDT
http://www.eham.net/articles/29153

The Plano Amateur Radio Klub (PARK) and other radio amateurs will launch a high altitude balloon on Saturday October 20, 2012. The balloon will be launched at ASC Signal in Farmersville, TX at 9am and is expected to reach an altitude of over 95,000 feet. The helium filled balloon will deflate at its maximum height and come back to earth. The entire flight will last about 2 hours. The amateurs have configured the balloon with a payload that includes a talking altimeter, a tracker (using APRS), a homing beacon, a TV camera, and a radio repeater. The talking altimeter can be monitored by listening to 147.54 on a scanner with VHF.

//
Amateur Weather Spotter Recalls Chasing Destructive Dexter Tornado:

Posted: 16 Oct 2012 05:10 PM PDT
http://www.eham.net/articles/29152

Jeff Cowall had waited for this moment for 24 years. He was speeding through the Dexter countryside in the early evening of March 15, cresting a hill on Dexter-Townhall Road when he saw a "majestic, tall, huge, dark, body of cloud." He pulled his truck over. The otherwise fluffy mass of precipitation was flat at the bottom -- an unmistakable sign that a tornado could be forming. In the minutes that flowed a dark cyclone dropped from the ominous cloud. The display quickly transformed into a natural disaster: an EF-3 strength twister that would travel 7.2 miles and rip through hundreds of homes before finally dissipating. Cowall and his son Michael Kundak-Cowall, both amateur skywarn weather spotters trained to use emergency HAM radio systems, watched as two football fields away the

powerful swirling vortex touched ground water, lifting and manipulating the liquid so it looked like a thin, wildly twisting rope. "We're on the radio calling this in and they're saying get out of there," recalled Jeff Cowall, a University of Michigan data architect who first began weather spotting in 1988. Despite having spotted for decades, never before had he seen a tornado up close. "So when we're not on air we're screaming like little babies at each other."

I was at this ISS QSO during the ARRL national convention, and it
was great! As the article notes, the telebridge system allowed for
a 10-minute contact, so all the kids waiting in line got to ask
their questions. There was even time at the end for astronaut Lee
Morin--who was on site in Santa Clara to give a talk--to say hi
to Aki himself. Congratulations to everyone who helps with the
ARISS project; I can't think of a better way to get kids excited
about amateur radio, space exploration, and sci-tech in general.

[EMCOMM] - Post Tropical Storm Rafael to pass out to sea over the
Southern Grand Banks of Newfoundland
2012-10-17

Hurricane Rafael has now been downgraded to Post Tropical and
continues to move Northeast at 56KM/HR. Greatest rainfall is predicted
to be well out to sea with minimal damage to the previous alerted
affected areas. That said, folks living in the Southern Avalon Region
of Newfoundland should prepare overnight for much larger than usual
surf as maximum wave height over the Southern Grand Banks will reach
more than 15 meters.

Thanks to all of you who have been on a heightened level of alert, but
it seems that Rafael has come and gone.

GRE stops making scanners -- Radio Referencee

Posted: 18 Oct 2012 02:11 AM PDT
http://forums.qrz.com/showthread.php?365212-GRE-stops-making-scanners-Radio-Referencee&goto=newpost

This came across my screen from the GRE PS-500 Yahoo Groups mailing list.
It quotes an announcement on the Radio Reference forums.

Quote:

GRE US Personnel Attempt Restart of GRE Business
GRE US Personnel Attempt Restart of GRE Business. Same Customer Service,
Warranty and Repair Remains

By Wayne Wilson, former Executive VP GRE

Tuesday, Oct. 16, 2012

FORT WORTH, Texas, Oct. 16, 2012 ☐ In early October, all US GRE Sales and Development team were advised by GRE-Japan that scanner manufacturing was shut down; nearly all GRE personnel in Asia and USA were dismissed. Since that time, the US Team has been working to rebuild the company and get back into production.

There is nothing on this (as yet) at the GRE USA and GRE Japan Web sites
-- and there is nothing about it showing up via a Web search for news
relating to the company.

Readers will remember that Alinco had partnered with GRE USA as its US
distributor. This appears to be continuing, as is GRE support at GRE USA.
The Alinco Web site also has nothing on this as yet.

CO6CBF Receives Visa for Travel to AMSAT Symposium

Posted: 17 Oct 2012 02:32 PM PDT
http://forums.qrz.com/showthread.php?365171-CO6CBF-Receives-Visa-for-Travel-to-AMSAT-Symposium&goto=newpost

2012 AMSAT Space Symposium Begins Next Week in Orlando

AMSAT's 2012 Space Symposium in Orlando will have a special visitor this year. The Symposium will be held on

Friday, October 26th through Sunday, October 28th in Orlando, Florida at the Holiday Inn at Orlando-International Airport.

Special Symposium Visitor Hector Martinez, CO6CBF

Hector Martinez, CO6CBF will travel from Cuba to the Symposium in Orlando at the invitation of AMSAT for Hector to

attend and to make a presentation. Thanks to the work done by Patrick Stoddard, WD9EWK/VA7EWK, Hector has been able to obtain a visa to come to the United States for the Symposium.

Once the invitation was extended, Hector had to approach both governments and file applications to get a Cuban passport and travel permit and a US visa. All expenses for his trip must be guaranteed by someone outside Cuba. Patrick took on that task personally on behalf of AMSAT, even signing legally-binding documents for the Cuban government to that end. Patrick has covered expenses out of his personal funds since no AMSAT funds are available. Patrick would appreciate donations to cover the expenses via his callbook address.

AMSAT looks forward to welcoming Hector, CO6CBF at the Symposium!

Additionally, the Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

Visit the AMSAT Web Store to complete your on-line registration. Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page for those preferring this method.

Dr. Samuel T. Durrance, NASA Astronaut at the Saturday Evening Banquet

The featured speaker for the AMSAT 2012 Saturday Evening Banquet on October 27 will be Dr. Samuel T. Durrance, NASA Astronaut/Payload Specialist and Professor of Physics and Space Sciences at the Florida Institute of Technology.

2012 AMSAT Symposium Schedule

To help you plan your trip to Orlando the 2012 Symposium Committee has posted a high-level schedule of the weekend's events.

[ANS thanks the 2012 Symposium Committee for the above information]

from the Convention on the ARRL's Facebook page
<https://www.facebook.com/ARRL.org>.

==> + ON THE AIR: GET READY FOR JOTA THIS WEEKEND
```

The 55th annual Jamboree on the Air (JOTA) is October 20-21. This 48-hour event runs from 0000 (local time) on Saturday, October 20 (right at midnight Friday) through midnight (local time) on Sunday, October 21. JOTA is an opportunity for Cub Scouts, Boy Scouts, Girl Scouts and Girl Guides from all over the world to experience the magic and excitement of Amateur Radio. According to Boy Scouts of America JOTA Organizer Jim Wilson, K5ND, more than 250 JOTA stations have registered with the BSA; stations do not need to register with the BSA to participate in JOTA. "We estimate that there will be nearly 17,000 Scouts in 45 states, Puerto Rico and a few countries on the air for JOTA," Wilson told the ARRL. "We have compiled a spreadsheet that lists locations, call signs, detailed contact information, bands and modes for these stations. We invite hams to use this information in their JOTA activities." Read more here <http://www.arrl.org/news/get-ready-for-jota-this-weekend>.

==> GET READY FOR THE 7TH ANNUAL ARRL ON-LINE AUCTION

The Seventh Annual ARRL On-Line Auction <http://www.arrl.org/auction> opened for preview on Tuesday, October 16, and will open for bidding at 10 AM EDT (1400 UTC) on Thursday, October 25. According to ARRL On-Line Auction Coordinator Lisa Tardette, KB1MOI, there is a large assortment of ARRL Product Review items, including an Elecraft KPA500 HF/6 meter power amplifier, an ICOM IC-7410 HF/6 meter transceiver, a Yaesu FT-450D HF 6 meter transceiver, a Kenwood TM-281A 2 meter FM transceiver and an MFJ-998 RT and MFJ-994BRT remote auto antenna tuner.

The ARRL On-Line Auction also features a wide assortment of books, including ARRL Handbooks from the 1920s and 1930s -- most notably, a first edition of the 1926 Radio Amateur's Handbook -- and a set of three first-day-of-issue covers of the 1964 5-cent stamp highlighting Amateur Radio (see an image of a stamp here <http://www.qsl.net/wj8c/>).

"Once again this year, bidders will find a large variety of product review equipment, vintage books, novelty items and a number of very special items that have been donated by the crew of the ABC Television's Last Man Standing, starring Tim Allen as Mike Baxter, KA0XTT," Tardette explained. "In order to place a bid, you must register on the ARRL On-Line Auction website. You may browse the website and scope out those 'must-have' items without being a registered bidder, and you can register at any time during the auction. If you are interested in some great bargains -- and some great fun -- you really need to check out the ARRL On-Line Auction." The 2012 ARRL On-Line Auction runs through 11:45 PM EDT on October 31 (0345 UTC November 1). Contact Tardette via e-mail <ltardette@arrl.org> with any questions concerning the ARRL On-Line Auction.

==> + ARRL MEDIA AND PUBLIC RELATIONS MANAGER ALLEN PITTS, W1AGP, RETIRES FROM LEAGUE

After more than eight years as the ARRL Media and Public Relations Manager, Allen Pitts, W1AGP, has retired. During his tenure, Pitts was

responsible for developing public relations campaigns that featured the many facets of the Amateur Radio Service: Hello Radio came first in 2006 and highlighted the fun and friendships of ham radio. It was followed by Emergency Radio, which built on the ARRL and the Amateur Radio Service's response during Hurricane Katrina. We Do That -- Radio in 2008 showed the technologies used in Amateur Radio. In 2011, the Do It Yourself (DIY) campaign was unveiled.

Building a corps of Public Information Officers (PIOs) throughout the country, Pitts believed that all news was local. "With this in mind," he explained, "I felt the best use of ARRL resources was to provide local PIOs with the very best materials we can and let them use them in their home areas." The strategy obviously worked, as the number of PIOs volunteers increased. "There are almost 200 graduates of PR-101, more than 500 subscribers to the PR e-mail reflector and the number of media hits about Amateur Radio grew larger and larger." Read more here <http://www.arrl.org/news/arrl-media-and-public-relations-manager-allen-pitts-w1agp-retires-from-league>.

==> + POSTAGE RATES TO INCREASE IN JANUARY

The US Postal Service has announced that as of January 27, 2013, the cost to mail First Class letters, postcards and packages within the US will go up. The cost to mail a first class letter will be 46 cents, while the cost to mail a postcard will be 33 cents, an increase of 1 cent for each. This is the third increase for postcard postage in less than two years; in April 2011, the USPS boosted the postcard stamp price from 28 cents to 29 cents, and from 29 cents to 32 cents <http://www.arrl.org/news/postage-rates-to-increase-in-january> in January 2012. The USPS will also introduce a First Class Mail Global Forever Stamp in January. This new stamp will allow customers to mail 1-ounce letters anywhere in the world for one set price of $1.10. The cost to mail flat-rate Priority Mail packages and letters will also increase. Click here <http://about.usps.com/news/national-releases/2012/pr12_114.htm> for more information on all the 2013 postal increases.

==> + DIGITAL EDITION OF NOVEMBER QST NOW AVAILABLE

The digital version of the November QST is now available <http://www.nxtbook.com/nxtbooks/arrl/qst_201211/> to ARRL members. The digital version includes many features not available in the print version, such as:

- Video overviews of the Array Solutions AIMuhf impedance analyzer and the DZKit HT-7 40-meter AM handheld transceiver.
- A circuit board layout and additional information on how to bring your vintage receiver and transmitter together with the "Boat Anchor Buddy," by Ralph E. Taggert, WB8DQT.

Every issue of QST is filled with the news and features you need to keep active in Amateur Radio. Find all this and more in the November

issue of QST:

- Build an inexpensive HF power attenuator.
- Learn a different way to assemble PL-259 plugs.
- See PSK31 "up close."
- Put your remote antenna tuner to work on 160 meters.
- Turn back the clock with an easy single-tube transmitter.
- See how students "Reach for the Stars" with Amateur Radio.
- ...and much more!

==> + TED RAPPAPORT, N9NB, NAMED RECIPIENT OF IEEE EDUCATION AWARD

Ted Rappaport, N9NB, of New York City, has been named the recipient of the 2012 William E. Sayle Award for Achievement in Education, given by the Institute of Electrical and Electronics Engineers (IEEE) Education Society. This prestigious award is presented annually to an IEEE Education Society member who has made significant contributions in engineering education. Rappaport, an ARRL Life Member, is a Professor of Electrical and Computer Engineering at the Polytechnic Institute of New York University. According to the university, Rappaport was selected to receive the award "for his exceptional technical and varied contributions in the creation of research centers, educational books and software and for the creation of products in the wireless industry." Read more here <http://www.arrl.org/news/ted-rappaport-n9nb-named-recipient-of-ieee-education-award>.

==> + AT THE WORKBENCH: ATTENTION KIT BUILDERS -- THE ARRL WANTS TO HEAR FROM YOU!

The ARRL wants to hear from kit builders about simple, useful, educational and exciting kits. These kits should have a high probability for success and would serve as stepping stones for more advanced projects. We are looking all sorts of kits, but RF detector kits that work in the 380 MHz-2.5 GHz range are of special interest. The kits should also have a "Wow, I built this and it works!" factor. If you know of such a kit, please let us know by filling out a simple form here <http://www.arrl.org/technology> by October 31.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Sunspot activity rose this week, with the average daily sunspot numbers up more than 45 points to 97, while the average daily solar flux rose more than 24 points to 129.2. We saw high geomagnetic activity on October 12-14, with the planetary A index at 12, 38 and 19, the college A index (in Alaska) at 18, 70 and 33 and the mid-latitude A index (measured in Virginia) at 12, 28 and 20. On October 13, a solar wind spilled through a gap in the Earth's magnetosphere, making for unsettled conditions, and aurora were seen across the northern tier states in the US. The latest prediction is for the solar flux to peak at 135 (not at 150 as predicted earlier) for October 18-21, 130 on October 22-23, 125 on October 24, 130 on October

25-28, then down to 125, 120, 115, 110, 105 and 100 for October
29-November 3, and then 105 on November 4-5, peaking again at 140 on
November 12-14. The predicted planetary A index is 8 on October 18-19,
5 and 8 on October 20-21, 5 on October 22-November 7, then 10, 20, 15,
12, 8, 8, 10 and 8 on November 8-15, and down to 5 again on November 16
through the end of November. Look for more on the ARRL website on
Friday, October 19. For more information concerning radio propagation,
visit the ARRL Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

This Week in Radiosport

This week:

- October 15-19 -- ARRL School Club Roundup

Amateur Radio Newsline(tm) Report 1836 - October 19 2012

Amateur Radio Newsline report number 1836 with a release date of October 19 2012 to follow in 5-4-3-2-1.

The following is a QST. A case to be heard by the U.S. Supreme Court could limit or curtail your ability to resell your personal property including used ham radio gear; the Department of Homeland Security to provide emergency communications training at Hamvention 2013; ham radio gets new responsibilities from Army MARS; the FCC asks assistance in tracking down cellphone and GPS jamming devices. We will look into that and more on Amateur Radio Newsline(tm) report number 1836 coming your way right now.

(Billboard Cart Here)

**

LEGAL WRANGLING: SUPREME ASKED TO RULE THAT PUBLIC HAS NO RIGHT TO RESELL OWNED GOODS

How would you feel if there was a law that kept you from selling or even giving away a piece of ham gear or anything else you think you own without first getting permission from the original manufacturer? Sound crazy? Well this is a legal precedent that the United States Supreme Court has been asked to rule on as we hear from Amateur Radio Newsline's Mark Abramowicz, NT3V:

--

Imagine, if you possibly can, the Dayton Hamvention, the Orlando Hamcation or the Huntsville Hamfest with no flea market.

Or, what about ham gear disappearing altogether from eBay or Craigslist.

Some fear this could be a real possibility, depending on how the U.S. Supreme Court rules in a case that could impact a nearly 104-year-old doctrine recognized by the high court that allows us to resell items without fear of a copyright holder coming after us.

The doctrine essentially says the copyright holder had control only over the first sale.

But a case decided last year in the U.S. Court of Appeals in the Second Circuit in New York has the potential to re-set that doctrine.

The case involves a man from Thailand who came to the United States in 1997 to enroll in Cornell University in Ithaca, N.Y.

The student found that the same textbooks they were asking him to buy in the book store could be had for much less in Thailand.

The man asked his relatives there to help him buy the books and send them back overseas to him in New York.

Later, the man got some entrepreneurial spirit and court documents in the case show he decided to start selling textbooks on eBay. There's some dispute as to how much the man made on the sales.

So, the publisher of the books objects and brings a suit against him.

The publisher admits it was charging less for books sold overseas, but it claims the man was guilty of copyright infringement. But the man counters his sales are covered by that first-sale practice.

The federal appeals court in New York upheld a lower court decision saying, no, that doctrine only applies to stuff produced in the United States and not to anything made overseas.

That court's ruling, in the view of some constitutional scholars, could now throw into jeopardy the whole idea of what you buy at flea markets, or yard sales and on-line sales of used goods.

Polk Wagner, a law professor at the University of Pennsylvania Law School here in Philadelphia, isn't ready to push the panic just yet with that conclusion.

Wagner says in this case, it's about copyrights...

"So the question here that the Supreme Court has got to wrestle with is to try and figure out how these two provisions of the copyright act -one that says that you can't import anything that's copyrighted without the permission of the copyright owner and also one that says lawful owners of books are allowed to do what they want with the copies of the books that they purchase," Wagner says.

He says there's a bit of conflict here...

"So, the legal question is how those two provisions of the Copyright Act work together or don't as the case may be," Wagner says. "Courts have wrestled with this for the last 5 or 10 years and have not reached any satisfactory conclusions. So, hence, the Supreme Court is going to take it up."

eBay has filed a brief on the issue warning that the Second Circuit's ruling would have significant consequences for trade and ecommerce. And, in a broader reach, the company says it could hurt small businesses and consumers and cost jobs in the U.S.

Wagner, the University of Pennsylvania law professor, says there's another area and it may involve patents.

For example, he says in cases involving ham gear, it's legal to buy overseas and import the gear. And, there's nothing under the patent laws that prevents you from reselling the gear.

However, Wagner says there's another matter and it has to do with software that may be included or needed to operate the gear.

And, while most companies or software developers will sell you a license to use their software, it's not the same thing as selling you a book. And, while Wagner says that's not at issue here it eventually it could be sorted out by the courts in the future.

Stay tuned.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The Supreme Court is scheduled to hear oral arguments on the case on October 29th. If it does rule with the appellate court, it's likely that the matter would be brought to Congress to force a change in law. However that could take months if not years or even decades. Until then, consumers, including ham radio operators would be stuck between a rock and a hard place when trying to resell their belongings without breaking the law.

(Marketwatch, other published reports)

RESCUE RADIO: DHS TO TEAM UP WITH DAYTON HAMVENTION ON EMCOMM TRAINING

Department of Homeland Security's Office of Emergency Communications is teaming up with the folks in Dayton to provide free emergency communications training in conjunction with Hamvention 2013. Amateur Radio Newsline's George Bowen, W2XBS, reports:

--

The Department of Homeland Security's Office of Emergency Communications will be on hand at the next Dayton Hamvention. This to conduct its nationally recognized NIMS/ICS compliant Auxiliary Emergency Communications course.

The course itself focuses on a number of important aspects of emergency communications. These include auxiliary communications interoperability, emergency operation center etiquette, on-the-air etiquette, FCC rules and regulations, auxiliary communications training and planning, certification and accreditation to mention only a few. The objective of the training is intended to supplement and standardize an operator's basic knowledge of emergency amateur radio communications in a public safety context.

This Office of Emergency Communications workshop is designed for auxiliary emergency communicators who volunteer to provide backup

emergency radio communications support to public safety and emergency response professionals and their agencies. Typically this includes amateur radio communicators from groups such as MARS, ARES, RACES, SATERN and the like. The course will actually be held just prior to Hamvention, but still in the Dayton area and as part of Hamvention 2013.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, st the North-East Bureau in Albany, New York.

--

Details on any pre-required training for this free course is on-line at www.hamvention.org. Information on for registering for this special free course will be posted at the same site in the near future. (Hamvention.org)

**

ARMY MARS: MORE RESPONSIBILITY FOR HAM RADIO VOLUNTEERS

Stephen G. Klinefelter, Chief of the Arrmy's Military Affiliate Radio System better known as Army MARS has announced a major leadership realignment. This, at a conference of the auxiliary's Region Directors held Sept. 12th to the 14th in Dallas, Texas.

Under the new terms, volunteer ham radio operators have assumed day-to-day management responsibility previously exercised from the MARS headquarters at Ft Huachuca, Arizona. Each of the auxiliary's 11 regions will be under command of its director. Together the 11 directors will form a policy-making Governance Executive Board for the auxiliary as a whole.

This is a striking revision of the military's traditional top-down chain of command. It was symbolically activated at the first national leadership conference in the Military Auxiliary Radio System's 87-year-history.

Army MARS reports to the Network Enterprise Technology Command which manages Army computer networks and communications systems worldwide. Chief Klinefelter, who retired as a full colonel in the Signal Corps after 31 years, returned to the Network Enterprise Technology Command as a senior civilian employee and is Deputy Operations Officer G3. He added the MARS post last spring.

An in-depth article on the changes to Army Mars authored by those involved is on the Web at www.eham.net/articles/29106. (Army MARS, QRZ.com)

ENFORCEMENT: FCC SAYS THAT UNREGULATED PART 15 DEVICES INTERFERING WITH AVIATION WEATHER SYSTEM

The FCC has acted to curb interference to aviation Terminal Doppler Weather Radars Systems coming from unlicensed Part 15 devices. Amateur Radio Newsline's Norm Seeley, KI7UP reports:

--

The FCC's Enforcement Bureau recently took action against several companies for operating devices that caused interference to Terminal Doppler Weather Radars maintained by the Federal Aviation Administration. Terminal Doppler Weather Radars systems operating in the 5600 to 5650 MHz band are used by the FAA to obtain quantitative measurements for gust fronts, wind shear, microbursts, and similar information.

Investigations have been conducted by the FCC, the FAA, and the National Telecommunications and Information Administration in several areas of the United States and Puerto Rico. These have revealed that much of the interference stems from wireless devices sharing the same band as Terminal Doppler Weather Radars systems, and operating outdoors in the vicinity of airports at high elevations that are line-of-sight to the radar installations. Also that most are operating inconsistent with the FCC Part 15 Rules.

The Enforcement Bureau and the FAA are continuing to investigate additional areas where interference is reported to Terminal Doppler Weather Radars systems. The FCC says that it will continue to take appropriate enforcement action as necessary.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More information on this matter is available in FCC release DA 12-459 released on September 27th and FCC Enforcement Asdvisory 2012-07 released on the same date. (FCC)

**

ENFORCEMENT: FCC CREATES TOLL FREE NUMBER TO REPORT CELLPHONE AND GPS JAMMING

The FCC wants your help in locating anyone who is using a cellular telephone or GPS jamming device and to do this the Commission's Enforcement Bureau has launched a dedicated jammer tip line at

1-855-55-NOJAM or 1-855-556-6526. This, to make it easier for the public to report the use or sale of illegal cell phone, GPS or other signal jammers.

As has been said many times before, it is against the law to use, import, advertise, sell or ship a cellular telephone or GPS jammer or any other type of device that blocks, jams or interferes with authorized communications, whether on private or public property. As such, members of the public are being asked to call the FCC's toll free Jammer Tip Line immediately if you are aware of the ongoing use of a cell, GPS, or other signal jammer. Also please call if an employer operates a jammer in a workplace; you observe a jammer in operation at a school or college; you observe an advertisement for a jammer at a local store or you observe a jammer being operated on your local bus, train or other mass transit system.

One warning. This number is only for use to report cellphone or GPS jamming devices. Please do not call it to report that your favorite repeater is being jammed or that your QSO on 20 meters is being interfered with. Those matters will not be handled on this telephone line and will be of no interest to those taking cellphone or GPS jamming device calls.

Once again, the number where to report the use of cellphone or GPS jamming is 1-855-55-NOJAM or 1-855-556-6526. And calling that number is toll free. (FCC)

**

HAM HAPPENINGS: K6H - HAM RADIO CELEBRATES HOLLYWOOD FROM CBS STUDIO CENTER STAGE 9

Ham Radio Celebrates Hollywood will be a special event operation held on Sunday, October 28th from 1600 to 2000 hours U-T-C. Sponsored by Southern California's PAPA repeater system, the event using the callsign K-6-H will originate from the Stage 9 of the CBS Studio Center facility in Studio City, California.

The historic Studio Center has been the production facility for such hit programs as Will and Grace, That 70's Show, Malcolm in the Middle, Spin City, Just Shoot Me, and 3rd Rock From the Sun. Nine seasons of Seinfeld were filmed on Stage 9 except for the first four episodes, which were shot at at another facility. Stage 9 is currently the home of ABC TV's Last Man Standing, starring Tim Allen. As such, several of the hams who work on Last Man Standing will be hand to host the PAPA operators.

A number of R-F and non-RF paths will be available to contact the stage 9 commemorative operation. These include HF, VHF, UHF, D-STAR, Echolink and IRLP. The operation will also be monitoring the Broadcast Employees Amateur Radio Society ABC and Disney interconnected amateur repeater system. This links W2ABC in Manhattan, New York, WD4WDW in Orlando, Florida and WB6AJE in Los Angeles. The BEARS system can be

accessed on Echolink at WD4WDW-R.

A schedule of operating times and frequencies will be published on the PAPA website at www.papasys.com. To facilitate contacts during the event, operators will blog in real-time at www.facebook.com/KA0XTT and on @NN6JA on Twitter. A special, limited edition QSL card will be issued to all confirmed contacts during this fun national event. (NN6JA)

**

EMERGING TECHNOLOGY: ALL DIGITAL AM HD TESTING ON ITS WAY

Information is surfacing regarding NAB Radio Technology Committee plans to test all-digital AM H-D Radio technology on an existing full carrier AM radio station.

The committee has been meeting since last November to discuss technical options for the revitalization of AM. Testing would quantify both indoor and outdoor coverage. In general, the goal is to verify whether the station coverage and robustness are improved with an all-digital signal in both day and night transmission. Also to quantify any change. There's little technical data in the public arena for all-digital AM operation.

Glynn Walden is CBS Radio Senior Vice President of Engineering. He said during the fall NAB Radio Show that a test station has been chosen with testing likely to begin right after the presidential elections. Walden and other committee members declined to identify the facility but some believe it will be a CBS station in an area that could be characterized as a medium sized market. You can read more about this AM broadcast digital experiment on-line at tinyurl.com/all-digital-am. (CGC, RW)

**

HAM HAPPENINGS: 2012 AMSAT SPACE SYMPOSIUM REMINDER

And a reminder that the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th at the Holiday Inn Hotel at Orlando-International Airport. Downloadable paper registration forms in MS-Word and PDF formats are available at tinyurl.com/amsat-2012-reg. The Symposium Schedule web page has been updated with links to find more information about the planned activities. You can find it in cyberspace at tinyurl.com/symposium-program. More on the overall event is at www.amsat.org (AMSAT)

**

HAM HAPPENINGS: RAC COLLECTING CLUB MEMBER BIOS FOR 2012 MEMBERSHIP DIRECTORY

If you are a member of the Radio Club of America, please listen up. RCA is in the process of collecting data for the organizations 2012 Membership Directory that will include biographies. If you are a club member who has not yet done so, please go to tinyurl.com/rca-survey-2012 and fill out the online form. Also, please be certain to keep all biographical information on the form as space is limited. (RCA)

**

AWARDS: CQ INTRODUCES 40 CQ ZONES ON 160 PLAQUE

CQ has announced the availability of a special plaque for those who have achieved contact to all 40 CQ zones on 160 meters. This is considered the most difficult of all amateur radio awards to earn and because of this the Worked All Zones 160 Meter Plaque recognizes that receiving it as one of the elite Top Band DXers. If you believe you qualify, please contact W-A-Z Award Manager Floyd Gerald, N5FG, by e-mail to n5fg (at) cq-amateur-radio (dot) com for further details. (CQ via Facebook)

**

NAMES IN THE NEWS: DX SUMMIT APP

Some names in the news. Kevin Schutz has released a freeware application he calls code.google.com/p/dxer/. Its primary purpose is gather information from DX Summit. Schutz says that with this data and his application, you can easily find out if you already have made a contact or not with that country. More is on-line at the shortcut of tinyurl.com/dx-summit-app. (Via e-mail)

**

NAMES IN THE NEWS: W2ML ORAL HISTORY VIDEO RELEASED

And Steve Mendelsohn W2ML, who passed away earlier this year, was an extremely active, enthusiastic member of the ham radio community. Among other things, he was an ARRL Vice-President and ran the ham radio communications for the New York Marathon. Professionally he was a broadcast engineer for CBS and ABC, and did frequency coordination for the National Football League spending 13 years as the Game Day Coordinator for the New York Jets. Then tragedy struck as he was diagnosed with Pancreatic Cancer and given only a short time to live.

Knowing that he had a vibrant story to tell, his lifelong friend Bill Pasternak, WA6ITF, interviewed Steve at the 2011 Pacificon hamfest. Steve was the conventions guest of honor and it gave them what would be a final opportunity to video record an oral history of Steve's life.

Steve Mendelsohn passed away early in the morning of May 23rd. It was decided that the anniversary of the date of the interview would be apropos for its public release. As such it's now available at two locations.

Gary Pearce, KN4AQ, who edited the production, has it available at his HamRadioNow website at tinyurl.com/w2ml-video. It's also on YouTube at tinyurl.com/w2ml-life-story.

Even if you knew W2ML, and many hams did, you may yet learn a few things you did not know. If you didn't, then take this rare opportunity to hear the story of someone that many call a true trendsetter in the hobby and whose legacy will remain with us for decades to come. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

WORLDBEAT: QATAR TO HOST FIRST MIDDLE EAST HAM RADIO FESTIVAL

The city of Doha will host the Qatar's first International Festival for Amateur Radio in December. This according to H E Abdullah bin Hamad Al Attiyah, who is the Chairman of the Administrative Control and Transparency Authority and the vice-chairman of the US Amateur Radio Society.

Al Attiyah, who is also chairperson of the board of directors of the Qatar Amateur Radio Society says that the festival will include a contest between amateur radio operators from all over the world. About 100 hams from across the globe will be invited to the festival to take part in the competition. The Qatar Amateur Radio Society will also establish five amateur radio stations in different parts of Doha during the festival, including the society's office and the festival venue itself.

Announcement of an exact date for this event is expected to be announced shortly. The festival is being dubbed as the first of its kind in Middle East and will take place in conjunction with the Qatar National Day celebrations.

Doha is the capital city of the state of Qatar and is located on the coast of the Persian Gulf. (The Peninsula)

**

WORLDBEAT: INDIA TO ADD 839 NEW FM BROADCASAT STATIONS

India's public service broadcaster, Prasar Bharati Broadcasting, plans to soon set up 839 new FM stations in 290 cities in that nation. According to India's Secretary of the Union Information Broadcasting Ministry, these new radio stations will be a part of the country's

expanding private sector. The regions of Jammu and Kashmir are to be the focal points for what is being termed as this new broadcasting initiative. (Hindu Business Line, The Statesman, RW)

**

WORLDBEAT: HOW SOLAR STORMS CREATE THE NORTHERN LIGHTS

The British Broadcasting Corporation has released a short video that explains in laymen's terms how solar storms affected the Earth's magnetic field to create the Aurora Borealis. The news story features Professor Dag Lorentzen who uses a simple diagram drawn in the snow to explain how this phenomenon of nature takes place. The story was taped in Svalbard and you can see it on line at tinyurl.com/bbc-aurora-story. (Southgate, BBC)

**

HAM RADIO IN SPACE: HAMS ASKED TO HELP FIND MISSING F1 CUBESAT

An article published on the AMSAT-UK website reports that the F Space team at the F-P-T University in Viet Nam are requesting Amateur Radio operators continue to listen for their F-1 CubeSat. The mini satellite went missing shortly after it was deployed from the International Space Station on October 4 but never heard on Earth.

F 1 was expected to begin transmitting beacon alternatively on its main and backup channels 30 minutes after deployment. Its operating frequencies are on 437.485 MHz while in daylight and 145.980 in satellite darkness.

More information and guide to download F-1 telemetry decoder can be found at tinyurl.com/f1-info. Decoded data can be submitted on using a File Transfer Protocol client to thuvt (at) fpt (dot) edu Dot)vn. Audio recordings are highly appreciated. (F1 Cubesat Team)

**

HAM RADIO IN SPACE: ISRAELI GPS CUBESAT BEING BUILT

Israel is planning to launch a student built ham radio microsat. The Space Duchifat-1 is an experimental and educational CubeSat being developed and built by students at the Space Laboratory of the Herzliya Science Centre.

The CubeSat will carry an APRS digipeater operating on 145.825 MHz and a UHF/VHF 1200 bps B-P-S-K transceiver that can provide a CW beacon and an FM to DSB transponder.

The main mission of the satellite is to transmit real-time information via packet radio from a Low Earth Orbit using the Automatic Position Reporting System protocol. The satellite will allow remote traveler's to access the bird for worldwide position, status reporting and messaging. This using simple handheld or mobile radios with

omni-directional whip antennas.

The project is directed by Dr. Ana Heller with support from the Herzliya city municipality and the Israeli Amateur Radio Club. At this moment no launch date or orbit details are available. (ANS)

**

ON THE AIR: SAQ TO TRANSMIT ON UNITED NATIONS DAY

On the air, word that the Alexander Association will activate the giant SAQ radio-wave alternator on Wednesday, October 24th. This, in recognition of United Nations Day.

Transmissions will begin at about 10:10 UTC, and a special commemorative message will be sent at 10:30 UTC using CW on 17.2 kHz. Unfortunately, reports from the transmission cannot be confirmed by QSL card.

The Alexander Association is a group of European radio enthusiasts who preserve and demonstrate the old ultra long wave Alexanderson electro-mechanical transmitter located at Grimeton, Sweden. The site houses the only working Alexanderson rotating alternator radio transmitter in the world and is classified as a World Heritage Site.

More on the transmitter is at the society Website at www.alexander.n.se (Association Alexander)

**

ON THE AIR: CELEBRATING 150 YEARS OF THE PACIFIC RAILWAY ACT

And the Union Pacific Amateur Radio Club will sponsor Special Event UP150 on December 1st. The operation commemorates the 150 years since President Abraham Lincoln signed the Pacific Railway Act of 1862 and directed the Union Pacific and the Central Pacific to construct a transcontinental railroad. The event will use the call sign WOUPR. It will begin at 6am Central and end at 8 pm Pacific. Many present and past Union Pacific employees are expected to operate during that time frame in hope of talking with you. A special QSL will be available. More information is on-line at www.pocatelloarc.org/uprr. (Union Pacific ARC)

**

DX

In DX, F1NGP will be active stroke FG from Saint Francois Island in Guadeloupe through October 26th. He will be operational on 40 through 10 meters on CW , SSB , RTTY QSL via his home call.

G3RWF who was expected to be active this month from Uganda 5X1NH has announced that his trip is now postponed. No reason was given.

WJ2O will be operational as 8P9DF from St. Philip, Barbados between November 21st and the 28th. Activity will be on all HF bands using mainly CW and as an entry in the CQ World Wide DX CW Contest on November 24th and 25th. Outside of the contest, he will be on 30, 17 and 12 meters. QSL via WJ2O.

HB9OAU will be on the air from the Maldives as 8Q7AU between November 26th and December 11th. Activity will be holiday style on 80 through 10 meters SSB only. QSL via his home callsign, direct or by the Bureau.

N3IQ will be operational as C6AQQ from Nassau's Providence Island between October 25th to the 31st. Activity will be mostly on the lower bands. QSL via N3IQ, direct, via the bureau or electronically using Logbook of the WQorld or eQSL.

Lastly, ZL1LC planning to be operational from the Chatham Islands hrom March 21st to the 27th of 2013 as Zed-L-7-L-C. He planning to be active PSK only. No times, frequencies or QSL route have yet been announced.

Above from various DX news sources)

THAT FINAL ITEM: WHAT EVER HAPPENED TO THE PRINCIPALITY OF SEALAND

And finally this week, do you remember Sealand? That's the self-proclaimed principality that also once claimed to be a DXCC entity. Well its still there but changes are in the wind. Amateur Radio Newsline's Cheryl Lasik, K9BIK, takes a look back into recent history:

--

Sealand is a former United Kingdom anti-aircraft tower legally known as Roughs Tower. Its located in the North Sea some 7 nautical miles off the shore of Suffolk, England. In 1967 the tower was occupied by a retired army major named Paddy Roy Bates along with his family in 1967. On September 2nd of that year Major Bates declared the fort an independent sovereign state from the UK and renamed it Sealand. He went on to establish Sealand as a nation in 1975.

Sealand had its own constitution, flag, national anthem, stamps, passports and currency. There were even a few DXpeditions to Sealand. This included a operation by a group of German DX'ersin 1982 using Sealand's self proclaimed and unofficial callsign prefix of S-1-A. Later, in 2000 there was the Dutch-lead 1SLA1 operation, but neither of these was awarded DXCC status.

Now comes word that Major Bates passed away on October 9th, in a senior care home Essex England at the age of 91. This, after a long battle with Alzheimer's.

But the Sealand saga is far from over. His wife Joan is now expected to take over the rule of the self proclaimed nation. Also, with Sealand is

managed by the Bates family as if it were a recognised sovereign entity, and they are its hereditary royal rulers. Bates son is known as "His Royal Highness Prince Michael." He has also been referred to as the "Prince Regent" by the Bates family since 1999. In this role, he apparently serves as Sealand's acting "Head of State" and also its "Head of Government". Also, at a micro nations conference hosted by the University of Sunderland in 2004, Sealand was represented by Michael Bates' son James, who was referred to as "Prince Royal James".

Butr whomever takes on the leadership of Sealand, one thing is fairly certain. Mounting a DXpedition to Sealand in the hope of establisghing it as a new DXCC entity, woyuld likely be a very expensive waste of time.

For the Amateur Radio Newsline, I'm Cheryl Lasik, K9BIK, in Zion, Illinois.

--

According a Wikipedia, the Sealand News says that a movie about Sealand is currently in development and scheduled to be released in 2013. More about this interesting location is on-line at www.sealandgov.org and also at wikipedia.com. (OPDX, Wikipedia)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline(at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a quick word of congratulations to Amateur Radio Newsline's Heather Butera-Howell who is now Heather Embee. Heather and her new husband Jason Embee were married last weekend in Pennsylvania. Please join with us in wishing Heather and Jason many, many years of happiness and all good things together.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Don Wilbanks, AE5DW, in southern Mississippi, saying 73 and we thank you for listening.

JOTA THIS WEEKEND (1:30)

GRANTS SCHEME

As reported in recent weeks, the 2012 WIA Clubs Grant Scheme closed for

entries on August 20th. 10 arrived in time, with one 9-days after the cut

off.

The Grants Committee consisting of Reg VK7KK, Peter VK3KCD and Bill VK4ZD had expected to announce the results tomorrow, Monday 22nd October. The timeline for this process has been extended. We will bring you updates and result as soon as they are available.

Good luck to all submissions and here's a gentle prod for everybody else next year;

"The WIA Club Grants Scheme promotes the advancement of amateur radio through WIA Affiliated Clubs by financially supporting useful and/or innovative projects undertaken or to be undertaken by Clubs."

(http://www.wia.org.au/members/clubs/clubgrant/)

30 Meter Multi Mode Weekend

The 30 Meter Multi Mode Weekend is taking place on the weekend of October 27th and 28th 2012 on the 10 MHz - 30 Meter Band (10.100 - 10.150). The objective is to promote experimenting and using different digital modes on the unique 30 Meter Band. For a more detailed listing of this event see the News Page at www.30mdg.net

The 30 Meter Digital Group (30MDG) is celebrating-.5 year Anniversary, 6,000 members (120DXCC), and its 30MDG Award Program issuing over 31,000 Award Certificates. 30MDG is FREE to join, FREE Awards program with FREE Award software - Ultimate 30 or U30).

Good Luck and as always this is NOT a contest - no start or stop times, no exchanges, no logs to send to anyone, no winners or trophy - this IS to PROMOTE AWARENESS of the 30 METER BAND and the only winners are those that participate and have fun!

(Don KB9UMT 30MDG #0001-Founder)

(aside: worldwide management/committee, including Laurie VK3AMA as Awards Manager, Database Programmer and manages the 30m Digital Spot page on the website. Yahoo Group "30MDG" typically sees 50~60 messages a month)

(wia broadcast feedback page)

QUICK CORRECTION

The VK7 "Mil-ena" Hamfest is actually in "My-eena". Somehow an extra 'ell' got in there in the middle of our newscopy.

Doing a quick map search on the internet you'll see that the closest "Milena, is a [municipality] in the Province of Caltanissetta in [...] Sicily, located about 80 km southeast of Palermo and about 30 km west of Caltanissetta."

This is clearly a little too far to visit by car on the weekend, so our unreserved apologies for misspelling, and mispronouncing Miena (My-eena).

Thanks to VK7 Regional News & Broadcast Coordinator, Justin VK7TW for bringing it to our attention this week.

(http://en.wikipedia.org/wiki/Milena,_Sicily)

HAMS ACROSS AUSTRALIA.

WICEN Call for Assistance - Fitz's Challenge Bike Ride - Sunday 28th October

The Community Service Arm of the Canberra Region Amateur Radio Club, is seeking people to assist with two events in coming weeks:

Firstly, the Annual "Pedal Power Fitz's Challenge Bicycle Ride" taking place on Sunday 28th October.

Information of the event itself can be found at http://www.fitzs.com.au/.

For this, WICEN operation will be on VHF using the Portable Repeater VK1RWP to be installed on Mt Tennent, with VK1RBH on Bulls Head used for the latter parts of the afternoon.

Second event is the "NSW Carriage Driving Championships" which is taking place on Sunday 4th November at "Witwood" between Bungendore and Braidwood.

The WICEN operation will be on VHF and UHF simplex frequencies with the majority of operators being able to use handheld radio's.

It is normal to meet onsite at around 8:00 AM for the now standard Egg & Bacon Rolls for breakfast before a day of keeping track of the 1, 2 & maybe 4 horse power vehicles undertake their "marathon" & "obstacle" runs. This is a great one to take the family to, especially if you have horse lovers in

the family. Finish time is normally early afternoon.

If you can assist for either event, please notify Matt VK1MA and Phil VK1PL

by email to wicen@crarc.ampr.org

(Phil Longworth VK1PL)

(Deputy State Coordinator, WICEN ACT)

VK3

YARRA VALLEY AMATEUR RADIO GROUP HAMFEST, SUNDAY 11TH NOVEMBER

>From 10:00am - 2pm

The Yarra Valley Amateur Radio Group Hamfest is on again.

This year the event will be held in Yarra Glen at the Gary

Cooper Pavilion 16 Anzac Avenue Yarra Glen. Melway 274 K1.

Over 20 tables of goodies at bargain prices. Call in on

the VK3RYV repeater 146.725MHz FM.

If you would like to book a table for this event please call

Steve on 0418103487, email yvarg yvarg.org.au .

The club will put on a BBQ. Tea and coffee will be available free.

Yarra Valley Hamfest 2012 Don't miss out on the bargains.

Web: http://yvarg.org.au

SOUTHERN PENINSULA AMATEUR RADIO CLUB (SPARC), ROSEBUD HAMFEST

SUNDAY 25TH NOVEMBER

This hamfest will be held at the Eastbourne Primary School

auditorium, Allambi Avenue, Rosebud, Victoria, on Sunday

November 25th 2012.

The event is now on Facebook under the name of "Rosebud

RadioFest". Check in to stay tuned about our progress, leave

a message, ask questions or just say "Hi".

The Rosebud Hamfest contact is:

Mark Bruechert (VK3PDG)

markybradio at gmail.com & phone 0407844063

WICEN Vic: Australian 4 Day Enduro Event: 24 - 26 October

The Australian 4 Day Enduro motorbike event is scheduled for
this Wednesday to Friday inclusive.
WICEN Vic is a couple of operators short, so if you could assist,
it would be greatly appreciated.
The event is being run in the area east and north of Warragul, with
the event HQ at Buln Buln (just north of Warragul) and the event
itself in the area south and west of Noojee. Access to checkpoints
is over good gravel roads; 4WD is not required.
The communications will be 2m voice with 40m HF as backup.
If you can assist, please contact John Morrissey VK3ZRX on
0419 872 772 or jbmorrissey@netspace.net.au. Alternatively,
you can contact Chris Morley VK3CJK on chris.morley@gdfsuezau.com.

Amateur TV - In South East Queensland. Hello, this is Peter, VK4EA.
The Brisbane Digital Amateur TV Group have moved the VK4RKC 70cm output to
446.5MHz in line with Amateurs losing the 420 to 430MHz spectrum. ACMA
issued the same output frequency to VK4RKC as VK4RMG (South East Queensland
ATV Group) after much negotiation between BDATV, the WIA and the ACMA. What
this means is now one 70cm ATV frequency has to be shared by two groups
with similar interests. We are hopeful a gentlemens agreement will be
reached between the two Groups soon to ensure all ATV enthusists can
utilise this valuable resource without interference.
To receive VK4RKC you need a settop box capable of manual tuning and an
antenna pointed toward Oceanview. Appropriate settop boxes are available
for less than $50 from various retailers. To transmit to VK4RKC you can
use either 1250 MHz DVB-S, 1250 MHz FM or a very economical solution for

sub $100 via 2.415GHz. VK4RKC will continue to maintain the 1250MHz FM input so your existing investment in ATV is not forgone.

Repeater id beacon has been reduced to 30 seconds as per the WIA conditions, put out a call on 147.400 MHz (simplex) if need a signal to help with setting up your receiver.

Every Monday evening the Redcliffe and Districts Radio Club broadcast's their meetings live to air from about 7.30pm, and also keep an eye out for regular programming from VK4BTV screening HamNation and other Amateur Radio related programs at the same 7.30 pm time slot. This is a great example of ATV usage, we welcome any local Amateur Radio related content at any time of the day, please get in touch if you are interested.

The email and website addresses are in the text edition of this broadcast (badtv@people.net.au - http://members.optusnet.com.au/~cardenrj/), or you can just Google "VK4RKC".

Liasion is via the WIA band plan specificed ATV liasion simplex frequency - 147.400MHz.

This has been Peter, VK4EA, on behalf of the BADTV Group

[Audio Provided]

HISTORY OF JOTA (2:00)

SILENT KEY

Ray Naughton VK3ATN

Ray passed away on the 15th of September. Ray was 83.

Ray had a wealth of radio knowledge but was best known for his moon bounce work in the early sixties. In fact Ray Naughton was the first in the southern hemisphere to work stations in the northern hemisphere by Moonbounce.

Quite a feat in the early sixties when most amateur equipment used valves and was largely home made. And off course without the aid of computers as we know them today.

Through that work Ray was presented with an ARRL award and also received a trip to America where he traveled thousands of miles visiting leading moon

bouncers and many other radio installations.

Ray operated ATN Antennas at Birchip over a period of some 40 years.

Noel VK3FI reports that he last spoke to Ray several months ago, and although he had been in and out of hospital after a series of strokes - he was still saying "when I get back to the factory etc". Ray certainly had a determined outlook right to the end.

Ray Naughton will be remembered within the Sunraysia Radio Group through the ongoing "VK3ATN Technical Merit Award"

The aim of that award is to encourage Sunraysia Radio Group members to become more involved with technical projects. The VK3ATN Technical Merit Award is presented annually after being decided by nomination and members votes.

A heavily edited version of Ray VK3ATN presentation at the 2009 Sunraysia Radio Group AGM, may be viewed by going to You Tube and searching VK3ATN.

Ray leaves xyl Margaret, Sons Trevor, Peter, David and daughter Jennifer.

Vale - Ray Naughton VK3ATN

(Many articles from QST 1960's editions found online)

(http://www.ok2kkw.com/eme1960/eme1965eng.htm)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, AR Victoria and the WW sources of the WIA.

Multiple changes proposed to US Amateur Service Rules

The FCC has released a 'Notice of Proposed Rule Making' which includes a number of changes that could redefine large swathes of the United States Amateur Radio service.

While not effecting Australian Amateurs they are interesting as points of discussion and comparison to our own regulatory arrangements.

In brief, a change to rules to no longer require retesting of hams who have let their licence expire. The argument in favour of the change cites that many amateurs maintain their payments while not actively engaged in the hobby and are not required to reassert their competency. They are looking for acknowledgement of past examinations in the same way we do here, in VK.

In the area of training, the FCC seeks a change from the requirement of 3

examiners to two and to allow for modern alternatives for remote testing stations like those already employed widely in the enterprise and education sectors.

What is of more interest to VK amateurs is the possibility of more emmission types entering the amateur service.

Here's Amateur Radio Newsline's Mark Abramowicz, NT3V, introducing comments by CQ Magazine's editor:

--

Rich Moseson, W2VU, is editor of CQ Magazine, and Amateur Radio Newsline called upon him for his take on the proposals.

Moseson says he's encouraged by the proposal looking at the modes for amateur radio transmissions. He says there are too many restrictions and limitations on hams which can stifle rather than encourage experimentation.

He says the FCC is wise to look at the issue, especially considering the area of TDMA or Time Division Multiple Access technology for amateur radio.

"I think that the more that we can do with them as hams, in addition to what the commercial world is doing, the better off we'll all be because that competition is a fact of life," Moseson says. "You know, you look at our microwave bands which are really where a lot of the future is going to be - 2.4 Ghz, 5.8 Ghz - these bands are already shared.

"And if we can make better use of that sharing so that we can do what we want to do without bothering the other people and without having them bother us then that's great we can all get by very well."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V in Philadelphia.

OPERATIONAL NEWS - DATELINE 2012

WW JOTA/JOTI October 21

VK3 Melbourne Cup Day 160m Net November 6

VK Spring VHF / UHF Field Day November 24-25

HOW TO TALK TO A SCOUT ON JOTA (2:00)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

The Morning Coffee Break Net

A long established tradition in VK3 is a net on 1843 kHz in the AM mode running from 11am to noon Monday to Saturday.

Regularly participants of this Australian net seek advice on their equipment or antenna problems, restoration of old gear and where to get bits and parts. It seems that there's always someone who can come up with the answers and good advice including experienced people who have worked in the broadcasting industry.

For those unable to get on air at 11am, the Melbourne Cup Day public holiday in VK3 is one of a few opportunities to get involved, and typically seen as an opportunity to get portable.

So, with a couple of weeks left, and for many of you a long weekend before hand, there's still time to get a 160m antenna arranged and work topband!

You can find a number of youtube videos by Peter VK3YE with recordings of previous efforts, and some explaining the toploaded verticals and loop antenna designs on his website.

INTRUDER REPORT: CHINESE OTH RADAR GAIN HARASSING 40 METERS

The IARU Monitoring System newsletter reports that Radio Hargeisa is operating on 7.120 MHz and that Chinese surveillance radar in the amateur radio 40 meter band is now stronger than ever before

According to the report, the pesky Chinese Over the Horizon Radar had left the 40 meter band for few weeks. But now its reported back with a very strong burst system. One that is at least 10 kHz wide and has an almost S9 signal, world-wide. IARU Regions 1 and 3 are reported to be severely affected by it.

More about both of these situations is on-line at

tinyurl.com/china-radar-again.

EMERGING TECHNOLOGY: ULTRA HIGH DEFINITION TV SYSTEM

EXPECTS ITU APPROVAL

The next generation of super high definition television may

soon be on its way as we hear from Amateur Radio Newsline's

Jim Damron, N8TMW:

--

Ultra High Definition Television also known under the

acronym Super Hi-Vision, will likely be approved by the

International Telecommunication Union as the next generation

universal global television standard.

Developed by public broadcaster NHK at its Science and

Technical Research Laboratories, Ultra High Definition

Television is a system that delivers 16 times the resolution

of current high definition images. The new format can

deliver images with 33 million pixels through 7,680

horizontal lines and 4,320 vertical lines. It also boasts a

video refresh rate of 120 frames per second, as well as 22.2

channel multi-dimensional sound.

The system is collaboration between NHK along with

electronics manufacturers Panasonic and Sharp.

>From Charleston West Virginia, I'm Jim Damron, N8TMW,

Submitting news items

If you would like to submit news items for inclusion in the

VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on

wia.org.au

Remember the sooner you submit material the more the likelihood of it being

broadcast in the very next edition of WIA National News. Each item will only

be broadcast once, if you want a couple of mentions, please submit different

slants to keep your event 'fresh 'and always if the news room is to read your

item write in the 3rd person.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to

the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may

lodge a quick reply to let us know you read it, who knows, you might

even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize

their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to

active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia

and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit

material and do not necessarily reflect those of the rebroadcasters,

nor the National WIA, but are broadcast in the spirit in which they were

submitted.

Material may be reproduced in whole or in part, in any form, a credit to

WIANews wouldn't go astray...

Compiled by VK3GR@wia.org.au on behalf of the National WIA.

http://forums.qrz.com/showthread.php?365310-Amateur-Radio-Newsline-Report-1836--October-19-2012&goto=newpost

Amateur Radio Newsline☐ Report 1836 ☐ October 19 2012

Amateur Radio Newsline report number 1836 with a release date of October 19 2012 to follow in 5-4-3-2-1.

The following is a QST. A case to be heard by the U.S. Supreme Court could limit or curtail your ability to resell your personal property including used ham radio gear; the Department of Homeland Security to provide emergency communications training at Hamvention 2013; ham radio gets new responsibilities from Army MARS; the FCC asks assistance in tracking down cellphone and GPS jamming devices. We will look into that and more on Amateur Radio Newsline☐ report number 1836 coming your way right now.

(Billboard Cart Here)

**

LEGAL WRANGLING: SUPREME ASKED TO RULE THAT PUBLIC HAS NO RIGHT TO RESELL OWNED GOODS

How would you feel if there was a law that kept you from selling or even giving away a piece of ham gear or anything else you think you own without first getting permission from the original manufacturer? Sound crazy? Well this is a legal precedent that the United States Supreme Court has been asked to rule on as we hear from Amateur Radio Newsline☐s Mark Abramowicz, NT3V:

2062. NZART Headquarters Infoline issue 260

Newsgroup: rec.radio.amateur.misc
Date: 2012-10-19 19:15:11 UTC
From: ZL1AMW <zl1amw@gmail.com>
Message-ID: <00FF67C01518464D821812AC3EAE8058@TERMINALSERVER>

NZART Headquarters Infoline Issue 260

19th October 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Close Down of Channel 1

· Proposed Waipa District Plan

· Phasing out of International Reply Coupons

· FMTAG Notes

· VHF-UHF-SHF-EHF Contest Committee reminder

· 30 Meter Multi Mode Weekend

· ZL9HR DX'Pedition update

· Amateur Radio Property for sale – attachment.

Debby says…my sincere apologies for missing the October 5th issue of HQ Info-line, I was unable to come to work due to an injury. Sadly I have not received one complaint that it wasn't sent out…does this mean that no-one reads it?!

It is not NZART policy to advertise real estate, however there are extenuating circumstances stances to why this has been included in this issue. John Nixon (ZL1FR, VK4BJN) has a property here in New Zealand that he would love to be able to sell to a fellow ham. John is undergoing treatment and is critically ill in Australia, so has asked if we would help. John's contact details can be found on the pdf file attachment to this issue of HQ Info-line, together with a small photo and description of the property.

Talk soon…Debby ZL2DL

Close Down of Channel 1 and Amateur use of 50 to 51 MHz

As many members are aware, the bottom end of the 6 metre band (50 to 51 MHz) is to be returned to Amateurs once all Channel 1 television has ceased and the current management right for this expires.

What may not be known is that the last channel 1 television transmitter is not due to close down until November 2013 and the management right under which they operate does not expire until August 2015.

NZART is working with Radio Spectrum Management on arrangements for the period between when all the Channel 1 transmitters are turned off and the management right expires.

In the interim, the current arrangements will continue; an amateur in an area where channel 1 is no longer operating can apply for a permit to operate (see http://www.rsm.govt.nz/cms/licensees/types-of-licence/amateur-licences) by contacting Radio Spectrum Management at info@rsm.govt.nz or on 0508 RSM INFO (0508 776 463) .

Don Wallace, ZL2TLL, NZART Administration Liaison Officer

Proposed Waipa District Plan

Waipa District Council is reviewing its district plan and NZART has made a submission to incorporate the gains made in Tauranga City into the Waipa plan.

If you wish to read the NZART submission, either go directly to http://www.waipadc.govt.nz/NR/rdonlyres/A005939D-5CEC-4D3A-AA88-48CB4B6A9386/83429/260NewZealandAssociationofRadioTransmittersIncorpo.pdf

or you can navigate your way through the Council's web-site – look for submission 260.

Waipa DC has called for further submissions. Included as an attachment to this issue of InfoLine is a pro forma further submission to the proposed Waipa District Plan.

(If you want an original I can send it to you as a doc, odt or pdf file.) Alternatively you could look at the NZART web-site Antennas and Planning area (give me a couple of days to get it posted).

You can help by forwarding a further submission to the Council which could assist building the weight of argument to bear on the Council. Further submissions can be mailed or emailed to the Council. Mail and email address are shown on the pro forma submission, Submissions must reach Waipa DC by 5pm on Wednesday 7 November 2012. You need to enter your full name, address for service, and email address.

You don't have to use the proforma form, instead you may wish to enter your reasons for your submission in your own words. In that case you can get the form from the Waipa DC web-site which is www.waipadc.govt.nz, or send an email request to zl1bnb@nzart.org.nz

You also need to forward a copy of your submission in support to zl1bnb@clear.net.nz, do this as a cc if you email your submission to the Council. You don't need to sign a submission that you sent by email.

For any further information, please email me, Mike Newman,
zl1bnb@nzart.org.nz

Let's send a strong message to Waipa DC. Your submission will count.

Phasing out of International Reply Coupons

I have just received the following response from Royal Mail to my
enquiry
about the rumoured phasing out of IRCs

"Due to declining international mail volumes and electronic
substitution,
customer demand for International Reply Coupons has been falling
dramatically over the last few years. Overall sales of International
Reply
Coupons have been very low indeed - on average just 4 per annum bought
from
each Post Office branch. Therefore, it was no longer commercially
viable to
maintain the sale of coupons and Royal Mail has taken the decision to
withdraw them from sale.

International Reply Coupons have not been withdrawn globally from
sale.
Under UPU regulations Royal Mail through Post Office Counters is
obliged to
redeem International Reply Coupons presented having been purchased
overseas,
but we are not obliged to sell them. However, I can confirm that
customer
have up to December 2013 to redeem IRCs."

This seems to be much more in line with the Royal Mail's
responsibilities
under their UPU membership. Looks like they're safe until 31st
December
2013. It may be that the UPU will change their rules after that date
(which
would be no bad thing IMHO).

73 for now

FMTAG NOTES FOR HQ INFOLINE 260

Annual License Fees for Beacons Links and Repeaters

Most of the Licences fall due for renewal during November, which is
RSM's “Billing Month” for licences in the name of NZART.

Early in November, FMTAG will send Invoices, for $51.11 per licence, to the following Branches:

05 Christchurch 26
Nelson

28 Whangarei 34
South Canterbury

37 Southland 38
Taumarunui

48 Wanganui 49
Westland

51 Eastern Bay of Plenty 56
Christchurch West

67 Kawerau 78
Far North

82 Southern Wairarapa 84 Bay of
Islands

87 South Taranaki CARDS

Other Branches will receive their Invoices direct from RSM, by email, to the address registered in SMART.

Many of these Branches have an RSM “Billing Month” of November. However, the “Billing Month” of a particular licence can be confirmed by the following method. Go to:
http://www.rsm.govt.nz/smart-web/smart/page/-smart/WelcomePage.wdk

Click on “Search Licences”.

Enter the transmit frequency in the box “Frequency (From)”.

Click on the “Search” button.

All stations on that frequency will be displayed.

Click on the blue underlined number, at the left-hand-side of the screen, of the appropriate station.

The Licence will appear.

The line “Fees paid on” displays the “Billing Month” of the Licence.

Proposals

None this time.

Final recommendation to NZART Council

None this time.

NZART Council Approval

On the 2nd of October, NZART Council approved the following Final Recommendation, published as a Proposal in HQ InfoLine 258:

Branch 39 Tauranga. Frequency change of its 885 Repeater at Papamoa, located at TOPO50 BD37 894.73 184.87. The new repeater transmit frequency is 433.025 MHz and the receive frequency is 438.025 MHz.

Comments and applications

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website: http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

VHF-UHF-SHF-EHF CONTEST COMMITTEE REMINDER

Time is running out for submitting logs for the Microwave Contest, held on the 6th and 7th of October 2011. Please send all remaining logs by email to:

zl2wa@clear.net.nz, with Contest Log in the subject line.

The Next Contest

The next contest is the Field Day Contest, all bands 50 MHz and up, on Saturday the 1st and Sunday the 2nd of December 2012. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The contest after that is the DX Weekend Contest, all bands 50 MHz and up, on Saturday the 2nd and Sunday the 3rd of February 2013. The operating times are: Saturday 1700 to 2300 NZDST and Sunday 0700 to 1300 NZDST.

The Contest Rules are available at:

www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:

zl2wa@clear.net.nz with Contest Log in the subject line, or by post to:

Contest Manager

Wellington VHF Group

P.O. Box 12-259

Thorndon

Wellington

Please include your email address if you wish to receive the results as soon as they are available.

30 Meter Multi Mode Weekend

When: October 27th and 28th 2012

Where: 10 MHz - 30 Meter Band (10.100 – 10.150)

Objective: To promote experimenting and using different digital modes on the unique 30 Meter Band.

For a more detailed listing of this event go here:

http://www.30mdg.net/news.html

The 30 Meter Digital Group (30MDG) is celebrating….5 year Anniversary, 6,000 members (120DXCC), and our 30MDG Award Program issuing over 31,000 Award Certificates. 30MDG is FREE to join, FREE Awards program with FREE Award software – Ultimate 30 or U30).

GL and as always this is NOT a contest – no start or stop times, no exchanges, no logs to send to anyone, no winners or trophy – this IS to PROMOTE AWARENESS of the 30 METER BAND and the only winners are those that participate and have fun!

Don KB9UMT 30MDG#0001-Founder

And the 30MDG “Team”

http://www.30mdg.net

ZL9HR DX’Pedition Update

Fifteenth most wanted DXCC location entity – Campbell Island will soon drop down the charts as many, many Radio Hams work ZL9HR between November 28th. and December 9th. Campbell Island is at IOTA OC-037 600Km south of New Zealand in the Great Southern Ocean.

While the equipment makes its way down to New Zealand, I wanted to highlight some essential parts of the DX'Pedition organisation that are not always obvious.

DX'Pedition "Pilots".
The “pilots” are assigned, for Europe it's Col MM0NDX, For Australia & New Zealand it's Peter VK2NN, for Africa it's Andre V51B, for the Pacific region Stan KH6CG is doing the honours and last but not least we have Richard KY6R in Western USA.

For those who haven't come across Pilots before they act as a conduit between amateurs trying to contact the DX'Pedition and the DX'Pedition leaders. The Pilot doesn't play God - but is a faithful "technical support agent" whose boss is the leader of the DX'Pedition. The pilot may tell the DX'Pedition that he is receiving a lot of requests for a particular mode or band from a certain area of the world and if justified, the DX'Pedition may look at changing planned operations to

fit this need as much as they can. Pilots often have to put up with abuse from idiots. It's not an easy job! Pilots are volunteers and form another part of the DX'Pedition that is crucial to its success. All amateurs owe a vote of thanks to the pilots of this and all other DX'Peditions for the work they kindly perform. So if you communicate with a DX'Pedition pilot, show them some respect – remember they don't have to do this work!

Please refer to the web site ZL9HR.COM for the full, up to date, information about the major ZL9HR DX'Pedition to Campbell Island.

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Sept/October issue of Break-In-closes on 10 Nov 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body of the text. Please ensure that suitable descriptive captions/legends are included with your copy. All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.

Propagation Forecast Bulletin #42 de K7RA:

Posted: 19 Oct 2012 06:28 AM PDT
http://www.eham.net/articles/29174

Sunspot activity rose this week, with average daily sunspot numbers
up over 45 points to 97, and average daily solar flux rising over 24
points to 129.2. October 12-14 had high geomagnetic activity, with a
planetary A index at 12, 38 and 19, college A index (in Alaska) at
18, 70 and 33, and mid-latitude A index (measured in Virginia) at
12, 28 and 20. On October 13 solar wind spilled through a gap in our
Earth's magnetosphere, unsettling conditions here. Aurora was seen
across the northern tier states in the United States.

ARRL Media and Public Relations Manager Allen Pitts, W1AGP, Retires:

Posted: 19 Oct 2012 06:25 AM PDT
http://www.eham.net/articles/29167

After more than eight years as the ARRL Media and Public Relations Manager, Allen Pitts, W1AGP, has retired. During his tenure, Pitts was responsible for developing public relations campaigns that featured the many facets of the Amateur Radio Service: Hello Radio came first in 2006 and highlighted the fun and friendships of ham radio. It was followed by Emergency Radio, which built on the ARRL and the Amateur Radio Service's response during Hurricane Katrina. We Do That -- Radio in 2008 showed the technologies used in Amateur Radio. In 2011, the Do It Yourself (DIY) campaign was unveiled.

Attention Kit Builders -- The ARRL Wants to Hear from You!

Posted: 19 Oct 2012 06:23 AM PDT
http://www.eham.net/articles/29164

The ARRL wants to hear from kit builders about simple, useful, educational and exciting kits. These kits should have a high probability for success and would serve as stepping stones for more advanced projects.

Fire Department Trains for Phone Failure with Amateur Radio Operators:

Posted: 18 Oct 2012 03:35 PM PDT
http://www.eham.net/articles/29157

The training exercise, held Saturday in Troy, simulated a widespread telephone failure in the city. This past Saturday, the Troy Fire Department initiated a Simulated Emergency Test in conjunction with the Oakland County Amateur Radio Public Service Corps. The ARPSC is a group of trained volunteer amateur radio operators organized under the Oakland County Homeland Security Division, whose purpose is to assist in public service and emergency radio communications. ARPSC includes Amateur Radio Emergency Services (ARES), Radio Amateur Civil Emergency Services (RACES), and SKYWARN. The SET scenario was that of a telephone failure within the city, necessitating the assistance of the ARPSC. Amateur radio operators were positioned at each of Troy's six fire stations, ready to relay requests for municipal services from the public in the form of preformatted messages simulating various types of requests. Additionally, amateur radio operators were located at the Troy Fire Emergency Operations Center to receive those requests for service and relay them to the appropriate authorities.
